

Chapter 448

In Cheng manor, Henry loudly asked Shane if he knew how to control his juniors in front of so many guests. On that day, the Cheng family was also disgraced and completely admitted defeat.

However, in the past, another junior of the Cheng family had offended Henry.

Jodie had just returned from overseas, so she didn't know much about the Cheng family. She didn't know anything about what happened in the Cheng family's manor last time.

Now, Henry asked Shane again about teaching the younger generation how to behave.

Seeing the angry look on Henry's face, Shane opened his mouth and didn't know what to say.

Henry looked at John and said lightly, "Some people don't have the ability to sit in their positions, so they should go somewhere else."

Hearing this, John's face suddenly turned pale. He glared at Bing with hatred. He was deeply involved in it! After tonight, it was likely that he could not keep his position.

Henry took two steps forward and patted Shane on the shoulder. "This time, I will help you educate your younger generation for the last time. If there is a next time, maybe the problem is not with the younger generation, but with you. There might be something wrong with you."

Elder Cheng looked at Henry with a trace of horror in his eyes.

Henry reached out and snapped his fingers in front of Shane.

At the same time, a huge explosion was

heard from outside the police station.

With the sound of the explosion, everyone felt that their feet were shaking.

A puff of white smoke emerged from the door of the interrogation room. In almost two seconds, the whole interrogation room was covered with white smoke, so that people couldn't see what was in front of them.

The white smoke came and went quickly. Five seconds later, the white smoke dissipated, and everyone could see the scene in front of them clearly.

When the white smoke dissipated, Shane immediately found that Jodie and Bing were missing! Even Sam also disappeared from the interrogation room.

Henry's face suddenly changed. He shouted at the leading police officer of Yinzhou police station, "Quickly, the

fugitive Sam Zheng has run away. Two accomplices have also run away! Arrest them!"

Hearing this, several police officers from Yinzhou immediately ran to the outside of the interrogation room.

Henry 's face changed. After finishing his words, he smiled again and looked at Captain Yu and Chief Wu. "You two, if there is no evidence to accuse me of murder, I should be able to leave, right?"

Captain Yu and Chief Wu swallowed hard. This matter was originally ordered by Bing and Jodie. Now that both of them had run away, it was impossible for them to say anything.

"Yes, yes." Chief Wu nodded repeatedly.

"Thank you." Henry smiled at them and walked out of the interrogation room.

Sylvia and Jenny followed Henry and went

out.

As soon as they got out of the interrogation room, they saw that the police officers from Yinzhou, who had just chased out, were all surrounding the front of the national highway station.

"What? Why don't you go after them? What are you doing here?" Henry asked.

"Mr. Zhang, the fugitives... died... died by falling..." The leading police officer from Yinzhou turned around and stammered.

"Died by falling? That's a pity. Although they are fugitives, after all, they are human beings." Henry shook his head with a regretful face. He didn't look at the door, as if he had already known it.

Shane walked out of the interrogation room and heard the words of the officers from Yinzhou. He also saw Henry's attitude. With his experience, how could he not

think of anything?

The police officers from Yinzhou turned around. After seeing Shane, they slowly moved away so that he could see the scene in front of them.

Because of a puff of white smoke, Jodie and the other two people just disappeared from the interrogation room. At this moment, all of them were lying in front of the door of the station, with blood flowing all over the floor. On their foreheads, there were pieces of sharp stones. The three of them hit their heads on these stones.

Shane slowly closed his eyes, and a stream of tears flowed out of his eyes. He said in a trembling voice, "Get someone to come over and collect the bodies..."

As for the fact that the three of them ran away and died by falling, Shane didn't even think about it. He didn't even ask to call for an ambulance. If someone wanted his

granddaughter to die, no one could save her.

Shane seemed to have aged more than ten years after saying that someone should collect the bodies. At first, he felt like he was walking lively, but now, he was trembling and could not even standstill.

John looked at the body of Bing lying there and felt bitter in his heart. Anyway, this was his godson.

"Well, since there is nothing to do, I will leave." Henry went to the door and said to several police officers from Yinzhou, "This time, I really have troubled you to come here. Let your director know about this matter. I will remember it."

"Mr. Zhang, this is what we should do. As long as you are fine," said several police officers. After greeting Sylvia and Jenny, they drove away.

Henry turned around and looked at the two women standing behind him. One was Jenny and the other was Sylvia.

"How did you know I'm here, honey?" Henry asked Sylvia.

Seeing that Henry talked to Sylvia first, Jenny's face revealed a deep sense of loss.

On Sylvia's pretty face, there was a little surprise, but this surprise disappeared in an instant. "President Qin told me that you are here. This time, we should thank her."

Henry's eyes fell on Jenny. She waved her hand indifferently and forced a smile. "We are friends. Why are you saying so much? After all, it was because Henry saved me last time. All right, Henry, since you are all right, go back with your wife. Your wife ran to Luohe city immediately. She was worried about you."

Jenny said as she waved at Henry. She walked out of the station, sat down in her BMW and left.

"Let's go too, honey." Henry saw that Sylvia was in a bad mood, so he stepped forward and took Sylvia's little hand.

Sylvia licked her lips and said, "Let's go home."

Half an hour after Henry and the others left, several ambulances drove to the door of the police station and carried the three people lying on the ground into the car.

Watching the three ambulances driving away, Shane closed his eyes and said to Peter next to him, "Notify all the people of the Cheng family not to make trouble and not to show off from today on!"

"Understood." Peter nodded. "Grandpa, now we..."

"Let's go back." Shane sighed and got in

the car.

When Shane and the others had just moved no more than ten meters away, a violent blast of air swept over from the rear of the car they were sitting in. The fire was soaring. After the fire, they heard a loud noise.

