

The Mightiest Little Peasant Chapter 3132

Even Tang Hao was shocked.

A Divine Tree that could speed up the growth of the Golden Flower was simply too heaven-defying!

This was the first time he had heard of a treasure that could speed up the growth of the Golden Flower!

He took a light breath, and his eyes became fiery as he looked at the divine Tree.

The current him was in urgent need of such a treasure!

How good would it be if he could snatch it and plant it in his own medicine garden!

He said to himself.

But after some thought, he shook his head.

This idea wasn't very realistic. Even if he had the ability, he couldn't do this because he would offend a Celestial King expert. The gains didn't make up for the losses.

"It's best if we can cut off the next section and see if we can plant it ourselves!"

He pondered.

Of course, it was very difficult to do so because this Divine Tree was different from all the plants he had grown before. It was a connate Spirit Tree, and the first one born when the immortal world was established.

Whether they could cut a section off, whether they could be planted, and whether they would have the effect of accelerating the growth of the Golden Flower after they were planted were all unknown.

"It seems that I have to find an opportunity to go in and take a look!"

He looked around for a while longer before he retracted his gaze and followed the crowd to the Great Hall on the mountainside of the main peak.

There were already two groups of people waiting here. They were clearly the people from the other two groups.

The three groups added up to a thousand people.

What followed was a rather grand entrance ceremony.

Tang Hao followed the crowd and went through all the procedures. He finally entered the door and received a standard immortal robe, an identity token, and a key to the cave abode.

"Yellow rank command token, d rank cave!"

Tang Hao took the token and key. He glanced at them and shook his head.

Whether it was yellow or D, they were both the lowest level.

In the Thearch puppet sect, the disciples were divided into four ranks, according to heaven, earth, black, and yellow. Yellow rank was the lowest, and the treatment was also the worst. Each month, they could only receive ten Dao attainment pills.

The higher the level, the more Dao attainment and immortal crystals one would receive.

The cave abodes were divided into a, B, C, and D, which corresponded to the four levels of disciples.

The higher the level of the immortal's cave, the more magnificent it was and the higher the density of the immortal Qi inside. For example, his cave dwelling d was the worst and smallest.

"Hahaha! He deserved it! Who told you to provoke the elder!"

At the side, many people looked over and immediately let out gloating laughter.

The classification of status was naturally related to the performance in the test, and this guy actually slept during the test and even angered the elder. He deserved to be classified as the worst.

"This guy! It's over! There's no hope of rising up in the Emperor puppet sect!"

"Hurry up and stay away from him!"

They sneered and walked away.

Tang Hao glanced at them. He did not mind. The fewer people there were, the quieter he would be.

"I'll first look for a cave abode and set it up. Then, I'll take a look at the treasure vault. Finally, I'll find an opportunity to explore the primordial divine wood and see if I can get a branch!"

Tang Hao left the hall and headed toward the cave abode area.

Along the way, he did some calculations and came up with a clear plan.

The last one was especially important. If he could succeed, his cultivation would improve by leaps and bounds.

"Not bad!"

Arriving at the cave dwelling area, he quickly found his own cave dwelling. After entering, he closed the door and called out Chun Xuan and the others to help him set it up.

After he was done, he went out and went straight to the treasure vault.

“Of course, there are many connate spirit items. There are at least fifty or sixty in the treasure vault. But don’t even think about it. You’re only a human immortal. You have to wait until the peak of heaven immortal before you’re qualified to exchange for them.”

“The exchange price is also extremely expensive. You have to complete hundreds of missions for the sect before you can exchange for one.”

He went to the Treasury and asked someone about the connate spirit items.

“Fifty or sixty?”

Tang Hao was speechless when he heard that.

Although Emperor puppet sect had never produced a zenith heaven immortal, they had many golden Immortals, even more than the original beginning sect.

After cultivating so many gold Immortals, the sect’s Treasury still had so many connate spirit items. It was truly astonishing!

“Only those at the peak of the heaven immortal realm can exchange for it. This is a little troublesome!”

Then, he furrowed his brows, feeling that this was a little tricky.

The cultivation base he was showing now was only 6000 Dao attainment, which was more than 90000 Dao attainment away from the peak of heaven immortal.

“There’s no rush, we’ll think of a way in the future!”

He didn’t dwell on it, since it wasn’t urgent.

He then inquired about the other treasures in the treasure vault, and his heart was a little excited.

There were all kinds of treasures in the Treasury, especially immortal materials, which dazzled his eyes. There were also many pills and Immortal Weapons of extremely high grades. There were even Immortal King-grade Dharma Treasures.

“It seems like it was all thrown in by that Immortal King.”

Apart from the immortal King Almighty, the Thearch puppet sect was actually not very strong. This was because they did not even have a single zenith heaven, only a group of golden Immortals. With the abilities of these golden Immortals, how could they obtain so many top-notch treasures?

“This is a really good place!”

Tang Hao could not help but sigh when he came out of the treasure vault.

Not only were there many treasures in this place, but there was also a missing Celestial King as a backer. It was really a good place to hide one’s identity.

“Next, I’ll go and explore that Divine Tree!”

He found a remote place and checked around. After making sure that there was no one around, he took out his gold fighting robe and put it on.

Then, he went straight to the medicine Mountain.

The primordial divine wood was at the peak of the medicine peak.

“There’s actually no one guarding it!”

When he was near the pharmacy division’s Mountain peak, he made some inquiries and found that there was no one guarding the mountain peak. There were only a few layers of arrays covering it.

Clearly, the people of the Emperor puppet sect had never thought that someone would dare to have ideas about the primordial divine wood.

He was probably the first in history!

“It’s just a bewildering array, a defensive array, and a killing array. There’s no problem!”

When he arrived at the peak, he first circled around and carefully examined these formations. After confirming the types and grades, he was relieved.

He had broken through many formations and had never failed before. Even the three formations in front of him could not stop him.

He put on his golden fighting robe and walked into the formation.

Without any obstacles or triggering any major arrays, he walked in smoothly.

“What a dense Taoist connotation!”

As soon as he entered the array, he could feel the shocking Taoist connotation in this space.

No wonder that elder said that this Divine Tree could speed up the growth of the Golden Flower. It seemed that his words were not false.

Step by step, he carefully walked forward and arrived under the tree.

After staring at the divine Tree for a while, his expression changed slightly.

He could tell that the material of this Divine Tree was not ordinary. It was probably abnormally hard and would be very difficult to cut down with a sharp weapon.

He reached out his hand and pinched a branch through the Golden fighting robe. His heart couldn’t help but skip a beat.

His guess was right. The wood was extremely hard. He wouldn't be able to cut it off with all the sharp weapons he had.
