

Passive Skills 151

Chapter 151 a pincer attack

Zhang Shan did not want to waste any more time and quickly approached the formation of the Qi players.

when they were within shooting range, they immediately stopped firing. the bullets flew out quickly and knocked down the surrounding people one by one.

archers, quickly release your meteor arrows and stun six-barreled Bodhisattva. He's too arrogant. He only has 500 men and he dares to charge at our 2000-man formation.

we can't stun him. Six-barreled Bodhisattva has the ability to be immune to crowd control.

"It doesn't matter if we can stun him or not. We have to force out his control immunity skill first. Hunters with Eagle Eye can attack. We can't just take hits and not fight back."

Rows of meteor arrows were shot from the Qi camp. At the same time, the hunters with the Eagle Eye skill also quickly moved forward and exchanged fire with Zhang Shan.

Ever since they had the Eagle Eye skill, the range of the Hunter class was much stronger than other long-range classes.

Other effects aside, just the range of the Eagle Eye skill had increased by 20%. Before this, this had always been Zhang Shan's godly skill to suppress others.

however, as the game progressed, there were many hunter players who had learned this skill.

In terms of shooting range, Zhang Shan no longer had an advantage over these people.

However, it did not matter. Other than his range, Zhang Shan's attack power and attack speed were much stronger than others.

Just as the meteor arrow was about to hit him, Zhang Shan activated his berserk and fanatic skills, and a series of "miss" appeared on him.

all the meteor arrows that hit him were ineffective.

At the same time, because he had activated his berserk and fanatic skills, Zhang Shan's attack speed had reached a terrifying level.

although the duration was short, it was enough to suppress the qi kingdom's players.

" damn it, we can't just take the beating passively. we'll send half of our people to attack them. they only have 500 people. i don't believe that we can't beat their 500 people even if we send half of our 1000 people. "

Seeing that half of the Qi players had split up and were charging towards them, Windcloud blade also started to take action, leading the other guild members to fight against the Qi players.

"Charge forward and disrupt the enemy's formation. Release the brothers in the tunnel."

Following that, Gale blade and the others also charged forward.

Zhang Shan's pressure was greatly reduced. He did not have to care about anything else. He just kept moving forward and firing.

The bullets were shot out quickly. One shot for one, two shots for one, and the Qi players in front of him were quickly knocked down.

"Don't get entangled with these people. Charge forward and break peerless's defensive formation."

Their goal wasn't to kill people, so there was no need to get entangled with these people. They just needed to rush up quickly.

If they were to split up the remaining thousand players, Feng Yun realm would be able to lead the Guild members out of the tunnel.

At that time, eight thousand people against two thousand people would be able to destroy the other party in minutes. There was no point in tangling with them now.

come with me. We don't need to worry about the two sides. Just rush straight to the passage. Six-pipe Bodhisattva will suppress the enemy's fire. We just need to rush forward. Don't be afraid of falling.

Windcloud blade commanded the Warriors to charge forward bravely, not bothering to get entangled with the Qi players.

As for the enemies in front of them, they couldn't stand still at all.

Zhang Shan's bullets made him fall to the ground in minutes.

It looked like Zhang Shan and the others had fallen into the enemy's encirclement, but in reality, the people from the wind cloud Guild had been advancing quickly.

They did not stop their charge for even a moment.

"the people in front, stop them. we can't let them rush to the passage. otherwise, if the people in wind and cloud guild rush out together, we'll all be finished."

However, the peerless guild members were already powerless. Although they tried their best to stop them, they were suppressed by Zhang Shan's firepower.

Their interception had been completely ineffective.

Wind and cloud blade led two to three hundred people and charged in front. Zhang Shan followed closely behind and fired continuously.

There were other wind and cloud guild members around him, helping him block all kinds of attacks.

This way, Zhang Shan would not have to worry about anything. He only needed to defeat the Qi players in front of him.