They looked back, Captain Yu and Chief Wu's car exploded, and the two people were still sitting in the car.

Chapter 449

On the way back to Yinzhou, Megan was driving, Henry and Sylvia sat in the back seat.

Henry found that Sylvia seemed to be worried all the way.

"Honey, what's the matter?" Henry asked worriedly.

"Ah?" Sylvia seemed to be frightened, and then quickly shook her head. "It's okay, I'm fine."

Henry looked at her strangely. It was obvious that she wasn't fine. But Sylvia didn't want to tell him, so he didn't ask.

By the time they got home, it was already late at night. After taking shower, they went to bed.

Henry lay on the bed and thought about Sylvia's appearance. He felt that Sylvia had something on her mind.

Henry threw his mobile phone aside and closed his eyes. He gradually felt sleepy. Just as he was about to fall asleep, his mobile phone suddenly let out a soft sound.

Henry took the phone and saw a message from Wade.

"Boss, there are some news regarding the crystal. There's a breakthrough. You may have to come to Shan City in person."

Henry thought for a few seconds and sent a message back to Wade.

"Book me a flight to Shan City tomorrow."

The next morning, Henry got up early. After preparing breakfast, he waited for Sylvia.

"Honey, it's time for breakfast." When Henry saw Sylvia coming out of the bedroom, he greeted her.

"Okay." Sylvia nodded and sat down on the dining table unnaturally. Then she ate her breakfast with a dull look.

"Honey, are you really all right?" Henry reached out and waved his hand in front of Sylvia.

Sylvia was still sitting there as if she didn't see it.

"Honey?" Henry waved his hand again.

"Ah? What's wrong?" Sylvia's whole body suddenly shook.

Henry frowned. After a few seconds of silence, he shook his head and said, "Nothing. I have something to do today, so I have to go to Shan City. I might need to stay there for a few days."

11:31 ■■■

Sylvia nodded and said, "Oh, okay. What time is your flight?"

"10:30. I'll go to the airport after breakfast."

"Well, be careful."

After breakfast, Henry washed the bowls and chopsticks and left the house.

Sylvia looked at the direction of the courtyard gate and wasn't moving.

"Miss Lin, are you still thinking about what happened last night?" Megan stood behind Sylvia. "In fact, you don't have to blame yourself. This is a bad thing for Mr. Zhang, but it's also maybe a good thing."

"A good thing?" Sylvia turned around with a puzzled look.

Megan nodded and said, "Yes, it's a good thing. Miss Lin, you will inherit the position of the head of the Family Su in the future.

This is the last wish left by the old master before he died, and it's also your natural mission. Do you know why the ancient kungfu families have never been known by outsiders?"

Sylvia shook her head.

Megan said, "Almost one hundred percent of the ancient martial families will choose to arrange an alliance through marriage. First, it is to maintain the concealment of the family. Second, it is because the other half is powerful. Miss Lin, you have to know that the ancient kungfu family is different from an ordinary family. In the future, what you have to contact is the underground world. If your partner is weak, he will become your weakest point. I admit that Henry is very capable of doing business, but no matter how big the business is, it means nothing in the underground world. As long as you two are still being together and Mr. Zhang is your

partner, the situations like that from the last night will happen to him more and more in the future. What he had been through last night can be regarded as a warning."

Hearing Megan's words, Sylvia took a deep breath. "What kind of place is the underworld you've been talking about?"

A solemn look appeared in Megan's eyes. "A place where only the strength is respected. Money is nothing. No matter how rich a person is, he will be scared for his life after offending the masters of the underground world. The big underground meeting is about to be held. Miss Lin, as the heir of the Su Family, you have to attend."

Sylvia asked again, "What's the status of the Su Family in the underworld?"

Megan smiled bitterly and shook her head. "Among the ancient kungfu families of

China, the Su Family has a fairly high status, but in the whole underground world, the Su Family can only be considered to be in the middle, even in the lower levels. Even the Ji family, the first ancient kungfu family, can only be ranked above the middle."

Sylvia was shocked. "The strongest Ji family can only be ranked in the middle? Which country does the top force belong to?"

"It's not any country," Megan replied. "Not a country. It's said that the most powerful force in the whole underground world is a free organization, called Radiant Island."

"Radiant Island..." Sylvia murmured, "Is that a place?"

"Yes." Megan nodded. "There's an island floating on the high seas. Its military force is far beyond that of any country in the world. It's said that people on the island

are extremely evil. They're all killing people without blinking. The number of people killed by the island is definitely above tens of thousands. The leader of the island is also known as the King of Hell. In China, we call him The Conqueror!"

Sylvia's body shook. In the society she was a part of for a long time, if there was a murder case, it would be big news. But in the underground world, it seemed to be common. After hearing Megan, Sylvia felt a great sense of fear towards Radiant Island. The King of Hell, The Conqueror?

The number of people killed each year was more than a thousand. What would that island look like?

Sylvia couldn't help but think of a scene in which the ground was dark and people were bathing in blood.

Megan came forward and grabbed Sylvia arm. "Miss Lin, so I said that what

happened last night was a good thing for Mr. Zhang. He can adapt to it in advance. Once he got in touch with the underground world, the enemy's means would be much crueller than yesterday's police officers. If he was taken away by the people from the underground world, he absolutely couldn't survive until we came to save him."

Sylvia's heart was filled with sorrow. She did not expect that her existence would bring so many hidden dangers to Henry. Henry was powerful and his skills were not bad. He had reached the annual salary of hundreds of millions in Hangshi's evaluation centre. But it would mean nothing in the underground world mentioned by Megan.

