

Spoiled by Mr. Russell Chapter 715

Lily smiled, "It was just a cover-up."

"A cover-up?" Alexander asked in confusion.

"It was pretty easy. We've been discussing what we could add to the raw materials when making our scented candles and what would possibly cause them to be unstable. However, that day, I was just saying this to confuse Henry. I didn't actually make something stable enough to be used as perfumes or candles," Lily remarked.

After hearing her explanation, Alexander could finally understand, "In other words, it did not matter whether or not the perfumes or scented candles contained that substance."

Lily nodded, "I didn't put it in the perfume at all. I merely added some medicine that could cause drowsiness in their tea. I calculated the time needed for the medicine to work and sprayed some perfume that could help with sleep onto my wrist.

"Furthermore, Henry was already panicking, and I only needed to give him a slight nudge in the right direction. Then he would think I did something to the perfume that caused his legs to go weak. Honestly, if I didn't do anything, he would still feel sleepy when the time came."

One of the reasons Lily could succeed was because of Henry. He felt guilty and knew nothing about perfume formulas and their raw materials. He chose this method because he needed to frame Lily or Justin to become the head of the family.

That was why Henry thought Lily had added something harmful to her perfume to cause them to hallucinate.

"Wow, so that was the whole story."

Alexander nodded as he finally understood the whole story.
