

## Chapter 367

Sylvia, who was uncomfortable and worried about Henry, heard his words and laughed. "If your wife was ugly, you would be happy when others wouldn't look at her."

"Of course not." Henry put his arms around Sylvia's thin waist. "I think my wife should only show her beauty to me."

Henry's gesture of holding her waist made Sylvia subconsciously dodge it, but soon she calmed down and let Henry's big hand hold her waist. She glanced at him and said, "Indecent!"

As if he didn't hear Sylvia's words, Henry's hand on the woman's waist silently enjoyed the softness.

"President Lin, you're here."

Henry saw that the secretary, Cathy Lee, was also standing in front of the door of Glory Hotel.

Cathy came over and greeted Henry.

Sylvia looked at the door of the hotel and asked, "What's going on?"

"The situation is not optimistic. Originally, according to our sources, this time, the powerful competitor was only Chows Group, but..." Cathy subconsciously glanced at Henry at this time and continued, "But the QZ group is also here. It's brought by Bing Ke."

Bing Ke was the person who Henry saw when he came back from the Su Family. When he saw the person who confessed his love to Sylvia in front of the company, Henry destroyed the heart-shaped roses that Bing Ke prepare.

"Why did he come?" Sylvia frowned.

The QZ Group was not comparable to Lin's in terms of financial resources, but the other party's connections were stronger than that of the Lin's. If QZ also wanted to intervene in this matter, it would make Lin's very uncomfortable.

"President Lin, according to the rumours, QZ came here to make trouble. It seems that it's because of what happened last time," Cathy said, glancing at Henry again.

Henry showed a look of indifference from the beginning to the end. In his eyes, no matter who he was, he was just a clown.

Sylvia frowned and said, "Let's go in first."

Cathy nodded and led the way for Sylvia.

The three of them went all the way to the banquet hall on the top floor of Glory Hotel. It could be seen that there were already a lot of people in the banquet hall. Many people were standing in groups of

three or five, chatting.

Many people knew that they had no chance in this project. If they came here, they would only make more friends. There were only a few people who really had the ability to compete.

Danny Chow, the young master of the Chow's, stood in the banquet hall, surrounded by a lot of people, men and women.

The appearance of Zhao's Group made Chows' company, who ranked second in Yinzhou City, rank third, but this did not affect Chows' influence in Yinzhou at all. After all, in many people's eyes, there was no difference between the second and third. They all needed to be looked up to by themselves.

The person in charge of the Zhao family, whose name was Owen Zhao, was also a young man. Although the Zhao family had

just risen up in Yinzhou, there were too many people who wanted to make friends with the Zhao family. Some people even privately said that in one or two years, the leading enterprise in Yinzhou might not be the Family Lin.

Originally, because of Danny Chow and Owen Zhao, the situation in the banquet hall was a competition between the two of them. The arrival of Sylvia directly changed the situation into a three-legged one. Many people came up and greeted Sylvia.

Sylvia had seen too many of this kind of scenes, so she had already been able to cope with them easily. She smiled and responded to everyone.

Henry walked to the side of the banquet hall, sat leisurely on a sofa, and picked up some pastries to eat.

While eating, Henry looked at the people in the banquet hall and listened to the

soothing music in the banquet hall. After forty minutes, Henry saw Sylvia walking toward him wearily.

Henry had experienced such a scene before, so he knew that she was tired of it.

"Dear, have you finished chatting?" Henry got up from the sofa, let Sylvia sit down, and then massaged Sylvia's shoulders.

Sylvia nodded.

"Honey, what kind of project are you doing this time? Why are there so many posters about technology here?" Henry pouted his lips at a poster in front of him. There was a spaceship drawn on the poster.

"It is a project supported by the government. Yinzhou been developing rapidly recently. As the capital city of Ning province, Yinzhou is behind in science and technology. This time, it is mainly to develop a large-scale technical centre in

the suburbs, and then build an experimental automatic residential area around it. Whether it is the construction of the centre or the experimental residential area, it is a good business, which is steadily profitable." Sylvia explained to Henry.

Henry nodded thoughtfully and asked, "What are you looking at this bid?"

"It's hard to say." Sylvia smiled bitterly. "It's hard to say who can win the bid this time. Even the authorities are not sure. It all depends on the experts. This time, they say that they are experts from the capital. If we can give them the greatest support, they will cooperate with us. This is the time to test the financial resources of each family. Of course, it depends on the expert's mood."

Henry nodded. "Understood."

If it was another bid, Henry could give

Sylvia an idea. But if it depended on the individual's mood, Henry could do nothing, unless he called Future. With the influence of Future, if she was willing to help the officials with the construction, it was estimated that the officials would cry with excitement.