"What you mean..." Sylvia Lin looked out of the room and murmured, "Is it possible that he could get hurt because of our relationship?"

"Yes!" As soon as Sylvia said that, Megan answered firmly, "Mr. Zhang doesn't belong to the underground world, which is a place that he shouldn't come in contact with. He has no background and no power. In the underground world, he is as weak as an ant. Once you take over as the Master of the Su Family, everyone who wants to deal with the Su Family will regard Henry as a breakthrough point!"

Chapter 450

10 am in the morning.

Sylvia sat in her office with a stack of documents in front of her. She wasn't in the mood to read them. She sat there quietly for over an hour.

Megan's words kept ringing in her mind.

The underground world, strong enemies, cruel means, and... Henry might be in danger.

Sylvia admitted that a regular man had already occupied her heart. Even if they were a couple on the paper only, deep inside she had already regarded Henry as her partner for the rest of her life.

But now, hearing Megan's words, her identity as the future master of the Su Family was like a heavy hammer that woke

Sylvia up.

The future was not what she had expected. If Henry continued to be with her, he would face countless dangers in the future, which should not have anything to do with him.

Sylvia looked down on Henry at first. Now she admitted that he was so excellent that she even thought she could not match him. He was talented, and he had a future. He shouldn't be ruined by her like this.

Although Sylvia still didn't know what kind of place the underground world was, it didn't prevent her from thinking about it. She could even think that one day, Henry could be oppressed by the underground world and she would have to watch the man fall because of her. What would happen to her? Probably, she would go crazy...

Sylvia took out her mobile phone. On the mobile phone, there was a picture of her

and Henry. Looking at the man standing in front of her, who was like a shield, Sylvia's eyes gradually became wet.

"Maybe, you don't belong to me after all. This between us is just an accident. There are others who love you. She cares about your feelings more than I do and can take care of you better. You belong to a wider sky. I shouldn't have tied you to me..."

Sylvia put out the phone screen, took a deep breath, slowly got up, walked to the door of the company, and opened the door.

"President Lin, are you going out?" asked Cathy.

"Please help me make an appointment with President Qin from Hengyuan Company, say that I have something to talk to her." After Sylvia finished, she was silent for two seconds and said, "It's private."

"Okay." Cathy nodded.

At 12:30, a plane that took off from Yinzhou landed in Shan City.

Shan City was known as a city that could drive people crazy. It seemed that you were standing on the ground with a wide road in front of you. But actually you were standing on the top floor of the nine-story building.

Henry had been to Shan City more than once. In the past, he used to travel all over the country. Wherever he went, he would clearly remember the road.

Henry looked at the address Wade sent him on his mobile phone. He got in a taxi and went there.

This was a private scientific research centre, which covered an area of more than 300 square meters. Compared with the normal scientific research centre, it

was very small, but if a professional scientific researcher saw the equipment in this private research centre, they would be shocked. Every piece of equipment was of the best quality, and there were some pieces of equipment that could only be seen here.

A young girl, who looked less than 20 years old, was wearing a white coat and shuttling back and forth between these pieces of equipment. Some elderly scientists, like students, were now looking at the girl's movements with questioning eyes.

"What are you waiting for? Do you still want to be my assistant? Don't you know what to do now?" The girl scolded from time to time, and the older scientists immediately stood up. Compared with the girl's big movements, these scientists seemed to be much more cautious.

Next to the research equipment, a handsome young man was lying leisurely on a wooden lounge chair, enjoying a glass of iced watermelon juice.

"Idiot, when will Boss come? I can't wait any longer!" The girl walked up to the young man and kicked him hard on the calf.

This girl was Future.

Wade was lying there, gritted his teeth and said, "Girl, I'm a few years older than you. Your big brother has to bend over when he sees me. How can you call me like that?"

"Come on, how do you want me to call you? How about Brother~ Brother~ White, is that okay?" Future, when she said the words brother White, deliberately made a very girly sound.

Wade couldn't help but shiver and said with a cold face, "Forget it. It's up to you.

You can call me whatever you want."

Future smiled and said, "When will Boss come?"

Wade looked at the Patek Philippe custom-made model on his wrist and said, "He should be here. He has already landed long time ago."

As soon as Wade's voice fell, he heard a voice coming from outside the lab.

"Little girl, why are you so anxious to see me? Are you going to take me to do an experiment again?" Henry put his hands in his trouser pockets and walked toward the lab.

"Wow, Boss, I missed you so much!" When Future saw Henry her eyes lit up and she pounced on Henry. She grabbed his arm and said, "Boss, come on, there is a new discovery."

There was a bitter smile on Henry's face,

and he let Future pull him.

Wade shook his head and sighed. "Boss, judging from the past experience, you have to suffer again today?"

"You idiot, what do you know?" Future rolled her eyes at Wade. "What do you mean by suffering? Boss is dedicated to science!"

Wade curled his lips and didn't say anything.

In the past, many experiments that were done by Future were something that ordinary people could not bear. All of them had Henry as their test subject. In each experiment, Henry sometimes felt that he had to thank her for not killing him.

In the centre of the laboratory, there was equipment with a mechanical arm stretching out, holding a small square crystal in the arm.

Next to the crystal, numerous complex data appeared on the screen.

The cheerful Future looked much more steady when she came to the side of this equipment.

"Boss, where did your crystal come from?" Future asked with a serious look.

"It was cut out from a stone," Henry answered, "I thought it was similar to the Fire Crystal at that time. Did you find anything?"

"Mmm." Future nodded vigorously. "Boss, this crystal has indeed a Fire Crystal-like power. However, the energy contained in the Fire Crystal is more violent, and this crystal is much softer. Moreover, the energy contained in this crystal is more powerful than that of the Fire Crystal!"

