

# 《Medical road》

## Chapter 43

There is a saying in the medical industry that the most terrible doctor is an energetic doctor with a mortgage. Not talking about the system, not talking about society, not talking about pressure, anyway, it's not bad. Lao Gao finished the meeting and everyone began to work. Lao Li is not feeling well these days. Cui Pingjun is not very willing to have an operation. He owes a lot to Lao Gao. His level is limited. Lao Gao pretends not to see it. Zhang Fan and Xiao Wang are the only ones who work in their group.

Zhang Fan has a system and can continue to work after a while, but Xiao Wang can't bear it. There are still three operations today. It will have to be finished in the afternoon. Today, they are on duty 24 hours“ You can lie down for a while before you get the anesthesia. " In the operating room, Zhang Fan saw that Wang Yanan couldn't stand, so he said. She was too tired to care about anything. She pulled a list of accessories and lay down. Within a few minutes, he began to snore.

"So is this girl. She has to do surgery. This job is done by rough men. She's a delicate big girl. What's she mixed with?" Elder sister Xia Yonghong in the anesthesia room is a little distressed.

"Pursue it, elder sister. Didn't you come like this back then?" Zhang Fan helped the anesthesiologist put in position.

"Alas! This is not human work. It has been better in recent years. There are more young people and I am older. In the past, I used to rotate continuously. One year, I turned over my patient, and I also fainted. Now I have a root cause of the disease and often feel dizzy. Retire quickly. " She was a worker, peasant and soldier college student. She learned almost all her skills after entering the hospital. She also suffered a lot before she was better in the Department. Technical unit, technology can't pass, it's really hard to mix.

After anesthesia, Zhang Fan washed his hands and disinfected them. He said to Wang Yonghong, "sister, after I disinfected, please call Xiao Wang and let her sleep first. I did it all night last night."

"OK, you wash your hands."

After detoxification, the nurse helped spread the towel, and Xiao Wang was called up“ Go and wash your hands. Doctor Zhang is really good. He also knows how to pity

you. You too have to do surgery and look tired. " Sister Xia said a few words and Zhang Fan was embarrassed.

"Doctor Zhang, I heard you're going to invite Xiao Yin to dinner, isn't it? Otherwise, I'll take it with me. Shouldn't I let you invite it!" While Xiao Wang went to wash his hands, today's operation nurse joked with Zhang Fan. Zhang Fan is single and tries not to say. His skills are very good. The old doctors in the first Department of orthopedics value him, so he also began to catch up. The little nurses in the hospital work and work overtime every day, especially in the operating room. They come down 24 hours a day and can't see the sun in two or three days. There are fewer people to contact, and school-age people focus on the young doctors in the hospital.

Speaking of it, Zhang Fan is not the style of a white faced scholar. He is a little rough and crazy. He is just one meter eight. He is an ordinary person in the frontier. Without a strong body in orthopedics, it is absolutely impossible to do orthopedic surgery well. A steel plate orthopedic has no strength in his hand. Don't even think about it. Lao Gao can't eat now, and Lao Li can't. when he is old, steel plate orthopedic can't be done.

"OK, let's call all your spare time in the operating room. After working for so long, I'm always bothering you. You should. After the operation, I'll go in the afternoon. Sister Xia, you too. " Just invite them all.

"Hehe, I'm not involved in your young people's affairs as an old lady, but Xiao Zhang is really good. I haven't talked about the object yet. The little nurses in our department should look like and have a head. They are much better than those goblins in the society. Doctor Zhang should start early."

"Start quickly." Wang Yanan finally came. Zhang Fan was overwhelmed. The old lady was too fierce. Xia Yonghong's age should be called aunt, but it's not appropriate for colleagues to call aunt. Those who are closer are called eldest sister, and those with general relationship are called doctor Xia.

After the operation, at more than two o'clock in the afternoon, I didn't eat the boxed lunch in the hospital at noon because I promised to treat others. Wang Yanan really couldn't. he grabbed Zhang Fan's arm and went back to the Department. He fell down on the bed in the duty room and fell asleep. They were supposed to be on duty today. They had no brains last night and forgot about it.