Henry looked around and asked, "Honey, where is the expert?"

"I don't know." Sylvia shook her head. "We haven't even seen the expert. I only heard that the expert likes to play. This party is specially prepared for the expert."

"Likes to play?" Henry guessed that this was probably another person with outstanding abilities. Otherwise, who would give in to this expert's character?

Henry patted his chest and said, "Honey, when the bidding comes, we'll spend money on it. I'll invest it for you!"

"Your money is your money. I have the ability to make money. Why should I use your money?" Sylvia refused.

"Er..." Henry touched his nose. Sure enough, his wife was still strong.

Henry didn't mention this topic. He gave Sylvia a piece of cake and they sat down to chat.

"Oh, isn't this Sylvia? Are you also here to bid?" Bing Ke came over from the side with a group of people. Beside Bing, there was a beautiful woman dressed in gorgeous clothes. Judging from Bing's appearance and tone, it was obvious that he was looking for trouble.

Sylvia smiled and said, "If Bing Ke can attend this event, I don't see why my Lins Group should not be here, right?"

Bing nodded and said, "Lins Group isn't bad, but..."

Bing paused deliberately and looked at Henry. "Some people have made me very angry. This time, I'm afraid that Lins will need a lot of luck today."

After Bing said that, he glanced at the beautiful woman next to him. The woman understood and stepped forward. She looked at Sylvia and said, "You are Sylvia Lin, just so so!"

## Chapter 368

The woman next to Bin came up and directly aimed at Sylvia. It seemed that Bing wanted to get revenge for the last time.

Sylvia glanced at the beauty and frowned slightly. She asked confusedly, "Who are you? Do I know you?"

When the woman heard Sylvia's words, her face suddenly changed.

"Haha, let me introduce her to you. This is Jodie Cheng." Bing said with a smile, with a strong sense of pride on his face.

Jodie held her hands in front of her chest. The Cheng family was absolutely in a high position in the whole Ning province. The three disciples of the old Master Cheng were the top leaders of the three major forces in Ning province. Although Will Ning

had fallen off the throne, this did not hinder the influence of the Cheng family at all.

Sylvia shook her head. "I haven't met her. I don't know."

Bing opened his mouth again. "Jodie just returned from studying abroad in the United States. It's normal that you haven't seen her."

Jodie looked sideways at Sylvia and said, "I've always heard that Sylvia Lin of the Family Lin is so great and excellent. Now it seems that she's just so-so. Yinzhou is too small. No capable person can compare with us in the United States. Look at you. Your clothes seem to be so expensive, but it looks like you're a nouveau riche."

In the face of Jodie's sarcasm, Sylvia acted as if she didn't hear it.

"Jodie Cheng, right?" Henry clenched his

right fist and waved his left hand. "Come here, I'll show you a treasure."

Sylvia pulled Henry's sleeve and said, "Honey, forget it. Don't make trouble."

Sylvia knew Henry's character. She knew that he was going to do something to her, so she stopped him in a hurry.

Henry nodded, looked at Jodie with warning eyes, and loosened his fist.

Jodie looked at Henry again and said, "Are you the son-in-law of the Family Lin? Are you a burden to the Family Lin? No wonder you are so anxious to show your loyalty in front of the Family Lin. In the end, you are just a servant!"

Henry looked at Jodie and shook his head. She was definitely an idiot. How could she be so proud of being used by others like this?

When Jodie saw that Henry and Sylvia

ignored her, she certainly would not let it go. She kept looking at Sylvia, trying to find some reason to provoke.

Today, Sylvia was wearing a decent black dress with infinite charm. Her hair was tied up, shining brightly, and her whole body was perfect. If we had to say that there was a flaw, it was the ring on Sylvia's ring finger.

The silver ring, like an aluminium circle, destroyed the overall beauty. This ring was a gift from Henry to Sylvia.

Jodie naturally fixed her eyes on the ring on Sylvia's hand.

"Hey, is this your wedding ring? It's so unique. Which factory gave you their raw materials?" Jodie covered her mouth and smiled. In the process of covering her mouth, she deliberately showed the ten-carat diamond ring on her right index finger.

This 10-carat diamond ring, under the light, was extremely dazzling, emitting multi-coloured brilliance.

"Oh, I'm so sorry." Jodie deliberately revealed the ring on her hand for a while, and then quickly put it away. "This ring was given to me by Bing. If it hurts you, it's my fault. I apologize to you."