"More powerful than the Fire Crystal?" Wade exclaimed.

It must be noted that the energy contained in the Fire Crystal was comparable to that of a nuclear plant. How could such a small piece of crystal be more powerful than the Fire Crystal?

Chapter 451

When Wade looked at the white crystal again, he was a little scared. He thought back to yesterday when he delivered the crystal, he put it casually into his pocket. He was a little scared. If it was destroyed by him accidentally, the explosion would be even more powerful than a nuclear bomb.

Thinking about the explosion in his trousers pocket, the closest part of his body to his pocket was...

At the thought of this, Wade unconsciously squeezed his buttocks and shivered.

Henry's focus was different from that of Wade. He asked Future, "The energy you mentioned is softer. What do you mean?"

"Boss, look at this." Future pointed to a transparent test box with a length of 50

centimetres and a height of 50 centimetres next to them.

In the experiment box, there was a steel plate with a thickness of five millimetres and two little mice.

She said, "Boss, I'm going to pour out the energy from this crystal in a special way and guide it in the form of gas."

As she spoke, she skillfully operated the computer.

Henry saw a row of LED numbers lit up on the surface of the experiment box.

She explained, "This is the energy source I mentioned in the crystal, and now it filled about ten percent of the whole experiment box. You should pay attention to the changes in the two experimental bodies."

Henry's eyes were fixed on the two white mice. Five seconds after the number on the surface of the test room reached ten,

the two white mice suddenly became a little violent. They kept turning around in the box, and their speed was particularly fast.

One of the white mice, after spinning a few times, suddenly hit the steel plate in front of it.

The impact of the collision forced the box to move a few millimetres.

Henry looked again and found that the steel plate hit by the white mouse actually bent a little. After such a fierce impact, the white mouse did not get hurt at all. It just looked very weak and lay there motionless.

Another white mouse also crashed into the steel plate, and the same thing happened.

"How is it possible?" Henry frowned. This kind of weak white mouse could knock down the steel plate. The most important thing was that these two white mice were

unharmmed.

Moreover, the power of the two white mice not only caused damage to the steel plate, but also they became aggressive and they caused the box to move.

"Boss, do you think it's incredible? When I saw this scene, I thought I was wrong." Future had a look of excitement on her face. All the new research results were something exciting for a researcher like her.

"That's incredible." Henry nodded.

"Boss, come and see this." Future pull him aside.

Future brought Henry in front of the screen, on which the scene in the experimental box just now was displayed.

"Boss, I slowed down the speed of the scene just now by 20 times. At the same time, all the data would be captured. Take

a look." She pressed the start button.

On the screen, the two white mice moved slowly. Henry noticed that there was a speed data on the screen. After the energy from the white crystal was brought into the test box in the form of gas, the two white mice ran at a speed of 10 metres per second!

Normally, the maximum running speed of the white mice was between seven to eight meters per second, but it could only maintain this speed for four or five seconds.

And just now, both white mice had broken through the limit, which was incredible.

What was the limit? The limit was something that couldn't be surpassed since ancient times.

The words "break through the limit" were simple to say, but if that could be really

done, it would be an outstanding achievement!

Then, Henry paid attention to the scene when the white mouse hit the steel plate.

"Boss, that's it. Take a good look at it." Future reminding him from the side.

The white mice dashed against the steel plate at a speed of twenty times slower, so that Henry could see all the changes clearly.

When the head of the white mouse was less than a centimetre away from the steel plate, Henry clearly saw that the steel plate had begun to hollow. At this time, the head of the white mouse had not yet touched the steel plate.

At this moment, a word popped up in Henry's mind. It was Qi!

The dent on the steel plate was not caused by the collision with the white mouse at all.

It was caused by the pressure of an invisible force.

Subsequently, when the white mouse completely hit the steel plate, an invisible force broke out between the white mouse and the steel plate, like the centre of a nuclear explosion, bringing up a wave of air. It was this wave that caused the experiment box to move slightly.

Looking at this scene, Henry didn't come back to his senses until the video stopped.

"Boss, is it incredible?"

Henry nodded subconsciously. "It's amazing if someone is able to change the movement of the entire environment by himself!"

For that white mouse, the whole experimental box might be his whole world. A white mouse could do this. What would happen if this force was put in the human

body? Would the human be able to crack the ground with just one punch?

Future turned off the screen and looked at Henry. "Boss, I'm going to..."

"No!" Before she could finish the words, Wade interrupted on the side right away. "Future, no matter how many tricks you usually do, you can't play tricks on this matter. The energy contained in this crystal is too powerful. You can't directly use Boss for an experiment!"

"It doesn't matter. Let's do it." Henry gave Wade a hint with his eyes and then asked Future, "What should I do?"

"Boss, no way!" Wade hurriedly said, "We don't know what this energy is. There's no need to do such a useless experiment."

Henry shook his head. "It's necessary. Someone knows what this crystal is."

Henry thought of the man and woman in

the underground parking lot that day. "Besides, they also know how to use this crystal."

Future said, "Boss, I want to tell you something. With such a huge amount of energy, I don't have much confidence. In theory, the white mouse is the closest to human beings, but there is still a difference after all. During the experiment, you may suffer great pain and you need to be mentally prepared."

"Don't worry, nothing serious will happen to me." Henry waved his hand. As an experimental subject, he took the initiative to comfort Future and Wade. "Just like before. If there is anything wrong, just stop the experiment."

Future nodded and said, "Okay."

Henry had already been experienced in this kind of experiments. He knew where to go without Future leading the way.

There was a 20-square-metre independent room specially prepared for Henry. The wall of the room was made of a high-intensity material. Even if the missile was launched, it might not be able to blow up the wall.

