

The Mightiest Little Peasant Chapter 2978

“You’re unlucky to have met me!”

Tang Hao put away the divine furnace and snorted.

This old man wanted to deceive him with his schemes?

How naive!

He had seen and killed many of these sinister old monsters.

“I should be able to completely refine it in seven or eight days!”

He made a rough estimation.

It took him more than a month to refine the immortal before. Now that he had entered the immortal realm and his cultivation was higher, refining it was much easier.

“I only need to take 3000 out of my 4500 Dao attainment points. I’ll give the remaining 1500 to the sisters!”

“I don’t have any good treasures! He’s quite poor!”

Tang Hao took out the old freak’s ring and opened it. He pursed his lips.

There were only two ordinary immortal artifacts and not a single immortal material. However, there were a lot of immortal crystals, more than 3000 in total.

“Let’s go!”

He broke the formation in the cave and took the formation disk. Then, he left the cave and returned to Yuan yang city.

He had been staying in the cave dwelling and activating the divine furnace to speed up the refinement of the old Daoist green pine.

Six days later, the old Daoist was finally refined to death.

He waved his hand, and more than 4500 round Dao beads gushed out like a tide. He opened his mouth and swallowed them into his stomach.

“Just nice!”

After a while, he stopped. The number of Dao in his body had just reached 10001. He could be considered an earth immortal!

“I’ll save these for now. I’ll give them to the two girls after they’ve advanced!”

Tang Hao took out a Jade bottle and stored the rest of his cultivation.

“You’ve only been here for a few days and you’ve already become an earth immortal. That’s really fast!”

He chuckled and was a little happy.

He had only been here for 11 days and his cultivation had advanced from the late-stage human immortal to the earth immortal realm. This speed was fast.

“How should I improve it next?”

Then, he began to ponder.

This time, he was lucky to have met an old monster who wanted to harm him and was able to kill him. This kind of luck was not often seen.

Moreover, he had taken a certain risk in killing this old monster. If this old monster had some extremely powerful means to escape, he would be exposed and attract the attention of the big shots of the immortal world, such as the perfected golden immortal.

He didn’t want something like this to happen again.

“I can’t take the risk, so I can only make money. I’ll make a lot of money and buy Dao attainment!”

“I’ll have to think about how to earn money. Plant medicine or refine pills? Forging?”

Tang Hao spent the next few days thinking about how to earn money.

He even went to the city to inspect the various businesses.

Every profession seemed to have a way to make money, but he was not very satisfied with the speed at which he made money.

For example, immortal pills were not easy to refine. It would take a long time to refine a furnace of them.

“How about ... I get a bit of each. When my name is known, I’ll naturally earn money much faster!”

Tang Hao pondered.

After making up his mind, he took the two sisters and left the place.

This place was still too close to the immortal court, and he didn’t want to stay here.

“Let’s go to the spirit Toad continent!”

Tang Hao sat cross-legged on the crane. He took out a map and looked at it. His gaze fell on the spirit Toad continent next to the heaven spirit continent.

The spirittoad continent was vast and had a complicated terrain. Even the structure of its forces was extremely complicated. There were many itinerant cultivator organizations that were most suitable for him.

It was different from the lower realm. In the immortal world, there were many itinerant cultivator organizations. Grotto-heavens and blessed lands were actually itinerant cultivator organizations. A group of itinerant Immortals gathered together, occupied a place, and looked after each other.

Some itinerant cultivator organizations were very large and could have thousands or even tens of thousands of Immortals.

As for the smaller ones, most of them had dozens of Immortals.

“Let’s go to the teleportation formation first!”

He didn’t fly directly to the spirit Toad continent, which was too far and would take more than half a month. Moreover, these continents weren’t connected, but were pieced together by many continents. The terrain at the edge was very dangerous.

Therefore, in every continent, there were some teleportation arrays that could be used to teleport between different continents, which was much more convenient.

A day later, he arrived at a teleportation array, which was built in an Immortal City.

“You want to go to the spirit Toad continent? One hundred!”

He entered the teleportation Hall and asked around. Tang Hao was shocked.

The fee was indeed a little expensive.

“First time here, right? This is the price. If you go to a place further away, it will be more expensive. The further it is, the more expensive it will be. The price will rise even more.”

The person in charge of the teleportation formation was also wearing the clothes of the immortal court.

He sized Tang Hao up with a disdainful expression.

Look at this guy, his aura is not weak. He must be at least an earth level deity. How can he be such a country bumpkin who has never even used a teleportation array?

“Alright! Then 100 yuan!”

Tang Hao said through gritted teeth.

It would take him more than half a month to fly there by himself. It was too time-consuming. Previously, in the lower realm's starry sky, he had spent most of his time on the road. Now that he had a teleportation array to save time, it was naturally a good thing.

As for money, he had over 4000 immortal crystals on him, so it didn't matter if he spent 100.

"Which city of the spirit Toad state are you going to?"

The man took the money and walked to a high platform in the middle of the hall. He turned and asked.

"Silver wall city!"

Tang Hao said.

This silver wall city was located in the southeast of the spirit Toad continent. It was in a remote location and was more suitable for him. He planned to join an itinerant cultivator organization there, occupy a mountain, settle down, and earn money.

"Alright, I'm done!"

The man took out a jade talisman and manipulated it. The high platform trembled and a bright divine light burst out.

Soon, a circular void gate appeared.

Tang Hao walked through the door and appeared in another Hall. He looked at the stone tablet beside him. It had the words 'spirit Toad continent, silver wall city' written on it.

As its name suggested, silverwall city was completely silver.

Tang Hao stepped out of the teleportation Hall and saw the dazzling silver walls.

"You guys should also shop around!"

He called out the two girls, Chun Xuan and Qiu Ci.

Previously, in Yuan yang city, he had let the two girls stay in the cave dwelling and did not let them show their faces in public. Now that they were in the spirit Toad continent, it did not matter.

The two sisters were a little excited. They walked along the street and looked around curiously.

Tang Hao followed behind them and looked at the shops one by one.

"The things they are selling are similar. However, there are more beast materials and plants than primordial yang. It seems that the spirit Toad tribe has more mountains and continents, so these two resources are more abundant."

"I'll go ask around later. I'll see which organization is more reliable and then ask."

Tang Hao muttered to himself as he walked.

At this time, on the other side of the street, a group of people was walking over. They were all wearing five-colored immortal robes and all of them looked young. They had horns on their heads and some of them had lightning in their eyes while others had three eyes. All of them had strange phenomena.

On their waists hung a piece of Jade. On the Jade, there were two ancient characters, "Shen Miao".

As they walked, everyone around them looked at them with respect and avoided them. It was enough to show that they had extraordinary origins.
