

# 《Medical road》

## Chapter 15

The snow on the road was finally cleared and the road from Quark county to the city was finally opened. During the road closure, the number of medical treatment in Quark county hospital increased sharply. In order to alleviate the pressure of the county hospital, the city sent an expert group to support the county hospital. Experts from cardiology, respiratory department, general surgery, orthopedics and B-ultrasound. These experts are the ones who want to be promoted from the vice high to the positive high. It is also the top presence of various departments in the municipal hospital. In particular, Gao Shijun, an expert in orthopedics, was the director of the first Department of orthopedics of the municipal hospital after his retirement.

The arrival of the expert didn't matter to others, but Yang Chengming was very happy. When he worked in the urban area, he was in the first Department of orthopedics. He knew the level of director Gao Shijun very well. "When there is surgery, look at the level of director Gao, which is N levels higher than that of the county hospital. Zhang Fan and Chen Qifa are all hanged and beaten." He said to Li Liang excitedly.

"Chen Qifa and Zhang fan are not bad, and the high level of director should not be bad, but Zhang Fan is always better than us. For Zhang Fan, you and I are the goods that were hanged and beaten. " With that, Li Liang ignored Yang Chengming and went to change the dressing with the dressing plate.

"You, you, you are a frog in a well." With that, he threw the book on the table. In fact, Zhang Fan has never ridiculed or clashed with him, but Yang Chengming just doesn't look up to Zhang Fan. Whether he is jealous or despised, it's a disagreement.

"Director Gao, please drink tea." Yang Chengming felt that his Savior had arrived and he could finally stand out. He performed fairly well in the urban hospital and gave a good image to the doctors in the Department, so Gao Shiming still remembered him.

"Cheng Ming, how are you? Are you still used to it?" Gao Shijun asked politely.

"That's it. There aren't many patients anyway. Read books in a day. " Gao Shijun asked casually. Unexpectedly, Yang Chengming complained a lot.

"Take your time and don't worry." Gao Shiming secretly underestimated, "this young man is too impetuous. You have a contradiction with the Department. Complain to me as if I were the leader of your hospital." Ignoring Gao Shiming, he smiled and said to Nur, "director Nur has a good spirit. I saw him at the annual meeting of orthopedics

last time. Director Nur's drinking capacity shocked everyone at that time. Ha ha "

"Ha ha, I'm old. Director Gao prepared a light meal in the Department at night. Let's have a good drink and meet our new doctors by the way. They are all great prodigals." Old Nur rarely did not drink.

After the morning meeting, under the leadership of Nur and Gao Shijun, the second Department of external medicine began rounds. There are almost no patients outside the brain of the second Department of surgery. Shi Lei is enthusiastic about his career. Tuxun plays soy sauce every day, and brain surgery has not developed. In the ward, Gao Shijun found that there were many patients in orthopedic surgery. He said to Nur, "the development of director Nur's department is good. In the surrounding county hospitals, you have the best development in orthopedics, with a high number of patients, and many high-quality and difficult operations have been carried out. Very good. "

"It's all the credit of the young people. Our new Doctor Zhang is very powerful."

"Inside the Yamen?" Gao Shijun muttered that he knew the newly admitted students very well, not to mention undergraduates. Even postgraduates majoring in orthopedics could only do some simple orthopedic surgery. As for undergraduates, it's good to recognize all surgical instruments " Oh, really, congratulations. " The tone is flat.

In the evening, Zhang Fan was on the night shift and couldn't attend the banquet for director Gao. Chen Qifa wanted to replace Zhang Fan on duty and asked Zhang Fan to refuse. Drinking is indispensable for attending the banquet. Zhang Fan has a big head on the rules of the wine field in the frontier. He drinks three cups before eating. Generally, Zhang Fan is persuaded to retreat after three cups.

Coincidentally, the next day, the old lady retired from the Finance Bureau walked around in the morning. As a result, one accidentally slipped and landed on her elbows. The two humerus were almost in the same position, and the broken ends of the fractures were almost the same. When the family learned that Gao Shijun was in the county hospital, they came directly to Gao Shiming " I have been practicing medicine for more than 20 years and have never seen such a consistent fracture. I can take photos and publish a paper. Director Nu, do two fractures at the same time? " Although this symmetrical fracture has not been seen, it is not difficult.

"You talk to the young people about it. I don't have surgery anymore." Now the rise of Zhang Fan in the department doesn't need him to worry about. He doesn't have anything to do if he divides the equipment into hands regularly every month.

In the operating room, "Dr. Chen, you do the right humerus and I do the left. The broken ends are neat, and the last steel plate is very simple. He still knows about Chen Qifa. When he came to the county hospital, Lao Chen was his assistant. "

"Director Gao, I'll help Mr. Zhang Fan. You two take the lead."

"It's strange. What's the origin? The director of the Department praised it and the old doctor in the Department held it." Gao Shijun looked at Zhang Fan and said nothing more.

Zhang Fan and Chen Qifa, Gao Shijun and Yang Chengming. Li Liang didn't compete with Yang Chengming. Because of his poor foundation, he didn't show up on the stage. After the anesthesia, the operation began. The two main knives were very sharp under their hands. Gao Shiming looked across from time to time. He was a little worried. He was responsible for the problem. He didn't speak before the operation because he didn't understand. If there was a problem during the operation, he would have something to say, and the humeral fracture was simple, and he wasn't afraid.

"Something's wrong. The young man's skill is not ordinary. He's not much worse than himself." Gao Shijun wondered " Dr. Zhang, you are a graduate student in that school. The operation is very good. " This was the first time he talked to Zhang Fan. He regarded Zhang Fan as a graduate student. He spoke in his mouth, but he didn't slow down under his hands. He couldn't let a young man compare with him. Fake is also the orthopedic director of the third class hospital in the future.

"Director Gao, I'm an undergraduate of Su University. I didn't get a master's degree. During my internship, the teacher let go. Practice makes perfect." Zhang Fan is still the original story.

"Fool the ghost. I won't be proficient in doing humerus every day for a year." Gao Shijun didn't say much. He focused on the operation because Zhang Fan opposite was fast.

The operating room was quiet. This example of experts performing the same operation at the same time had never happened in the county hospital. Everyone was curious about who finished first and who did better. Zhang Fan's group took the lead in completing the operation. It was not Gao Shijun's fault, but the assistant's fault. Chen Qifa was against Yang Chengming.

Although Zhang Fan also has a little idea of comparison, the main reason is that in

order to brush the operation volume, he can finally pull a hook and tie a knot, which is also his operation volume. "Dr. Zhang, it's not simple." Gao Shijun was shocked. Although his assistant was almost, he was in his forties. It was the age of successful operation skills that made him how old the other party was.

"Not yet. If I didn't Miss Chen today, I wouldn't be as fast as director Gao." Yang Chengming is about to cry. How can he go to the orthopedic department in the city in the future and humiliate the director? It's too much trouble. I knew I'd let the fat man go. His hands began to tremble, and the rest of the stitching was done by Zhang Fan and Gao Shiming.