Chapter 452

In Yinzhou.

In a cafe downstairs of the Hengyuan Commercial Company.

Jenny was wearing a white suit jacket, a black shirt, and a pair of white pants, which made her look capable and generous.

Sylvia surprisingly put on light makeup and sat opposite Jenny, wearing a beige wind coat.

These two women sat together, forming a beautiful scenery. Both of them gave people a completely different feeling, and both made people feel that they couldn't choose which one was more beautiful.

Jenny picked up an exquisite cup and took a sip of latte. "I didn't expect that President Lin would take the initiative to ask to see

me."

Sylvia smiled slightly and said, "I didn't think of it either, but life makes people wandering between many unexpected things. Am I right, President Qin?"

Jenny put down the cup in her hand and said, "President Lin, you're not here to talk about the life with me, are you?"

"No." Sylvia shook her head slightly and looked at Jenny. After a few seconds, she nodded and said, "Kind of."

"President Lin, you are not in a good mood." Jenny looked at Sylvia and said, "Your eyes are uncertain. This should not be the state of mind that the Queen of Business in Yinzhou should have. If you have anything to say, just tell me."

"Okay." Sylvia tidied up her collar. "Since you're so frank, President Qin, I won't hide anything. President Qin, do you like Henry

very much?"

Faced with Sylvia's question, Jenny nodded without thinking. "I like him."

Sylvia said, "President Qin, I want to make a selfish request. Although it is unfair to you, I am really..."

Jenny directly interrupted Sylvia and said, "President Lin, just tell me what you want to say."

"I want you to help me take care of Henry," Sylvia said directly.

"What?" Jenny wondered if she had heard it wrong. "Take care of Henry? What happened to Henry? Did he..."

"No." Sylvia shook her head. "Henry is fine. I can't stay with him anymore. I want you to take care of him for me."

Jenny smiled and said, "President Lin, Henry is an adult. I'm afraid that he doesn't

need someone to take care of him."

"You don't understand what I mean." Sylvia picked up the coffee and said, "You and I both know that Henry is excellent, even better than any man we know. He has talent and courage. He is very attractive, but... I can't stay with him anymore."

"Sylvia..." Jenny had just opened her mouth.

Sylvia directly interrupted Jenny's words.

"President Qin, you know, men like Henry are very attractive to women. But you are the only one who really likes him and cares about him."

At this time, Sylvia stared at Jenny with her beautiful eyes.

"President Lin, as far as I know, you are not a person who will easily choose to give up. Did you encounter any difficulties?" Jenny asked. She admitted that she liked Henry.

As long as Henry opened his arms to her, she would throw herself into his arms without hesitation. But she did not want to be like this. Sylvia took the initiative to look for her and wanted to give Henry to her.

Sylvia shook her head. "This is my own problem. I made my own choice."

This morning, when Megan told Sylvia about those things, Sylvia was wondering if she should continue to be the master of the Su Family. If she gave up, all problems would disappear. But whenever Sylvia thought of giving up, her mother's expression before her death would appear in her mind. The urgent desire to return to the Su Family, the unwillingness between her eyebrows, and the determination to be recognized by the Su Family. Even when she died, her mother did not close her eyes.

Coming back to the Su Family was Sylvia's

mother's greatest wish.

Taking her mother home was also the direction that Sylvia had been struggling for. Now she could not willingly choose to give up being the head of the family and refuse to accomplish the last wish of the old master. She didn't want her mother to have troubles in the afterlife.

Sylvia now felt guilty for Henry in her heart.

He took a deep breath and said, "President Qin, you should have heard of my relationship with Henry, haven't you?"

Jenny nodded and said, "I've heard a little about it."

Sylvia smiled with sweetness. "Henry, when he came to my house to be a son-in-law, I didn't know why my dad liked him. At first sight of Henry, to be honest, I didn't like this man very much. I felt that he was sloppy, lazy, and didn't have the heart to

be a better man for me. At that time, I just wanted to kick him out of the house."

When Sylvia said this, she couldn't help recalling the memories of her relationship with Henry and the happy smile unconsciously appeared on her face.

"As time passed, Henry showed his different side. At that time, someone took away Lins Group from me and humiliated me. Of course, the subject of humiliation included Henry as well. You know, no matter how humiliated Henry was, he didn't say a word. But after those people said some rude words to me, he broke out. He said that they could bully him, but if someone wanted to bully me, they would have to face the consequences."

Jenny looked at the happy smile on Sylvia's face and the sweetness in her eyes when she spoke. She was very clear that this woman's love for Henry was no less

than hers. However, she might not express her feelings and hid them all in her heart.

Sylvia continued to recall, "That day, I felt that I had some kind of support behind me. When I was helpless, I had a foothold. From then on, he gradually entered my heart. Later, he took me to drink coke, play in the sand, and eat in a street restaurant. I felt like that day was the happiest time I had in the past 20 years. I did not have to worry about anything. I was no longer the ice-cold president, the leader of the Family Lin, but... just an ordinary girl."

Jenny noticed that when Sylvia was talking about these things, her eyes were full of joy and freedom, which made Jenny sigh and felt sad for Sylvia. This woman seemed to be excellent and envious, but in fact, she was also deprived of a lot of happiness. She could only dream of some things that ordinary people could do easily.

Sylvia was immersed in her memory, suddenly came to her senses when she heard Jenny's sigh. "I'm sorry, President Qin. I'm got lost for a while."

"It doesn't matter." Jenny shook her head and said, "I am very happy that you can treat me as a friend and tell me all this."

Sylvia calmed down and said, "President Qin, I may be a little selfish in my next words. I am going to leave, but I won't divorce Henry. I want you to take my place and stay with him while I am away. If I have enough strength, I will come back. If you are still with Henry at that time, I am willing to accompany him together with you."

