

Medical road

Chapter 113

The operation was successful, but it has not passed the dangerous period yet. But the operation was well done. There should be nothing to do.

Ouyang has gone out to report. Lao Guo is unwilling to see Zhang Fan. With the help of the head nurse, Zhang Fan wiped his head with sweat. He said: "the conditions are too hard. This kind of operation can be performed by pulling out three groups of people in our hospital. And there are such difficult operations almost every month. " He's bragging! But he knew very well that this kind of gifted doctor could attract him is difficult surgery and partners.

Zhang Fan doesn't have a hot eye at all. He knows how to go and the planning is also very clear“ Director Guo, is it possible to finish medical postgraduate and doctoral studies in two years? "

"Probably not!" Lao Guo was shocked. What rhythm is this“ Anxious to graduate is one reason, lack of money! "

"The salary and bonus of our hospital is not the highest in the medical industry in China, but it also ranks in the top three. If you test my graduate student, I can also give you a subsidy. " Lao Guo continued to agitate until.

"In fact, you have already graduated from orthopedic surgery. There is no need to further study. Even if you continue to further study, the promotion will not be very high. The ceiling of orthopedics is not high, but it is different outside the brain. You are just getting started outside the brain now, and you will face great challenges in the future. How about coming to me if you have the courage. I promise you that your life will be wonderful in the future. Every day will be different. " Lao Liang suddenly interrupted. He also saw that Zhang Fan's master might be a folk wonder, otherwise Zhang Fan wouldn't ask questions about Masters and doctors.

"Why are you everywhere! Where is his surgery? There are still many things to learn. Since he has the foundation of orthopedics, he should be improved. Moreover, you Lao Liang still don't understand the surgery outside the brain! It's different every day. It's different every day! " At present, human beings have only studied a little about the complexity of the human brain, and there is still a long way to go.

"That's why there's a challenge. What's the meaning of doing things that others understand? How old is Dr. Zhang this year. I think it's still very young. How many years have you been in orthopedics? "

"I'm 24 years old and I'm transferred!"

What else does Lao Guo have to say, but the patient is going out of the operating room! I had to explain to the family outside, so I didn't entangle anymore. I went out of the operating room with Lao Liang.

"Remember what I said! Keep your eyes open and don't be confined to a known field. It's the most exciting to guess the unknown field. " Lao Liang stood at the door of the operating room and said to Zhang Fan.

"Come on, why do you talk so much? He's an orthopedic doctor." If Lao Guo hadn't been outside, he would have to explain. Today he would definitely have a debate with Lao Liang.

Ouyang has gone out to report on the stage of surgical fixation of cervical spine“ Leaders, the operation was successful. As long as we get through tonight, the rest is waiting to recover. "

"Thank you for your hard work. How can we cooperate? " The wounded's sister looked much better at this time. Although her attitude was also very good, she still felt superior. The operations have been successful. Ouyang is not afraid of his family now! Superman possessed!

"As the highest level hospital in chasu City, we will spare no effort to save the lives of patients, although our conditions are difficult and our equipment is poor. Not even a first aid center. But our doctor is the best doctor. never mind! Everything will be fine. " What is capital? This is capital. I was frightened one night. Since you have such a high attitude, let it shine.

If it is the leader of the municipal Party committee, Ouyang will definitely be obedient, but for such leaders who are respectful, he will never care about her or care about her. You don't have to think about personal interests. Maybe you can strive for some benefits for the hospital!

The leaders of the municipal Party committee and middle-aged soldiers were also relieved, especially the middle-aged soldiers. They really wanted to bury the children of their old superiors here. He really couldn't explain.

At this time, Lao Guo and Lao Liang came out, and the anesthesiologist took care of the patient and went to the ICU.

Ouyang's words can only let the woman breathe a sigh of relief, but can't really reassure her. Before the woman spoke, Lao Guo said: "the operation is successful. If you survive this day, you will be completely out of danger tomorrow. The doctors here are highly skilled. They completed the operation independently. It's really admirable! " Lao Guo couldn't do anything to snatch credit, nor did he disdain to do it.