"Brother, Jianghu is in urgent need. Come and take a shift for me quickly. I'll go out. " He called Xue Fei. Lao Zhou is off the night shift. It's not good to pull people back. Today, when the director of Xue Fei's normal class went to the clinic, he dodged early.

"You just ask for trouble for me one day. Am I easy to bully?" Complaining Xue Fei entered the Department, "I just sat on the mahjong table."

"All right, I'll save you some money. I'll lose money. For the sake of family harmony, help me on duty today." Xue feichuan, a native of Sichuan Province, loves playing mahjong and often quarrels with his wife about this shit. Once his wife specifically told Lao Gao where to let Lao Gao clean up Xue Fei. The relationship between teachers and apprentices in surgery is a little more important than that in internal medicine. In internal medicine in general hospitals, you will graduate after learning for half a year, but surgery is not good. There are some tips that you don't have a teacher to bring, and it may take a lifetime to summarize and experience. So Xue Fei is more afraid of Lao Gao than the dean.

Not far from the hospital, there is a thin skinned steamed stuffed bun shop opened by Uighur people. The skin is thin and transparent, there are many meat, and the taste is good. There are many people who eat, and there are many people who like to eat in tea vegetable city. When it's cold, Zhang fan can still eat a few. He can't fall in summer. It's too smelly. The little nurses in the operating room, there were seven or eight hula, and Xiao Yin was a little unhappy. The agreed two turned into a department dinner. While no one was paying attention, he stepped on Zhang Fan and made great efforts.

Those who occupy seats and those who take chopsticks take chopsticks. Zhang Fan has nothing to do. After cleaning the tables and stools for everyone, he is relieved to wait for food“ Dr. Zhang, you graduated last year, didn't you? I heard you were in Quark county hospital before, didn't you. Xu Hong doesn't know. I'm from the operating room of quark county hospital. I'm a classmate of health school. " Almost all nurses of the same age went to work several years earlier than doctors and began to detour. They all know something about Zhang Fan's experience. They are very famous in the county hospital. More people are interested in him.

"Yes, we have a good relationship."

"Have your parents come to tea vegetable city? I heard that you are short of water. Many people don't wash their faces in the morning."

"Ha ha, no wonder Doctor Zhang is so dark. He often didn't wash his face when he was a child." Women, big or small, have more courage and become strong. You have nothing to say to bully.

Zhang Fan is not angry. His colleagues are joking. He is definitely not the kind of person who looks down on others“ There is a shortage of water, but there is no shortage in my hometown. A Yellow River is enough for me to wash my face. "

With that, the steamed stuffed bun came up, full of flavor. Although there were many

people, they were all little girls. A steamed stuffed bun cost one yuan. In the end, they didn't even spend 100 yuan.

"Dr. Zhang, I have a birthday this weekend. I'll invite everyone to sing. Do you have time to come?" A little nurse invited Zhang Fan. People talk about their birthday. Can't they go.

"OK, where is it? I may be late. But I will. "

Back in the Department, Wang Yanan didn't wake up. Zhang Fan brought her some steamed stuffed buns. There was a microwave oven in the Department. When she woke up, she could eat it. Xue Fei sat on the stool scratching his heart and lungs. He was in a hurry to play mahjong. A look at Zhang Fan, did not say anything, ran away. This is Zhang Fan's credit for dealing with people at ordinary times. If he can't be a man, he will give you a little doctor on duty. Don't even think about it. He will pull down from the mahjong table on duty and dream.

In the afternoon, Zhang Fan woke Wang Yanan up. Hurry up and have some dinner. The little girl is really hungry. The steamed stuffed buns are stained together and become a lump. When it was hot, I didn't care. I ate it in a big bite.

"Tired?"

"I'm tired. I'm cramped and skinned“

"It's too late to regret before you decide the Department."

"That's not necessary. I didn't adapt at the beginning. When I adapt later, I'll have no problem."

"According to your attitude, if your body can stand it, surgery will definitely have a place for you in the future."

"Thank you!" She is really tired, with tears in her eyes and steamed stuffed buns in her mouth. Her dream is beautiful and the reality is really cruel. Surgery is not for handsome.
