

Chapter 887

Henry pulled Sylvia out of the research centre quickly.

"Dear, what are you in a hurry to do? Professor Zhao and the others have just arrived and are so tired. We haven't arranged a place for them to stay." Sylvia was puzzled and asked. She felt that Henry seemed to have something urgent to do.

"Honey, let me ask you a question." Henry stopped and turned to look at Sylvia.

"What's wrong?" Sylvia blinked her eyes and her long eyelashes fluttered.

"Do you think I'm a good person?" Henry asked.

"You..." Sylvia pondered for a while and looked up and down at Henry, "You're probably not a good person."

With a bang, Henry reached out and put his hand on his forehead. "Honey, what do you mean by saying probably not? You have to be sure."

"You are not a good person." This time, Sylvia shook her head firmly.

"All right." Henry sighed. "Since I am not a good person, whoever provokes me, I will certainly retaliate. Let's go. Get ready for a good show."

"Retaliate? Who are you taking revenge on?" Sylvia was puzzled as she asked.

"Of course it's that guy surnamed Qiu. I'm not happy with him. Honey, don't say that you don't hate him at all."

Sylvia rolled her eyes. "You've already beaten his nephew, what are you still trying to take revenge on him?"

"Answer me. Don't you want to see this show?"

"Yes!"

After Sylvia replied, the two of them looked at each other and smiled. She took Henry's arm and unconsciously quickened her pace as she walked towards the parking lot. At a glance, one could see that Sylvia had taken the initiative to pull Henry.

After getting in the car, Sylvia sat in the passenger's seat and looked at Henry. "Honey, what is the revenge you mentioned?"

"You'll know later." Henry drove all the way with Sylvia.

On the other side, Frederic and Yvonne left the research centre.

"Professor, what should we do now? Things have turned out like this. With the help of Professor Raedwulf, they don't need us at all! Your nephew, he..." Yvonne wanted to say something but stopped on second thought.

"Him?" Frederic's eyes flashed with a trace of haze. "He deliberately tried to drug others and was beaten. It's all his own fault!"

Today, Frederic had seen very clearly the attitude of Captain Richard. He knew that it was impossible for the police to be on his side. Frederic didn't think it was possible for him to fight against the Lins Group with his own connections.

And Frederic's biggest dependence was on the project. He had thought that he had caught the Lins' lifeline by getting his hands on this project. But with Raedwulf's appearance today, Frederic completely understood that the Lins did not need to rely on him to finish this project. This caused Frederic to completely lose the advantage of being able to threaten the Lins. Now, Frederic would not dare to go against the Lin Clan with his own strength.

As for Hansraj, of course, Frederic didn't want to be responsible for it.

"Then we..." Yvonne opened her mouth but didn't say what she wanted to say.

"I know what you want to say." Frederic turned back and stared at Yvonne. "This time we were supposed to share money in half, but after what happened this time, I have to pay for my nephew's medical expenses. I'll take seventy per cent. Do you have any comments?"

"Seventy per cent?" Yvonne frowned. "Frederic Qiu, it's your nephew's fault. What does it have to do with us? Don't forget, I've also signed the report this time. If anything happens, we'll take the responsibility together. Why would you take seventy per cent? That's impossible!"

"Then what do you want?" Frederic's eyes flashed with a hint of fierceness.

"I want fifty per cent!" Yvonne stretched out her hand. "Not a single yuan less. Otherwise, something will happen to both of us."

"Fifty per cent? I was the one who negotiated with the Lins the whole time. I'll give you forty per cent at most!" Frederic said, "At most forty per cent. If you don't agree, something bad will happen. I'm not afraid at all. That is more than 10 million. Yvonne, it's more than enough for you to live your entire life. Don't be too greedy!"

Frederic's eyes were fixed on Yvonne, with a fierce aura between his eyebrows.

Yvonne looked at Frederic's fierce eyes and stepped back subconsciously. "Four... forty per cent. But you have to give it to me immediately!"

"OK!" Frederic nodded. When he saw Yvonne giving up, he was relieved. Though he couldn't get more money, the

security fund and the research fund given by Lins Group were enough for him to live a carefree life.

At this moment, a business car with no licence plates suddenly stopped beside them. Before they could react, two big hands reached out and pulled them into the car.

Frederic was shocked. When he looked again, he found several strong men sitting on the left and right, all of whom were fierce-looking.

"Who... who are you?! Let us go!" Frederic roared.

"F*ck you, shut up!" A strong man slapped Frederic in the face.

