

Medical road

Chapter 57

Jia SuYue and Zhang fan are in the wrong position one after the other. Zhang Fan, who was walking on the road, also knew that he could not afford such a girl at present. He married a man and dressed and ate. You can't supply other people's living standards. Why pursue others? Is pursuing others to improve their living standards!

"Do all your doctors have a mania for cleanliness?" The girl's tone is not good. She is also helpless. She wanted to go home early, but now when she goes back, her mother can talk about her to death. And the doctor is a stuffy gourd. If you don't speak, he doesn't speak.

Zhang Fan is very depressed. He wants to go back quickly, but he can't go first. When the girl asked, he said, "it's a little bit." It's gone.

"Are you busy at work?" The tone was a little better this time, and she also saw that this man was not a brown sugar, not the kind of sweet mouth running towards her house. There are a lot less annoying emotions.

Zhang Fan said, "I'm very busy."

"You usually talk so little." Jia SuYue looked back at this picture.

Zhang Fan was a little embarrassed, looked up, let the back lower his head and said, "it's OK."

"Ha ha. You're funny. " Jia SuYue found Zhang Fan shy. After more than half an hour, they separated. Zhang Fan was relieved. When Jia SuYue got home, her mother had been waiting on the sofa for a long time. Looking at her girl coming home, she hurriedly asked, "how do you feel, how do you feel. The young man is nice. According to Miao Juan, he is the backbone of the hospital. He has a bright future and is very stable. "

"Besides, are you so anxious to marry me off! Not with you. I'll take a break. " Then he went into the bedroom. Her mother chased her and said, "I can tell you, don't look for a little white face. I won't agree."

Zhang Fan was out of hepatobiliary surgery, and the medical office asked him to go to the double gland department. The double gland department is the only department with female surgeons. There is almost no emergency in this department, the relative operation time is not very long, and the patients are mostly women. In the Department, one director, two deputy high school students and three attending doctors were transferred to the Department.

The director is a woman, about 50 years old, who is very famous in the field of double glands in the frontier. There are two vice senior high schools, one male and one female, three men who are in charge of two women, and the male doctors in the double gland department have a miserable life. With nurses, almost all departments are women's world. If a male doctor is a little arrogant, he will be denounced by women in the general department. Zhang Fan and Wang Zipeng went to the double gland department together. Wang Zipeng wanted to apply for internal medicine when he saw that he was transferred with Zhang Fan.

Director Li Qihua arranged for Zhang Fan to follow Su Jing, a woman in her thirties. Wang Zipeng followed Zhou Guohua, male. After the morning meeting, Su Jing took Zhang Fan on a ward round. Almost all of her patients are patients with mammary gland (a). Out of the ward, Su Jing asked Zhang Fan, "I heard you are also Su Da?"

Zhang Fan returned in surprise: "yes, you too?" Su Jing smiled and said, "me too. I'm five times higher than you. I'm your senior sister. You're so strong. You can even get more than 500 in the exam. Everyone was surprised. I was very happy when I knew it. I've been busy ahead. I'm going to call you for dinner sometime. As a result, you came to our department. I'll invite you to dinner after work. "

"Really, alas! I finally met my relatives. I thought I was the only one in this hospital. Is elder martial sister also the frontier from the west? "

"No, my family is here. I came back after graduation. I heard from the surgeon that your operation is also very powerful. Younger martial brother really gives face to the head of our school. "

"Hehe, what elder martial sister said makes me blush." A school met thousands of miles away. Zhang Fan and Su Jing were really happy. The double gland department is a little more leisurely than other departments. It doesn't matter if you can enter the double gland home. Don't even think about it. The double gland Department of each hospital is a related household.

Su Jing was very warm to Zhang Fan and took Zhang Fan to dinner at noon. At dinner, Su Jing asked Zhang Fan, "which department are you going to enter?" Zhang Fan thought about it and said, "I haven't decided yet. It's estimated that orthopedics is more

likely, because I entered orthopedics when I took the exam."

Su Jing said in surprise, "really, that condition was customized for you at that time? Younger martial brother, it's not easy. " Zhang Fan smiled and said, "not anymore. At that time, no one went to study in the county hospital, so he sent me."

"That's great. It's great to let orthopedics customize the quota." The two talked while eating.

In the afternoon, a breast (d) gland cyst operation was performed. Zhang Fan washed his hands and disinfected. Although the probability of breast (ah) gland cyst canceration is very small, it is best to remove it after discovery. The larger the breast (ah) gland, the easier it is to grow a cyst. The operation is very simple. Cut a small opening, remove the cyst and remove the intima. Su Jing also wanted to see Zhang Fan's level, so she let Zhang Fan take the lead. It was a very simple operation. In less than ten minutes, Zhang Fan took it off and sewed it up. Zhang Fan sews very well. He can hardly see the incision.

Su Jing said in surprise, "Zhang Fan, the level is really powerful. I can't sew the seam. It's a coincidence. You're all cosmetic stitching. You have to add the operation fee." She smiled herself.

There are many double gland operations. Since Zhang Fan did very well, Su Jing's patients were all done by Zhang Fan. At lunch, Zhang Fan met Li Hui. With a bad smile, he said, "little virgin cuts bags every day. Do you feel anything?"

"It's unkind of you to leave quickly and keep me waiting in the middle of the night." Zhang Fan is talking about the night of the result.

"Hey, hey, I left you the chance to open the treasure chest. Don't thank me. Are you very happy when you open it?"

"Yes." Zhang Fan is really happy.

"Don't go home for the new year." Li Hui's family is also provincial.

"I want to go back. I didn't get a ticket. How about you? Go home?"

"Alas! I came together last year, but I came back alone this year. "

"Who's to blame? It's all you don't cherish" Zhang Fan said.

Zhang Fan hasn't written several medical records since he became a doctor. He can't go to the double gland department this time. The teacher is his elder martial sister.

They talk casually. Su Jing said to Zhang Fan, "since you are a doctor, you have to take care of the patient. We share the hospital beds equally. You also take care of the patient independently, and then some commissions belong to you" Su Jing really takes Zhang Fan and wants Zhang Fan to grow up quickly.

As a novice doctor, the independent tube bed promotion is the fastest. " Thank you, elder martial sister. Forget the Commission. Let me take care of the bed"

"It's all right. You deserve it. Your income is not high when you come here. You'll be fine after you get your certificate and register. There will be a lot of people looking for you" Then he squeezed his eyes. The management of double gland patients is very simple. Generally, it is to make preparations before operation, change drugs after operation, and give some drugs to promote blood circulation and remove blood stasis. Generally, chemotherapy patients are more troublesome, and we should pay attention to the test values such as leukocytes.
