

Chapter 589

Of course, this kind of reversal was not easy to do. If it weren't for Henry who had been helping Spring residential home for a long time, and if it weren't for him who had looked for the foreman, and if it weren't for him looking for someone to investigate the director after he had left Yinzhou University, all those videos just now wouldn't have existed.

Just when someone was confident of winning, Henry began to deal with a lot of problems secretly.

The disturbance in front of them completely dissipated. The public relations team of Lins company began to exert its strength. The anger of the masses was transferred to Zhao's Group. Some sensitive reporters also went to Zhao's Group.

"Henry, I'm sorry to bother you." Dean Cui smiled at Henry and held Lisa's little hands. "Let's go back."

"No, I don't want to go back." Lisa pouted, shook off Dean Cui's hand and ran to Henry's side. She hugged Henry's calf and said, "I want to stay with my daddy. I need my parents."

Dean Cui pretended to be a little angry. "Don't make trouble! Go back with grandma."

Lisa's eyes suddenly turned red, and tears flowed down her eyes. "No, I don't want to go back, and I want my daddy and mommy."

"You're disobedient, aren't you?" Dean Cui walked up to Lisa and patted her on the back. "Come back home with

grandma."

Lisa pursed her lips, and her eyes were sparkling, she started crying, "No, I don't want to go back...I...I..."

As she sobbed, her small body, which was only one meter high, suddenly shook back and forth. Her footsteps became weak, and her little face was pale. Her arm that was holding nervously Henry's calf suddenly loosened and she fell to the ground.

Henry was quick-witted. He hurriedly bent down and hugged her, so she didn't fall to the ground. When he looked again, he found that her eyes were closed and her face was very pale. She had already fainted.

"What... what's going on? Lisa, Lisa!" Dean Cui looked anxious and shocked.

Henry reached out and put his hand on Lisa's pulse. He frowned and said, "Dean Cui, does she have any heart problems?"

"I... I... I don't know." Dean Cui's cloudy eyes were full of tears. Every child in Spring residential home was like her own child. A three-year-old girl suddenly fainted, which made her panic.

"Secretary Lee, get someone to prepare the car. Let's go to the hospital!" Sylvia shouted at Cathy beside her.

"It's too late! Honey, give me your car key." Henry shouted anxiously.

Sylvia did not hesitate at all. She took out the car key and handed it to Henry.

Henry took the car key and did not delay for a second. He carried Lisa and ran out. As he ran, he shouted,

"Honey, you can come directly to the hospital with Dean Cui!"

Sylvia's car was parked in front of the company's entrance. Henry got in the car and started it in one breath. The engine roared and drove fast on the road.

It took Henry the shortest time to arrive at the hospital. During all of this, Sylvia had already notified President Ma.

Before Henry's car entirely stopped, President Ma rushed to the entrance of the hospital with his men.

When Henry handed Lisa to the doctor, he breathed a sigh of relief.

President Ma immediately arranged for people to check her conditions.

A few minutes after entering the hospital, President Ma had the results and made Henry feel at ease.

It was just a lack of oxygen in the brain that caused her to faint. The reason for the lack of oxygen was that Lisa had congenital heart disease. The emotional stimulation was likely to cause the heart to stop abruptly, and the human body's function would decline.

More than ten minutes later, Sylvia and others arrived.

At this time, Lisa was lying on the bed. There was nothing wrong with her body, but she was still unconscious. Looking at the little girl's round pale face, frowning brows, and the tears on her face, made people feel sorry for her from the bottom of their hearts.

"Honey." Sylvia gently called Henry outside the ward. Her voice was so low because she was afraid of disturbing

Lisa.

Henry pointed outside the door, covered Lisa with a quilt, and went out with Sylvia.

Dean Cui and Jenny stood outside the ward.

"Henry, how is she doing?" When Jenny saw Henry coming out, she asked anxiously. Lisa called her mother, so she was also treating Lisa as her daughter.

"This is the report. You can see it." Henry handed the report that President Ma had just given him to Jenny. Then he patted on Dean Cui's shoulder and comforted her, "Dean, she's okay."

Dean Cui's face was full of self-blame.

Jenny and Sylvia looked at the words "congenital heart disease" in the report and couldn't help but open their mouths.

The heart is the most complicated part of the human body. Even if the technology is so advanced now, it can't completely simulate the human heart, which is the foundation of each person.

