

《Medical road》

Chapter 45

Zhang Fan goes to treat Li Xiao every evening. The card she gave, Zhang Fan went to the ATM several days later to see the amount. He suppressed his desire to see the money and couldn't let the money control him. Four zero and one three. That's a lot. The salary for the first half of the year came out. In this year, there was almost an income of more than 100000. Zhang Fan was very satisfied. Li Hui can't do it. There's no deposit. He is the same as Zhang Fan. Without a certificate, he has no income. But Zhang Fan is different. Zhang Fan is a person who has established his status in both the county and the municipal hospital. While he was in the internal medicine department, he had no prescription right and was not on duty alone. He followed his female teacher every day, and there was no extra income at all.

Recently, Li Hui's upset is caused by several things. He has a jumping personality, likes to play and make trouble, and is easy to joke in the Department. But his female teacher is more serious. She has told him several times, but her character can't be changed easily, which makes his teacher very angry and doesn't want to take him. In addition, I like to play. After I get familiar with the city, I go to bars and night shows every day after work. I don't know how I was seen by the little nurses in the Department and spread rumors. And the biggest upset is that Wang Sha is getting engaged, not him.

When the food came up, Li Hui asked while eating, "how are you doing in surgery? Hi! I'm talking nonsense. According to your technology, it should be very moist in surgery. Endocrine doctors and nurses all have TN secretion disorders. They don't ask for anything, so they gossip about me. " He is in endocrinology, and women doctors account for the majority.

Zhang Fan smiled and said nothing. Li Hui's character is like this. You dare to play and are afraid of being said " Wang Sha is getting engaged, you know. " Li Hui asked for a bottle of Baijiu, and poured it from himself.

Zhang Fan had expected such a thing long ago and was not surprised. It's appropriate for a man to marry a woman. Originally, Zhang Fan thought Wang Sha would leave quark county and go back to her hometown. Unexpectedly, she really took root. Eating the vegetables, Zhang Fan said, "what's the matter, unwilling? You don't want to stir it up. I won't go with you. It will kill people. " Li Hui ignored Zhang Fan, drank another cup for himself, sighed a long sigh and said, "it's all my fault. No wonder Wang Sha. I think I'll find a way to get Wang Sha over when my side is stable. As a result, who knows she's so strong."

This is bullshit. Zhang Fan doesn't answer, "who is engaged to Wang Sha? It won't be the person from the county hospital."

"A director of the teaching and Research Department of the county high school was pulled by your surgical asshole Shi Lei"

"You know, but no wonder people don't have Shi Lei and Wang Lei. It will happen sooner or later. Wang Sha is very excellent in all aspects. If her psychological quality was not a little poor, her skills would not be better this year, nor would it affect the enrollment examination. Alas! It's all fate. Admit it. " Zhang Fan couldn't persuade him. He deserved it. He couldn't bear to see Li Hui.

Bitter wine is intoxicating. Li Hui can drink well, but he is depressed. He gets drunk after a few drinks. Zhang Fan opened a room directly next to the restaurant and will sleep until tomorrow. Originally, the wind rating is not good, and it's even worse to let others see drunk. There are also gossipers in the hospital, especially young people. If you don't restrain yourself, the gossips can spread all over the sky. Among the few people who went in with Wang Yanan last year, there was a little girl who was very beautiful and loved to dress up all day. As a result, I didn't know who came out and said that the girl was a junior to others.

Guli recovered well. On the third day, she didn't feel any pain and wanted to go down to the ground. But he bluffed Zhang Fan. I dare not go to the ground now, or all my previous efforts will be wasted. It was her mother who accompanied Guli. More than 40 people were like Grandma Guli because of the wind and the sun. She doesn't understand Chinese and dotes on Guli. The old girl is flesh in her heart.

The hospital secretly preached to build welfare houses, and Zhang Fan planned to have one. The internal room of the hospital is much cheaper than the market price. When the house came out, my sister went to college. He brought my parents here.

When winter comes, it gets cold immediately. Tea vegetable city is better than Quark County, but it's not much better. The expressway to the capital is not connected. The national road to the capital has to pass through a canyon. The road is closed like snow, but fortunately there is an airport. In winter, the number of people injured by falling rises sharply, especially the elderly, who break their bones accidentally. Wang Yanan is more beautiful in plaster than Zhang Fan. The girl's heart and effort, coupled with the natural delicacy of women, the cast is particularly beautiful. Under the leadership of Zhang Fan for several months, Wang Yanan can handle the general orthopedic emergency patients independently. Zhang Fan is a selfless professor and Wang Yanan works hard and makes rapid progress. Lao Gao also acquiesced to the non staff

personnel of the Department and began to give her bonuses.

Guli can finally be discharged from the hospital. For more than half a month, Zhang Fan is also worried. The little girl is too jumpy. She is afraid of her condition all the time. When she was discharged from the hospital, her coach took several strong men from the sports department and carried the little girl away like an empress dowager. The school conditions were average and there was no professional doctor. When he left, Zhang Fan thought he had questions about Guli's treatment, so he asked, "Mr. Wu, do you have any questions?"

"No, Guli is recovering well. Let's wait until she recovers completely. I have a bad word to say. But I have to say"

"It's all right. Say it. If you have a problem, say it." Looking at his tangled face, Zhang Fan said.

"We are a sports school, and the training conditions are OK, but there is a lack of professional doctors. Many students either rest for a few days or prescribe some painkillers after being injured. The children are still young, and there is no professional sports doctor in Teasu city. I think you seem to be very professional in sports medicine. Can you go to the school to help the students when you have time. I tried to talk to the headmaster about the funds, but I didn't talk much. " His red face seemed to radiate holy light. Dedicated people will definitely be respected.

"Well ~! The hospital work is very cumbersome. I take one day out of two weeks to go to the school to do a physical examination for the students. If you have special circumstances, you can call me directly. " Since you can't upgrade other disciplines for the time being, make orthopedics to the extreme. It's just that there is no system. Looking at coach Wu's professionalism, Zhang Fan will go too. It's not about money.

The greater Wang Yanan's progress, the more he knows about orthopedics and the deeper he admires Zhang Fan. Just graduated a year earlier than her and has become a backbone in orthopedics. Zhang Fan is her goal. Her family also has a headache for her. A girl's family is mixed with men. She is tired like a puddle of mud every time she comes home and has no strength to eat. From time to time, I won't be home for several days and stationed in the Department. However, her uncle is very supportive. The technical unit is the king of Kung Fu. Struggle while you are young and have a dream. Time won't be bad for your efforts.
