

Chapter 698

When Dr. Lance and the western doctor saw they got involved in this, their faces turned extremely pale.

Especially Dr. Lance. His heart trembled. How could this Chinese man know about the medicine?

Red Hair waved his hand, and a few soldiers immediately walked out and rushed to various places of the clinic.

Two minutes later, two Western nurses were brought over by two soldiers. The two nurses were in a panic. As soon as they came over, they pointed to Dr. Lance and said, "It's him. He told us to give the patient digoxin."

Digoxin!

The word uttered by the nurse made the doctors of Chinese Medicine present cry out in surprise. Digoxin and most of the Chinese herbal medicine had a strong rejection. If taken together, they would easily produce toxins.

"Did the patient take digoxin orally or by injection?" Henry asked deliberately.

"An injection, an injection," the nurse replied again and again.

Henry smiled and said, "The patient's brain was filled with fluid, and the pressure of the nerves made him unconscious. During the treatment, we used the two types of medicinal herbs, fructus amomi and costustoot, as the supplementary medicine to prevent the patient's damage caused by the compression of the stomach. When the fructus amomi and costustoot are combined with digoxin, they will produce a highly toxic poison. I think this is the reason why the patient has just been

unconscious, right? How can an old man over 60 years of age withstand this kind of poison?"

Dr. Lance's face changed, and then he stuck out his neck and said, "How could I know that you would use fructus amomi and costustoot?"

"Ha, ha." Henry smiled. "It seems that you haven't figured out one thing yet."

"What?" Dr. Lance asked subconsciously.

Henry stretched out a finger and said, "I'm not trying to reason with you now. I just need to know who poisoned him."

"You!" Dr. Lance's face changed sharply. "You can't do this. You don't have any evidence. If you want to talk about poisoning, I first gave the patient a medicine, and then you, Chinese doctors, poisoned him!"

"Doctor Lance, is there something wrong with your words?" Lewis said. "I'd like to ask, what kind of symptom did this patient have? Was it necessary for you to treat him with digoxin? Moreover, by injecting the digoxin."

Dr. Lance was stunned. He couldn't answer this question, because digoxin was injected in order to poison the patient. He couldn't find any excuse. He didn't expect that this matter would be exposed!

"Well! You are a beast!" The patient's family member rushed forward and punched at Dr. Lance's face. "You said that the doctors of traditional Chinese medicine were wrong. In the end, it turned out that you deliberately poisoned my father! If it weren't for these doctors from the East, my father would have been killed by you. You are not worthy of being a doctor!"

The crowd of onlookers were also very angry.

Red Hair waved his hand and did not speak. Two

soldiers immediately came out and held Dr. Lance.

Dr. Lance's handsome face turned pale. He turned his head to the western doctor and said, "It's you! It's all you! It was you who asked me to do. If it weren't for you, this wouldn't have happened!"

"Hey." Red Hair laughed. "We almost missed one. Take him. He should be dealt with according to the planned treason crime."

Several soldiers came up and pressed on these people's heads, dragging them down directly. Dr. Lances cried for mercy, but no one paid any attention to him.

"Doctor, I'm sorry. I blamed you before." The patient's family member walked up to Henry and sincerely thanked him.

President Ma's and others' moods were full of ups and downs. Originally, they thought that the patient was dying. With the arrival of Henry and his medical skills, they were amazed. However, when the patient's case had just ended, in order to win this exchange, Dr. Inner came out and wanted to arrest Henry. Unexpectedly, Henry had a friend who was respected by the whole of Europe and solved the problem in front of them.

Moreover, the surgery just now was recorded because the emergency room door was not closed. The magical needle technique had been posted on the Internet. At this time, Chinese medicine became extremely popular.

"Boss, I have something to tell you." Red Hair whispered in Henry's ear.

Henry nodded and asked President Ma, "President Ma, are we done here?"

President Ma nodded and said meaningfully, "Yes, there are only three hours left. Magical doctor, if you have something to do, go ahead and do your business."

"Okay, you don't have to wait for me when you decide to return to China. I'll go back myself." Henry said to President Ma, then waved to Lewis and others, and left the clinic with Red Hair.

