

《Medical road》

Chapter 34

Why did Zou Pingshan stumble in the county hospital? Neither Batu is better than him, nor Shi Lei set him up. But he is not professional. He is too high-end. Batu went step by step from the township doctor to the president of the county hospital. Shi Lei worked in Quark county hospital from young to middle-aged. One knows more about management than he does, and the other knows better than others. Relying on his background and being an expert in internal medicine, he acted a little impatiently. So he suffered and fell. There is a big difference between the management of a hospital and that of a department.

After Zhang Fan came back, he didn't argue with Zou Pingshan. It's meaningless. A week later, Zhang Fan and his family set out for the city examination, and the car was gone. Since Batu was caught, the car has been driven away. In a high school, Chen Qifa was nervous to death. In previous years, he had no hope and didn't care. But this year is different. Under Zhang Fan's one month high-pressure training, he is particularly hopeful to be admitted this year. So I'm very nervous. Where Zhang Fan goes and where he follows, just one sentence: do you think the topic this year is difficult? Can I pass the exam.

Zhang Fan understood him very much and kept comforting, "Lao Chen, you have absolutely no problem. Don't worry. Don't worry when answering questions. It must be over this year." On the morning of the first day of the exam, there was no big problem. After a year, Zhang Fan made up almost the same foundation. In the afternoon, there was no problem with internal medicine. The topic was simple. The next morning, the surgeon went out with almost full marks. It was a little difficult for women and children in the afternoon, but it was not a big problem.

"I passed this year, I passed this year." After the exam, in the hotel room, Lao Chen pulled Zhang Fan's arm and cried like a child. Decades of depression can finally be vented“ Yes, I can. In the future, we will be people with certificates. " Zhang Fante sympathizes with Lao Chen. Looking at Lao Chen, he will think of the depression of looking for a job when he graduated.

Li Liang and Li Hui did well in the exam. They should be able to pass. Without Wang Sha's skills, they can't take the written exam. After a few people met, Lao Chen said, "today is my treat. No one should rob me. I must thank Mr. Zhang." Four people went to the restaurant shoulder to shoulder. Anyway, Lao Chen's salary is higher than theirs. He has no psychological pressure at all. During the meal, Li Hui asked, "director Zhang, the exam is over now. You must have no problem. Where are you going in the

future? Don't say to stay in the county hospital. Be careful I hit you with a bowl."

"Although the examination is over, the results will not come out until December, and the certificate will be obtained next year. Now you can't resign immediately. See if there is a recruitment examination in the city recently. If there is, take the examination. If not, wait until the end of the new year. And you. "

"I'm going to do the same. If there is an examination, I will go to the examination with Wang Sha. There is no way out for the county hospital. " Li Hui said.

"Brother Zhang, I'll take the test wherever you take it. You have to take me." Li Liang is direct.

"Brother, you look up to me too much."

"It's better to be young. You should all go out and make a break. In the county, you will be me in the next 20 years." Chen Qifa has no energy to break through.

To upgrade the system, you must go to a large hospital, but the county hospital can't count on it. It's unrealistic to go to other cities without a certificate. My sister is a sophomore this year and a junior next year. She has to earn an income every month. Otherwise, if she doesn't have a job, it will affect her sister's study. Since the last medical accident, Zou Pingshan can't bear it and is not young. He is really afraid. The two knives of surgery are too evil. Shi Lei is responsible for surgery, and Feng, director of the first Department of internal medicine, is responsible for internal medicine.

Shi Lei has more chicken thieves. Give me the surgery. No problem. Is surgical has the final say, is it also has the final say that I enter the equipment, anyway, I start digging the right corner of the building. Batu's management method is to learn from others. If he wants to hold the surgery in his hand, he should coax those who can work first. Chen Qifa has small eyes. He gives more overtime pay and runs faster than a dog. Zhang Fanna has to make a heavy bet. He is highly skilled, and he is also related to the leaders of the city or county. There is a truth in foreign studies. Nur and tuxun were directly ignored. They couldn't do anything. What should they do.

Batu's case has not been explained yet. Batu has long been prepared. His son's nationality was from Kazakhstan. When the director of the health bureau could not operate, he sent his son to Kazakhstan. Anyway, he doesn't have any property under his name. He admits that he doesn't recognize the benefits of CT. The building of the county hospital has been built for many years. Some related people have retired long ago and disappeared. The county also wanted to pull out higher-level figures, but Batu

kept biting and didn't say anything. In the past, he couldn't find anything except CT.

Medical trouble has little impact on the ordinary staff of the county hospital. Anyway, people in this line are also ordinary. But it has a great impact on Zoupingshan. It not only converges a lot, but also shrinks. He is going to stay in this position until he retires. If something happens on the way, he will have no future. Insomnia is becoming more and more serious. I often wake myself up in the middle of the night and always feel the phone ringing.

Shi Lei was elated. On his proposal, he raised the duty fee of doctors and nurses and added a little night meal subsidy. The hospital's evaluation of him is getting higher and higher. He knows that his business is not good, and professional things are handed over to professional people. Old Nur's retirement report was approved, and Shi Lei, director of the second foreign language department, served concurrently. Tuxun didn't want to do it, and Shi Lei didn't want him to do it. Old Chen was the best, but old Chen didn't have a certificate. Shi Lei privately promised Lao Chen that as long as he followed him and waited for the certificate to come down, he would hand over the director of the second foreign language department to Lao Chen. Zhang Fan knows he can't stay. Just keep a good personal relationship.

In October this year, the frontier organized the largest entrance examination. Although Zhang Fan and his party are regarded as supporting the western region, they actually have no establishment. Li Liang and Yang Chengming have their own staff. Therefore, after the practice examination, as soon as the enrollment examination began, Gao Shijun called Zhang Fan, "don't mix in the county hospital. I've set it up for you. You can directly report to the trauma orthopaedics department of the municipal hospital. Specially tailored for you." Gao Shijun also spent some time trying to get Zhang Fan into the Department.

Department dignitaries, after setting the conditions, report to the hospital. The hospital reports to the Health Bureau, and those who meet the conditions can sign up. The conditions he set were almost not met except Zhang Fan in the tea vegetable city. First, graduated from 211 medical college. Second, male, unmarried. Third, he studied in the third class hospital of senior officials for more than five months, and was in surgery. Fourth, he participated in national support activities. This setting directly raised the threshold by N levels. And just one person. Lao Gao is worried that some experts will directly squeeze Zhang Fan out, so the conditions are harsh. No matter how awesome your father is, he can't register if he doesn't meet the conditions!

Lao Gao's department director retired. After several rounds of pursuit, Lao Gao is the acting director and is responsible for the daily work of the Department. He also has his ideas. Several disciples under his hand can't stand alone at present. He wants to cultivate a strong hand to echo him.
