

Medical road

Chapter 109

Juma Buick pondered for a long time. When he saw the doctor's room number, and Zhu Qianqian took it, he was not stupid. Zhu Qianqian couldn't even see a tuberculosis? He doesn't believe it.

"It has been treated for three days, and some tests are only done in the morning. Director, look at this ~ ~" Zhu Qianqian said pitifully.

"Now that I've taken them all away, it's strange that the patient doesn't make trouble. However, Dr. Zhu, I can not investigate this time, but this is only one case. Tell your patient not to run around, draw out the pleural effusion quickly, and leave the hospital quickly after a course of treatment. " Then he threw the medical record on the table.

Zhu Qianqian quickly nodded and bowed with a coquettish tone: "don't worry, director, it won't happen in the future. It's also an accident. I knew you had the softest heart. " She was elated when she left the director's office.

After the director is settled, no one will investigate this matter, as long as it is not known to others and other patients in the ward. Tuberculosis is not untreated.

Temperate people have come to the frontier for seven or eight years. They make money every year, and then go back for the new year. As a result, they don't know how to get tuberculosis. It has been diagnosed in the county hospital. He was given a transfer list to a tuberculosis hospital.

He won't go to the infection hospital! Are you kidding? It's very easy for him to live in the third class hospital. He saw the doctor and couldn't open his eyes. As a result, he met Zhu Qianqian and didn't know whether it was open or not!

He was very cooperative with the doctor's decisions and didn't do much. Zhu Qianqian told him not to leave the ward disorderly. He didn't go out at all. His meals were sent by the canteen.

Tuberculosis is a disease that bullies the soft and fears the hard. When a person is

infected, if the person is strong and has strong immunity, it will quietly lurk up and will not be handed down from generation to generation. But once this person has a physical problem and his immunity drops, he starts to be arrogant, and it is still a lingering disease. Drug chemotherapy can not be completely cured. Maybe he will jump out and rebel sometime.

And the cure effect of this drug is worse and worse every time. This thing can evolve itself! It has been immunized against many drugs more than ten years ago, and its efficacy has been greatly reduced.

Zhu Qianqian protects herself very closely. She has a double-layer mask. Zhang Fan doesn't know if she will have a sense of suffocation. As long as Zhu Qianqian enters the ward, she must disinfect and wash her hands. She does it very carefully and meticulously.

In the morning, jumabek took the doctors and head nurses from the Department to the ward.

"The antibiotics in bed 18 have stopped. It's been two weeks. If you lose again, you'll get mold. I have repeatedly stressed that rational application and rational application should not be used by nature. Antibiotics are not omnipotent drugs. " After checking a patient, he pointed out the wrong place, but he gave the following doctors face. He said it only after he left the ward.

During ward round, family members can no longer stay in the ward, and only one family member can be left for critical patients, and can only stay in the ward“ I know, director, but he still has a little cough. I hesitated and didn't stop. "

"I'm not afraid of coughing. I should combine the examination and believe in my physical examination. This is the best weapon and must be used. When I was abroad, this was the best friend of a respiratory doctor. It's not an NMR or a large inspection instrument. " Then he held up the stethoscope and said to the lower doctor.

This has become a habit. He often talks about his study abroad. At the end of the ward round, the special ward was left. He said to everyone, "well, let's get busy, modify the medical orders that should be modified, actively adjust the medical orders and use drugs rationally." Then he turned and left.

The head nurse wondered if there was still a ward, so she quickly caught up with jumabek and said, "there is another patient over there, the director, who was taken in by Dr. Zhu on Friday."

"I know that a patient she took in without authorization has been treated for three days. What else can you say now? Explain to the nurses and protect yourself. I can't go round the house. " Jumabek said to the head nurse.

"Tuberculosis?" The head nurse whispered.

"Yes!"

"OK, I see!"

"Also, don't spread the news about Dr. Zhu. They are all doctors in the same department. In the evening, you work hard after work and strive to achieve ultraviolet disinfection every day."

"Yes, director. You can rest assured. " The head nurse returned to the nurse's office worried. Standing at the door, he clapped his hands and said, "everyone come here. If you have work, stop first. I'll explain one thing."

Zhang Fan also wondered, this Zhu Qianqian really has a set, and can even play a fancy tune under the eyes of the director. Juma Buick is also helpless. Usually Zhu Qianqian works seriously and listens to his words. Although he is a little greedy for money, he also needs such men. For him, this is not a big deal.

He shook his head. It's not for Zhang Fan to worry about it, nor for Zhang Fan to express his opinions. It's useless to say anything! Temperate people have a lot of chest water. After making chest film and color Doppler ultrasound positioning, they should do chest wear and draw out the chest water.

"Doctor Zhang, your surgeon should be very good at this. Physicians are still a little worse than surgeons. And men's hands-on ability is a little stronger than women. " Zhu Qianqian doesn't want to do it. She doesn't go if she can. If she can let Zhang Fan replace it, let Zhang Fan replace it. If you want to make pleural effusion, run on Zhang Fan in words.

Zhang Fan smiled helplessly. This doctor Zhu is really direct. She doesn't participate in any business in the Department. She just doesn't want to rob her patient and don't touch her interests. She writes and writes quietly like a robot. Also rarely participate in other people's chat gossip.

If someone robbed her patient, or who robbed her hospital bed, it would be great. You could eat it. The fierce is not ordinary. Other transferred doctors, who have no certificates, are eaten by her. She runs on Zhang Fan with words. Zhang fan can't quarrel with a woman.

Even a quarrel may not be able to quarrel. A patient's family came to copy the medical record. Zhu Qianqian was very busy and asked the family to wait for a while. The family members were not happy. Pointing to Zhu Qianqian, they said a few dirty words, and Zhu Qianqian broke out.

The thin body erupted with the power of a nuclear bomb. He scolded from the Department to the corridor of the Department. The family member was a man. He was scolded and wanted to do it. However, with the security guard of the hospital security department, he could only be scolded speechless.

Chest water should not be pumped too fast. It should be pumped slowly. Too fast will cause low volume hypotension and easily lead to shock.

"Is Dr. Zhang busy? If you have time to go out for dinner, a young and promising doctor like you will have a bright future in the future. " Half understood and chatted with the patient.

It's not Zhang Fanai chatting, but Zhang Fan wants to judge his situation from his tone, because he can't observe his expression behind his back.