Moreover, Windcloud blade and the others were not to be trifled with. The two to three hundred players they had led the way for them were also very aggressive.

The axe and the saber could also cut down many Qi players.

Although there were still people falling among the 500 men that wind and cloud blade had brought, it did not affect their speed of advancement.

Hundreds of people whistled through the formation of the Qi Kingdom's players and soon approached the entrance of the passage.

"Boss, you guys can start charging out now. Peerless Guild can't hold them back anymore."

Windcloud blade continued to charge forward while calling out to Windcloud realm in the Guild channel, asking him to bring his men out from inside.

Although the passage was very small and only five people could pass side by side at a time, in theory, dozens of people would be enough to stop them.

however, in the face of the wind cloud guild's pincer attack ...

Peerless Guild no longer had the heart to defend.

With the hearts of the people scattered, even if they could hold Feng Yun realm back for a little longer, what was the use?

Those at the back could not stop Zhang Shan and the hundreds of people. When Zhang Shan and the others rushed over, the Qi players who were defending the passage would be finished.

As Feng Yun realm arranged for his men to charge into the passage, the remaining Qi players dispersed in an uproar.

They didn't want to defend, but they couldn't.

he would have to run sooner or later, so he might as well run earlier and maybe he could keep his little life.

They believed that the wind and cloud Guild would not chase them too far.

...

that was because unparalleled gentleman was leading the others on their way, and they would be able to come over to help very soon.

Following Feng Yun realm's charge, Zhang Shan met up with them and they had already secured their victory.

The only thing left was to cut down as many Qi players as possible.

split up and chase them. Come back and gather in a minute. The unparalleled gentleman will definitely be here soon. We won't fight them head-on. We'll leave after we win.

Zhang Shan was the best at things like splitting up and chasing. He identified the direction the enemy had escaped in and quickly caught up on his Red Hare.

he got off his horse and fired a shot. after knocking him down, he continued to pursue the next target.

As long as a target was targeted by Zhang Shan, the only outcome would be falling to the ground. There was no chance of survival at all.

Some of the Qi players did not believe in the heresy. When they saw that Zhang Shan was alone, they dared to chase after the group of them.

Relying on the fact that there were dozens of people together, they quickly formed a formation and rushed towards Zhang Shan.

However, they had underestimated Zhang Shan's combat power.

Unless it was a team of more than a hundred people, Zhang Shan might not be able to handle it alone.

...

As for the dozens of people, that was a piece of cake. Zhang Shan did not run away. After getting off the horse, the bullets flew out quickly.

He knocked down the enemy while they were charging. Occasionally, a few archers released meteor arrows, but he dodged them all.

As for the thief and the ice mage, Zhang Shan did not give them any chance to get close and use his crowd control skills.

as long as they entered his shooting range, he would prioritize the classes with crowd control skills.

As for the Warriors who rushed up to attack him, Zhang Shan ignored them.

Even though he was alone and had no support to heal him.

however, the purple-gold necklace had a lifesteal effect.

It was impossible for the few Warriors to cut him down in a short time. After taking down the long-range jobs at the periphery, Zhang Shan quickly took down the few Warriors who were cutting him down.

After a wave of harvest, he rode on the red Hare to find the next batch.

Chapter 152 the unparalleled gentleman doesn't want to fight anymore

Zhang Shan rode on the red hares, like the god of death, chasing and killing the Qi players everywhere, until he could no longer see the Qi players.

Only then did he return to the passageway and meet up with the others.

haha, this time it was great. I've cut down at least 20.

Windcloud blade laughed arrogantly.

what a loser. He only killed 20 people. What's there to be proud of? ask the divine weapon boss. He probably killed almost 2000 people today, right? "

“Why should I compare with brother Liu Guan? he’s a big pervert. I just need to cut more than you guys, hehe.”

“brother liu guan, how many people have you killed today? do you have a count?”

I don’t know. Does the game system record the number of kills? ”

zhang shan did not know how many people he had cut down. there were a few here and a few dozen there. he had no idea.

