

《Medical road》

Chapter 28

As the days passed, the temperature rose slowly. It's the end of May. Except for occasional department activities, Zhang Fan hasn't been out of the operating room, and there's not much basic upgrading of general surgery. The joints and spine are almost the same. Microsurgery is poor. Few people in large hospitals are willing to engage in microsurgery. First, the operation time is too long. Second, the use of surgical consumables is less, and the doctor's income is less. Third, 90% of them are emergency patients. They often come to patients in the middle of the night. Therefore, the development of microsurgery public hospitals is slow, and the operations are taken away by private hospitals.

"Miss Zhang, your hair is long enough to braid. Today, I have a rest to clean up my hair. No matter how long the aseptic condition is, it doesn't meet the standard. " The head nurse in the operating room, a young woman in her thirties, is very agile and nice to Zhang Fan, but she has high requirements.

"OK, head nurse, is there a barbershop in the hospital?"

"Who has a haircut in the hospital? It's for patients outside the brain. There are many barber shops at the back door of the hospital"

Zhang Fan's story has spread all over the hospital. The new surgeon wants to chop Zhang Fan. Zhang Fan doesn't have to write a medical record, take care of the patient number, fall in love, and soak in the operating room every day. Leaders don't care about this. Others can do it. Can't you! Let's get together, "Miss Zhang, do you like watching movies. Transformers II is very exciting. I have a ticket here. Go and have a look. " Ding Lei can't stand it. Seeing the sky in the operating room, his girlfriend is running away with others.

"It's boring. I don't like it."

"Play games and go to the bar. I have a hobby. "

"Well! I don't seem to like it. "

"My brother, if you go to the operating room again, I'm about to let the leader

dismiss."

"I won't rob you of your position. I'm not even a graduate student. Don't worry."

"God, now the director has said. If you're in the operating room, I have to be in the hospital. I'm dying and want to change the hospital. "

"Is there a bigger hospital here?"

"No, why"

"Then you can go to work at ease. I'll have a haircut first. I'll be back in a minute. "

Ding Lei looked at the mobile phone screensaver made of his girlfriend's photo and cried. Bye! My love, who let me meet a pervert? It's been more than four months and I haven't been out of the operating room more than five times. In the dean's office, the president of the youth Medical University is also the doctoral supervisor of the youth Medical University, and is also a talent with special national allowance. The director of general surgery and several directors of orthopedics are in the office.

"About the annual meeting of surgery, we will prepare after we go down. This time, medical professionals from many countries in the United States and Rb will attend the meeting, and pay close attention to the training of young doctors in hospitals. Health care reform is becoming more and more difficult. If we don't advance, we will fall back. How is the training of the frontier personnel coming to study? " Not only Quaker county but also other areas came to the frontier to train young doctors.

"Everything is OK. Zhang Fan is special. Now I take the orthopedic department again. The general main treatment can't be compared with him. " Lin Cong said.

"Yes, I'm taking it too. I've started a gastrectomy. He has good talent and special efforts. He has hardly been out of the operating room in the past four months. " Director of general surgery.

"Not to mention, I have forgotten Zhang Fan's educational background, medical experience for several years, and now his professional title."

"Hehe, I just graduated from Su university last year. I haven't worked for a year. I have a junior professional title."

"Undergraduates who have worked for less than a year have begun to have a big stomach cut. Orthopedics has reached that level. "

"You can replace the hip with the main knife!"

"If it weren't for working hours, I thought everyone was drunk and talking nonsense. What a genius. What department is he in now? "

"Operating room"

"Let him see me."

"Dean, are you looking for me?" After Zhang Fan knocked on the door and went in, "Xiao Zhang, sit down quickly. The directors of all surgical departments are full of praise for you. "

"Yes, the atmosphere in our hospital is good. The teachers are willing to teach me. "

"Do you like it here?"

"Yes"

"Then test my graduate students." If an outsider loses his teeth, how many years has he not brought a graduate student?.

"I can't speak English. I rely on ignorance in the exam. I'm afraid I can't pass the exam. "

"Take out one tenth of your efforts in surgery, I don't believe that English can't be taught. Seeing you, I think of my teacher, Professor Qiu Fazu. You have one thing in common. You are all generalists in surgery. Your vision is broader, and you can even do difficult orthopedic surgery, so don't waste your talent. Education is your biggest weakness at present. If you want to make achievements in medicine, you must improve your education. "

Out of the office, Zhang Fan is tangled and still can't go up. If he goes up, the advantage is that his education goes up, but the disadvantage is that he can't go to surgery freely. Graduate students must apply for a subject. At present, there are no graduate students in the whole subject. Upgrading the system is more important than everything. Let's upgrade the system first for the time being. Even the basic subjects have not been brushed now. After a little entanglement, Zhang Fan returned to the operating room. If Ding Lei and his colleagues knew about it, they would probably have died. The young doctor's graduate student was joking. Young surgeons count one by one. As long as they are willing to recruit, they will have to break their heads.

The days of further study were full and the time passed quickly. At the end of May,

Zhang Fan was ready to take the skill test. The medical practice test was divided into two tests, the skill test in June and the volume test in September. The days of study are running out. Zhang Fan doesn't want to waste. He grits his teeth and is ready to fly back and forth. Batu has finished his study. It seems that the matter of entering the Health Bureau has not been implemented. At present, he is still the president of the hospital.

From Qingniao to the frontier capital, there are still hundreds of kilometers to chasu city. Simply fly the whole journey. Zhang Fanyi needs more than 5000 back and forth. It hurts!

"Zhang Fan, when are you going to start? It's time for the exam." Batu is in a bad mood recently. He is also anxious to wait for Zhang Fan to come and see if he can find his sister Wang.

"Ba yuan, do I make a plane or a plane"

"Sit down if you want. What a big thing. I know you can't bear the ticket money. Come on, I'll reimburse you."

The ticket money is available. Zhang fanlisuo buys the ticket and asks Wang Cong for a good leave. Don't go to the operating room these two days. Take a look at the skill operation. Don't cry if you can't pass the operation at that time. There is no problem with surgical operation, that is, gynecological and internal medicine operation. When I left, I took a look at the sea. It's hard to say that I haven't seen the sea when I came to the beach.

"It's so big. Why don't you have the blue color on TV. It's a little clearer than the Yellow River. TV is a lie. I won't watch TV in the future." Zhang Fan looked at the sea.

"I've finally seen you. It's almost half a year. I've finally passed the customs," said the director of internal medicine in the same dormitory.

"I'm going back to the frontier for the exam. I'll start tomorrow. Let me tell you if I have anything to bring. I'll take it back."

"It's really a little. It's not easy to take the fresh goods here. I bought some dry goods and took them back for me. Thank you." Zhang Fan went by plane with some dry goods. He also bought some dry goods. There were not many people to send, including Batu, director Gao, Kang Hua, Tang Jingjing and sister Wang. These are the people who have helped him. Although the gifts are not valuable, they have friendship.
