

《Medical road》

Chapter 50

Experts from the municipal hospital came to the county hospital for treatment, and the news soon spread from the government to all organs and units. The number of outpatients increased sharply. There are more surgeries, and director Yang of general surgery is in the outpatient department to seize the time to collect patients.

"The director of the city came to the hospital. This is a minimally invasive operation. You can do it with three eyes on your stomach."

"Yes, experts do it themselves. You can rest assured."

One morning, Lao Yang received three gallbladder and one appendix. After going out of the clinic, he asked the doctors in the Department to hurry up for examination, and then he went to the second Department of surgery to find Zhang Fan " Dr. Zhang, there are several gallbladder and appendix tomorrow. Do you have time? "

Zhang Fan said, "director Yang has time. You can arrange it. " In recent days, there are many orthopedic operations, including taking steel plates and joint degenerative diseases. The hospital directly hung up a surgeon's clinic for Lao Li. He couldn't get busy alone, so he took Wang Yanan to the clinic. He said that Wang Yanan wrote that the little girl was very sharp. In the morning, there was a platform to take the humeral plate. Lao Chen took Li Liang on, but Zhang Fan didn't. He wanted to go out.

Zhang Fan has been driving to Batu's house for more than half a year. Batu's case has not been explained yet. This time, the door is open and the car is parked. After Zhang Fan enters, he finds that Bayin is also there " Sister in law, let me see you. Has Dean Ba heard from you? " Batu's daughter-in-law is a beautiful woman. She has grown old in the past six months.

"Zhang Fan, come in and sit down quickly. You have something to do with batugo. Thank you for your trouble"

"Just have news." After Zhang Fan sat down, Bayin was busy making tea and handing cigarettes.

"Brother Zhang, you came to the hospital after my uncle's accident. Hey!"

"It doesn't matter whether you look or not. Go and get some cheese for Dr. Zhang Fan."
"

"Sister-in-law, what's going on in the bar yard now." Bayin's name is Zhang fange, and Batu is his uncle again. Hey!

"Returned the compensation, fined, and then found a relative of the tribe to help with the judicial work in the provincial capital. Finally, he was sentenced to three years." As she spoke, she began to cry.

"Aunt, don't cry any more. You can't see your eyes if you cry again. Three years is fast, and it will arrive in the twinkling of an eye. You should cherish your own body. " After Bayin persuaded Zhang Fan, he said, "brother Zhang, you've spent a lot of money this time. It's going to be sentenced to three years, alas!"

After sitting for a while, Zhang Fan advised, chatted with Bayin for a while and came out. Three years is good news. Back to the Department, I happened to meet Wang Yanan in the outpatient department, "I'm so tired. You're off duty again. Tomorrow, you and I will go to the outpatient department with director Li." In fact, she is not particularly tired. After all, there are not many patients in the city, but she does not suffer from poverty and inequality. She sat all morning, and Zhang Fan is leisurely. She is angry.

Zhang Fan said directly, "do you want to have the main knife operated on? If you want to, quickly pour me some water. I have to go to the city."

"Here, choke you." Threw a bottle of drink into Zhang Fan's hand. I don't know who gave her, so I turned around and left.

The next day, Zhang Fan went to the operating room early, and Lao Li was going to the clinic. As a result, as soon as Wang Yanan saw that Zhang Fan went to the operating room, she pulled a new doctor to fight Lao Li, and she also went to the operating room. She thought orthopedics had surgery. The county hospital has three operating rooms, one for each of the two surgeries and one for obstetrics and gynecology. After she entered the operation, she found that Zhang Fan had gone to the operating room of general surgery.

In the operating room, Lao Yang handed the medical record to Zhang Fan and said, "look at Dr. Zhang. The examination is normal and you can have an operation." Zhang Fan looked at the medical record and said, "OK, let's start."

Wash your hands, disinfect, open a hole and cheer up. The lens enters the abdominal cavity. Zhang fan starts in an orderly way. Wang Yanan standing at the door of the operation is stunned. "This guy can even do laparoscopy in general surgery. Still

human! " She was a little wronged and insisted for half a year. She felt that as long as she worked hard, she would catch up with his level sooner or later. As a result, when she looked back, this shameless thing changed its way and ran at the high speed. She wanted to shout loudly: Livestock!

General waiters put the surgery in the morning. Zhang Fan did it one by one. The last one was the appendix. Lao Yang wanted to say and was embarrassed. Zhang Fan saw it, "what's the matter, director Yang."

"Miss Zhang, can I do this appendix? I'm not sure. I have some experience with the appendix. Can you help me check it?" He said it was not easy. Zhang Fan was about the same age as his son. He was really embarrassed. It was too embarrassing.

"OK, I'll help you with the mirror." It's better to see the operation a thousand times than to do it in person. Zhang Fan holds the mirror and says the key points to Lao Yang, always paying attention. Surgery is not a joke. You can't be careless about life-threatening things. Lao Yang's first laparoscopic appendix was not very nervous, but he didn't use much abdominal mirror. He was born by hand and did it very slowly.

Zhang Fan is not in a hurry. Not everyone has a system. Finally finished, Lao Yang breathed out, "I didn't expect that an appendectomy had made Lao Yang sweat all over me for more than 20 years. Thank you, Mr. Zhang. Without you standing on the stage, I don't know how long it takes to do a laparoscopic operation. "

"Director Yang is very kind." Zhang Fan smiled.

"You're welcome. Mr. Zhang, you should have no problem with the practice examination this year. "

Zhang Fan wondered why he suddenly cared about my grades“ There should be no problem. What? "

"Well, our hospital has little hope of relying on the president's support. If it's not pleasant to say, the president's mind is not business. But we are still young. If we don't work in the hospital any day and go out to work, as a general surgeon, we can't even do gallbladder laparoscopy. Who wants it? In the future, laparotomy will be eliminated slowly. I think after your grades come down, I will collect several specialist patients in a week or two. Can you spare a day to take us. The dean will certainly not support this, so I owe you a little on the labor fee. I didn't tell you until I showed my old face. " In fact, Lao Yang contacted the general foreign doctors in several municipal hospitals. As a result, when they heard the cost, they directly refused. There was no way. Lao Yang called Zhang Fan's attention.

If you don't care much about more money and less money, more is better and less is

OK. Zhang Fan said happily, "OK, money is not money. Just give it to you. At least I went out from the county hospital. "

"Thank you so much. I really appreciate it." Because of the problem of the president of the hospital, Lao Yang doesn't want to stay in the county hospital. His children are going to college in the south. They are about to graduate and don't want to come back. The old couple thought about not going with their children. As a result, they called several local hospitals. As soon as they said it was a general foreign doctor, they first asked whether they would have laparoscopy.

After the operation, as soon as Zhang Fan returned to the second Department of surgery, Wang Yanan chased Zhang Fan and asked, "you can do general surgery!" Then he took out a mirror and shouted to Zhang Fan, "show yourself, monster."

"Aren't you tired these days. Thanks to you. " Wang Yanan was too hit.