However, the number of people he had cut down, if not 2000, should be very close.

No. Sigh, I don’t know how the hatred points between the two countries are calculated. We’ve been fighting with the players of Qi country for so long. I don’t know how many hatred points we’ll lack after the war of Qi country.

“You want a Kingdom war now? this is definitely controlled by the system. the system will only start the world war when it feels that the time is right.”

I really want to have a World War. Every country has ten to twenty million players. If they all participate in the world War, it will be a spectacular scene.

that’s right. In ancient times, a battle between hundreds of thousands of people could be called a great battle. In the game, if tens of millions of players fight each other, it’s exciting just thinking about it. Hehe.

don’t think too much about it. You’ll know when the world War begins. Since the system has announced that the World War is going to start, it shouldn’t make us wait too long. I believe that before the players reach level 40, there will definitely be a World War.

“Rank 40? That’s too long ago. Even if godly equipment bro can level up quickly, it’ll still take two months for him to reach level 40.”

Zhang Shan looked at his experience bar. To level up to 31, he needed 40 million experience. The monsters in the Heaven’s Gate map gave more experience.

If he focused on killing monsters, he could gain at least 500000 exp in an hour. It would not be a problem to gain six to seven million exp a day.

He would probably reach level 31 in about five days, but he didn’t know how much more exp he would need for each level.

If he didn’t add much, he felt that it wouldn’t be too difficult to reach level 40.

One level in five days, fifty days to level up to level 40.

Of course, he was just thinking about it. After that, the experience points he would need to level up would definitely be much more, and it would be very difficult for him to upgrade his equipment.

As a result, his grinding speed could no longer be increased.

Even in the most ideal situation, it would be impossible for him to reach level 40 in two months.

let's not talk about the World War for now. That's still a little far away. Boss, what should we do next? should we go back and continue farming monsters? "

I don't think there's a need. Right now, peerless should have about the same number of players as us. They can definitely defeat them.

there's no point in beating them. How many people would be knocked out? how are we going to revive them? the support can't save them at all.

"What are you afraid of? we don't have enough support, but we still have other support. After we finish the bounty, we can find a support to pull people in."

that's right. It's just spending some money. If we fight with them, it's not good to keep being blocked. It won't be nice if word gets out.

Due to the fact that wind and cloud Guild had just defeated nearly 2000 players, the number of players in the Heaven's Gate map that peerless Guild had was not much higher than theirs.

If they were to fight head-on, they would not be at a disadvantage.

The big shots in the Guild didn't want to be cowards anymore, as long as they were confident of winning.

Of course, he had to do it. If he was too cowardly, what game would he play?

alright, then we'll wait for peerless gentleman here. If he still wants to fight, then we'll fight him.

feng yun realm made up his mind. as long as the unparalleled gentleman still wanted to fight, he would do it.

Of course, they were planning to go head to head with peerless. They just didn't know if peerless gentleman still had the intention to continue fighting.

perhaps, the unparalleled gentleman had already started to give up.

The wind and cloud Guild quickly arranged the formation. Since they planned to start the battle, they had to make good preparations.

if they really started fighting and they were still a pile of loose sand, that would be nonsense.

In this kind of large-scale chaotic battle, they couldn't be arranged into a formation. Otherwise, it would be difficult to display everyone's strength.

They had to split up into small formations to ensure that everyone had the opportunity to deal damage.

after the wind cloud guild had lined up in small formations, unparalleled gentleman finally led his main force and rushed over once again.

However, this time, he was even more depressed. He didn't even feel that the ones who fell before weren't from his Guild.

It was someone else, so what did it have to do with him?

This time, however, it was different. The two thousand players that had been guarding the entrance were all from peerless.

So many guild members were lying on the ground, giving him a headache. It seemed like he had to spend money to find people to revive these people.

the problem now was whether they should continue fighting with wind and cloud. if they didn't, even if they called people over, they wouldn't have a chance to revive the guild members.

