

# Medical road

## Chapter 53

As a director of hepatobiliary surgery, Zhao Jun hardly goes to minor surgery. Major surgery certainly won't ask a resident. Zhang Fan is extremely bored with Zhao Jun. usually, the operation is to pull the hook, sew the abdomen, and several transferred subjects. Zhang Fan didn't participate in it anymore. Several transferred doctors were forced to work in internal medicine before. As a result, Ouyang came to power. As soon as the new regulations came out, they saw hope, one by one more positive.

Moreover, the emergency department of hepatobiliary surgery is relatively few, and it is useless to go to the emergency department. Nothing happened one day. Everyone was busy in the Department. Zhang Fan was bored. You can't change the dressing for others. The transferred students work very hard and finish their work early. They're afraid to lose this opportunity.

Every day is to go to work to read, or go to the clinic, and give Li Xiao treatment after work. There will be nothing more. Zhang Fan regretted that he didn't book the ticket home. Now he doesn't want to book it. As a result, as soon as I got out of the clinic in the morning, I received a call from physical education teacher Wu Yanchao, "Dr. Zhang, remember me? I'm Guli's teacher Wu Yanchao. Have you been busy lately. If you have time, come to school?"

Just then, Zhang Fan was bored to death. He remembered that he had promised others, but he had never been to school. He hurriedly said, "Hello, Mr. Wu, I must remember you. He went to the countryside a few days ago and came back only a few days ago. It'll be all right this afternoon. Can I go there? "

"Well, I'll wait for you at the school gate. What time will you come over?" Agreed on the time, Zhang Fan hurried to the canteen for dinner.

In the afternoon, Zhao Jun went to other hospitals and didn't come to the Department. Zhang Fan directly drove to the sports school.

The scale of the sports school in chasu city is not large. In China, it is the right way to learn cultural courses well and enter a good university. Practicing sports is not only professional, but also professional. There are not many parents who can support.

Practicing sports is too cruel and uncertain.

Under the leadership of Wu Yanchao, Zhang Fan parked the car. The two walked towards the training room. Along the way, Wu Yanchao said: "the children here are 11 or 12 years old, and the older ones are no more than 15 years old. They have good talent and can make achievements. The older ones were selected by the provincial sports school. If they can't make achievements, they will think of other ways early."

There are several majors in the school, all of which can be trained here. For example, swimming can't be done here. Infrastructure construction is too expensive to do. Wu Yanchao took several to practice boxing, basketball and football. Because there are not many teachers, there are many positions for one person.

Guli is still resting at home. She hasn't fully recovered and can't train. Zhang Fan looked at their training process. To tell the truth, it was very hard. It's really not easy for these children to stick to it“ Come on, everybody, let me introduce you. This is Dr. Zhang from the municipal hospital, who specializes in orthopedics. Guli is the operation Dr. Zhang performed for treatment. In the future, Dr. Zhang will come regularly. Now we welcome Dr. Zhang. " After Wu Yanchao called the students close, he introduced Zhang Fan to them.

"Hello." Zhang Fan looked at a group of children. He didn't know what to say, so he simply said hello.

The little guys were very enthusiastic and almost shouted in unison, "Hello, Doctor Zhang." Almost all people who practice sports are cheerful, which may be the advantage of physical fitness. Have you ever heard of that sportsman suffering from depression~

After the introduction, Wu Yanchao organized these small athletes to line up and accept Zhang Fan's inspection one by one. Although they are not old, their muscles are angular. Zhang Fan mainly checks the sequelae left by joint wear and muscle strain.

After an hour and a half of inspection, the situation is not optimistic. Almost all of them have been slightly or severely injured, and some obvious scars have affected the later development“ Few of our children can become professional athletes in the future. Most of them wait for their old age to test the certificate of national level II athletes, and then their scores are lower than others. In the future, a large part of them will be PE teachers. "

Then he took Zhang Fan to see their infirmary again and said, "there used to be an external nurse at work in the infirmary. Now he goes home to have a baby and is vacant. There are several talents here. I just want Dr. Zhang to participate and give us some professional advice and help. "

"OK, it's not a big problem."