Outside the hall, four beautiful western women with long legs and big eyes were waiting beside the car. When Henry and Red Hair came over, the four opened the door in a hurry and bowed respectfully.

Looking at the pure gold car in front of him, Henry said, "To be honest, I really don't want to sit in your carriage full of sins."

"Let's go, Boss. There's some fine wine that you love to drink." Red Hair stood to the side.

Henry shook his head and got in the car.

Seeing Henry get in the car, Red Hair did the same.

The four beautiful women in front were all shocked. Who was this Chinese man? Even the king had to wait for him to get in the car before he got in.

After getting in the car, Henry and Red Hair sat on both sides of the car.

Red Hair took out a bottle of good wine worth millions of yuan from the secret compartment, unscrewed the bottle cap, and handed it to Henry.

Henry took the wine bottle handed over by Red Hair, raised his head and took a sip, asking, "Tell me, what's the matter?"

"Boss, don't be too upset after hearing this news." Red Hair looked at Henry's face.

"Go ahead." Henry's eyes were full of doubts.

"Zhu family..." After saying these two words, Red Hair deliberately noticed Henry's expression, and then he slowly said, "The Zhu family has been destroyed."

"Bang!"

A cracking sound rang out.

The bottle in Henry's hand was crushed after he took a sip of the wine that was worth millions of yuan. The wine covered expensive carpets in the car.

At this moment, Red Hair only felt that the temperature around him had dropped more than a dozen degrees, making him feel as if he had fallen into an ice cellar.

A few seconds later, the momentum that made Red Hair fear faded away.

Henry took a deep breath and asked, "When did it happen?"

"The day you went to Yun Province, I got the news today." Red Hair was relieved when he found that Henry was not as angry as he expected.

Among the several ancient kungfu families in China, the ones who had the best relationship with Henry were the Zhu family and Wilbur Zhu.

"Do you know who did it?" Henry asked in a hoarse voice.

"The Zhu Clan, the ninth clan on the list."

Chapter 699

Henry listened to Raid Hair and was trying to calm down for a long time before he actually succeeded.

"Do you know the reason?"

"No." Red Hair shook his head. "But boss, I've heard a piece of news. Recently, there have been hidden forces in the world that are attacking the top underground forces. But in China, the Zhu family was the first to be attacked."

Henry frowned and looked out of the car window. "How many forces in China know about this?"

"No one knows for the time being. The other party has hidden this information very well. It can be said that the Zhu family is completely annihilated. That's why we got the news just now."

Henry looked out of the window quietly. After a long while, he said, "Arrange a plane to take me back to China."

"Where are we going?"

"To Yinzhou first." Henry took a deep breath and said, "Tell everybody to get ready. When I call you, I want everybody to gather, everybody!"

"Boss, what are you..." Red Hair opened his mouth wide.

"Old Zhu and I are old friends after all. Then the Zhu clan..." Henry thought of those mysterious men and women who suddenly appeared in the Zhu family. "If the Zhu family is completely destroyed, there must be a clan that will accompany them. After all, the Zhu family has been following Master Lu from the beginning."

Red Hair nodded solemnly. "I understand."

Henry tapped a simple folded table in the car. "The clan came out openly this time and dared to destroy the Zhu family, which means that something that they are afraid of has disappeared, or that something that they want at any cost has come out. Otherwise, according to my understanding of the clan, they wouldn't appear like this and they wouldn't suddenly attack the Zhu family."

"Boss, do you mean that the Zhu clan has destroyed the Zhu Family to probe someone's attitude or the Zhu Family knew something that the clan didn't want others to know?"

Henry nodded. "The latter is more likely. The clans have been hidden for so many years. Even if they want to test someone's attitude, they will not destroy the Zhu family at once. It seems that the old man Wilbur has never given up."

At that time, Wilbur found Henry and told him about the existence of Qi. It was also at the bottom of the Zhu family's ancestral tomb that Henry saw that sword painting and understood the horror of Qi for the first time.