This slap left Frederic dazzled and his big teeth loose. Frederic no longer dared to speak and just sat there. Yvonne, who was next to him, was so scared that she couldn't stop shaking.

The vehicle didn't stop until it reached a waste factory in the suburbs.

Frederic and Yvonne were dragged out of the car by two strong men.

"Get the hell in there, hurry up!" The strong man pointed at the entrance of the old factory and cursed.

"Big brother, I... I don't know you!" Looking at this fierce-looking strong man, Frederic's legs were trembling.

"You don't know me, but I know you!" The strong man pushed Frederic into the factory, and then said fiercely, "You are a famous professor, your life must be very valuable. Let's see if the people in this factory are willing to spend money on you!" After saying that, the strong man closed the factory door.

Frederic and Yvonne were locked up in the old factory, surrounded by an empty space. All the doors and windows had been welded with steel. They couldn't get out at all.

Looking at the completely welded doors and windows in this deserted old factory, Frederic and Yvonne started panicking. When did such a thing happen to them? How could they be kidnapped?!

In a high-end Chinese restaurant, Sylvia looked at Henry, who was sitting opposite her and sipping tea slowly. She said with a little anxiety on her pretty face, "Honey, didn't you say that you will let me see a good show? Why are we here?"

"Haha." Looking at Sylvia's anxious and embarrassed cute appearance, Henry laughed out loud. "Honey, don't worry. The good show will start soon. Keep an eye on your mobile phone."

"Phone?" Sylvia was puzzled. As soon as her voice fell, the mobile phone rang.

"Hello." Sylvia picked up the phone.

"President Lin, we've given your Lins Group a hundred million insurance fee. How do you do things? Why did Professor Qiu and Professor Mei get kidnapped?!" A voice filled with anger came from the other end of the line.

Chapter 888

Listening to the angry voice from the other side of the phone, Sylvia gradually smiled. Even she did not realize that unconsciously, she was more and more like Henry.

"Our people have already taken a plane to Yinzhou. President Lin, I hope that when our representative sees you, you will give us a satisfactory answer. Also, you must ensure the safety of Professor Qiu and Professor Mei!"

After finishing speaking, the person on the other end hung up the phone without waiting for Sylvia's reply.

The busy tone of "du du du" was heard from Sylvia's phone.

Sylvia put the phone on the table, looked at Henry, smiled and said, "Honey, I know what the show you were talking about is. Has it started already?"

"We can go there later. We have to give them some time to prepare." Henry picked up the menu and waved his arm. "Waiter, we are ready to order."

Nine o'clock in the evening.

The sky in Yinzhou had completely darkened, and the cold wind was whistling.

In front of the old factory in the suburbs, more than ten police cars stopped here. With the flashing police lights, many patrols had already surrounded a factory with loaded guns.

"You have been surrounded. Your only way out is to surrender. Put down your weapons!" Captain Richard held a megaphone in his hand and said loudly, "Release Professor Qiu and Professor Mei. You still have a chance. Don't make a mistake!"

"Haha!" In the old factory, there was a burst of sneer. "Let these two go, and we will survive? Let me tell you, immediately prepare 300 million cash and arrange three cars for us. All of you withdraw to one kilometre away. My patience is limited. If you still want to waste my time, I don't mind killing them!"

Beside Captain Richard, a middle-aged man in a white coat looked anxious.

"Captain Richard, what should we do? Professor Qiu and Professor Mei are rare talents in our centre. Nothing can go wrong!" A middle-aged man in a white coat said anxiously.

"We understand." Captain Richard's face was solemn. "But we've just observed that the kidnappers are a bunch of experienced kidnappers. They've sealed off almost all the possible spots for us to break in. We won't be able to break through within a short period of time and provide effective help!"

"This!" The middle-aged man in a white cloak looked embarrassed.

At this moment, an inspector ran over and said to Captain Richard, "Captain, President Lin and her husband are here. Should we let them in?"

Captain Richard had not spoken yet, but the middle-aged man, who stood next to him, hurriedly said, "Let them in!"

"Let them in." Captain Richard waved his hand.

The inspector who had delivered the message nodded his head and ran over with large strides. After a few dozen seconds, Sylvia and Henry walked over together.

"What's going on?"

"How could Professor Qiu and Professor Mei be kidnapped? They were fine this afternoon!"

Henry and Sylvia both looked anxious and asked one question. After finishing speaking, they looked at each other deliberately and saw a smile in each other's eyes. Then they secretly gave each other a thumbs-up, praising each other's good acting.