This was because a few thousand players from the wind and cloud Guild were still here.

How could he just stand by and watch them pull him up?

however, if they were to really fight again, it would not just be a matter of losing 2000 people. it was possible that all of them would die.

He admitted that he had underestimated the wind and cloud Guild. He always felt that the wind and cloud Guild was just one of those dozens of rich big shots.

The others weren't worth mentioning. Dozens of people wouldn't be of much use in a chaotic battle with tens of thousands of people.

...

however, after a few waves of chaos, unparalleled gentleman realized that the most difficult person to deal with in the wind cloud guild was still zhang shan.

Just one person was enough to give them a headache. The wind and cloud Guild didn't even need to fight with him. They only needed to send Zhang Shan.

he could make them feel helpless.

Right now, both sides had roughly the same number of players-around 8000 or so. Could peerless still defeat them?

the unparalleled gentleman was not confident, and he wanted to give up. if he continued, the risk would be high, but the benefits would be small. it was not worth it.

Unparalleled gentleman thought for a moment and felt that it was better to discuss with Feng Yun realm and let him pull up the person on the ground. Then, they would both stop.

"Brother under the heavens, there's no point in continuing this fight. Why don't we both stop?"

In fact, Feng Yun realm had long felt that this fight was over because there was no need to and he did not want to lose his own men.

although he could spend money to find someone to save him, it would be better if he didn't have to fight.

there was no reward for winning, but it was not worth it to lose a level.

"Since brother Jun doesn't intend to continue fighting, we naturally have no objections. Besides, we don't have any enmity between us."

...

Chapter 153 Another guild challenge

As the saying went, in a war, as long as one side wanted to fight, it would definitely be able to start.

however, if both sides did not want to fight, it was naturally impossible for them to fight.

Both sides did not want to continue fighting as Feng Yun realm had no intention of going to war with the other guilds.

In the beginning, he did not even want to come to Heaven's Gate. It was just that wind and cloud blade, Zhang Shan, and the others were blocked by the Dragon from the West Mountain.

That was why Feng Yun realm brought people to help. Otherwise, he would still be farming monsters outside of Dangyang city.

The unparalleled gentleman didn't want to fight anymore, mainly because he wasn't confident that he could win.

He felt that the wind and cloud Guild had a sh * t-stirrer like Zhang Shan. Once they started fighting, he was afraid that something unpredictable would happen.

He might as well let go of this opportunity and take it back in the future. At most, he could start a guild War.

Wouldn't it be better to defeat the wind cloud Guild fair and square in the Guild War?

then it's settled. Let's each step back. I'll arrange for people to come over later and pick up our fallen brothers. I hope that brother under the heavens will not interfere with our operation.

sure, we'll go and kill some monsters later. As long as your people don't come and cause trouble again, it'll be fine.

Feng Yun realm agreed without hesitation, he had no intention of extorting the unparalleled gentleman.

However, just because Feng Yun realm didn't want to give unparalleled gentleman a beating, it didn't mean that others thought the same.

how would I know if you'll come back to cause trouble after you've pulled him up? how can you guarantee that? "

Wind and cloud blade did not plan to let peerless gentleman off so easily.

"Oh, Brother Yidao doesn't believe in my character?"

it's useless even if I believe you. The problem is whether the people you've brought before will listen to you. As for the people from the West Mountain Guild, if they cause trouble later, what will we do? you won't say that they're not your people and are not under your control, right? "

Windcloud blade's words had indeed stunned peerless gentleman. He could only control peerless Guild's members.

if the other qi players wanted to cause trouble for the wind and cloud guild, how could he stop them? even if he could, he didn't want to.

Although they were making peace for the time being, he was still looking forward to someone going to find trouble with the wind and cloud Guild.

"brother one blade, i can't really respond to you. i can only manage my guild members. they might not listen to me if it's anyone else."