Chapter 453

After Sylvia finished speaking, she looked at Jenny with a pleading look.

Jenny shook her head slightly. "I don't accept it."

Hearing this answer, Sylvia's eyes darkened. She didn't have any hope. After all, this request was too difficult to accept for Jenny Qin.

"Jenny..."

"Sylvia." Jenny looked at the woman with a cold face. "I don't know what happened to you. These have nothing to do with me. I only know that I should strive for what I want. I like Henry, and I also hope that one day you will leave him, but I don't want you to turn him into a product and take him as a capital for negotiation."

"I didn't take him as a capital." Sylvia hurriedly explained.

"You don't have to say this to me." Jenny waved her hand and stood up directly. "I have always regarded you as my opponent. Whether in business or men, I dreamed about the day when I defeated you and the day when I was completely defeated by you. I never thought that you, Sylvia Lin, would take the initiative to admit defeat."

Jenny picked up the coffee cup on the table, drank it all, and turned to leave.

Sylvia looked at her back and sat there for a long time, unable to speak.

Jenny walked out of the cafe and looked back. She saw that Sylvia was still sitting there. Her eyes were a little dull, and there was a kind of hesitation on her face.

"Hey, Henry Zhang, how powerful are you?"

How can you make Sylvia love you so much?"

Jenny sighed, shook her head and strode away.

As a woman, Jenny was very clear that if something happened to her and made her unable to go on with the people she loved, then she would definitely not be willing to give her lover to another woman. She would say that she would come back later and they would continue being together.

Loving a person could make one humble. Sylvia now seemed to have become like this. She was reluctant to leave Henry, but she didn't want Henry to fall into a dangerous situation because of her, so she chose to let him go temporarily. Even if she was only a small part of his life in future, she was willing to do it.

Sylvia sat alone in the cafe for two hours before she got up and left.

When she walked out of the cafe, Sylvia took out her mobile phone and dialled a number. "Megan, when is the underground world meeting you mentioned? What do I need to prepare?"

In a private research centre in Shan City.

"Boss, I'm going to release the gas now. If you feel that something is wrong, just tell me immediately." Future was standing in front of a big screen, there were countless precision instruments in front of her, which were too complicated that they would make ordinary people feel headache at a glance.

Wade stood next to Future, nervously looking at Henry in the lab.

From Henry's room, it could not be seen what was going on outside. He could only see a white wall.

Henry's upper body was naked, and he

wore loose trousers. He stood there with bare feet. It could be seen that Henry's body was covered with ferocious scars.

"Bring it on," Henry responded in the lab.

Future grabbed a lever in front of her and slowly push it. With her action, a 1% symbol appeared on the screen in front of her, representing the proportion of the gas exported from the crystal.

"Boss, how's it going?" With only 1% of the gas, she dared not to do anything else. She asked nervously.

The energy contained in this crystal was too powerful. If she was not careful, she might put Henry in danger, so she had to be extremely careful.

"There's nothing different. Let's continue." Henry took a deep breath and said.

She nodded and pushed the rod again, and the number on the screen increased by 1%.

"Boss, what about now?" She asked again.

"Go on." Henry shook his head.

The number on the screen increased to 5%.

Standing in the lab, Henry took a deep breath. His mouth and his tongue were dry. At the same time, he felt a tightness in his chest, as if he had stayed in an unventilated environment for a long time, and his head was a little groggy.

"A little more." This time, before Future could ask, Henry took the initiative to say, "When I ask you to stop, you stop. Each time you increase the percentage, wait for ten seconds."

She nodded her head. For so many years, she had already formed a tacit understanding with Henry. Every time until the end of the experiment, the dominant power would be in Henry's hands.

With the increase of the measurement, Henry felt that his head was getting heavier and heavier, his chest was uncomfortable, and even his breathing was not smooth.

"Okay, let's stop first."

As Henry spoke, he slowly moved his body. There was an illusion that he was in the water as if his body was full of some kind of pressure.

Henry raised his arms and threw a powerful punch.

"No! It's not an illusion!"

At the moment of this punch, Henry's pupils suddenly contracted. He could clearly feel that there was some kind of resistance when he punched.

Henry stood there and slowly took a deep breath. The sudden change in the two white mice was because they inhaled this

kind of gas. Now Henry had to adapt to this feeling slowly.

With constant breathing, Henry felt that the invisible resistance around his body had become much less, but his chest was getting duller and duller.

Outside the lab, Wade looked at the 16% on the screen and frowned. "Is there any problem with the boss?"

Future slowly shook her head. "He should be fine. Boss's physical quality is far better than that of ordinary people. His muscle strength and bone hardness are incomparable to others, so his endurance is stronger."

Henry stood in the room. His skin was a little red, and his breathing was getting more and more difficult. Just as he felt that he couldn't breathe and wanted to leave the lab, a sense of release suddenly came.

He felt as if he had caught a cold and a stuffy nose, but suddenly, he could breathe easily.

Henry could clearly feel that there was a stream of airflow flowing slowly in his body, just like drinking a mouthful of hot water. He could feel the hot water flowing into his stomach. This airflow brought an impulse, an impulse to exert strength.

At this moment, Henry understood why the two white mice ran back and forth, because of the... power! His whole body was filled with endless power! This power was stored in his body, looking for a place to vent.

Henry took another deep breath, put his fist around his waist, and made a horse stance. Then he stepped back, with the strength of his waist, he aimed it at the wall in front of him and punched out heavily.

When he threw out this punch, Henry felt an indescribable pleasure. At the same time, all his strength was wasted with this punch. At this moment, he was sure that this was the most powerful punch he had produced in the past 20 years!

