

Medical road

Chapter 76

People in the past 10 years are still very simple, and medical trouble is rare in the frontier. The family members came to the villagers to cheer, but also to embolden themselves. If it hadn't been for someone's advice, he wouldn't have thought of it.

Although Ouyang's attitude was strict, he softened a lot in the second half. As soon as his family saw it, they knew that there was something wrong with the hospital. Otherwise, a top three Dean will have to eat him. He is a civilian who can't afford to provoke the hospital, but no one has three friends and four friends.

At the beginning of the trust relationship, the reporters and lawyers have contacted. If the hospital plays horizontal tomorrow, he will be ready to appeal. The intermittent treatment has cost a lot in recent years, and the medical expenses are more this time.

At the hospital's management meeting, the vice president of Surgery said angrily: "I don't have a little sense of responsibility and take human life as a play. This is the largest hospital in chasu City, not the Caotai team. Whatever you want. Be responsible to patients and their families. We must punish them severely. Punish relevant responsible persons. "

He is a spectator, not afraid of big things, but also can add blocking to Ouyang. The vice president of gynecology and pediatrics has a relatively shallow seniority and speaks to the point: "the top priority now is to solve the dissatisfaction of patients and their families. As long as their conditions are not excessive, we can make some appropriate compensation."

The dean in charge of logistics doesn't understand business and has little to say at ordinary times. In the technical unit, his Dean is not as good as the director of the medical department. But I have to speak, "I agree with President song. Appropriate compensation and calm down as soon as possible are the best. "

Ouyang looked at several directors and asked, "do you have any other opinions?" She also wants to deal with this matter early. The longer it takes, the more advice will be given to the patient's family members, and the greater the impact will be. The worse for her.

"Well, since everyone has no opinion, let's discuss how to compensate." Tens of

thousands of yuan in the frontier is a great expenditure for an ordinary family. And for a third class hospital in an area, it is not enough to waste a month.

Ouyang is an officer. She doesn't want to get too stiff with the vice president of surgery. The development of a class III class a hospital can't be based on surgery or internal medicine, but must go hand in hand. Having established the superior subordinate relationship, she is confident to tame him.

The next day, the family members, together with the lawyers and relatives invited by the family members, negotiated the matter in the hospital office. 1: Refund all treatment and examination fees, including expert consultation. 2: Compensation for work delay and nutrition expenses during hospitalization. 3: Charitable donation of 30000 yuan to patients.

Both sides are satisfied, and the family members are satisfied. He also knows that it is impossible to ask for more. The hospital is not a good hall. If he really tore his face, he couldn't provoke a judge.

The hospital was also satisfied. Things were solved before they were expanded. Next is the time to settle accounts. Ouyang is not a good stubble. Clean up Zhao Cheng first. The position of deputy director shall be removed, the bonus of one year shall be deducted, and he shall be sent to the affiliated community of the hospital for temporary appointment to the clinic.

Then began to reorganize the digestive department. The other two vice highs can't run away. Although it's not sure which one, Ouyang doesn't care. The beard and eyebrows were shaved together. One of the two vice highs was punished to go to the endoscopy room to do endoscopy. He will not participate in the work of the Department in the future.

The other one went to the clinic for a long time and no longer participated in the work of the Department.

Why is the punishment so heavy? It's still from the beginning. Zhao Cheng was stabbed by Yin. He felt that the position of director had said goodbye to him. Can he be reconciled! No! He and the other two vice high school students, the three of whom have worked in the same department for more than ten years, know each other very well.

Lao Zhao began to turn over the old accounts. He knew what rebates he had taken and how much he had taken. Then he contacted the medical representative of the digestive department and forced them to hand in the data, otherwise he would report it. This

frightened the medical representative.

I don't know if the medical representative was really afraid or deliberately. Lao Zhao got the rebate records of the other two vice high schools.

Knowing that his director was dead, Lao Zhao left a backup and gave all these things to Ouyang. This hammer went down and smashed the pot directly. Lao Zhao also dared to react to Ouyang's level. No matter how high or to report, he didn't have the courage, because he was also a participant.

Ouyang was so angry that he couldn't speak. He waved his hand and told Zhao Cheng to go away. Ouyang wanted to make a big deal small, because the gastroscope ring was approved by her. Too much investigation is tantamount to slapping himself in the face. Unexpectedly, Zhao Cheng was so depressed.

"This is a scourge!" Ouyang simply went from pot to pot, and the three didn't use it. "I don't believe that I have to eat hairy meat without butcher Zhao." Ouyang said fiercely at the weekly meeting of Zhouyi hospital.

A series of things went on, and finally both sides were hurt. Lao Zhao left sadly and did something in his affiliated community. Just stay for a few months, and maybe you'll resign and leave by yourself.

There are places to go.

Zhang Fan's life has entered a formal stage. He works during the day. If he is on duty, he is not on duty. He returns to the dormitory. He goes to Li Xiao's treatment after work at night and goes to the sports school for physical examination for the children in two weeks. Recently, I made a breakthrough with Shaohua. I sent a message. People can reply occasionally.

Zhang Fan doesn't ask for anything. Let's get to know each other slowly. They are still young and in no hurry.

Zhang Fan's house was bought by more than 160000 and 170000. He inquired about it and bought it. There was no problem with two hundred and seventy-eight thousand. Zhang Fan was very embarrassed about the small 100000 yuan he went.

To Li Xiaoyi, she just smiled: "I asked you to buy a large area, you can't bear it. Now it's too late to regret. "

"I don't regret it. It's a shame. "

"Don't think so. I asked in port city. I can't beat 100000 when I operate on my lumbar

spine. If you don't say money, you'll say that you've avoided the pain. Isn't it worth 100000? Feel at ease. " Li Xiao is very satisfied with Zhang Fan's attitude. He doesn't look like a person who is difficult to level the gully.

With a house and a place to stand, Zhang Fan said it was false to be unhappy. The Chinese family thought is seriously dying. Without a house and a home, it seems that they can't live.

The house is blank, and I don't plan to find someone to design it. Zhang Fan is reluctant to give up, so how to decorate it? It's very simple. First go to see other people's model room, keep all the practical ones, and eliminate all the useless ones. After reading it, ask someone and it will cost at least 60000 to install it.

Zhang Fan is not going to decorate first. I'm not in a hurry anyway. Take your time.

The work of gastroenterology is slightly better than that of Cardiology. Although dealing with feces every day, at least it doesn't kill people every minute like cardiology.

The cardiologist is on duty. He has to keep his ears up all the time, so he doesn't have to digest. As long as there is no massive bleeding, no cirrhosis, gastric varices, it's time to sleep on duty. If the stomachache is too severe, bring the general practitioner directly for consultation.