When the two women saw the report, they looked at each other almost at the same time and shook their heads. Then they quietly put the report away and didn't tell Dean Cui. Both of them were afraid that Dean Cui couldn't bear it.

It was the most unfortunate news that this little girl, who had just starting to explore this world, was possessed by such a severe illness.

They sat on the bench outside the hospital.

Henry looked at Dean Cui and asked, "Dean Cui, what's

the matter with Lisa?"

"Alas." Dean Cui sighed and shook her head. "Henry, you also know that people often come to Spring residential home to adopt children. Yesterday, after Keith got adopted, Lisa started shouting that she wanted to find her parents. That's why I took the kids out today. Who on earth could know she would run into your company? The kid is smart and remembers what you and Jenny said."

Henry nodded silently. "Lisa and Keith have been a good friend since they met. It's normal for her to feel sad when she saw that he got parents."

Sylvia pursed her lips. Through the window of the ward, she saw that Lisa had been lying on the bed. Since she was a little girl, she had no mother to take care of her. She knew how much Lisa had suffered. Fortunately, she still had a father. But what about these children? They had no one to rely on!

After looking at Lisa's pale face and thinking of the scene when she hugged Henry's calf and called him daddy in the company, her heart was touched in the softest place-motherhood.

Taking a deep breath, she looked at Henry and said, "Honey, why don't we adopt her?"

"Ah?" Henry was surprised.

Adopting a child was not a simple thing. Once they adopted, it meant that they had to be responsible for the child's life. It was not only about the economic situation. People needed to be emotionally ready.

Sylvia was a healthy woman, so was Henry. They could have their own children. Ninety- nine percent of the

people would not be able to carry on with the adoption process because it required a lot of effort.

that it could play a role and make the Conqueror afraid.

Chapter 590

"Honey, don't be impulsive." Henry said. Although he liked children very much, adopting kids should be a mutual decision.

"No." Sylvia shook her head and stared at Henry with her beautiful eyes. "You know, I am not impulsive. Lisa likes you very much, and she likes President Qin. Since we live together, we can adopt Lisa. Are you afraid that two women can't take care of a child?"

Henry was silent and didn't say anything. If he wasn't married, he might choose to adopt Lisa without hesitation. But now, he had a family and had other considerations. The most important thing was that he didn't want Sylvia to feel wronged. It was a difficult choice.

"Honey." Sylvia took Henry's hand and pointed to Jenny's pocket.

Over there, there was Lisa's report.

Henry took a deep breath and grabbed Sylvia's soft hand. "Honey, thank you."

"Don't thank me. I like children very much anyway." Sylvia said with a smile, "And in this way, grandpa doesn't need to urge us."

Dean Cui heard what they said and looked at Henry and Sylvia.

"Henry, you and your wife are all good people."

Henry smiled slightly and didn't say anything. He just

grabbed Sylvia's hand tighter.

More than 20 minutes later, Henry suddenly received a message. He took out his mobile phone and looked at it. He said to Sylvia, "Honey, please stay here and take care of Lisa. I have something to do, and I have to go now."

"Okay." Sylvia nodded and looked at Henry. "Be careful."

Henry left the hospital, looked around, and walked toward the suburbs.

Henry had been watching the movements of Zhao's Group closely. Just now, he received the news that Zhao's Group had acted and gathered its people.

He had almost thought of the action that Zhao's Group might make. Zhao's Group could not help but do something to him, but they could not be too direct. Today, there were so many media reports about Zhao's Group. According to the things they had done before, it was logical that Zhao's group would take action. What Henry wanted to do was to give Zhao Group this opportunity do something to him.

Henry noticed when he went out of the hospital that there were at least five groups of people around watching his whereabouts. Those people thought that they hid very well, but they couldn't escape Henry's eyes. In his eyes, their hiding methods were basic.

He walked leisurely on the road, and several groups of people followed him.

The place Henry chose was a waste factory in the industrial park. The previous battles with the people from Toyobas and the people from Viper Rose were all held in this place. Henry was very familiar with this

terrain.

This abandoned factory had neither been demolished nor developed, so almost no one would come. When Henry arrived here, it was already noon.

The sun was hanging high in the sky.

