

The Mightiest Little Peasant Chapter 2767

“Lady su!”

Tang Hao walked up and smiled at su Xuezi.

“Al! Do you have the confidence?”

Ye Siyao quickly walked up and asked anxiously.

“I’m already here. Do you think I’m confident?” Tang Hao laughed.

Ye Siyao’s long, shapely eyebrows furrowed slightly. Although this big cheater looked very confident, she was still a little uncertain. After all, this wasn’t an ordinary poison, and no one had ever cured it.

“Swish!”

Not far away, Zhao Yan laughed coldly.

The little Cold Peak disciples around him also had suspicious looks on their faces.

“How are you going to solve it?”

Venerable Red Cloud asked, “I’m afraid ordinary medicine won’t work!”

“That’s natural! So, I’m going to use needles!” Tang Hao said.

“A needle?”

Venerable Red Cloud was stunned.

Using needles to detoxify poison was the most primitive method of detoxification. Not only did it require a lot of needles, but it also required a lot of cultivation. Therefore, very few people used it now.

This person didn’t have any cultivation, so how could he use needles to detoxify the poison?

Where did he get the needles? could it be that he had used the three million crystals to buy needles?

However, three million was too little. More importantly, there were no needles for sale in clarity city!

In an instant, countless doubts rose in her heart.

“That’s right! I have a set of ancient needles on me. There are thousands of poisons in the world, but they can cure them. I used the three million to buy some spirit herbs to nourish these needles.” Tang Hao made up a story.

“Ancient magical needle?”

Venerable Red Cloud was shocked.

Then, she felt that it was ridiculous.

This person's boasting was too exaggerated. What did he mean by there's no poison in the world that can't be cured? how could there be such a treasure in the world!

This was simply impossible!

Moreover, even if this ancient strange needle was truly incomparably magical, how could he use it and detoxify the demon seed fetus poison without cultivation?

"Elder, let me try first!"

Tang Hao said with a smile.

"Alright!"

Venerable Red Cloud suppressed the doubts in his heart and nodded.

As long as he gave it a try, everything would be clear.

"Lady su, let's go in! Please forgive me if I offend you later!"

Tang Hao said as he looked at su Xuezi.

"It's fine!"

Su Xuezi shook her head, looking a little shy.

Naturally, she knew what was going to happen later. Since it was acupuncture treatment, some intimate contact was inevitable. She did not resist it, but she was a little shy and nervous.

Then, she turned around and walked into the cave.

Tang Hao followed him into the cave abode.

Buzzzzzz!

Behind him, the door of the cave abode closed.

In the cave, the lights flickered, and the entire place was dim and hazy.

The Jade figure in front of him stopped and stood there with her back facing him. From this angle, her figure was tall and slender, full and graceful, showing the perfect curve, particularly attractive, and he was stunned.

Although she wasn't as popular as ye Siyao, she was just a little worse. Her figure was more well-proportioned and her proportions were more perfect. It was as if she was one with nature, and there was nothing to pick on.

"Lady su, you don't have to be nervous. It'll be done soon!"

Tang Hao quickly composed himself and smiled.

"Mm! Then I'll be counting on young master Tang!"

She responded in a low voice, her tone was unusually shy.

After she lay down, Tang Hao took out the needles and began to apply them.

With a light stab, the sharp silver needle pierced through his skin and into his flesh.

With a thought, he released the celestial core power he had stored in the needle. In an instant, the silver needle shone brightly, emitting a dazzling divine light. Powerful vitality was transformed in the silver needle and then surged out.

Under the guidance of his mind, the life force rushed to the corpse poison and began to drive it out, surround it, and then absorb it into the silver needle.

Soon, the silver needle turned black.

Then, Tang Hao took out the second needle and inserted it.

After a while, the silver needle also turned black.

Then the third, the fourth ... A total of 72 silver needles pierced down, covering his entire body.

The silver needles turned black one after another.

He waited for a while, then took out a Jade bottle and began to pull out the silver needles one by one. He then released the corpse poison inside and stored them in the Jade bottle.

"How is it?"

Sensing that all the silver needles had left her body, she closed her eyes tightly and said in a trembling voice, her tone extremely nervous.

"It's not over yet, I need to do it again!"

Tang Hao said.

This poison was a little more than he had expected. One round was obviously not enough, and he had to repeat it again.

Two rounds of acupuncture was enough to completely remove the poison in his body.

Then, he performed acupuncture again.

This time, not only did he cleanse the poison, he also released his life force to nourish her flesh.

The poison had been in her body for too long and had already damaged her blood, flesh, and meridians. She needed to be nourished and transformed.

Lady SU's comprehension is not bad, but her physique is a little too ordinary. She doesn't have the potential to become a saint, so she's still a little lacking." Tang Hao twirled the silver needle as he pondered.

Lady SU's talent could be considered top-tier in the great fate sect. She had astonishing comprehension and a Dao body.

However, Tang Hao's eyes were sharp, and such talent was nothing out of the ordinary in his eyes.

"Why don't you ... Try my blood?"

Suddenly, Tang Hao's heart skipped a beat.

After he had refined this perfect body, he had studied his own flesh and blood and discovered that it was different from those of the human race's sovereigns. The Qi, blood, and life force contained in his flesh and blood far exceeded that of those ancient beasts.

Even the silver God's flesh and blood might not be as strong as his.

But at that time, he was busy preparing for battle, so he didn't study it carefully.

Now, he might be able to use this opportunity to give it a try.

His blood and vitality were strong and contained amazing spiritual essence. It would not cause any harm to people. On the contrary, it could greatly strengthen the flesh and blood. Perhaps it could even bring some magical changes, which was also a good thing for lady su.

After a moment's thought, he released a drop of blood from a crack in his arm. It followed the silver needle and entered her body.

Soon, her delicate body trembled and started to tremble.

"What's wrong? How do you feel?" Tang Hao asked.

"It's very hot, I feel like my whole body is burning!"

Su Xuezi said softly.

At this moment, she found it a little unbelievable.

She had only felt this way when her physical body underwent Nirvana and transformation. Young master Tang had only applied a few needles. How could it cause such a change?

She really wanted to use her divine sense to check it out, but she was afraid it would affect the treatment, so she could only endure it.

“It’s fine, I’ll be fine soon!”

Tang Hao released a few more drops of blood. They flowed through the silver needles and fused into her flesh.

At the same time, the last bit of poison in her body was also sucked away by the silver needle, and it was all gone.

“Alright, I’m done!”

After a while, Tang Hao put all the needles back into the box. He stood up and breathed a long sigh of relief.
