

《Medical road》

Chapter 11

As soon as he went to work in the afternoon, Zhang Fan prepared disinfection materials and went to change Bayin's dressing. He pushed the door in and found Batu there, "Hello, Dean" Zhang Fan didn't say much, so he put his things at Bayin's feet.

"Let me see. You change your medicine. Don't worry about me" Batu was afraid of interfering with Zhang Fan, so he said.

"OK, Bayin, I'll change your dressing. The scar may scab and hurt a little. Hold on" The absence of the Dean can not affect Zhang Fan. Since Zhang Fan had the system, all medical technologies have been trained to a very standard in the system. Aseptic operation is the basis of surgery.

"OK, brother Zhang, take it easy. I'm afraid of pain" Bayin now sees doctors and nurses and pestles them.

"Doctor Zhang should be heavier, or you have no memory" Although Bayin's mother said so, she looked at Zhang Fan. How can Zhang Fan not understand.

"Don't worry, it's okay."

The wound recovered well. There was no redness, swelling, heat and pain. Zhang Fan pressed gently and didn't see the liquid flowing out. Then he began to disinfect and bandage. After bandaging, he looked up and said, "does it hurt?" Zhang Fan asked.

"It's all right. He should exercise more. A man can't stand the pain." After Batu finished, he asked Zhang Fan, "the wound is not bad. Orthopaedic surgery is afraid of infection. In the past, Nur often had postoperative infection. Let alone the level of operation, the postoperative infection gave me a headache. "

"It should be all right." After Zhang Fan finished, he was ready to say goodbye and go back to the doctor's office.

"Are you busy in the afternoon? Come to my office if you are not busy."

"OK, I'll clean up and go."

In the dean's office, Batu specially sat on the reception sofa with Zhang Fan and said to Zhang Fan, "you are a little tired these days. Take care of Bayin more. Although he is about your age, he just grows up like a child. It's very capricious. I hope he can grow up after suffering such a great crime this time. "

"Dean, don't worry, I will."

"The university has expanded its enrollment. Before, let alone our county hospital, even the hospitals in the urban area rarely recruited college students. Although other college students can't compare with you, the overall level is OK. Some time ago, the autonomous region organized an entrance examination, and several college students were admitted to our hospital. The dormitory here can't live. We rented a large house in the family courtyard of the county Party committee, and the environment is good. I asked the office director to reserve a small bedroom for you to live alone. It's also more convenient to read and study. No one bothers me. "

"Dean, I live in a good place now. I live in one bedroom alone. It's not very good."

"It's all right. You can live at ease. I've arranged everything. Tomorrow is the weekend. I'll ask director Wang to take you and move you with 120. These two cigarettes will give you congratulations on your housewarming. " Then he threw two red snow lotus to Zhang Fan.

"Thank you, Dean." Zhang Fan was not polite.

Although it's a rented house, Batu gives Zhang Fan the small bedroom, which is a disguised thanks. As the president of the hospital, he won't deliberately thank a doctor, but when there is a good thing, he will definitely think of Zhang Fan.

In recent days, there have been a lot of operations. If there is a snow mountain, you can only see it in the county hospital. If the mountain was closed for a year, Zhang Fan would graduate from the Department of trauma and orthopedics. Zhang Fan just returned to the office and was called back by the dean.

"There was a child trampled by a horse in sumutai Township, with clavicle fracture and pneumothorax. The situation was serious. The car could not be sent to the county. They called the Health Bureau, which reported to the county Party committee, which ordered the county hospital to send doctors. What orthopedics can do is you. You've been riding for two hours. Is there a problem? " Batu also looked more serious. Depending on the situation, the county Party Committee attached great importance to it.

"The situation is not clear, I can't say, but I can't ride a horse."

"In this way, let Shi Lei and Ma Lihua accompany you, and let three people in the security section contact the County Public Security Bureau to ride a horse and take you with a plow. Now the doctor who can go there is our county hospital. I have to go whether I can or not. "

"Let's go too, Dr. Chen. He's also an orthopaedic surgeon. More people, more protection. "

"OK, but don't count on him. He's very slippery."

Zhang Fan hurried back to prepare and borrowed an army coat from the security section. It's more than 3 p.m. now. No thick clothes can freeze to death on the road for more than two hours. Under the coordination of the county Party committee, six people from the county hospital and two from the Public Security Bureau set out within half an hour. The roads in the county can still drive, 120 people and equipment, followed by a large truck pulling horses. When the car can't pass, you have to ride a horse and climb a plow.

The altitude of sumutai township is close to more than 2000, which is much colder than the county seat. Most of them are herdsmen. After more than half an hour by car, I couldn't move forward. The snow on the road was too thick. Zhang Fan, the first time to do a plow, looked at the ice and snow world. There was no other color except white.

"Director Shi, does this happen every year?"

"No, it's snowy this year. I haven't encountered such a thing before. It's my first time“

"Su Mu Tai township will be relocated for a long time. As a result, the herdsmen are unwilling, so they drag it down. I've been to the countryside several times. The township hospitals have complete medicines, but they are short of doctors. The pregnant women over there give birth at home. Once dystocia occurs, one body and two lives. " Ma Lihua tightened her coat and said.

"I'm also worried that you don't have a coat. I found another one. Put it on. The temperature will be lower when the sun goes down“ Shi Lei took a leather jacket.

"I have an army coat. Let sister Ma put it on."

"We've been used to it for a long time. Just put it on. And I wear a thick, specially made dog skin cotton padded jacket." Ma Lihua helped Zhang Fan put on the leather jacket.

The sun gradually set and the wind grew stronger. Fortunately, there are leather jackets and military coats, so Zhang Fan's nose is cold and runny“ Is it coming? " He can't stand it.

"Soon, after the turn in front, we will go to the township health center. Hold on. Let them have a stewed mutton in the evening. Make it spicy and sweat as soon as they eat it." Shi Lei said.

"My mouth is watering. I've never wanted to eat mutton like this. I've had enough in recent months."

"Ha ha, if you insist, you may not like pork in the future. Isn't your sister Ma still a beautiful cousin. Ha ha, "Chen Qifa likes to discuss national habits.

"You're a dead man. You know how to laugh at me. My cousin is really beautiful." Ma Lihua hit Chen Qifa. He rubbed his legs and said, "my legs are numb. The doctors in our county are better. At least they are still in the city. The doctors in the village are really lucky and hard. Their standard configuration is a first-aid kit and a horse. "

Before it was completely dark, they finally rushed to the township health center. The injured child was a teenager. He was kicked by a horse's hoof, broke his clavicle, and the broken end of his clavicle pierced the tip of his lung. The doctors in the township hospital have limited skills and can only compress the lung wound, reduce bleeding and improve breathing. As soon as Zhang Fan saw that the problem was not big, there was gas in his lungs, which oppressed his chest and led to dyspnea. The stitching of the system has also been upgraded. This problem is not difficult for Zhang Fan.

Prepare for surgery, debridement, bone grafting, closed drainage. The operation was completed in an hour. The herdsmen were extremely enthusiastic. If Zhang Fan hadn't stopped them, they were going to slaughter cattle to entertain them. Zhang Fan is drunk and can't drink. Master white beard personally carries a silver bowl with horse *
* wine, sings a toast song and brings it to Zhang Fan with both hands.

Zhang Fan, who went to the cave for the first time, was drunk in mare's milk.