" that's the same as not saying anything. if you pull them up and leave, then the other qi players will block us. you'll be happy. how do i know if you're the one who called those people? "

"Then what kind of explanation does brother Yidao want?"

" how about this? heaven's gate is a public map. it's impossible for us to live in peace. you just have to make sure that the qi players don't come to us for trouble for one day. it doesn't matter if there are few people. as long as there is a large-scale harassment, i will blame it on you. "

okay, it's a deal. If there are any Qi players who harass you again today, call me. I'll come forward to mediate.

Unparalleled gentleman didn't want to waste any more time. He had to pull up the person on the ground first, or else it would take too long.

Those who fell to the ground would automatically return to the city to revive.

alright, I believe in brother Jun Zi's character. I hope you can keep your word.

" don't worry, it's not the first time we've come into contact. "

"alright then, you can go back to your work. we have to go and farm monsters."

Now that the matter had come to an end, the members of wind and cloud Guild naturally continued to farm monsters. It was not easy to find such a good farming map at heaven's gate.

They planned to farm here for a long time. This place was safe and they were not afraid of being ambushed.

Even if someone sneaked into the tunnel, it didn't matter. If there were too few people, they wouldn't feel any pressure. If more people entered, they would talk.

They weren't blind, so they naturally discovered it very quickly.

After the truce was settled, Zhang Shan and the rest were prepared to continue farming monsters. At this moment, unparalleled gentleman said to Feng Yun realm, "

"Brother world, to be honest, I'm a little unwilling to lose this round. How about we have a Guild War?"

Unparalleled gentleman still wanted to get back at him, but there were too many uncertainties in a guild challenge.

the most important thing was that before the challenge was issued, they could not be sure what kind of challenge mode the system would arrange for them.

Currently, there were already quite a few player guilds, and many Guild Wars had also started.

There had been many different challenge modes, except for the war flag's offensive and defensive mode in the battle between wind and cloud and traversing Four Seas.

There had even been a battle Royale where all the Guild members had participated.

There had even been a five-man arena.

the all-member free-for-all mode was easy. there was no need to sign up. as long as the guild members were online, they could participate in the battle. It was the best way to show the Guild's overall strength.

however, the arena mode was different. each guild could only send five players.

"Oh, Brother Jun Zi, you have to think it through."

"I've thought it through. I hope brother Tian Xia doesn't mind."

"It's fine as long as you've thought it through. If you want to issue a guild challenge, I can't stop you. Of course, I don't mind either. The Guild challenge is a game setting that gives each Guild the freedom to choose."

≪ system announcement: peerless Guild has issued a challenge to wind and cloud Guild. The challenge match will be held tomorrow night at 8 pm. ≫

Damn, it really came.

These big shots were really not willing to admit defeat.

Let's see what kind of challenge mode it is.

Zhang Shan opened the Guild panel, and a guild challenge message appeared on the Guild channel.

...

He checked the challenge information.

The Challenger was the peerless Guild.

The challenged party was the wind and cloud Guild.

challenge mode, five-person group arena.

Looking at the challenge mode, Zhang Shan could not help but be happy. The unparalleled gentleman was really unlucky.

How were they supposed to fight in a five-man Group arena?

Zhang Shan could handle it alone. This guild challenge could not be any easier.

It would end in minutes.

Other than the mode, the rest was similar to the previous guild challenge.

the challenger's challenge fee was also one million gold.

the reward was the same. the winning guild would receive 500000 gold coins from the challenge fee and 10% of the opposing guild's contribution.

...

The only difference was that scrolls were not allowed in the group arena, and the use of ultimate skills was restricted.

Not allowing the use of scrolls was a normal setting.

One scroll was enough to defeat all the opponents, and the challenge would have no meaning.

he didn't expect that even the ultimate skill couldn't be used. although there wasn't a single player who could use the ultimate skill yet, there would definitely be someone who could use it in the future.

This kind of large-scale ultimate move was actually not allowed to be used in the ring challenge.

However, thinking about it, it was normal. Otherwise, when more ultimate skills appeared in the future

...