"What happened? I have to ask you what happened!" The middle-aged man in a white coat stared at Henry and Sylvia. "Our centre entrusted the safety of Professor Qiu and Professor Mei to your Lins Group. Is that how your Lins Group does things?"

"You are?" Henry deliberately showed a puzzled expression.

"My name is Marinos Xue, and I am a representative sent by the centre. Our centre should have contacted President Lin!" The middle-aged man in a white coat said.

"Oh, yes, yes!" Sylvia pretended to be enlightened, "Professor Xue, hello, I only heard about this matter when I received a phone call from your centre."

"Captain Richard, what's the situation now?" Henry asked.

Captain Richard frowned and shook his head. He said, "The current situation is very bad for us. The opposite side has taken advantage of the terrain and is holding hostages. Our people can't break inside in a short time. The only way is to follow the other side's request and stall for time."

"Then let's hurry up!" Henry urged. "We can't just watch the two professors get into trouble, can we?"

"It's very difficult for us to meet the demands of the other party." Captain Richard showed a bitter face. "The other party asked for 300 million in cash. Our inspection bureau certainly can't provide that much money."

"Then let the research centre do it!" Henry looked at Marinos. "Professor Xue, the other party kidnapped people and asked for money. They didn't ask the professor's family for the money, did they? Shouldn't your centre be the one to help them?"

Marinos stared at Henry and then looked at Captain Richard. Finally, he turned his eyes to the place where the entrance of the old factory was located and said, "Lins Group, our centre won't let this matter go so easily! Captain Richard, tell them that I can give money to them, but they must ensure the safety of Professor Qiu and Professor Mei!"

When Captain Richard heard this, he waved his hand and one inspector immediately rushed forward to negotiate with the other party.

At this time, another inspector came over. The inspector also brought a young ordinary-looking man and said, "Captain, he said we could enter the factory."

"We can enter the factory?" Captain Richard's face lit up with joy. He looked at the young man and asked, "Can we really enter?"

"Yes." The young man nodded. "I just came out from inside. Including the two people who were caught, there are a total of nine people. I saw them clearly."

"Did you them clearly?"

"Of course." The young man nodded with certainty. "And those kidnapers just look a bit fierce. Their sense of prevention is actually not strong at all. There is an underground pipe in the factory that is connected to the upper part of the factory. They don't know at all. As long as we find someone to get into the factory through the pipe, we can easily rescue the people inside. You see."

As he spoke, the young man took out a phone from his

pocket. He played a video clip. In the video, it could be seen that the young man was sitting next to the pipe. Beneath the pipe were Frederic and Yvonne. Moreover, Frederic and Yvonne had not been tied up yet. If the young man was willing to take the risk, he could have asked Yvonne and Frederic to leave with him through the tube.

"Good! That's great!" Marinos clapped his hands and said, "Little brother, may I trouble you to lead the way for us and help us save people?"

"No." When the young man heard this, he refused without thinking.

The young man's decisive refusal caused Marinos to be a little confused. "Wh-why?"

"I'm at work. My boss sent me to protect someone. I have to go there quickly," the young man said.

"Protect? You're from a security company? Who's your boss? I'll tell him!" Marinos hurriedly said.

"This is my boss." The young man reached out and pointed to Henry.

Chapter 889

"He's your boss?" Marinos was obviously stunned when he saw Henry being pointed at by the young man.

"Yes!" The young man nodded and then said, "Well, our client's dog often like to walk outside. The client is worried about the safety of the dog, so he entrusted us to protect the dog. I have to go quickly."

"Then why don't you go?" Henry urged. "What if the client's dog gets hurt?"

"Wait!" Marinos reached out and stopped the young man who was about to leave. He said to Sylvia, who was next to Henry, "President Lin, since this little brother can enter the factory, we should ask him to lead the way."

"No way!" As soon as Marinos finished speaking, Henry shook his head and refused. "Help you save your people? What if the client's dog gets injured?"

Marinos's eyelids twitched when he heard this. What did he mean? Weren't the professors they sent more important than a dog?

Marinos's face darkened and he said, "President Lin, please figure it out. This time, the higher-ups gave us 100 million as a security fund and paid your Lins Group. Now your Lins Group can't guarantee the safety of our professors and wants to just stand by. Does this mean that your Lins Group doesn't care about our centre anymore?"

After Marinos said that, his eyes stared at Sylvia. He was using his bosses to pressure her.

