

Chapter 885

Lam looked at Hansraj, who was lying on the ground, and her body trembled slightly unconsciously.

"Well, they couldn't see what had happened here, but it shouldn't be a big deal for you, right?" Henry whispered to Lam.

Just now, Henry deliberately asked Lam to cover Daisy's and Amy's eyes, especially to make her see this scene happen.

The things that had happened before had been influencing Lam all the time. This time, Henry deliberately let Lam see these again because he wanted to give her a mental impact. He specifically said that it was not a big deal for her. This was an encouragement for Lam.

Indeed, after Henry said this, Lam's trembling body gradually calmed down.

"How is it? Is the injury on your arm better?" Henry asked.

Lam slowly nodded and said, "It's almost healed. There are still some scars, but it doesn't matter."

"Well, wait for this summer. You have to show off your body and wear a bikini." Henry made fun of her.

Lam's pretty face turned red.

When Henry saw this, he smiled and said, "Okay, as their senior, you should give them a little advice. I'll leave first. Later on, if anything happens, you need to be smart. I can't appear in such a timely manner every time. If Daisy hadn't called me, I wouldn't have noticed."

Henry said deliberately.

"Sure." Lam nodded hard. "This time, it's all thanks to Daisy, because she wanted you to join us. Only after that, we heard that you were out of town."

Henry waved at Lam. He bent over, picked up Hansraj, who was lying unconscious on the ground, and walked out of the house.

In the research centre of Yinzhou.

Sylvia walked out of a laboratory in her white protective gear. She took off her helmet, swung her shoulder-length hair, and wiped the sweat from her forehead.

Frederic and Yvonne followed behind Sylvia and walked out together.

"Professor, your progress is a little slow." Sylvia walked to a tea table

and sat down, frowning.

"Haha." Frederic also took off his helmet and sat opposite Sylvia. He poured himself a cup of tea, took a sip first, and then slowly replied, "President Lin, it's not slow. It's just that I don't have enough funds. You should know that a lot of new materials are very expensive. We have to keep doing research, so consumption is undoubtedly huge."

"Professor, if I remember correctly, the last research fund was already 30 million, right?" Sylvia stretched out her finger and tapped on the table. "I've seen the report you gave me. It said that this research fund wouldn't exceed 20 million. It's now far beyond the amount you said at the time."

"Ha," Frederic said with a chuckle. "President Lin, our plan can't keep up with the changes. I thought it was just a simple research, but the research is far more difficult than I expected. 30 million isn't enough at all!"

Sylvia looked at the smile on Frederic's face and disgust flashed in her eyes. "Professor, how much more research funds do you think we need now?"

Frederic smiled and stretched out a finger. "One hundred million! One hundred million. I promise that the research project will be successful."

100 million!

Sylvia's face was a little dark. She did not lack a hundred million, but she could not let others ask her for money just like that.

"Professor, a hundred million yuan is not a small amount for our Lins Group. How about this, I'll report it again and see if they can arrange for two more professors to come over so that we can negotiate it together?" Sylvia said.

Frederic's face changed slightly, and he looked unhappy. "Oh? President Lin, do you mean that I can't do it?"

"That's not what I meant." Sylvia shook her head. "It's just that my company really can't pay so much money in one go. I can only think of other ways."

Sylvia said the word report with the purpose of threatening Frederic. If the higher-ups knew that Frederic needed so much research funds, they would definitely not turn a blind eye to it. However, it was not good for Sylvia either. If something like this happened, no one would be willing to come to the Lins Group to participate in that project. Although Frederic did not succeed, the Lins Group would suffer the

biggest loss.

"Haha." Frederic sneered and said, "President Lin, do you mean that I should spend less money?"

"Ah." Sylvia sighed and said, "Professor, now our Lins Group is short of funds. 50 million yuan is the best I can do now. Professor, you should work harder. Come on, let's see if 50 million yuan is enough. If it's not enough, our Lins Group can only give up on this project."

Sylvia's words made it very obvious what she meant.