Chapter 454

When Henry punched out, his heart was full of self-confidence. It seemed that even if there was an armoured vehicle in front of him at this moment, he could also knock it through.

Future, who standing outside the lab, opened her eyes wide. She stared at the data on the screen. At the same time when Henry punched, the air in the lab was gathering around Henry's fist. It could be said that if there was a person standing next to Henry, the person would not be able to breathe at the moment when Henry punched, because all the air was sucked out.

"Boom!"

A loud sound broke out.

Henry watched helplessly as a large hole

appeared in the wall in front of him. This was a high-intensity material that could withstand a missile. How could it be deformed by a punch?

What made Henry even more surprised was that there was no pain in his fist at all when he punched out. To be precise, the wall bent before his fist collided with it.

Wade widened his eyes and stared at the place where Henry's fist hit. His eyes were full of disbelief.

Future kept analyzing all kinds of data and read them out.

"Speed 108, attack 121, and strength 160!"

"How is it possible?" Wade said on the spot, "Are you sure you're not mistaken?"

"No, absolutely not!" Future's eyes were filled with unprecedented excitement. "Unbelievable, it's incredible!"

There was a loud muffled sound at the door of the lab. Henry slowly walked out of the door. It could be seen that he was very tired. It was particularly difficult for him to walk alone, and his eyelids drooped.

"Boss, how do you feel now?" She ran to Henry right away.

"Sleepy." Henry only spat out one word and his body fell forward.

The punch just now drained all his strength, as if he had fought a tough battle and had not slept for a few days and nights.

When Henry woke up, there was a white ceiling above him. He was lying on a big soft bed, with Wade and Future sitting on both sides.

"Boss, are you awake?" There was a hint of joy in Future's eyes.

"Yeah." Henry nodded and moved his

limbs, but still felt a little weak. He rubbed his eyes and said, "How long have I slept?"

"Three hours." She answered without looking at her watch. She was calculating the time almost every minute.

"How is the test result?" Henry asked the question he was most concerned about.

"Speed 108, attack 121, and strength 160." Future told Henry the data she had obtained before.

Henry was lying on the bed and was stunned when he heard the data.

In the lab, Henry's data in these three aspects was about 60. This was also what Future believed to be the maximum power that human bodies could exert. However, just now, all these records were broken. The speed and attack data were nearly doubled, and the strength was almost tripled!

"Boss, do you feel incredible?" She was very excited. During the three hours when Henry was sleeping, she had been in an excited state all the time.

Henry nodded and didn't say anything.

"Boss, this proves that these gases can be completely absorbed by the human body. Do you feel any discomfort in your body?"

Henry shook his head. "Just fatigue."

Future pulled an instrument from the side and said, "Boss, I'm going to do a full-body examination for you now. If there's no problem, let's start the second stage of the experiment."

Once Future started studying an unknown thing, she would be very persistent and fanatical.

Henry was also eager to know what this crystal was, and why the man and the woman were so persistent to get it last

time. Recently, there were too many things that confused Henry. He had an intuition that he could find all the answers in this crystal.

After Henry sent a message to Sylvia that he would not return to Yinzhou for the time being, he stayed in the research centre and tested the energy of the crystal every day.

In the beginning, Future would let these energies integrate into the air in the form of gas. Henry would inhale these gases through breathing. After several experiments, she started to purify this energy in the form of liquid and transformed it into an ordinary vitamin pill. She wanted to see what kind of effect this energy would have on the human body.

Five days of the experiment passed in the blink of an eye.

Henry was only wearing a pair of boxer

shorts, lying on the wide test table. Several scientists in white coats were constantly operating something on the test table.

Future sat in front of the screens to observe every data.

A few minutes later, she came to Henry with a report and said, "Boss, your skeleton strength and internal organs strength have increased a bit. This time, you really found a treasure! Although we still don't know what the energy is in this crystal, after five days of experiments, we can be sure that this energy is absolutely beneficial to the human body. The purified liquid energy can be mixed with glucose and can be used as nutrition pill. Gas energy can increase one's power in a very short period of time."

Looking at the report in her hand, she felt a sense of unreality, which was beyond her research range.

"Boss, have you felt anything different during these days?"

Henry twisted his neck and said, "I sweat so much every day, and I always feel like there is dirt on my body."

"That is because the impurities in your body have been removed. As for what the energy in this crystal is, we still need to continue to study it." Future explained, "Boss, at this stage, we have to slow down the process of the experiment. Now I have to carefully study what the energy in this crystal is and how this crystal can store such a vast energy source."

Henry nodded, stood up from the test table, casually put on his clothes, and walked to the bathroom.

"Boss, Boss!" Henry was walking when he heard Wade's voice behind him.

"What's wrong?" Henry stopped and

looked back.

"Boss, why are you walking so fast?" Wade trotted all the way up.

"Did I walk fast?" Henry touched his nose with a puzzled look.

"Yes, I thought you had something to do." Wade pointed behind him. "It took you four or five seconds to get here from the laboratory."

Henry looked at the table. It was more than 30 meters away from where he was standing.

Chapter 455

He walked more than 30 meters in just four or five seconds. It was almost as fast as an ordinary person who was sprinting for 100 meters. Henry felt that he was walking as usual.

"Boss, I just heard from Future that the experiment is over. Are you going back to Yinzhou?" Wade asked.

"Yes." Henry nodded. "I've been away for a few days. It's time to go back."

"Then let's have dinner together tonight. You have come to Shan City. If you don't eat a hotpot, that would be a shame." Wade raised his mobile phone. "I'll book a room. After you take a bath, we'll set off."

