

# 《Medical road》

## Chapter 32

Su mutai, a township in Quark county and the farthest from the county seat, has inconvenient transportation. The roads are closed by snow in winter and occupied by floods in summer. It can also be said that he is intermittently isolated from the world. The township health center is a yard of no size, with grasslands in front and back. In different seasons, herdsmen graze in different places. There are grassland in summer and grassland in winter.

Su Mu Tai township health center is standing on the winter grassland. The president of the health center is looking after the house. Two nurses and a doctor are nearby. They have to cut sheep these days. They are busy at home. The herdsmen all transferred to the summer grass farm, and no one here came to see a doctor. Last winter, Zhang Fan came here for his first operation. The dean of the health center was very happy to see Zhang Fan and Lao Chen, because his family also wanted to shear wool. Hurriedly explained a few words and left.

Zhang Fan and Lao Chen stared at each other. There are many empty houses in the health center, but eating is a problem. There are few families around, and there are no people within two kilometers! " What's the hurry? If you have dinner in the evening, go to the dean's house. I know where it is. Now get some sleep. The old waist is bumpy and broken“

Life on the grassland is extremely calm. Don't talk about people, but there are few birds“ Lao Chen, ask me something“ Zhang Fan decided to pull Lao Chen. " Have you done this year“ Old Chen was dejected when he listened to the exam. "What's the use of operating it? I can operate it every year." the tone is not very good.

”Here, there is nothing. We read books and ask questions together. I promise you to pass this year“

”I'd better forget it“ Lao Chen has given up hope. The annual registration is just to cope with it.

”Absolutely, as long as you listen to me. Don't be like a woman. When you pass the exam, who dares to look down on you? Come on, let's start“ Then he took out the reference books he bought in the city. Lao Chen has no confidence. That's because he didn't find a way. Although an old doctor for many years graduated from a junior

college, he has accumulated a lot of knowledge by listening to a little in the hospital every day. So now build his confidence, "starting with orthopedics"

For a month, there was no patient. Except for the president of the health center, no one passed through the door of the health center. Zhang Fan, they are also happy to be free. The exam is coming soon. It's very good to have free time to read books. This month, I went through surgery for Lao Chen in a down-to-earth manner. They asked questions and answered questions one by one, and went through internal medicine. Zhang Fan is also a 211 graduate. There are no other churches in the University. He can cope with the exam. That's his strong point. Combined with the examination reference books, many key points have been drawn. " You must take the exam here this year, remember"

When Zhang Fan went to the countryside, Li Liang and Li Hui bought some cooked food to see Zhang Fan. " I was eating with my hands and drinking milk tea. Our brothers were worried that we were hungry and came to see you. As a result, we found that our life was not as nourishing as you" Li Hui looked at Zhang Fan and said angrily.

"Mutton was trampled to death by mengke's family yesterday. It's bad if you don't eat it in summer. Give us some. Is there a shortage of milk tea in Quark county"

"In this way, I have a little balance in my heart" Li Hui and Zhang fan are not in the same department. If they are more casual, Li Liang can't. Zhang Fan puts too much pressure on him and can't get up casually.

"Hurry, mutton with roast chicken. Start building. " I haven't seen many people for more than a month. Suddenly, the arrival of my colleagues made Lao Chen very happy. Several people chatted while eating" How did you review? Lao Chen and I have no accidents this year. We should be able to pass. " I have gained a lot from my recent study" If I say something shameless, if I really pass the exam, I'll take you as my teacher. " Chen Qifa said seriously.

"Cough, cough, cough!" Li Liang was frightened by Lao Chen. Is this still Lao Chen, or which shady old Chen!

"No, you can just pass. It's serious to worship a teacher or something." Zhang Fan patted the fat man on the back and his face turned red.

Lao Chen didn't speak again. Li Hui said, "I don't know. I don't know." With a sigh of relief, Li Liang said, "well, I've just been put into the trachea. Brother Zhang reads in the Department, and I'll follow him, but I don't have a bottom in my heart. Recently, Corey, you've all left, and you can't keep the patient. It's really boring. "

"Time is running out. Hurry up and do the problem. Try to pass the exam this year. "

Quark county hospital. With the start of busy farming, there are more injuries. They are accidentally cut by sickle and injured by harvester. This time of year is also the busiest time of surgery. Shi Lei is a good man. When Zou Pingshan sent the two who can work in surgery to the village, he began to play with his heart. Surgical Nur is not helpful. Tuxun used to compete with Shi Lei. Now Shi Lei has become vice president and asked him to be the deputy director of the Department. He thinks it's humiliating him. There are two kittens left, which can't be caught by mice.

"Monitor, the hospital has improved a lot recently. Or your level is high. I wonder how we should catch up with you. No, I want to go to the municipal hospital to study for a few days these days. I have to ask you to contact. The municipal hospital is in charge of you" Shi Lei's face was not generally thick. Although he was angry, he dug a big pit for Zou Pingshan.

Zou Pingshan was born in internal medicine and has been in the urban area. He doesn't understand the situation in the county. He is very proud to hear Shi Lei say, "as long as you are willing to make progress, the organization is very willing to help you make progress. I'll contact you right away. You'll go tomorrow"

"You're still an organization! I'll wait for the organization to cry" Out of the door, Shi Lei smiled proudly.

When the peak of busy farming comes, when the wheat is ripe, farmers have to reap by sickling at night. It's too hot during the day. If black and white are reversed, it is easy to lose squat and doze, and it is easy to have accidents. Zou Pingshan is old and has been on duty for 24 hours for many years. He has insomnia and sleeps on sleeping pills. The phone rang several times before he woke up. The hospital office called and he was full of anger, "what's the matter"

"Dean, a patient who was injured by a stone roller came to the hospital and was in the emergency department. What now" The chief on duty today is the director of the pharmacy department.

"Are all the surgical people dead?" Zou Pingshan was so angry that he called me when he was injured.

"Noor and tuxun couldn't get through. Zhang Fan and Chen Qifa went to the countryside. There are only two new ones left. They can't handle it." Yang Chengming is on duty today. Metatarsal fracture, he is uneven.

"Where's Shi Lei? Isn't he a surgeon?"

"Isn't Dean Shi sent out to study?" A dean has to deal with things that his subordinates can't handle. No way. He has to contact the doctor of the superior hospital for surgery. In the past, Lao Chen handled this kind of thing. If he can't do it, he should call a superior doctor. He has a fixed doctor, which is good. Zou Pingshan, who was born in internal medicine, was not very clear about the hidden rules of surgery. It took a lot of effort to contact a doctor. No one was happy in the middle of the night.

The operation was done, but on the third day, the patient had a high fever and was inadvertently infected. Surgery left Yang Chengming and Li Liang on duty, 24 hours a person. Although there was nothing wrong, he was on duty to sleep, but Yang Chengming was uncomfortable. As soon as his anger rose, he didn't work well. As a result, he didn't change his dressing in time after the operation, causing infection. The attitude was not good, which annoyed the patient's family.