Frederic pondered for nearly a minute before he said, "If the Lins Group is really in trouble, I, Frederic Qiu, will not force you. However, President Lin, if we don't have enough funds, we'll have to wait for a long time to finish the research."

"I understand." Sylvia nodded. She didn't give the money that the other party expected, but the other party had set a trap for her. Sylvia had already thought about it.

"Okay, we won't talk about money anymore." Frederic nodded. "But President Lin, I may leave these days. My nephew is about to graduate from college and his family has been urging him to get married. As his uncle, I have to help him. Alas, it's a pity that the person my nephew likes doesn't like him. By the way, the girl is also in Yinzhou. She seems to have some relationship with you. Her name is Daisy Xu. Do you know her, President Lin?"

Sylvia raised her eyebrows. "My younger sister?"

"Wow, she's your sister!" Frederic pretended to be surprised and continued, "What a coincidence! President Lin, since we're destined to meet, why don't you arrange for your sister to have a good chat with my nephew?"

"No need." Sylvia refused without thinking. "My sister is still young, and my family will not allow her to get married so early."

"Haha." Frederic laughed and said, "President Lin, this girl will get married sooner or later. After my nephew graduates, he has to follow me. Does she look down on my nephew? If my nephew knew her attitude, I really wouldn't know how to comfort him. But it's said that travelling around the world is a good way to release troubles. At that time, I'm afraid that I will have to accompany him."

There was a smile on Frederic's face. His words were full of threats, and his meaning was very clear. "If you, Sylvia Lin, don't agree, I, Frederic Qiu, will leave. I don't know when I will come back."

The loathing in Sylvia's eyes grew even stronger. Just as she was

about to speak, she heard a voice coming from the distance.

"No, that's not necessary. I don't think your nephew is in the mood to talk about love now!"

With the sound of footsteps, Henry walked in from the entrance on the side and threw Hansraj, whose limbs were twisted, in front of Frederic, as if he were throwing rubbish. ³

Chapter 886

When Hansraj, whose limbs were twisted, was thrown in front of Frederic, Frederic was completely stunned.

Sylvia furrowed her brows. She had experienced the great war of the clans and had personally witnessed someone die in front of her. Such a scene was not too difficult for her to accept.

"This is your nephew. When he wakes up, you can ask him if he's in the mood to talk about love," Henry said lightly, pulling a chair and leaning on the back of the chair, crossing his legs.

"Honey, this..." Sylvia's eyes were full of doubts. She didn't know when Henry came back, nor did she understand why Henry suddenly brought Frederic's nephew here.

"Ugh!"

Yvonne, who was sitting next to Frederic, immediately felt a bitter taste in her mouth and retched.

Frederic's body gradually began to shake. He slowly raised his arm and then put it down. Looking at his nephew in front of him, his arms and legs were twisted, which filled his heart with deep fear and anger.

"What did you do?" Frederic's voice was hoarse, but he raised it up again, "What did you do?!"

"Your nephew tried to drug Daisy Xu, so I broke his four limbs." Henry grinned. "How is it? The shape is good, isn't it?"

"Drug!" Upon hearing this, Sylvia suddenly clapped her hand on the handle of the chair. She instantly stood up and asked Frederic, "The Qiu Family, what do you want to do?"

In terms of interests, Sylvia could still negotiate with Frederic. But now it was related to her family, Sylvia naturally would not be nice to him.

Frederic's mouth was trembling. "You made my nephew look like this just because he tried to drug her?"

"Uh..." Henry scratched his head and said, "If you are not satisfied, I will change his shape."

"I'm going to sue you!" Frederic threw the cup on the tea table to the ground and smashed it. "I'm going to sue you!"

"Okay." Henry nodded and snapped his fingers.

As the sound of Henry's finger rang out, a few policemen walked in, led

by Captain Richard.

"This man tried to poison my sister-in-law. How should I deal with him?" Henry pointed at Hansraj, who was on the ground and asked Captain Richard.

Captain Richard stood upright and replied loudly, "Of course he should be punished severely!"

"Okay, take him away." Henry waved his hand.

