

Medical road

Chapter 92

Zhang Fan was very satisfied with a fish head banquet. Although I heard some low-level flattery, it's none of Zhang Fan's business. It has nothing to do with him. Li Hui's face hurt and his kidney hurt. He lost his words.

On the way back, Zhang Fan didn't stimulate Li Hui any more. There were few people. He was afraid that Li Hui would get angry! The next day is the weekend. Zhang Fan made an appointment with Shaohua early. Shaohua has agreed with Zhang Fan in advance that they can get to know each other and eat together, but they must pay in turn, one meal for each, a disguised AA system.

It would be nice to make an appointment. Zhang Fan has no opinion. Shaohua also wouldn't let Zhang fan drive, so they had a simple meal, and then went to the park for a walk, or went for a walk in the street. Two people slowly contact and understand each other.

The bathroom of Zhang Fan's new house has been renovated. It's not bad. Anyway, Zhang Fan didn't find out the problem. After paying happily, Zhang Fan went to the mall to choose kitchen utensils.

When I went there, I made an appointment with Shaohua and called it helping him choose kitchen utensils. In one day, they ran upstairs and downstairs several times to compare and choose the price. He was very tired. He hurried Shaohua home after dinner. The girls were tired and fell asleep in the car.

Dermatology, the municipal hospital combines the scald department with the dermatology department. Gulina, the director of the Department, is a female director. She is very famous in the recovery of skin burns. The dermatology department is a small department with few personnel and four doctors. The director is not on duty. Zhang Fan came to the Department with a transfer form. The doctors in the Department were thunderous with joy, because Zhang Fan had a practicing doctor and could be on duty alone. They worked night shift every two days. They were really going to collapse.

Zhang Fan follows gulina when he doesn't have a night shift. If he has a night shift, he goes on the night shift alone. Dermatology is simple and difficult. There are more than 3000 kinds of basic diseases. If you want to engage in dermatology, you have to

remember these more than 3000 kinds. Most skin diseases can be seen at a glance. You can't see them. You can't see them even if you ask about the medical history in detail.

But these are basic dermatology. If you want to know more, it's difficult, immune biochemistry, gene cells. Ordinary people don't have to think about it. It's too difficult!

Small departments have the advantages of small departments. The relationship between departments is quite harmonious, just like family members. You help me, I help you. After more than ten years, the relationship is really like family. I will miss it after a long time.

Unlike large departments, sometimes for the sake of interests and promotion of professional titles, they are angry behind their backs and face-to-face. Guli has been on-site for a long time, and the other three doctors work normally.

Zhang fan can't even see the simple acne. This department is too small and is not in the big department of medicine. The purpose of transferring to another department is to learn and understand. You can't turn in vain. You have to gain something.

If you want to have an experience, you have to write a liver book. One day, Zhang Fan read dermatology from beginning to end. He began reading at more than 7 a.m. and ate lunch on the way. He didn't eat dinner. At more than 3 a.m., he finally finished reading it.

Tired to the extreme, you can't feel hungry and fall asleep. I didn't wash. I'm too tired. While watching and remembering, you have to think. There are too many dermatology pictures, and there are too many similar ones. They don't think and don't remember. They get confused after reading.

Dreams are on papules, protruding, plate-like and silvery. Zhang Fan was sweating. This is brain overuse.

Dermatology department is much easier than several other large departments. Tea vegetable city is not an industrial city with few burns. That is, occasionally scalded by boiling water. So there are not many inpatients and not many emergency operations.

In a week, Zhang fanci got a little started. The pictures selected in the textbook are the most typical pictures of diseases, but there are so many typical pictures in actual work, many of which are specious.

This week, Zhang Fan had a lot of time and asked Shaohua very often. Once she met Jia SuYue. She looked at Zhang Fan with contempt: "do you want to chase us Shaohua?" She thinks love should be especially romantic, and her boyfriend should be prince charming!

Shao Hua was very generous and told Jia SuYue early. Jia SuYue looked at Shaohua's face and didn't deliberately ridicule Zhang Fan. The three had a meal and were safe and harmonious.

It's another Friday. Zhang Fan also made an appointment with Shaohua to eat hot pot. His kitchen was renovated. He invited Shaohua to visit it. Shaohua had a good eye and the things were practical and beautiful. Zhang Fan gave Shaohua an excuse to thank her and specially invited her to eat hot pot. At present, the two have passed the stage of ordinary acquaintances. When Shaohua is in a bad mood at work, he will also chat with Zhang Fan.

Just when Zhang Fan and Gulinaza were going to work together, a patient came, a woman in her twenties, beautiful and extremely beautiful. White skin, big eyes, high nose, sexy lips. Slim, concave convex material. Small suit, black pleated skirt, lavender long leg silk stockings, black thin bottom fabric boots.

Natural beauty! Gulinaza is a fat aunt, standing in front of this beauty like a big man. It's really beautiful. Zhang Fan couldn't help looking more.

Although Gulinaza is tall and strong, she has a good temper, otherwise the atmosphere in the Department would not be so intimate.

"What's the matter? Do you want to see a doctor?" It was about to get off work, and Gulinaza was anxious to get off work. The beauty didn't talk for a long time, so Gulinaza asked.

"Yes!" Not very loud.

"What's wrong?"

The beauty didn't speak, just looked up at Zhang Fan "oh It's an inconvenient place." Gulinaza knew, and then she said, "it's all right. There are doctors and patients, both men and women. Just tell me where you're uncomfortable. There's nothing to avoid."

I can't help it. I'll get off work without telling you. The beauty got up, closed the door of the office, sat down again and said, "I have something under me. It's a little uncomfortable. Please help me see how to treat it."

"Well, take off your pants and everything in the house with curtains behind you. We'll go there later." As he spoke, gulina put on her mask, hat and gloves. Many skin diseases are infectious, so we must do a good job in self-protection.

Zhang Fan didn't move. He also felt a little embarrassed. Usually, there are female patients with bare hips, but they are all after anesthesia. Today, it's a little embarrassing, and he doesn't want to embarrass female patients.

But gulinaza disagreed, "Doctor Zhang, the doctor's parents' heart, regardless of men and women." Although Chinese is a little weird, it's right.

After Zhang Fan cleaned himself up, he followed gulina into the examination room. At the moment of going, what he saw was not excitement, not temptation, but creepy. Zhang Fan wanted to stay away.

The beauty put her hands on the edge of the examination bed with her hips raised and her legs slightly separated. The purple silk stockings have faded and stacked on black boots. There are dense flesh colored small flesh pimples between her snow-white and slender thighs. The pimples are not big, which is as big as three match heads. What she is afraid of is that there are many between her legs.

Not to mention people with dense phobia, Zhang Fan is a little disgusting. Gulinaza knew what it was. Pointing to the place, he said to Zhang Fan, "Doctor Zhang, put on your gloves and touch it. You will never forget this disease in the future. Go! "

"Demon voice!" Zhang Fan walked step by step with the noodles he was about to spit out.