At that time, Wilbur told Henry that a mysterious force was ready to make a move. Wilbur was also the one who knew these things best among all ancient kungfu families.

Leaning on the seat of the car, Henry closed his eyes and whispered, "Old Zhu, oh Old Zhu, what did you know that made the clan take this kind of action?"

Half an hour later, a private plane belonging to the European royal family flew up to the sky and went straight to Yinzhou. It would take a total of 16 hours.

The time difference between Europe and China was six hours.

On the way, Henry was thinking about what kind of thing could make the Zhu clan suddenly make such a big move against the ancient kungfu family that was ranked ninth!

"Back then, why did the Zhu clan deliberately mislead me to hide the true power of Qi? Also, they have a keepsake of Master Lu. What kind of connection do they have with Master Lu?"

Layers of mists surged into Henry's mind, causing him to feel a wave of frustration.

After flying for nearly 16 hours, Henry appeared at Yinzhou Airport at one o'clock in the afternoon.

Henry took a taxi and went straight to Lins Group. This time, Henry had been sure that he would conflict with the Zhu clan. Before that, Henry first needed to solve Sylvia's safety problem.

Different from the ordinary underground forces, the strength of the clan was mysterious. Henry still didn't know what would happen in this battle, but he had to fight.

First, the friendship between Henry and Wilbur, the relationship between Wilbur and Master Lu, or the identity of Master Lu before his death, could not allow Henry, the only descendant and guardian of the ancient Chinese martial arts, to sit idly by.

Secondly, Henry himself also wanted to figure out the reason.

The appearance of the clans brought great pressure to Henry. The attitude of the clans was not clear for the time being. Although Henry had already eliminated the Zhao and Huang clan, he did not think that all the clans were enemies. Of course, he would not treat those clans as friends.

To put it bluntly, the relationship between friends and enemies was just a change of interests.

If the Tang clan was willing to share the method of using the Spiritual Stones with Henry, they would be friends.

As for the Huang clan, they wanted to compete with Henry for that stone mountain, so Henry had to destroy them.

In the adult world, the differences between friends and enemies were just that simple.

Henry sat in the back seat of the car and looked out of the window, thinking about how to protect Sylvia.

A large bulldozer came into Henry's sight.

"Stop the car, driver!" Henry suddenly shouted.

The driver suddenly braked and parked the car.

Henry directly threw out a hundred yuan. Without waiting for the driver to give him the change, opened the door and rushed out.

On the way from the airport to the Lins Group, they just passed by the Spring Residential Home.

Now, Henry was standing in front of the Spring Residential Home. The place of this welfare centre had already been turned into ruins. The large bulldozer was dismantling the ruins.

Henry would go to the small wooden pavilion when he was upset before, but now it had been razed to the ground, and even sawdust could not be seen.

Such a scene completely stunned Henry.

"What... what's going on?" Henry murmured as he looked at the original position of the wooden pavilion.

That wooden pavilion was made by Henry and his mother. It could also be said that it was the place where Henry could feel his mother was still around. At this

moment, it was destroyed by the bulldozer.

Henry looked aside, where a sign with the words "Kai Construction" was put.

"Kai Construction is just a subordinate of the Lins Group, isn't it?" Henry was full of doubts. "Why would the Lins Group send people to tear down the Spring Residential Home? Did someone pretend to be a member of the Lins Group?"

Henry walked over and saw a construction team standing there.

"Which company are you from? Who asked you to demolish it?" Henry shouted before he came to the construction team.

"Where did you come from? Who let you in?" A leader of the construction team scolded Henry when he saw him.

"Let me ask you! Who asked you to tear it down?!" Henry's voice increased. The destruction of the Zhu family had already made him feel very bad. Now, when he got off the plane and saw such a scene, his heart was in a terrible state. If it were not for the restraint of the mature reason, Henry would definitely do something out of line now.

"Who are you? This is the construction site, get out!" The construction team member scolded.

Henry clenched his fists.

"Mr. Zhang, Mr. Zhang." A voice rang out from the side.

Henry turned his head and saw Secretary Lee striding towards him.