Zhang Fan began treatment, symptomatic treatment for some symptomatic children, massage, prescription and bracing. One afternoon passed like this. For several children who had sequelae, Zhang Fan gave some suggestions on recovering exercise.

Although it took a long time, fortunately, they are not old and have strong plasticity. Maybe they can recover in the future. The headmaster of the school heard that Wu Yanchao invited a professional doctor to rehabilitate the children. He also came in a hurry.

"This is our headmaster, and this is Dr. Zhang. A doctor at the city hospital. " Although Zhang Fan is young, the brand of the municipal hospital is still very loud in the local area.

The headmaster is a middle-aged man in his forties. He has a strong physique. He often exercises at first sight. He holds Zhang Fan's hand and says, "thank you very much, Doctor Zhang. The school conditions are poor. When the children train, they will be injured if they are not careful. Last time, teacher Wu said that you are a professional orthopedic doctor. Thank you very much for coming to school this time."

The school's funds were limited, and he was embarrassed to take it out. After a while, he got a red certificate and sent it over. Zhang Fan opened it and couldn't laugh or cry: "I hereby hire Zhang Fan as the health care consultant of our school." He was also afraid that Zhang Fan would come once and get a certificate. He was also a little embarrassed. He rubbed his hands and said, "we are the children picked up by the Education Bureau. We can't die of hunger. Funds are often misappropriated. Look, this building was built by the Soviets. I can't help it. Please bear with me. "

"It's all right. I also like sports. You don't have to. I'll come when I have time."

After school, Wu Yanchao wants to invite Zhang Fan to dinner. Because he wants to treat Li Xiao, Zhang fan can't promise. In a few days, Li Xiao had two consecutive courses of treatment. Zhang Fan decided to let her rest for a period of time, have a CT, and then decide on the next treatment plan.

My sister also called and asked if Zhang Fan would go home for the new year this year. When she learned that Zhang Fan would not go home for the new year this year, she was a little sad. She hadn't seen her brother for more than a year. She missed her very much. She also knew that her tuition and living expenses were earned by her brother.

She is also very obedient. She hasn't passed the first three grades in the exam. Although she is a county-level middle school, according to her grades, the top schools in China are still promising.

It's Chinese New Year again. I lived in Quark county last year and came to tea vegetable city this year. Living standards have also improved a lot. Zhang Fan has no sense of urgency when he first came.

I drove to the largest shopping mall in the city. My income was good this year. I bought a suit for my parents and my sister, and gave my sister more than 5000 yuan. Last year, Wang Qian gave a large bag of things for the Chinese new year, and this year she also sent it to the house where Zhang Fan lives.

"The house is clean and tidy, but it is short of things. It doesn't even have a TV or a washing machine. I'll go to Vientiane exchange with my sister later. I'll buy you something. After all, it's new year. It's not necessary to have a new atmosphere. And maybe your sister Dong will thank you! "

"Sister Wang, I really don't bother you. I'm almost in the hospital all day. TV doesn't work. As long as you recover, you're welcome. "

"Silly boy, your elder sister Dong has been promoted. She went to Charke County as acting county magistrate."

"Don't thank me anywhere."

Wang Qian smiled mysteriously, and then said wittily, "you're a good double buckle player. You can see at a glance that you don't know Li Xiao's identity yet." Then he muttered to Zhang Fan about Li Xiao's identity.

"Oh, so it is. No wonder Sister Li called our dean Ouyang. The Dean called me to the office for a talk. "

"What do you think? Don't talk nonsense. Hurry up. There are a lot of people going to celebrate the new year." What's Wang Qian's identity? Almost all her shopping is cards, shopping cards.
