

# 《Medical road》

## Chapter 24

After returning to quark County, Zhang Fan adheres to the principle of dividing the meeting in half. In addition to the mobile phone, he divides the things in half and is ready to give them to Batu“ I'll borrow flowers to offer Buddha, and I'll pray for you in your early years. " After being delivered to Batu's house, Zhang Fan is ready to enter Batu's house with something.

"OK, I don't need your little things. Put them in the car and go in for dinner." Zhang Fan wants to mention it, but Batu won't let it. There's no way. Zhang Fan enters Batu's house empty handed.

Batu's wife is a very beautiful woman. She is very slim among Mongolian people. Pilaf and mutton tasted good. Zhang Fan ate a big plate“ Youth is good. I don't like cooking alone. " Batu's wife said to Zhang Fan, "the main reason is that you make it tastes good." Zhang Fan blushed a little, as if he had eaten too much!

"Do you have to go to the city this afternoon“ Batu looked at Zhang Fan and said after eating.

"Yes. I'm a line driver now. I haven't done a few serious operations. "

"Don't worry, when you do it, the Frontier Province will send several study groups to study after the new year. You go. "

"Really! How long? "

"The county Party committee has been here for about half a year“

After dinner, after a few words, Zhang Fan was ready to go back to the city. Before leaving, Batu took a bag to send Zhang Fan out“ You don't drink. Take these cigarettes and smoke them for the new year. "

"Ba yuan, this is not appropriate. I should pay you a new year's call."

"All right, just have a heart. Let's go quickly." Batu looked at Zhang Fan's car and

stood at the door in a daze“ It's not cold. I didn't wear a coat when I went out. It's almost half an hour since I sent someone. I haven't come in yet. " Batu's daughter-in-law followed.

"I guess the boy has met senior officials of the municipal Party committee. I'm not sure I'll have to rely on him in the future. "

"Really. Call him home on New Year's Eve. He has nowhere to go here anyway. "

"OK, is the relationship good? It's not on New Year's Eve. Go in. It's cold."

Taking advantage of the large number of gifts before the new year, Zhang Fan sold all the cigarettes he had collected in recent months in the urban area. I have a lot of income. I have my own mobile phone, so I mail it to my sister. Then he made some money to his parents. On New Year's Eve, Zhang Fan spent a little desolate in the hotel. Wang Qian wanted Zhang Fan to go to their house. Zhang Fan didn't want to live or die. The family of the new year was reunited and counted it by herself!

As soon as the Spring Festival was over and after normal work, Batu reported the list of people who went to the county hospital for further study. There were four places in the county hospital, one for women and children inside and outside. The directors of internal medicine, gynecology and pediatrics go for further study, and the quota of surgery belongs to Zhang Fan. The first division doesn't know what the situation is. The second division doesn't care about others except Yang Chengming. Batu has promised Shi Lei the second batch to let him go. Lao Chen has not been admitted to the qualification certificate for many years, and he is not in the mood to study. Tuxun feels that his level is already very high and there is no need to study ~!

There are only six places in the county health system, and two are given to the county traditional Chinese medicine hospital. The county traditional Chinese medicine hospital is distributed from the county hospital, and the scale is small. Last year, two people were enrolled in the hospital of traditional Chinese medicine. One was the son of the deputy director of the Bureau of health. After graduating from college, his father put him into the orthopedics and traumatology department of traditional Chinese medicine hospital. He also wants to study, but he can't compete with the two directors of the traditional Chinese medicine hospital. Besides, he has to work in the hospital in the future. It's not easy to do too much. After the list was reported, as soon as his father saw it, he crossed out Zhang Fan and replaced him with his son.

The Frontier Province attached great importance to this study, and the leader in charge was the first responsible person, so the list was reported to Kang Hua. Kang Hua usually signs this kind of thing. Since Zhang Fan cured her waist, she usually pays more attention to the county hospital. As a result, there was no Zhang Fan“ Dean Batu, how many people did your hospital report? Isn't Zhang Fan going? "

"Go, we're reporting Zhang Fan" Batu said in wonder.

"OK, I see." It was cut off. Zhang Fan, a college student from other places, was occupied.

"Xiao Tang, call the director of the Health Bureau."

The director of the Health Bureau wiped his sweat out of Kang Hua's office. He knew what was going on at a glance. The deputy director's son was on the list. No wonder Kang Hua scolded him for his secret operation. There was no shame! This pot is really unfair.

"You've caused me such trouble. Who asked you to change the list of people's county hospitals and who asked you to fill in your son. Is the Health Bureau run by your family! I let the county magistrate scold me today. Now I'll change it back immediately. When it's done, you can give it to Kanghua county magistrate in person. " The director cleaned up the deputy director like a son. The deputy director was almost scolded and fainted. A new college student alerted the county magistrate!

"Ba hospital, I have a question. Zhang Fan, a surgeon in your hospital, has a long history. He can go to study in his first year of work." Although he dared not put his son up again, he was unwilling to put Zhang Fan up.

Batu knew what was going on as soon as he heard it. He was such a good man, "Zhang Fan, what's great? It's said that he came from the province. He has a deep background and has a stronger relationship than steel plate. He was instructed by Kanghua county magistrate. What's the matter? Can't our list pass the health bureau! Why don't I call Kanghua county magistrate now. " He doesn't let go of being a big head. The deputy director is also a competitor.

"A few in the yamen, MD. It's in the province. Why don't you say it's central. " After hanging up, the deputy director was full of fire. No way, let alone in the province, he was crushed to death by a director, and he couldn't live with a standing county magistrate" How did this happen in this world! " He forgot his own favoritism.

After the list was determined, the government quickly issued a document. On January 17, the trainees collectively set out for Qingniao city. Team leader Kang Hua and Batu also mixed a deputy team leader. The headmaster of Batu H county high school is the leader of the team. He starts by train with the trainees. When they arrive, Kang Hua takes a plane to hand over with the competent officials of Qingniao city.

In order to rapidly improve the cultural, educational and health undertakings in the border areas, the central government kept supporting the west, but it was difficult to

retain talents. After a year or two of support, all the people who came slowly left and finished, so the effect was not obvious. This time, the central government changed its thinking, trained local talents, and paid great attention to counterpart study for the first time. The central government gave orders to Qingniao city to train a high-quality cultural and health team for the frontier.

Qingniao City, a relatively large coastal city in the north, has a high medical level. Zhang Fan went to the largest local hospital, the Affiliated Hospital of Qingda. At the beginning of 2009, the train had not speeded up. After sitting for more than 50 hours, Zhang Fan and them arrived at Qingniao city. Compared with the border province, it's much warmer here, but the wind is almost the same. The sea breeze in Qingniao city is not small.