Henry suddenly stopped. He was surrounded by dilapidated factories, and the roads were very narrow. The roads were uneven, and even the manhole covers were missing. The things that could be moved had been moved away.

At this time, there were more than 100 people hiding in the dead corners of these roads.

President Zhao stood in a corner closest to Henry with a crutch in his hand. He looked at Henry in the middle of the road with a smile on his face.

"Second Master, what are we going to do?" The young man in black stood next to President Zhao and asked in confusion.

President Zhao sneered and said, "He took the stone from me and ruined my enterprise. What do you think we should do?"

President Zhao pinched the crutch in his hand heavily. "The Master of the Su Family? He's just so-so. If he's not related to the island, I can kill him at will!"

"Really?" A voice with doubts sounded behind President Zhao.

President Zhao suddenly turned around and saw Henry standing behind him. This scene made President Zhao break out in a cold sweat.

"It's impossible. You were..."

President Zhao looked at the middle of the road, and the "Henry" he saw down the road suddenly turned around. His clothes and walking posture were exactly the same as Henry's, but his face was completely different. He was standing on the road with a black ghost mask.

President Zhao looked at Henry incredulously. "How is this possible? When did you change?"

"Long time ago." The corners of Henry's mouth curled up. "Your Zhao's Clan is just so so-so."

"How could you know about the clans?!" President Zhao's pupils suddenly shrank. "You're just the Master of the Su Family. How could you know..."

"Who told you that I am the master of the Su Family? He has been to Radiant Island, hasn't he?" Henry looked at the young man in black next to President Zhao.

When he was on Radiant Island, Henry had seen this young man in black. At that time, he did not know what the young man in black was doing, but now, he understood.

The young man in black went to Radiant Island. Originally, President Zhao wanted to see the attitude of the island.

However, everything changed when Cesia appeared. The young man in black, who had been contacted by her, came back with another idea.

Henry thought that since the young man in black had come to Radiant Island, he already knew his identity. Now Zhao's Group still did mess with him, did it mean

that Zhao's Group was going to start a war with Radiant Island?

The young man in black beside President Zhao suddenly moved his body and looked at Henry. At this moment, his eyes seemed to be much clearer. When he looked at his surroundings again, the young man in black was stunned for a few seconds, and then his face was full of fear. His teeth were trembling. "Second... Second... Second Master, he... he is..."

The young man in black reached out and pointed at Henry. He could not even speak clearly. He swallowed hard to get rid of the fear in his heart.

"He's... He's the Conqueror!"

It was the young man in black who screamed.

"What!" President Zhao's body shook. "The Conqueror, the owner of Radiant Island!"

An intense fear rose in President Zhao's heart. The clan was not afraid of Radiant Island, but he had not reached the level of returning to the clan yet. He was no match for the island at all! The people he brought with him were definitely no match for the Conqueror!

President Zhao held back his fear. He finally understood how this man knew about the clans. With the strength of Radiant Island, he had almost reached the threshold of the clan.

President Zhao took a deep breath and said, "Since you know I'm from the Zhao Clan, what do you want to do? Do you want to start a war with our Zhao Clan?"

President Zhao could only mention the clan. He hoped

leader of Lins Group. How could she have such a girl's temperament?

Chapter 591

President Zhao's threat did not affect Henry at all.

President Zhao couldn't have imagined that Henry had personally witnessed the destruction of a clan. In the beginning, the idea of the clan had a significant influence on Henry. Henry really didn't expect that a small village could make the 4th chieftain show up in person. But with the power of the Li family of Longxi, it was possible.

But when he learned about the clans, Henry found that the Li family of Longxi was the strongest clan. Other clans thought they were as powerful as gods. The Tang clan, compared with Radiant Island, only had a deeper foundation. In terms of strength, they were really not as strong as the people from Radiant Island.

Henry looked at President Zhao and smiled slightly. "So what about the Zhao Clan? Sooner or later, I will bury the Li family of Longxi, and your Zhao Clan will be destroyed first. Action!"

As soon as Henry finished his words, screams were heard in every corner of the area.

When President Zhao was leading his men to surround Henry, he did not notice that Henry's men had already surrounded them.

One after another, screams rang in President Zhao's ears. He no longer looked calm like before, nor was he in control.

When he knew that the enemy he was facing was not as

simple as the Lins or the Su Family, his pride was shattered.

