

The Mightiest Little Peasant Chapter 2580

Tang Hao felt extremely comfortable after he left the chaotic mainland.

The great void divine wheel was the ultimate treasure of the great void sect and was extremely powerful. If it was borrowed now, it would cut off the path for the great void sovereign to use this fairy weapon in the future.

Furthermore, if he took out the divine wheel, it would also damage the foundation of the middle world. This was a huge blow to the great void sect.

“I’ve borrowed the treasure, and it’s not a problem to circulate it. Next, it’s up to your pill!”

Supreme Xuan Hong said as he looked at Tang Hao.

“I’ll try my best!”

Tang Hao could only say that.

As soon as he returned to the temple, he went into the dimensional pocket to see the old silver Dragon.

He took out eight aperture opening pills and gave them to the silver Dragon.

The silver Dragon had just reached the great emperor realm and was only at the level of one aperture. As long as its cultivation rose, its body would grow. By the time it reached the level of nine apertures, it would probably double or triple in size and have more flesh.

The effect of the flesh and blood would be better.

“There! Take it!”

He threw the pill away and left in a hurry.

The old silver Dragon had a Special Hobby. He kept asking Lu Li to get a beautiful man, which made Lu Li speechless. Lu Li always felt that the way the old silver Dragon looked at him was not right. It was a little corny.

Three days later, an elder of the divine temple went to the lower realm and brought the great void divine wheel back.

“What a great treasure!”

Tang Hao’s eyes were burning with passion as he looked at the spirit wheel.

He had seen this divine wheel once, but that time, the great void sect master had brought millions of disciples to activate the divine wheel to kill him. This divine wheel had expanded to the size of a small star.

But now, this divine wheel was only the size of a disc.

Even he couldn't tell what material it was made of. It was extremely exquisite, and it was shrouded in a layer of dazzling crystal Light, making it look somewhat dreamy.

"It's indeed a good treasure!"

Supreme Xuan Hong exclaimed in admiration.

In the Holy region, there was only one celestial artifact that could control the passage of time.

Tang Hao held the spirit wheel and touched it over and over again. He was reluctant to part with it.

He would get his hands on such a good treasure sooner or later.

After a while, Supreme martial artist Xuan Hong took the divine wheel and said, "the treasure is good, but to activate it and control the time in the internal space, it requires an extremely large amount of energy. With my strength, I can barely control the time to 60 times."

"In other words, a year outside is equivalent to sixty years inside. If we throw in some spiritual essence, it can be increased by seventy times, eighty times ..."

"Sixty years isn't enough!" Tang Hao furrowed his brows.

Sixty years was definitely not enough to nurture a generation of geniuses.

Even if the Holy region had a lot of resources and those geniuses had outstanding qualifications, it would be difficult to cultivate them to the level of 7th tribulation or 8th tribulation in 60 years.

"Then two sixty-year-cycles will do. I'll find another Supreme martial artist, and that'll be enough. A hundred and twenty years is enough to cultivate a generation of geniuses!" Supreme Xuan Hong asked, "what about you? your pill ..."

"I've raised the silver Dragon to nine acupores, so I can collect more flesh and blood. In the next month, I think I can refine more than twelve thousand pills!" Tang Hao said.

"Alright!"

Supreme Xuan Hong slapped his thigh and his expression became excited.

Now that he had the pill and the celestial artifact, his plan would be complete.

"Let's begin! I'll immediately issue the order!"

Soon, in the Holy Palace, a holy temple token was sent out, shaking the entire Holy region.

When the great void divine wheel was activated, all pregnant venerable sovereigns and Supreme cultivation partners could enter. Once the child was born, they could enjoy the resources of the Holy Temple. In addition, outstanding young geniuses below the 8th tribulation of the Holy region were also qualified to enter the Holy Temple to cultivate.

The moment the Holy sanctum token was released, the entire world was in an uproar.

“The many child pill can make people pregnant. Now, activate the void divine wheel, take the person in and give birth. Then, nurture them inside and they will become adults immediately. It’s a one-stop service!”

“The divine temple’s move is amazing! “I heard that two Supreme martial artists are personally controlling the celestial artifact, and the time difference is 120 times. One year here is 120 years inside. This is awesome! One year is enough to produce a generation of geniuses. ”

“Yup! This move was awesome! In a few years, the number of geniuses in our Holy region will increase by several times, and all of them will be venerable sovereigns and descendants of Supreme sovereigns!”

All the cultivators in the Holy region were in heated discussion and were extremely excited.

The more powerful the sanctuary-realm was, the more at ease they would be.

“It’s all thanks to the pill ancestor of the sacred Hall! If he didn’t invent this unprecedented pill, today’s incident wouldn’t have happened!”

“That’s right! Perhaps this plan was even proposed by senior alchemy ancestor himself! He’s really a man of boundless virtue!”

When the cultivators thought of the ancestor of alchemy, their respect for him grew.

In the history of the Holy region, there had never been such a person who could change the situation of the entire Holy region and make the Holy region stronger with his own power. The merit of this person was really immeasurable.

“The alchemy ancestor is a deity who descended from the heavens. He’s here to revitalize our Holy region!”

“The pill ancestor is a great man!”

Quite a few people even worshipped him to the bones, publicizing the great achievements of the alchemy ancestor to the outside world every day.

“Hahaha! This is great, I don’t even have to raise my own children. A year later, I’ll have a group of children over a hundred years old. ”

Daoist yunyu was overjoyed when he heard about the Holy Temple token.

He had 3000 Dao companions, and all of them were pregnant. Many of them were pregnant with more than one child. Just raising this group of children was already troublesome enough. Now, the divine temple had helped him solve this problem.

“Let’s go! Hurry to the temple!”

He immediately prepared a Mobile Palace and brought his 3000 Dao companions to the sacred Palace.

In various places of the Holy region, many venerable sovereigns also brought their cultivation partners to the Holy Temple after seeing the token.

The divine temple’s plan was a great thing for them, so naturally, no one would reject it.

Many people even had the thought of continuing to live.

As long as she was pregnant, she would be able to Enter the Void divine wheel. A year later, she would be a genius with a cultivation level of around the 7th tribulation. This was a fatal temptation for any force.

As long as they had more children, they would be able to quickly strengthen their forces and become stronger.

At that moment, they also went to the divine temple even more actively to ask for pills.

When they obtained the pills, they distributed them.

Hence, a vigorous and vigorous birth movement began.

Not enough Dao companions?

This was simple. As venerable sovereigns, they never had to worry about finding a cultivation partner. There were many female cultivators in the cultivation world, no less than male cultivators. They all liked to find stronger people to rely on. If a venerable sovereign was willing to accept them, they would naturally be happy.

Therefore, in the Holy region and on the ground, for a time, there was news everywhere about who had a good relationship with which venerable sovereign and successfully got pregnant with one, two, three, or even four or five.

The competition between the Taoist sects was no longer about which family’s geniuses were more powerful, but about whose stomach was stronger and the number of fetuses.

For a time, the entire Holy region was bustling.
