

Medical road

Chapter 75

Ouyang was furious. As soon as the vice president of surgery fell down, the Department of Gastroenterology made it happen to her, and she approved it, which made her very angry.

"Is that your level. Why not stop it? What do you eat? Who's to blame if he kills someone today? Yours? Or mine? "

Ouyang shook his fingers and scolded Zhao Cheng, "what expert, shit. Said, what good did he give you? You invited a half dead to have an operation. What is your heart, said

He covered his face and cleaned up in front of Lao Hu. Lao Zhao really had a city government, but he didn't say a word. The old Hu standing on one side blushed badly.

"Dean, it's an accident for you to listen to me." Zhao Cheng looked at Ouyang and began to explain.

"I don't listen. Now the patient is still in the operating room. My family won't talk about accidents with me. If there's no problem today, I'll ask you. Don't think I can't help you." Ouyang's voice shrieked.

Ouyang's name Lao Hu means a witness. He is a subordinate doctor, and Zhao Cheng is not only a superior doctor, but also a deputy director of the Department. The so-called experts were invited by him.

Ouyang was very angry. He scolded intermittently for two hours. Lao Hu admired Ouyang and Lao Zhao. One could scold and the other could suffer. For two hours, without half-time break, Zhao Cheng was also responsible for pouring Ouyang tea. He couldn't listen to the excitement next to him.

"Dean, it's a good operation. My life is saved. But what about the follow-up problems? Our surgery can only do this. The family members are already yelling." Zhao Quanping from general foreign affairs department called Ouyang.

"What's going on?" Hospitals are not afraid of dead people, not afraid of not paying fees, but afraid of family trouble. If the hospital doesn't pay attention, I'm more afraid of family trouble.

"I don't know. I just had an operation. I heard my family call our hospital careless." This pot is not for ordinary foreigners. He doesn't want to pay attention to it at all. He knows that as long as he touches it, it will be endless.

According to the truth, this operation should be done, but the ring in front is nonsense. The consultation fee plus the follow-up rescue fee will disappear for tens of thousands. Zhao Quanping, a director of surgery, is very clear about the dispute.

Ouyang also has no reason to let Zhao Quanping come forward to solve it, "you've worked hard, have a rest." After hanging up, the surgery department was not his own department. Lao Zhao didn't even know anything about it, so he called her. What do you mean? She knew very well.

"Let's go. What are you doing?" Ouyang said to Zhao Cheng.

"Where are you going?" Lao Zhao didn't understand.

"Go and wipe your ass!" Ouyang really wants to hit people. The old Hu nearby almost couldn't help laughing.

Originally, this thing was on the operating table and finished the operation. Ordinary people who understand this thing. The doctor said to rescue, said to pay, dare not listen?

Why do family members make trouble? A professional asked. I don't know it's the one in the Department of Gastroenterology. He secretly said to his family, "go and make trouble. Just say it's careless. The expert invited is a liar. The rest goes without saying."

Patients and hospitals, vulnerable groups are patients. After the operation, there is no weakness. The operation is finished. I'm afraid you're an egg. You're not a police station.

Common people also have common people's chicken thieves. The patient's family is rural, but the advantage of rural areas is that it is easy to call people. The patient's husband greeted him when he came home. He was from Qiancun village to Houzhuang village. As long as he was OK at ordinary times, he would definitely come to help in such a thing.

Hundreds of cheering people blocked the ward. They don't interfere with your work, just shout and denounce. Most of them are gossiping. The families of the patients

around also came to join the fun, "what's the matter? What's the matter? Tell me." There are always many good things.

Ouyang rushed to puwai and felt dizzy when he saw so many people. This kind of thing, encounter a few fanning the flames, full of patients in the corridor, an accident is a big event“ The security office is really not as good as a dog. " Ouyang's heart exploded.

Although he was worried, his face remained unchanged. After fighting with Lao Huang for ten years, he still made some progress“ Who is the family member? I'm the president of this hospital. I'm responsible for anything. Now, irrelevant personnel please quit the hospital, otherwise, the consequences will be unpredictable. "

The tone is severe and the atmosphere is strong. In a few words, the people present were a little afraid. After all, they are honest farmers“ We are not idle people. We are all relatives. " There's also a brain that turns fast.

"OK, now the family and I go to the office to talk. Don't interfere with other patients. " Fortunately, the patient didn't die, and Ouyang was a little confident.

It took a long time for the security guard of the security office to go upstairs. Ouyang Li ignored them and took a group of people to the office. As long as they are transferred out of the ward, Ouyang is not afraid. In the office, the situation is wrong. The police station is next door. How many people can't hold a phone.

"Tell me, what's going on?" Ouyang said after both sides sat down. Here in the hospital are Zhao Cheng, Lao Hu and the directors of general foreigners. Ouyang showed up. It's unreasonable for the directors of general foreigners not to come.

"Our people were well sent to the gastroscopy room, but they almost died there. What kind of shit is your chief? He vowed that there was no danger at all. I bah. " Pointing to Zhao Cheng, the family and husband scolded.

Bang! Ouyang patted the table and stood up. She can scold Lao Zhao at will. Outsiders can't do it. Good leaders in the hospital have the habit of protecting cubs. My people are right and wrong. The government has a third organization to deal with and inspect, and others have no right.

"Say something and curse again. See? The police station is outside the hospital. I'm talking to you now, not listening to you curse. "

The woman's hardness is also terrible. The family members are stunned. Ouyang frightens her.

"I don't care. Anyway, some people say you don't care about human life. It's a liar who invited you for random surgery. Have the ability to show your films. " As soon as the patient's husband said this, Ouyang and Zhao Quanping looked at each other and there was a ghost.

Zhao Cheng's teeth were creaking. He thought with his ass that he knew it was the other two directors of his department. It's hard to say who it is, but they can't escape.

For the operation in the endoscope room, the films selected at that time could not be seen. They were all blood. When I took it to other hospitals, it leaked out. Ouyang can't harden.

"We have to investigate this matter." After talking for a long time, Ouyang finally dispersed his family temporarily.

"What should I do? Tomorrow people will have the result. What can I say. What do you want me to do? What you did, you said. " Ouyang pointed to Zhao Cheng and said.

"It must have been said by people in our department ~ ~" Zhao Chenggang was interrupted by Ouyang.

"I don't care who said it, what to do now." After that, he ignored Zhao Cheng and said to the director of the office, informing the vice presidents and department directors of meetings and emergency meetings. He could not be absent for no special reason.
