

The Mightiest Little Peasant Chapter 2971

Somewhere in the starry sky, a figure tore open the void and drilled out.

He looked around and heaved a sigh of relief.

No one was chasing after them, so they were safe for the time being.

Then, he smiled in joy.

This time, the harvest was not small.

A ten thousand laws divine mountain and an immortal Emperor's Supreme treasure. This trip was worth it, not to mention that there were so many cultivators, those genuine Immortals, and the treasures on the bodies of the ninth tribulation cultivators. He had already taken more than ten immortal artifacts.

"I'm rich!"

He took out a pile of rings and lined them up in front of him. He was grinning from ear to ear.

There must be many good treasures in these rings!

"Woof! Another celestial artifact!"

"What a huge immortal material!"

He first looked at the true immortal rings. There were seven in total, and each ring was filled with countless treasures. There was no need to mention divine materials. He even found some immortal materials in a few rings.

"What is this? The currency of the immortal world!"

Among the seven rings, he found a type of golden crystal. The style and size were the same.

"Only a little over a thousand."

He counted and found that the seven true immortals only had a little more than 1000 Yuan.

Clearly, even in the immortal world, this thing was quite hard to earn.

"There's still one in the furnace. I wonder how many there are."

He thought of the true immortal that was suppressed in the divine furnace.

He took out the divine furnace and estimated that it would take at least a month to refine this guy to death.

“After refining this guy, I can ascend.”

He muttered to himself after some thought.

Originally, he wasn't in a hurry to ascend at all. But now, the situation was clearly different.

He had seized the ten thousand laws divine mountain and exposed the great void divine furnace. When those genuine Immortals returned, the news would definitely spread in the immortal world. When he ascended again, he would be targeted by others, which would be very dangerous.

Therefore, he had to ascend as soon as possible.

After rummaging through the other rings, he collected all the treasures and put them into his own clear sky ring, then let his split souls sort them out.

He took out his Star Shuttle and returned to the origin immortal domain as quickly as possible.

It was already one and a half months later when she returned to the Ji family.

The true immortal in the furnace had been refined to death by him, and all his cultivation and treasures had been taken by him.

At this moment, his Dao attainment had reached more than 7000, which was the standard of late-stage human immortal.

As long as he knocked open the gate of immortality, he would be able to advance to the advanced-stage human immortal realm immediately.

“Let's go back to Pangu first!”

He still had some preparations to make before he ascended.

After all, he didn't know when he would be able to come back again if he went up.

He returned to the training hall and made some arrangements. Then, he took out all the unnecessary things from his ring and placed them in the training hall's treasure vault.

He also took out a few immortal materials and a few hundred Dao attainment points, placing them in the Treasury.

The most important thing was the spiritual void realm. He had left behind two true spirits to guard it.

“It's time to go!”

After bidding farewell to everyone, he returned to the Ji family and told Ji juechen that he was about to ascend.

“Congratulations, divine ancestor!”

Ji juechen first offered his congratulations. After a moment of hesitation, he asked, "divine ancestor, do you want to bring ru Yin up?"

He knew ru Yin's thoughts and naturally hoped that she would follow this person up.

"I don't think so!"

Tang Hao shook his head.

This time, he didn't know what the situation would be like. There were too many experts in the immortal world and it was too dangerous. He had just ascended and might have problems protecting himself. Naturally, he didn't want to bring too many people up.

As for Pangu, he didn't bring anyone. He was only going to bring Chun Xuan and Qiu Ci.

"She'll stay in the lower realm for the time being and guard your Ji family! After a few years, she will ascend again. By then, I will have a firm foothold in the immortal world!" Tang Hao said.

"That's good too!"

Ji juechen nodded.

This was indeed the safest way.

He went to see Ji Ruyin one more time, then left the Ji family with the two girls, chunxuan and Qiu Ci.

He had arrived at the Forbidden Zone of the starry sky.

He didn't want too many people to know about his Ascension.

"You guys back off!"

Tang Hao jumped out of the star Shuttle and waved at the two girls.

"Yes, young master!"

The two girls responded respectfully, both somewhat excited.

It wouldn't be long before they could ascend to the immortal world. This was something they didn't even dare to think about before.

After they had retreated far away, Tang Hao took a deep breath. His body trembled, and with a loud boom, he released his aura without reservation. It turned into a pillar of light that shot into the sky.

After about 15 minutes, there was a strange movement in the void above, and a beam of light shone down.

“Swish!”

The starry sky in all directions suddenly trembled. An extremely ancient and majestic aura spread out in all directions with this beam of light as the center. It quickly left the Forbidden Zone of the starry sky and spread to the stars in all directions.

“What is this aura?”

“It’s the might of the heavenly Dao! A gate of immortality had descended! Someone is about to knock on the gate of immortality!”

The stars were in an uproar.

They were all excited. Someone from the origin immortal realm was about to become an immortal and ascend to the higher world.

“Who is it?”

They were even more curious and started discussing.

The Forbidden Zone’s starry sky grew larger and larger under the light. Tang Hao looked up, but he could not see anything.

A moment later, he could vaguely see a gate as white as white jade. It was a thousand feet above him and it was shining with a shocking brilliance. The light was so bright that it seemed to be able to illuminate the heavens.

On this gate, he felt an incomparably intense pressure of the heavenly Dao.

“Is this the gate of heaven?”

He mumbled.

He wasn’t there when horizon and the others broke through, so he didn’t see the gate of heaven.

He flew up with a relaxed expression.

Eight or nine Dao attainment was enough to knock open this gate of immortality, not to mention that he now had seven thousand Dao attainment, which made it even easier.

A moment later, he came to the door, took a light breath, and pressed his hand on the door.

He slowly exerted his strength and pushed forward.

BOOM!

The door in front of him trembled and made a loud rumbling sound. He slowly pushed it open.

From the crack, a shocking divine light bloomed.

“This ... Why does it look a little like the ancient tai Chu Qi?” Tang Hao was surprised when he sensed it.

Waves of ancient aura gushed out of the door, crashed into his body, and was absorbed by his body.

These auras were somewhat similar to the ancient tai Chu Qi that he had obtained before, but they were also slightly different.

“It can even be strengthened ...”

He could feel that after the aura entered his body, it was perfectly integrated into his physical body and continued to strengthen it.

When he pushed the door open completely, the aura surged in with a monstrous momentum and drilled into his body. There was also a surge of the purest heaven and earth Qi that entered his dantian.

His divine soul, sea of the path, immortal abode, and physical body were all undergoing drastic changes and being strengthened continuously.

When one reached the ninth tribulation, he would have the body of a half-immortal. Now that he had knocked open the gate of immortality and transformed again, he would truly leave his mortal body and enter the immortal realm!