"Okay, let's go to the one where we used to go. I haven't been there for several years. What you said really made me miss

it." Henry recalled.

"Don't worry, Boss. We will go there."

While Henry was taking shower, Future had already changed into casual clothes and was waiting for him.

The three of them walked out of the lab together.

Future clasped her fingers and said, "Boss, I'm sure I won't be able to get any useful information about crystal for the time being. I'm planning to take it to the island."

"Okay, by the way, you two help me check these two people." Henry took out his mobile phone and sent a photo to Wade and Future respectively. The people in the photo were a man and a woman who fought with Henry in the underground parking lot that day for the crystal.

"I'll give you an answer within 24 hours." Wade sent the photo out and said

confidently.

Henry and Future did not doubt what Wade had said at all, because he had the strength and capability to do so.

The three of them went to a hotpot restaurant. The restaurant was not very big, two or three floors and the total area was less than 200 square meters.

"Phew." Henry looked at the door of the hotpot restaurant and took a deep breath. "It hasn't changed at all. It's still the same as before."

Henry still remembered that every time he came to Shan City to perform a task, he had to come here to eat. If he didn't eat here, he would feel that there was something missing.

Just as the three of them were about to stride into the restaurant, a harsh braking sound came from behind them.

"Fu*k, do you want to die?" A burst of abuse came from the driver who had just stopped.

Henry and the other two subconsciously turned their heads. When Henry saw the figure standing on the road, his face suddenly changed.

It was a girl. It could be seen that she was very beautiful. She had shoulder-length hair and delicate facial features. However, she looked very poor in her dress.

The girl's face was full of panic. Regardless of the driver's curses, she turned to look and continued to run forward.

As a city of China, Shan City had a large traffic flow. It was extremely dangerous to cross the road causally. As soon as the girl ran two steps forward, a fast off-road vehicle came from the side. Looking at the speed, it was too late for the off-road driver to slow down.

Henry, who was standing at the entrance of the hotpot restaurant, rushed to the middle of the road and wrapped his arms around the girl's thin waist. He suddenly jumped with his feet and narrowly escaped the fast-moving off-road vehicle.

The driver of the off-road vehicle suddenly braked. It seemed that he was also scared.

"Thank... Thank you." The girl gasped and was also frightened by the situation just now. She looked up timidly and saw Henry. Her eyes suddenly fixed and she panicked. "Brother Henry..."

The girl in Henry's arms was Amity Qiu, the girl who had left Yinzhou quietly.

Henry frowned and looked at the person in his arms. "Why are you in such a mess?"

Her hair was sticky and her clothes were a little tattered.

"I..." Amity pursed her dry and cracked

lips. She was about to say something but stopped on second thought.

At this moment, behind Henry, there was a scolding sound.

"B*tch, I'll let you run. I will break your legs when I catch you. Where are you going?"

Henry turned his head and saw three strong men walking towards him with an evil look on their faces.

"Are they looking for you?" Henry asked Amity.

"Yes." Amity nodded timidly.

"Did you do anything wrong?" Henry asked again.

Amity shook her head slightly, with fear in her eyes.

Seeing that Amity denied, Henry smiled and said to Wade, "Break the legs of these

three people."

Wade nodded. Without saying a word, he went straight to the three people.

"Boy, what the f*ck are you doing..." Hearing Henry's words, the three strong men were about to scold when Wade walked up to them and waved his hand knives at them. All of a sudden, their vision went black and they fell to the ground.

The three men, each of whom weighed at least 90 kilograms, were all strong men. Wade grabbed their collar and easily dragged them to the back alley of the hotpot restaurant.

A minute later, Wade clapped his hands and walked out.

"Boss, let's go, we're going to eat hotpot. Just smelling the food makes me so hungry." Future stood at the door of the restaurant and greeted.

"Okay." Henry nodded and said to Amity, "Let's go. Let's eat first and talk while eating."

"Okay." The Amity nodded.

When they entered the hotpot restaurant, Wade had already booked a private room. They ordered some dishes and soon the dishes were served on the table.

Amity looked at herself. She was so dirty. She sat there and didn't dare to get chopsticks.

"I've called someone to bring the clothes here. They should be here soon. Sister, don't be shy. You're my big brother's friend which means you are our friend. Come on." Future put a piece of boiled meat in the bowl in front of Amity.

"That's right. Let's eat first. What's more important than eating?" Wade also chuckled, reached out his hand to wipe the

ash on the ground, smeared it on his face, picked up a piece of meat, and ate it.

Henry rubbed the head of Amity. "Girl, eating is the most important thing. Come on, eat quickly."

After Henry finished speaking, he stuffed the chopsticks into Amity's hands. "If you don't eat, we won't eat either. We will be hungry with you."

Amity raised her head and looked at Future and Wade who had already put the chopsticks down. Her eyes suddenly turned red and tears flowed down. She stood up and bowed deeply to Henry and the other two. "Brother Henry, thank you."

"All right, sit down and eat. After you finish eating, put on the clothes and become a little beauty again." Henry smiled slightly, he took Amity's arm and made her sit down.

Amity picked up the chopsticks and put the boiled mutton from the bowl into her mouth.

Henry found that Amity was really starving. She was eating extremely fast which made Henry very puzzled. He wondered what this girl had gone through. She had not left Yinzhou long time ago, and she still had a deposit of one million yuan as a reward. Even if it would cost a large sum of money to treat her father, she should not be in such a bad condition.

Amity also realized how she was eating. She looked up at Henry with embarrassment and said, "Brother Henry, do I eat too fast?"

"Not at all. Eat quickly, or you won't be able to grab any food!" Henry said, picking up a big bowl of meat and stuffed it all into his mouth.