It was Radiant Island! When the clans were in the shadows, and when the Qi was declining, Radiant Island was the overlord of the whole underground world!

Who was the overlord?

The one who was worshipped by everyone!

This was the status of Radiant Island! This was the status of the Conqueror!

President Zhao looked at the young man in black beside him.

The young man in black was also in great fear. His whole body was trembling. Everything that had happened since he came back from Radiant Island kept running through his mind.

"Why?" President Zhao asked the young man in black. He didn't understand why this man who had been with him for so many years suddenly brought fake news to him.

"It's not me, it's not me..." The young man in black shook his head. "Second Master, it's that woman, it's..."

Before the young man in black could finish his words, a bright sabre flashed and cut his throat.

There was a look of unwillingness on the young man's face. He did not explain it clearly to President Zhao before he died.

"The Conqueror, you will pay the price for this!" President Zhao tightly gripped his crutch, and then suddenly pulled out a dagger from his crutch and stabbed at Henry.

Henry didn't even look at the dagger in President Zhao's hand. An invisible air shield covered Henry's body. The dagger in President Zhao's hand began to bend before it touched Henry's body.

Another cold light flashed, and President Zhao's head rolled aside.

Blood sprayed, but it did not fall on Henry's body. It all fell to the ground less than one centimetre away from Henry's body.

Henry turned around and didn't look at President Zhao anymore. He said, "Go and find out where the Zhao clan is! Inform everyone, be ready, others should know that Radiant Island is not a place they should mess with. It wasn't before, and it won't be!"

A desire to kill gradually spread in Henry's heart. He didn't know how long it had been since he had had the impulse to fight.

At this moment, in Future's laboratory on Radiant Island, a red crystal was slowly deepening the colour, flickering bright and dark. No one had seen such a change.

On a coast far away from Radiant Island, a silver-haired beauty was lying leisurely on the beach, enjoying the sunshine brought by nature. Her figure was perfect without any flaws. Even if the best model in the world stood in front of her, she would feel ashamed of herself. Her long legs seemed to be God's best gift.

The woman's slightly closed eyes suddenly opened, which were as bright as stars. She looked at the boundless sea in front of her. "Hey, it's been a few days. Brother Henry, you've really restrained yourself. You are

not able to make people scared like before."

People had only explored one percent of this vast planet. The mysterious ocean, the geocentric area, and so many mysterious death areas were all places that couldn't be touched.

In the distant southwest, in the ice and snow, a mysterious research centre hid from the eyes of any organization in the world. It was built here and hid under the glacier, isolated from the world.

There was only one purpose of this research centre-analyze a red crystal that was only three centimetres big. People here called this red crystal the demon fragment.

According to legend, the demon fragment could open an unknown door. The legend of the ancient times was recorded, and it was the only guide for all human beings to follow the trace of ancient times!

This small piece contained great power. In this research centre, every scientific researcher was very careful, because they heard that the explosion of it could destroy half of Antarctica! Its power was even more horrible than nuclear weapons!

No one could see the world clearly. The ordinary people were working and living trying to buy cars and houses. The rich people were thinking about how to change the city, and the government wanted to change the pattern of people's livelihood, wanted to be well-known for thousands of years.

And some people, what they wanted to do was to change the world!

In Yinzhou, Henry solved the problem with President Zhao and others, and he called Sylvia. Sylvia told Henry that Lisa had woken up, and she brought her back home. Dean Cui took the children back to Spring residential home first.

After hearing the news that Lisa had woken up, Henry was completely relieved. Although he knew that it was nothing serious, it was always worrying to see a child unconscious. It had nothing to do with whether Henry understood medicine or not. It was totally in human nature.

When Henry returned home, he saw that Lisa was sitting on the sofa with Sylvia. Between them, there was a set of chess.

"Haha, auntie, you lost again!" Henry heard Lisa's laughter.

"Don't call me auntie. Call me mommy." Sylvia puffed out her mouth and looked at Lisa.

"No." The little head wagged like a rattle. "You're not my mommy, no."

"I am!" Sylvia's tone was very sure.

"You are not!" Lisa, she also pouted her mouth and stared at Sylvia with her big eyes.

"I am. From today onwards, I am your mommy."

"You're not!"

"I am!"

Henry stood at the door and listened to the conversation between the big and small woman. He covered his head. It was usual for Lisa to be naughty. But his wife was the