Bing, standing aside, sneered and said loudly, "Henry, is this the wedding ring you gave to Sylvia? It really fits your identity as a real son-in-law. I'm afraid that it cost a lot of money for this type of silver."

As soon as Bing's voice fell, all the people he brought burst into laughter.

"The president of Lins Group wears a simple aluminum ring as her wedding ring. Hahaha, I guess that you are secretly laughed at by others."

"It's too funny. Look, this is the result of

finding a son-in-law."

"If I were to be someone's son-in-law, I would be too embarrassed to give this thing. You say how stingy this person is. The son-in-law that Lin's family hired also has a high monthly salary, right? Can't he buy a real gold if he can't afford that 10-carat ring?"

A burst of laughter attracted a lot of people's attention.

Owen Zhao, the head of Zhao's Group, came over and said, "An aluminium ring as a wedding ring? I'll have a good look at such an interesting thing. As a leading enterprise in Yinzhou, Lins Group is really extraordinary. President Lin, your husband can't afford a better ring. Why don't I buy you one for him? One million or ten million? Tell me."

As soon as Owen's voice fell, the people he brought with him also burst into laughter.

"Yes, President Zhao, buy her a ring. Do you want to have a midnight snack with President Zhao?"

Soon, the noise here attracted a lot of people's attention, and all the people in the banquet hall came over.

The wedding ring on Sylvia's right hand suddenly became a topic of discussion.

After all, the total assets of Lin's company had already passed ten billion. As president, Sylvia should not wear such a cheap thing even if it was a piece of ordinary jewellery, let alone a wedding ring.

Many people felt sorry for Sylvia. At the same time, they also felt sorry for Henry. Even if he was the son-in-law of the Family Lin, the Family Lin treated him well. Sylvia always took him wherever she went. If it were them, he would not only marry the president of the Family Lin, but also a woman of no status. With Sylvia's beauty,

he had to take care of her all the time.

Compared with Henry, Bing was so excellent that he bought a ring of more than three million yuan just after pursuing Jodie Cheng. Jodie didn't like it at all but she still put it on her index finger. She really didn't understand how Henry had the courage to give an aluminium ring.

Sylvia and Henry were sitting in the crowd, being pointed at by others. This feeling made Sylvia particularly uncomfortable. She never cared whether the ring Henry gave her was expensive or cheap. She liked it as long as it was given to her by Henry.

Sylvia also had a wedding ring. At that time, Nelson Lin had prepared it. Although it was not as exaggerated as ten carats, it was not as small as three carats. However, Sylvia never took it with her, because in her heart, the wedding ring had to be

meaningful. If there was no so-called meaning, diamonds were not as valuable as gold.

"Honey, let's go." Sylvia held Henry's hand generously. Even if today's bid hadn't been auctioned yet, she didn't care. It didn't matter. The key was that she didn't want to see Henry become the target of public criticism like this.

Hearing the sound of people around him, Henry didn't take it seriously at all. He let Sylvia hold his hand and walked out of the crowd.

Just as they were about to leave, there was a voice in the crowd.

"Get out of the way! Get out of the way, all of you! Hurry up!"

A woman in her thirties, wearing a pair of black-framed glasses, pushed the crowd away and walked up to Sylvia. Without

saying a word, she grabbed Sylvia's right hand and looked at it carefully. The woman's expression was particularly wonderful, from confusion to disbelief, and finally to shock.

## Chapter 369

Sylvia felt extremely awkward to be caught by a woman like this. She wanted to pull her hand back, only to find that the other party grabbed her extremely tightly.

"It's real! It's incredible, it's incredible. How could this kind of thing be made into a ring?" The woman stared at Sylvia's hand. To be exact, it was the ring on Sylvia's hand, and she kept sighing.

The woman suddenly raised her head and looked at Sylvia. "Where did you get this ring?"

"My husband gave it to me." Sylvia looked at Henry.

At the same time, this woman also looked at Henry and kept nodding. "Great! Really great! Can this kind of thing be made into a ring? How much did you spend on this

technetium gold? Ten billion dollars? Twenty billion dollars?"

The words of this woman confused the people around her.

"Hey, Henry, what's wrong with you? Where did you find such an actress? Her acting is too frivolous, isn't it?" Bing sneered. "Is this ring worth more than 10 billion dollars? You're so funny!"

The woman with black-framed glasses turned around and glared at Bing. "If you don't understand, I don't blame you. Please don't mislead us here. You said that technetium gold was aluminium. Your ignorance should be laughed at!"

Bing smirked and said, "Don't pretend to be smart. I've never heard of it."

"Of course you haven't heard of it," the woman said matter-of-factly. "This kind of thing isn't something that everyone can

hear of!"