The leader of the municipal Party committee looked red, and Ouyang was very excited. Originally thought it was a disaster, but it turned into a merit. It was really ups and downs.

The middle-aged soldier had a lot of follow-up work to do, so he whispered to the woman, left a few soldiers and turned away. Top experts have confirmed the success of the operation, and the woman is relieved.

"Thank you very much. Please delay you for another day. I want to take my brother back to the capital tomorrow. I don't know if I can. "

Ouyang wanted to talk and was stopped by the leaders of the municipal Party committee“ Look at tomorrow's recovery, it is estimated that it can. " Lao Liang said after a little meditation.

As soon as she heard this, the woman smiled and said to the leader of the municipal Party committee, "Uncle Zhao, I really trouble you. Please come and sit at home when you have time. My father also misses the comrades in the frontier. "

"Yes, yes, yes. We also miss the old leaders. "

Zhang Fan in the operating room lost their strength. The operation was very difficult. After the patient safely entered the ICU, they sat down side by side against the wall of the operating room.

"My hands are numb. I'm sweating all over. I'm really nervous this time. When I took the bullet, my legs were soft. If I hadn't breathed, I really couldn't stand. Old! " Chen Qi slightly raised his head and looked at the closed shadowless lamp.

"Hehe! Dr. Zhang, I studied in the golden mean. Say a selfish thing, I'm jealous of you, really! Director Liang is not an approachable director. "

"Lao Gao will really die of grief, ha ha!" Li Hongtu also thinks Zhang Fan will go. This opportunity is unthinkable in a dream in a small border area.

"I haven't finished transferring!"

The chat is over! This is a pure critical blow. The top experts in China will be your assistant. After that, you say: I haven't finished my transfer! The others are not in the mood to talk and are really tired.

The patient's family members can't go in the ICU. The leader and Ouyang have been accompanying the woman. Lao Guo and Lao Liang and the anesthesia director have been led to rest by the leader secretary.

"I want to personally thank the doctor who operated on my brother. Please arrange it for the dean. " The woman said to Ouyang.

"OK, I'll arrange it now. That's what we should do. "

In the dean's office, the woman bowed to Zhang Fan, "thank you! You worked hard. " Zhang Fan and Lao Li were not much shocked, and the bowing families were not without them.

But the leaders of the municipal Party committee and Ouyang's mouth opened in surprise. Such a proud man bowed to the doctor. They did not realize the despair of a woman who knew that the only boy in her family could die at any time. Even standing on the top of mankind! My brother is the hope of my family and the sustenance of my grandparents! No hope, no sustenance, that is, a salted fish!

"That's what we should do. Don't do that. Even if you want to thank, you should thank Dr. Zhang. We are just a help. " The most talkative Chen Qi said first.

"I can't do the operation alone, director Chen!" Zhang Fan hurriedly said.

"You are all my brother's benefactors!" After that, he said to the leaders of the municipal Party committee: "Uncle Zhao, look! ~" After all, she is not in charge now. Some things are really inconvenient.

The leader of the municipal Party committee said: "you are all meritorious heroes on the tea element medical front. I am very glad that you have lived up to the people's trust. Dean Ouyang, since you have made meritorious contributions, you will be rewarded. You can't chill the hearts of meritorious officials! " He doesn't know how to reward.

Ouyang is also happy. Although the patient is not out of danger, the top experts say there is no big problem. When will we wait if we don't ask!

"Although our doctors work very hard, after all, this is a frontier. I want to send some of them to study."

"OK, which hospital can I contact?" Ouyang also knows that although people say thank you, they still have to have a bottom line, or they don't know where to go.

"You all talk!" Ouyang said to several doctors with a smile.

Several people looked at Zhang Fan at the same time. Zhang Fan has not consolidated his foundation at present. When he consolidated his foundation, he took off. There is no need to hurry to study. Although the system is strong, it still depends on your own thinking and experience, otherwise you are a surgical craftsman, not a doctor!