Henry said, "Sorry, I need to interrupt you, you..."

Before Henry could finish his words, he heard a roar coming from the factory. "The time is up. We don't see

the money and we don't have the cars we have requested. Do you treat our words as farting? Or do you think we don't dare to touch the two people inside?"

After the roar, another cry came from the factory, "No, please, don't kill me, please! If you want money, I have. I can give it to you, don't kill me!"

This cry came from Yvonne. In Yvonne's cry, they could clearly feel a burst of fear and despair.

Marinos's face changed and he stopped questioning Sylvia. Instead, he looked in the direction of the factory and said, "Captain Richard, you have to hurry up and find a way. Don't let our people get hurt!"

Marinos's voice had barely faded when Captain Richard didn't have the time to reply. A sharp and clear gunshot rang out from within the factory, reverberating in the night sky.

This gunshot made Marinos and Captain Richard stunned. There was no more Yvonne's scream in the factory.

"Aaaa!"

In the factory, Frederic's terrified voice could be heard. Who would have thought that the other side would shoot her!

"Hahaha!" Waves of laughter came from the factory. The laughter sounded particularly harsh in the ears of Captain Richard and Marinos. "Look at it, Yinzhou is not afraid of us. In that case, this matter should be treated as a warning for everyone. As for the remaining person, I will give him a chance to live. However, whether you can seize this opportunity depends on you. He has seven timebombs attached to his body with sixty-four strings, If you cut the wrong one, this year's New Year's fireworks will be seen earlier. Hahaha."

Sylvia looked at Henry with confusion in her eyes. She originally thought that this matter might have been arranged by Henry and he wanted to teach Frederic a lesson. But now it seemed that it had nothing to do with Henry. No matter how angry Henry was with these people, he would not kill them or attach them to a bomb. Moreover, this matter attracted so much attention that police cars were coming one after another.

Facing Sylvia's puzzled eyes, Henry did not answer. He just looked ahead and did not speak.

As time went by, the investigators seemed to be silent. All the major investigators also understood that this time the kidnappers were a group of ruthless people who dared not to act rashly. They would kill the hostages as they liked.

Time slowly passed, and both the inside and outside the waste factory fell into silence.

Suddenly, a cry sounded, breaking the silence.

Inside the factory, Frederic was about to burst into tears. "You guys... Please come in. They're already gone. The things I'm carrying are about to explode!"

When the investigators standing outside the door heard the sound, they looked back and forth at each other.

"Go inside!" Captain Richard waved his hand.

With the command of Captain Richard, many investigators rushed straight into the factory. As expected, there was no one else in the factory except Frederic who stood alone.

They could see seven bombs bound to Frederic's body. The sound of time ticking continuously rang out as the seven bombs overlapped on top of each other. The noise was so loud that it made one's hair stand on end. Even the officers could not help but break out in cold sweat,

much less Frederic.

As for Frederic, his face was pale and his whole body was trembling, his calves were trembling wildly, sweat was dripping down from his forehead to his face, and his lips were a little purple.

"Don't move, don't touch me. These things will explode as soon as you touch them! Hurry up, call the special team. They only gave us ten minutes!" Frederic urged them as soon as he saw the police team coming. His voice was extremely hysterical. Frederic didn't know how powerful these bombs could be, but he knew clearly that he would be blown to pieces!

The officers looked at the various strings on Frederic's body and felt embarrassed. They didn't undergo this type of training and didn't know these things at all. How could they dare to touch these strings?

Marinos quickly ran over and glanced at the strings on Frederic's body. He urged, "Captain Richard, quick! Arrange for the special team to come!"

"Impossible!" Captain Richard knitted his brows.

Frederic's and Marinos's hearts skipped a beat when they saw the look on his face. They had a bad feeling about this.

Captain Richard said, "It will take at least eight minutes for the team to get here. They wouldn't have enough time."

"Then what should we do? Hurry up and find me!" Marinos said anxiously.

"Save me! I don't want to die! I don't want to die!" Frederic's eyes were red and he was already crying out of fear.

When everyone felt that they can't solve this situation, a big hand suddenly came out from behind Frederic. Then,

before anyone could react, the big hand grabbed a string and pulled it hard!

"It's over!"

Seeing the appearance of the big hand and everything it had done, everyone present thought at the same time. Some subconsciously stepped back, while others closed their eyes.

How could the strings of these bombs be torn down so casually? If something went wrong, these bombs would explode. There were seven bombs here, and they could probably cover an area within a radius of 100 metres!
