

# 《Medical road》

## Chapter 33

Family members make trouble. The situation is different at different levels of the hospital. The county hospital has no way to make trouble. If there are many people in the family, they will seal the door for you directly. There are seven or eight brothers in this family, and there are more relatives. The wheat was also collected, and he was idle, so he followed him to the county hospital to make trouble. Zou Pingshan has been disheartened these days. You talk about the law to others, and others play rogue for you. He has just become the president, and his prestige is insufficient. The security department doesn't listen to the propaganda. Several women in the patient's family are about to put their fingers in his mouth.

What should I do? Lose money and transfer to another hospital. A few village women broke him down. I can't afford it. I can hide. Lost work expenses, nutrition expenses and hospitalization expenses have been compensated to the family members, which is unwilling. Finally, the county government called again. This matter was reported. It was said that the county hospital misdiagnosed human life, and the family members united with people in a village to petition the municipal Party committee. Watching the excitement is not afraid of big things.

Stability is overriding. If someone wants to petition, it's not a small matter, so he hurried to ask Zou Pingshan. Kang Hua has just been in office for more than a year. The accident in Batu has little impact on her, but she is also in a bad mood. When something happened in the hospital, he was even more angry. The informant also said that Zou Pingshan bullied the new college student and asked Zhang Fan, a surgeon, to go to the countryside, which directly made him angry“ What's going on? ” Kang Hua's tone is not good.

"The surgical department didn't handle it well. If it was infected, it was transferred to another hospital. ~ ~" Zou Pingshan still feels that he can't be wronged, and now he can't shirk his responsibility. The vice president was sent out by him to study. Noor has made a retirement report to himself. Tuxun hemorrhoids committed a crime and went to the city for hospitalization. He is a doctor of internal medicine. He can't do anything. He can't go to the superior hospital to ask for a doctor every time he comes to the patient. Where? Is there room for your face.

Nur was frightened by the events in Batu. When he thought about it, he begged to quit. Anyway, the grade was coming, so he made a retirement report. As soon as Tucson heard of an accident in surgery, he went to the city for hospitalization.

"Why not ask for leave?"

"Please"

"And who asked for leave!"

"Nur, director of our section."

"Why didn't he admit it?"

"Maybe he's drunk again. Wait until he wakes up" This is the dialogue between Zou Pingshan and tuxun. Zou Pingshan smashed the phone at that time. Who are these people.

Kang Hua had a problem with him. It's not your skill to be the dean. But you can't manage the hospital well and bully Zhang Fan. Then you have to know why Lord Ma has three eyes. She has subconsciously felt that Zhang Fan is her person, "this is a county-level hospital. If you have a fracture, please ask a superior doctor. Finally, please come to the accident. What do you want this hospital to do! What do you want the dean to do. Can you do it? Can't you do it? Let's go. Do you think it's impossible for people with ability to live without you? " The door of the office was open, and Kang Hua was suspected of making a show. It's terrible for me to get angry. You should be careful.

Zou Pingshan finally trembled and walked out of the gate of the county government. Regretful straight hammer chest, a good internal medicine director quit and ran to this place to be angry. He also has a number one in the city hospital, and even the president wouldn't talk to him like that. For many years, I almost lost my breath today. In particular, the last sentence made his old face have no place to put, "you invited Zhang Fan back early, and the superior leaders are still waiting for him to see a doctor."

After reporting, Shi Lei called friends to drink in the city. He just wanted to make trouble for Zou Pingshan and let him lose his prestige. The county hospital can't be like Batu's era. The president has a speech hall, otherwise it's no use asking him to be the vice president!

Su Mu Tai Township Health Center, Zhang Fan, they finally opened today. For more than a month, I haven't seen anyone except Li Liang and them once. Su Mu Tai is a Mongolian settlement and believes in Lamaism. A living Buddha who is said to have graduated from Xihai Buddhist College has been stationed in sumutai for a long time.

That day, the living Buddha didn't know what was wrong. The pain was death and life, lying on the ground and rolling.

Fortunately, it was found by the willing herdsmen and sent to the health center“ Intestinal obstruction, closed loop intestinal obstruction, you have to have surgery. " Zhang Fan said after the physical examination.

"To the county?" Meng Ke, President of the health center, asked that he played more roles in the health center, with anesthesiologists as surgeons and presidents. The other is internal medicine. The two nurses mainly do the work of midwives.

"I'll do it here. It's troublesome to send it to the county. Can you be numb, this man's family. " The living Buddha is somewhat related to Meng Ke, "Neng ma. Without any relatives, I can decide. "

"No, you can't laugh at your future. I'm an orthopedic doctor. " Lao Chen said with a little worry. Obstruction of passage of intestinal contents caused by any cause is collectively referred to as intestinal obstruction. It is one of the common surgical acute abdomen. Sometimes the diagnosis of acute intestinal obstruction is difficult and the disease develops rapidly, which often leads to the death of patients. Water, electrolyte and acid-base imbalance, as well as older patients with cardiopulmonary insufficiency are often the causes of death.

"You're an orthopedic doctor. I didn't say I was an orthopedic doctor. The operation is simple. Don't worry, I'm not stupid." The operation was carried out smoothly. Resection and separation were performed. The distal and proximal intestinal anastomosis at the obstruction site was performed. OK, close the abdomen. Although Lao Chen has not engaged in general foreign studies for many years, he still has no problem being a helper.

"You can do all the operations in general surgery“ Surprised, too surprised.

The next day after the operation, the living Buddha woke up. He didn't know much Chinese. Through mengke's translation, he thanked Zhang Fan especially. He said that Zhang Fan had wisdom and gave Zhang Fan a string of honey wax. It is said that an eminent monk from Tibet Province opened the light. Munk's mouth watered greedily as he looked at the honey wax.

"The county hospital called you back." Mengke informed Zhang Fan and Chen Qifa. Su mutai has no mobile phone signal and can only be contacted by landline. When the wind blows off the telephone line, it depends on shouting“ We can't go back here in despair, "said old Chen angrily.

"OK, let's go. The exam will be in a week. I said don't be angry. You're beginning to

be angry. Let's go. "

"It's not the same thing. It's a matter of face." He kept talking, but he didn't stop.

"Will you come again next year. My family will have to cut wool next year. " Say goodbye to Munk. They took a bus to the county.

Zou Pingshan was cleaned up by Kang Hua, and his anger was put out directly. He also found that asking turson about the hospital was purely for smoking. Let's start talking one by one. Start with internal medicine. His strengths. After a little understanding, I know why Batu attaches importance to Zhang Fan. Zhang Fan is the non staff director of the second foreign language department. He is ready to comfort Zhang Fan when they arrive. He can't always ask a superior doctor for surgery. He was really afraid that Kang Hua would get angry one day and dismiss him. There would be no director of internal medicine when he went back to the municipal hospital.