Bing's face darkened as he was scolded. Just as he was about to scold her, he heard a voice coming from the crowd.

"Professor Liu! Professor Liu!"

The voice came from outside the crowd and sounded very anxious.

"I'm here. Don't yell." The woman wearing black-framed glasses waved her hand.

The crowd was pushed away, and they saw a middle-aged man standing in front of the woman with an anxious face. "Professor Liu, you suddenly disappeared. You scared me to death!"

Seeing the middle-aged man, many onlookers welcomed Master Wong.

Master Wong was the one who brought the experts from the capital to choose the partners. Everyone was polite to him.

Master Wong waved his hand to the people around him and then said to the woman, "Professor Liu, these are all entrepreneurs from Yinzhou. You can talk to them and choose your partners."

Master Wong's words made Bing's face change. This woman was an expert from the capital? The super genius who claimed to be at the age of 30 and had PhDs?

Professor Liu ignored Master Wong and looked at the ring in Sylvia's hand again. "Can you show it to me?"

Sylvia didn't expect that this woman was an expert from the capital. Whether she could win the bid this time was up to others. After Professor Liu made this request, Sylvia took off the ring and handed it to her.

Professor Liu held the ring in her hand like a treasure and kept sighing. "It's really technetium gold! How generous it is to

make a ring from it! Wait! There are words on it? Is this engraved by your husband?"

Professor Liu widened his eyes and looked at Sylvia in shock.

Sylvia nodded and said, "Yes, he is not very romantic, so he could only engrave these five words."

Professor Liu shook her head. "If he isn't romantic, there is no romantic man in the world! He engraved words in technetium gold! In this world, your husband is the first person to do this kind of thing."

When the onlookers heard Professor Liu's words, they were all confused.

"Professor Liu, what exactly is this technetium gold you're talking about?"

"A rare metal," Professor Liu said with a heavy voice. "Look, the rare metal I mentioned doesn't refer to gold or some other metals. There is less than one cubic

metre of technetium gold in total in the whole world. Its value is unimaginable."

As soon as Professor Liu finished speaking, the crowd burst into an uproar. There was only one cubic metre in the world. How expensive was this? No wonder Professor Liu asked Henry just now. How much money did he spend on this ring? If it was really as rare as what Professor Liu had said, such a small piece of the ring was worth one billion dollars.

Bing's face was extremely ugly. He had just said loudly that this was the actor Henry had hired. He didn't expect that it was an expert from the capital. He had said that it was an aluminium ring, but in the end, there was less than one cubic meter of technetium gold in the world.

Professor Liu took the ring and said, "Technetium gold is the hardest metal known in the world. All countries want to

have one piece of it for research, but there is only so much of it in the world. Even if many countries want to own it, they can't do it. China once used rent one piece of it same size as this ring. One year's cost is one billion dollars."

Professor Liu's words shocked everyone once again. It was just a small piece for one billion dollars a year? This rent alone was equal to the total wealth of most people present!

All the people, including Sylvia, were stunned by this price.

Jodie's face was particularly ugly. She was just showing off her ten-carat diamond ring, worth more than three million yuan, but now she found that her diamond ring was not even as good as the ring on Sylvia's hand.

Professor Liu said again, "What I said is just the rent price. If you want to buy this

piece of technetium gold, unless there is a special channel, you can't buy it at all. This kind of metal, even if you use a laser, can't be completely cut. You need to grind it with a laser. The material and material resources consumed for grinding such a ring are simply unimaginable. The most important thing is that someone still engraved words on it!"

When Professor Liu saw engraved words, even she herself couldn't believe it. If she hadn't seen it with her own eyes, if someone told Professor Liu that one could engrave words on technetium gold, Professor Liu would think that the other side was crazy.

Even now, Professor Liu felt that she was crazy. She looked at Henry and said, "Can you tell me how you engraved the words on it?"

"It's very simple. Just grind it slowly."

Henry shrugged his shoulders.

Professor Liu listened to Henry's words and stared at him with her eyes. It took her a long time to spit out a word, "... awesome!"

Professor Liu's words completely refreshed the cognition of the people present. Those who had ridiculed Henry just now were so ashamed that they didn't even raise their heads and sneered at others with their ignorance. It was shameful to think about it.

Especially Bing and Jodie, as well as Owen, who had said that he was going to buy the diamond ring. At this moment, he only felt that his face turned blue and ugly to the extreme.

Sylvia blushed. She didn't expect that Henry's gift was so precious. At first, she thought it was just an ordinary aluminium ring. At this moment, she felt that she was

08:16 

the happiest woman in the world.
