

Medical road

Chapter 126

The next day, Zhang Fan's patient ranked first. Urology has a special endoscopic operating room. The nurses in the operating room work in shifts as operating nurses. Electric cutting requires a large amount of flushing fluid. After an operation, the ground is completely wet, and the doctor has to wear a layer of special plastic surgical clothes to prevent water.

Zhang Fan's first operation, the urologist and Wang Zong Kui came. Wang Zong Kui was worried that Zhang Fan couldn't do it. Several urologists were just watching jokes. If Zhang fan can't even install a mirror, he won't have to have surgery! You can be laughed to death by them.

At the beginning of the operation, the old man was helped into the operating room by the nurse. As soon as he saw many doctors, he said, "haven't you seen the old man pee?"

"Well! Old man, these are my superior doctors. This is the rule of surgery. " Zhang Fan couldn't make it clear, so he fooled the old man.

"Well! You don't work hard. You're your superior! " The old man replied, with a vivid expression and tone of an old policeman, reflecting the temperament of the prison guard incisively and vividly. I don't know. I thought Zhang Fan was a prisoner in his former prison!

The anesthesiologist began anesthesia while Zhang Fan began to wash his hands, disinfect, install an endoscope and an electric knife. Several others stared at Zhang Fan's movements with wide eyes. Although Zhang Fan has not touched this mirror in real work, in the system, Zhang fan does it no less than the general treatment. When I was transferred to another department of internal medicine, when I was tired of reading, I entered the system for surgery to clear my mind.

In an orderly way, although LV Shuyan is a graduate student, she is a graduate student in gynecology, not in urology, and is not very familiar with some instruments in urology. Zhang Fan was not in a hurry. He explained one by one. Although he explained it to LV Shuyan, he also said it to several other people.

At the beginning of the operation, the hand-held endoscope began to enter the urethra to adjust the visual field and clarity. Rinse and start electric cutting. The prostate is like a piece of tofu under the lens. Tofu with a little toughness, cut, gently cut and rinse!

Zhang Fan's work is very delicate. He peels it off layer by layer. It looks very simple. Just cut it, but he can't master this strength in a few years.

Several attending doctors have experienced several years before they began to cut the prostate. Now look at Zhang Fan's technique, darling! Is this a resident! Say a bad word. None of them are so skilled.

Zhang Fan's technique is too skilled to be picky. Each cutting is almost the same thickness, which is the embodiment of technology. Wang Zong ashamed looked at Zhang Fan's operation and said, "this is the operation!" It's OK not to speak. When I said this, the other chief doctors were embarrassed.

Slowly out of the operating room one by two“ That's bullshit. It's so powerful. Did you find it. The cutting force is almost the same. Lao Li is not so powerful. " Chen Xinyuan, the chief physician of Urology, said that he was a senior physician. It was a little incredible to see Zhang Fan's operation.

"Ah! When did he jump out? If he came to Corey in the future, he would take the group directly. Hey! How many years have we had to endure before we can lead the group? He can lead the group when he changes his subject. It's really a matter of throwing away goods and killing people! " The youngest urologist is haimudura. He just got married when he spent money, so he's a little worried!

"At other people's level, there's no way to come. Didn't you look at the face of the director? How polite you are to Zhang Fan. When have you seen the director so kind to his subordinates. So, young man! Don't think about looking for trouble anymore. People are not afraid! "

"Ah! I hope he goes to other surgeries! We don't have much meat. Let's have another wolf, hey! Hu Da, I can't live any longer! " Haimudura said sadly.

They didn't want to chat anymore. They went directly back to the Department to prepare for the operation. Zhang Fan cut it finely and moved fast. It's estimated that the operation will be performed soon.

Wang Zong was ashamed to see that Zhang Fan was coming to an end. The more he cut the prostate, the more dangerous it became. He cut it through accidentally. He took a step closer. If Zhang Fan continued to cut, he would stop it. He was white worried. Zhang Fan said after cutting the last knife: "OK, prepare to withdraw the mirror."

Wang Zong Kui held his hands and said, "Doctor Zhang, that's good! It's very old. Are you going to do urology in the future. When your transfer is over, you can become independent. "

"It's still early. Many departments haven't been transferred yet. Director Wang, can I take this doctor's order as usual? " In the absence of the general director, the lower level doctors will also call the deputy high as the director!

"As a general rule, remember to stop using hemostatic drugs on time and pay more attention within three days after operation."

"OK."

At the end of the operation, LV Shuyan helped Zhang Fan take off his surgical clothes. "You're really cow. You didn't see the chief doctors in the Department. Your face is blue. You really scared others. But it's also very soothing. I just cleaned up a little and put on some light makeup, but no one took me! Who are they? " LV Shuyan was a little angry that several attending doctors dumped her to Zhang Fan.

"You exaggerate! This is a new group! We don't have any affiliation. We'll discuss this group. I'll give the doctor's order, you write the medical record, or you give the doctor's order, and I'll write the medical record. "

"Ah! You are also a slick. You have given orders. Do I have a choice? I'll write the medical record. When can I get out of the Department? I really don't want to transfer. In front of you, my three-year graduate student has read for nothing, and I don't have a sense of superiority! "

"Hehe, when you go to the gynecology department, you can show me! I'll definitely call the teacher when I see you! "

"Fuck you! Laugh at me again. I won't write you a medical record! " LV Shuyan smiled and pushed Zhang Fan. After the operation, the attending doctors looked a little good to Zhang fancai, not like the day when they first entered the Department. Although there is not much enthusiasm now, there are still some nods when meeting. Zhang Fan took the group as soon as he entered the Department. If he has no strength, it is estimated that the patient will be robbed!

When the patient returned to the ward, the eldest son of his family came to find Zhang Fan. Yesterday, his classmate, the director of the radiology department, had told him.

He doesn't trust that ordinary people in his family can't accept it. Everyone looks like a thief. He was really worried that his old man would make Zhang Fan angry.

"I'm tired! I'm tired! Dr. Zhang, it's not convenient for you to have a casual meal together today. There are still many days to trouble you in the future. We don't care. We're really sorry. "

"It's all right. It's really all right. The director of the radiology department has explained it. Don't be so polite. I'll try my best to do what I can do. Just eat. If you have anything, you can come to me directly. " What Zhang Fan said was also very polite.

After work at noon, at the gate of the hospital, the family and children carried a black bag with two cigarettes and waited for Zhang Fan at the entrance of the hospital. As soon as they met, without saying a word, they stuffed the cigarette into Zhang Fan and left.

There were too many people at the gate of the hospital, and Zhang Fan didn't say anything. He was going to take the cigarette. Later, he would directly rush the money into his hospitalization fee. Otherwise, they were really worried if they didn't take something according to the posture of his children.
