

《Medical road》

Chapter 27

Since the system upgrade, Zhang Fan is busier than before and almost doesn't go to the Department. Stationed in the operating room, the head nurse in the operating room was also moved by Zhang Fan's efforts. We found a bed in the male nurse's lounge for him to rest.

"Director, our hospital is a big surgery. The opportunity to study is very precious to me. I also want to study other surgery. Can you help me talk to the hospital and let me have other operations? "

"Hehe, joints or spine?" Lin Cong thinks Zhang Fan wants to study other orthopedics.

"These all go up, still want to learn general foreign language!"

"Will you still have surgery for general surgery? What operations can you do? "

"Some basic operations can be done for appendicitis, thyroid diseases, gastric perforation, intestinal obstruction and various hernias." The exercise in the system has not been put down these days. After all, the system is the most important.

"Er!" Lin Cong's mouth opened for a long time. He was so surprised. Is this still talent? Is it genius directly. He can't do some operations“ OK, I'll ask the dean for instructions. It should be no problem. " After Zhang Fan went out, he thought to himself, "is it true that great surgery exercises people like this“

Lin Cong personally reported Zhang Fan's situation to the dean. The Dean was also surprised. He was born in a general foreign language“ OK, I'm not afraid of him learning, but I'm afraid he won't learn. All surgical departments are open to Zhang Fan, including obstetrics and gynecology. Let him do whatever he wants. I also want to see where he can go. " This is a realm and a mind! It's really a scholar's mentality.

Zhang Fan is on the operating table of joints and spine in the morning and on the operating table of general surgery in the afternoon. Sleep time is reduced to four hours a day, which is still cumulative. The system requirements are too high. Zhang Fan doesn't dare to relax at all. After studying, he can't find a big hospital to go to work until he gets his practice certificate a year later. Moreover, he doesn't have to let go and let him have an operation at will.

Laparoscopic surgery for common gallstones, "Dr. Zhang, it's safer to tie a little closer to the front." The boss of the hospital spoke, and all departments also cooperated quite well. The director of general surgery personally gave Zhang Fan the platform on the operating table of gallstone, "no, you can't come to general surgery. Orthopedic surgery has no technical content. I'll take you to have a major gastrectomy in a few days. That's the real technology. Any carpenter with better orthopedic surgery can do it." The director of general foreign studies tempts Zhang Fan. He is skilled, savvy and modest. Who doesn't like it.

"Pull, you come to a carpenter for hip replacement. Zhang Fan, ordinary foreigners either wash dung or cut bags, and the sense of achievement in orthopedics has exploded. " Hospital surgery also has a chain of contempt!

Tired, very tired. But Zhang Fan didn't dare to rest. For two months, Zhang Fan hasn't seen the sun. His face was marked by the export cover, "where's Zhang Fan?" Batu came to the young doctor to study hospital management. He might be transferred to the Health Bureau when he went back.

"In the operating room." The director of internal medicine and Zhang Fan have a dormitory. I haven't seen Zhang Fan since I came to Qingyi.

A few days later, Batu came to Zhang Fan again. "He's still in the operating room. He didn't come out when he went in. He has become a legend of young doctors. "

"This bastard is dead." With that, Batu called Zhang Fan, "where are you?"

"Ba yuan, I'm in the operating room."

"Come out quickly. Do you sign up for the exam. I'll wait for you under the surgery building. "

It's time to sign up. Zhang Fan has forgotten this. Half an hour later, Zhang Fan went to ask for leave with Lin Cong. Although Zhang Fan is now on surgery, he is still a member of the trauma orthopedics department. "Director, I went out for a few hours and the president of our hospital came."

"Don't worry, I'll give you a three-day holiday to see the sea. The Department will organize activities tomorrow night. You must participate. You haven't been invited to dinner for several months." Zhang Fan's performance has made Lin Cong and them bring him into their own system.

"Ba yuan, I miss you so much." After more than two months of crazy surgery, although Zhang Fan was very tired, he removed the distress that the system could not be upgraded, removed a big stone in his heart, and people also looked like young people. Then he hugged Batu.

"You boy, you smell like disinfectant. I'm thin, and I can't work so hard. " Batu was also happy to see Zhang Fan. After all, people are emotional animals. After more than half a year, he likes Zhang Fan more and more.

"You didn't sign up for me to come to the bluebird market."

"You have a big face. I also come to study for a month. I haven't been here for a few days. I've been looking for you several times and I can't find you. "

"Why don't you call?"

"I came to see you. Nothing happened. I didn't call. I have to sign up today. Just contacted you. The registration materials are all ready for you, just a picture. " The photo Zhang Fan was ready long ago. He called Li Liang and explained it. It's OK.

"Come on, I'll show you the world." Batu looked at Zhang Fan and said.

Zhang Fan was happy when the old bus came. He followed Batu to a five-star hotel, "today I eat self-help, one is more than 800, and I haven't eaten it. Let's see it today." When Zhang Fan first came, he had a good meal when he was entertained by the government, and boxed lunch every day for the remaining two months. The saliva will come down when you listen to a big meal. The taste buds will lose their function every day.

Fish, big fish, meat, all kinds of meat, shrimp, big shrimp. The plates in front changed one after another. Batu has been full for half an hour, and Zhang Fan is still eating. Zhang Fan hasn't spoken much since dinner.

"Slow down and have a drink. It's good to take you to eat self-help. Wrap your face when you go out. Or they won't entertain you next time. " Batu drank red wine and teased Zhang Fan.

"I have eaten boxed lunch for two months. Just point to this meal. "

"In a few days, I'll take you out to the sea. It's a pity not to go to sea."

"I'll forget it. Just give me the money."

"Hehe, you can't die. You're young. Don't worry. The days will be long in the future.

Do you have any plans after the exam? "

"Well! Not yet" Zhang Fan was embarrassed to say that he couldn't eat others' food, and then said: I went to the big hospital after the exam. The county hospital is too small, so it's too careless.

"I don't know you yet. The county hospital is too small to support you, and I can't afford to delay you. Let's see. If the health bureau can't get in, I'll go to the hospital in the city. You can't refuse when you need support."

"Don't worry, a phone call will see my performance."

"Hehe, I'm a little energetic." Batu's son is also a medical student and is about to graduate. Study in general, you don't have to think about taking the postgraduate entrance examination.

After eating and drinking well, Zhang Fan and Batu returned to the hospital. Batu's study is purely to travel. A few days later, he took the other three people from the county hospital to the sea for tourism. Zhang Fan was called, but Zhang Fan didn't go. There are many opportunities to go to sea.
