

Mission To Remarry Chapter 941

Fortunately, Lucian had packed some professional camping equipment for Estella before the camping trip.

Initially, Roxanne had thought that they wouldn't need any of those items. Who knew that those would turn out to be exactly what she needed to save the children's lives?

After she found the small pot that Lucian had specially prepared for Estella, Roxanne emerged from the tent.

Without further ado, the woman poured some water into the pot and threw in the herbs and two leaves before starting to boil the mixture.

While waiting for the medicine concoction to be ready, Roxanne got up and carried Benny and Estella into the tent.

Overwhelmed by pain, the children had a blank look in their eyes, and their foreheads were covered in sweat.

Roxanne covered the two little ones with some clothes before stroking their heads and saying, "Just bear with it a little more. You will feel better soon."

Benny and Estella gave a slight nod but were too weak to speak.

After settling the kids, Roxanne stood up and walked out of the tent.
