

《Medical road》

Chapter 14

After the operation, the little fat Li Liang looked at Zhang Fan's eyes. "Isn't this a living technology master!" Speed up a few steps under the soles of your feet, catch up with Zhang Fan and say, "brother Zhang, you've been standing for a long time. I don't have any good tea. I'll make it for you. You can have a good rest. The doctor tells you to speak orally and I'll knock it on the computer"

"Even if I don't drink tea, I can't drink it well. You can give a doctor's order if you like. Go back to the Department and we'll get it together" Anyone who falls in love with you likes it. Yang Chengming turned his eyes and ignored them.

"Mr. Zhang, you said you would do the operation. I'll take care of the patient. Let's take half of the medicine. Otherwise, I'm sorry" After returning to the office and giving the doctor's advice, Lao Chen came up to Zhang Fan and whispered.

"Mr. Chen, you're welcome. Your children go to high school in the city. You have a lot of pressure. Let's go on as usual" Zhang Fan is bleeding in his heart. He is also short of money, but he can only protect Lao Chen, otherwise he will kick his son for you. Zhang Fan doesn't even have an assistant. After all, Shi Lei is out of his mind. He can help occasionally. He certainly doesn't want to pull a strong man every day. Besides, Shi Lei is determined to be in an official career and doesn't have much desire to improve technology.

As the old nurses looked for Zhang Fan to see more waist, slowly Zhang Fan became famous in Quark county. "The back pain is terrible. I have to go to the municipal traditional Chinese medicine hospital at the weekend" Some old ladies from the county union gossip.

"What traditional Chinese medicine hospital did you go to, that is, acupuncture and moxibustion. The effect was good at that time, and you still fell ill when you came back"

"It's better than nothing" Several middle-aged women from the County Trade Union want their husband to be an official. They want their relatives to be powerful. Anyway, they have nothing to do at work. They just sit together and gossip.

"Don't go to the traditional Chinese medicine hospital. My little sister-in-law has a severe back pain. Her legs are numb and can't walk. As a result, a young man in their hospital had a massage for a few days. Guess what, now it's good, just like a good

man“

”It can't be massaged in bed, ha ha“

”You start complaining again. Be careful that your family will tear your mouth“ Talking about the topic is biased. These official wives have almost no sex life at home, so they rely on their mouths.

”What's the doctor's name? I'll see it after work“ I'm worried about my back pain.

As long as the nucleus pulposus is not ruptured, under Zhang Fan's massage, it will have some effect. Gradually, more and more people came to see Zhang Fan's waist. Kang Hua, the deputy county head in charge of culture and education in the county, was born as a teacher. In his early years, he hurt his waist when he was a teacher. Later, after becoming an official, there were constant meetings all day, and waist diseases often occurred. The attack can only rely on painkillers. I went to many hospitals with average results. A few days ago, I heard from the following people that a doctor in the county hospital looked at her waist well. Anyway, under her rule, it was just a phone call.

”Brother, the Dean called you“ Guli is now the first fan sister of Zhang Fan. She is very kind to Zhang Fan. In her words, "if I were 20 years younger, I would definitely give birth to Zhang Fan“

”Do you remember the female county magistrate who had dinner together last time? She has a problem with her waist. She called you to have a look. I'll take you there in the afternoon. If there is no emergency operation, don't go to the Department in the afternoon. We'll go to the county government when we go to work“ Batu asked.

”OK“

”When you see a doctor for a leader, you should be strict with your mouth. If you don't look good, don't say it first. You must be strict with your mouth and don't spread it everywhere“

”I see“

”Change into a decent dress. The collar of your dress is fluffy“ Batu suddenly found that Zhang Fan's clothes were a little old.

Zhang Fan has only two coats, one of which is still brought back from home. He usually stares at one at work. Isn't it old? " I only have one“ Zhang Fan was very

embarrassed. If he hadn't called home all his money yesterday, he couldn't say this.

"As for the salary, it won't be all spent playing cards and games" Batu was a little surprised. A young man who didn't love face and paid a salary didn't buy some new clothes.

"They all called home. My sister went to high school and my mother was not in good health" There's no way. Zhang Fan tells the truth.

"You, what do you say? How many times have I told you. Come to me if you have any difficulties. I'm not only a leader but also your parent in the county hospital. Why don't you say if you have difficulties"

Zhang Fan blushed and didn't make a sound. He didn't take what the dean said before seriously. Batu was promoted from an auxiliary department to the president of the hospital. In addition to helping at home, he also had a set of ways to be a man. The top technicians of all departments were attracted by him. As long as these people obey him, the county hospital is his world.

"Let me stress again that you can come to me no matter in life or work. Don't treat me as the Dean, just as I am your uncle" Then he wrote a note and handed it to Zhang Fan. "Go and get five thousand from the finance department. Hurry to buy a set. This is a political task. Don't search, or I'll let director Wang take you to buy it" Zhang Fan really can't afford to lose the man. He quickly promised not to fool him.

Out of the dean's office, Zhang Fan's eyes were red. No matter what Batu thinks, Keren's family is really good to him, and it's quite good. Zhang Fan is grateful. This is the standard way to provide timely help. Let's not talk about Zhang Fan. If Batu can do this, it shows that he has a set of ways to be a man.

In the afternoon, wearing new clothes and sitting in Batu's car, he came to the county government. Zhang Fan was not nervous at all. He had nothing to ask, but Batu couldn't. He explained all the way.

"If you can see it, try to see it. If you can't see it, we won't show off."

In the office, Kang Hua was very polite. "College students who can come to the west to support must have a high ideological level. I hope President Batu can take care of us college students in life and let them work in Quark county." As she spoke, Kang Hua took out a CT and said to Zhang Fan, please help Dr. Zhang see it. She didn't say anything, so let Zhang Fan see it. If she can't even see the film, there's no need to say anything else.

"The right side of the fourth and fifth lumbar intervertebral disc protrudes,

compressing the nerve, and there are bone spurs in the vertebral body." After that, Zhang Fan put down the film and watched Kang Hua.

"I took this picture in the provincial hospital last year, and the doctors in the provincial hospital said so. I don't know if there is any good way." Although the film is good, she still doesn't trust Zhang Fan.

"The fastest treatment is to do a minimally invasive operation through discoscope."

"Well, is there any other good way besides surgery?" Kang Hua sat ahead and asked.

"Manual rehabilitation can be done, but the effect is hard to say, and it will recur if you are tired."

"Yes, Dr. Zhang's level is really good, just as the doctor of the provincial hospital said. I'll trouble Dean Ba and Dr. Zhang today. I still have some work, so I won't give it away. " With these words, Kang Hua stood up.

"It seems that K county is still satisfied with you."

"Satisfied? I didn't say anything, nor did I say anything about my condition. " In the car, Batu and Zhang Fan chatted.

"Silly boy, what do you think in the office? Wait. Maybe it will be said tomorrow." Batu is happy to get close to K county through Zhang Fan.