Captain Richard immediately ordered someone to carry the unconscious Hansraj away. Their legs were trembling as they carried Hansraj's body. After all, Hansraj's current appearance was too unacceptable.

"You're the policemen. He hit someone! You should arrest him, not my nephew!" Frederic shouted loudly when he saw the captors take Hansraj away.

"Your nephew is suspected of using illegal drugs. Mr. Zhang only did it in self-defence. If you are dissatisfied with our actions, you can complain at any time!" Captain Richard said to Frederic with a serious face. After that, he smiled at Henry and said, "Mr. Zhang, we will take him away first."

"Okay." Henry nodded. "Thank you for your hard work, Captain Richard."

"I am just doing my job!" Captain Richard waved his hand repeatedly. "It's our duty to arrest criminals and protect people's safety. This time, Mr. Zhang, thank you for helping us to punish this lawless person. We will send the gifts to your house."

After saying that, Captain Richard waved his hand and left with his men.

Frederic watched Captain Richard take the prisoner away. He pointed at Henry with trembling hands and shouted, "You! You! You are a snake! I'm going to sue you! I'm going to sue you!"

Henry shrugged indifferently. "Whatever."

"Just wait and see. President Lin, I want you to suffer! I'll make you regret what you did this time! I will not work with you on this project anymore!" Frederic glared fiercely at Sylvia and strode out of the door.

Just as Frederic walked to the entrance, several researchers also came in.

"Gee, Professor Qiu, it's you." The researcher outside the door greeted Frederic when he saw him.

Frederic looked up and saw the comer. The anger on his face

subconsciously decreased a lot. He said with a smile, "Professor Zhao, it's you. I didn't expect to see you here."

The person who greeted Frederic was Raedwulf Zhao. In the field of construction technology, he could be said to be No.1. Although Frederic was called a professor, he was not as good as Raedwulf. After all, Raedwulf's assistant's achievements were much higher than Frederic's. On normal days, even if he met Raedwulf's assistant alone, Frederic had to be respectful and did not dare to put on any airs.

Raedwulf chuckled and said, "Isn't President Lin doing a new project? I have nothing else to do, so I might as well join in. Professor, you're also here to participate in this project, right? We'll work together in the future. I hope that Professor won't dislike an outsider like me, haha!"

Hearing this, Frederic was surprised. "Professor Zhao, are you here to participate in this project?"

"Of course." Raedwulf nodded.

"This..." Frederic opened his mouth. Just now he said that he was leaving, making Sylvia unable to continue negotiating with him. And now, Raedwulf, the top talent in the science and technology field of China, arrived with his team. This scene was like a slap on Frederic's face.

"Professor Qiu, what's wrong?" Raedwulf looked at Frederic's unnatural expression and asked in confusion.

"It doesn't matter, Professor Zhao. I still have something to do. I'll leave now." Frederic said. He couldn't stay here any longer, so he had to leave first.

"Okay, then you attend to your own business first, Professor Qiu. I'll take a look at your research results. Is that okay?"

"No problem, no problem." Frederic quickly replied and then left as if he was escaping.

Yvonne had been vomiting non-stop. When she saw Frederic leave, she quickly suppressed the discomfort in her heart and followed him.

"Dear, is Daisy all right?" Seeing the two leave, Sylvia asked Henry with some concern.

"She's okay." Henry waved his hand. "Everything is okay."

"That's good, that's good!" Sylvia patted her chest.

"Come, my wife, let me introduce you. This is Professor Zhao. You're afraid that asking Future would make too much trouble, so I called her apprentice." Henry got up and introduced the man to Sylvia. "Professor

Zhao will work on the research in the future."

Sylvia hurriedly stretched out her hand to Raedwulf. "Professor Zhao, hello."

"Hello, President Lin. It's my honour to have this chance." Raedwulf bent over slightly, stretched out his hands, and took back his hand with his fingertips gently holding Sylvia's.

"Okay, Professor Zhao, I have to trouble you to supervise this project. My wife and I have something to deal with. If you need anything, you can directly tell the secretary," Henry said.

"Thank you, Mr. Zhang."
