Spoiled by Mr. Russell Chapter 867

Two major news appeared on the headlines-the first being Arianna and Noah's public announcement that they were in a relationship. The media caught the couple on camera on a date being intimate with each other.

When asked if they had plans to get married or if they got involved because their families had proposed a business marriage, the couple gave the media a vague response while not denying its possibility.

If the two families did decide to be united in marriage, it would be massive news as Arianna and Noah had issues with Lily. The Tanner family was responsible for pressing charges against Lily for a corporate crime.

Simultaneously, the Perfumers' Society claimed that Lily did not have an official license to practice her career as a perfumer.

With these two issues combined, it looked like they were working together to take Lily down.

public was distracted from the issue of Lily's perfumer license. However, the media refocused their attention again after

was working together to take Lily down. There were also people claiming that Lily was the one who had problems, as she was not a well-known public figure, so why would the Tanner family or the Perfumers' Society work together

false information and her audio recording from before, saying

her work and preparing for her counterattack. She had almost completed her new line of perfume, which progressed at the same speed as Lisa's orders. All that was left was the lab test, and everything

continuously. She was just waiting for the court to make its final decision. Soon after, something huge

was the mastermind behind this corporate crime and told Lily to add harmful ingredients to the Tanner Corporation's new perfume. He also claimed he wanted consumers to

police so much

only link between Lily and him was just a single transaction, nothing

the police where or when they met to discuss their plans. The police also could not find the perfumer Damian had previously encountered. If what he said

too abruptly. It was so strange