It wasn't about who made the first move winning the ring challenge.

that would be too much of a joke. the restriction on ultimate skills was probably to make the challenge as fair as possible and increase the playability.

Chapter 154 The BOSS's real name

Unparalleled gentleman's face darkened as soon as he issued the Guild challenge. How did they meet in the five-man Arena mode?

What was the point of fighting then? no matter how many players peerless chose, there was no point.

Not to mention, other than Zhang Shan, there were still four other people from the wind cloud Guild.

He had been too impulsive. He had hoped to get the battle royale mode.

Unparalleled gentleman felt that their Guild's overall strength was slightly stronger than the wind cloud Guild's.

If he could draw the battle royale mode, he would be confident in winning the Guild War.

Even the battle flag's attack and defense mode would work.

However, when the challenge mode came out, he knew that he had been too impulsive.

The challenge mode was arranged by the system. He would not use whatever he wanted.

Since he had initiated the Guild challenge, he had to draw the challenge mode first, like the lottery.

it was possible to draw a mode that was beneficial to them, but of course, it was also possible to draw a mode that was disadvantageous to them.

Unless their Guild had no shortcomings and was strong in all aspects.

obviously, this was impossible. One Zhang Shan from the wind cloud Guild could dominate the arena challenge mode.

The challenge had already been issued, and it couldn't be changed.

unparalleled gentleman helplessly said to feng yun realm,

"brother world is really lucky. i admit defeat this time. we forfeit this guild war."

In the Guild War in new world, once it started, there was no such thing as admitting defeat.

it would only end when there was a result.

However, if one side abandoned the competition, it was still possible. The other side wouldn't even send anyone to participate.

When the challenge began, if one side didn't have any participants, the other side would naturally win.

"Thanks for letting me win."

Feng Yun realm was not pretentious. The result was obvious. In the five-man battle, no Guild could beat them.

Zhang Shan alone was already ridiculously strong, and the rest of them were not weak either.

Feng Yun Qing Qing had obtained a spirit tool, even though she was only a support.

However, as long as the equipment was good enough, the support could still fight fiercely.

Feng Yun realm and the others were also equipped with the best equipment that players could get.

It was the same for skills. Other than a few very rare skills, there was really no place to get skill books.

they had already learned all the other practical skills of their respective classes.

Compared to the other players, the wind and cloud Guild had obtained a lot more skill points.

The skill level was not bad.

It was only because Zhang Shan was there that he had overshadowed them.

It made the big shots in the wind and cloud Guild seem to have no sense of existence.

"Let's go and farm some monsters."

The outcome of the Guild challenge had already been decided before it had even begun, so everyone was very excited.

Everyone discussed excitedly as they killed the monsters.

no wonder no one has challenged our Guild for so long. With the godly weapon boss, it's a sleeping victory if we win the arena mode.

" yeah, whoever dares to fight with us, brother divine artifact can sweep them all by himself, hehe. "

"The five-man Arena mode is practically our Guild's exclusive mode."

didn't you guys see? the moment the challenge announcement came out, unparalleled gentleman's face turned black. I think this challenge mode must have dealt him a huge blow.

unparalleled gentleman said that he wanted to give up the competition. Is that true? is he trying to numb us? "

who cares if he's really giving up or not? we'll still prepare the strongest lineup.

"What kind of lineup do we need? with brother divine weapon here, we can win even with a few dogs."

"F * ck, do you know how to talk? who are you calling a dog?"

" f * ck, you seem to be using the wrong words. boss is also participating in the competition. are you scolding him? "

"I didn't. It wasn't me. Don't talk nonsense."

"Hehe, you're finished, boss. Kick him out of the Guild, hehe."

.....

" sigh, it's boring. it's better than the battle royale mode. at least everyone can go up and play. there's no way to play in the five-person arena mode. "

what's so fun about it? the reward is the real thing. Everything else is just a facade.

"Boss, I'm applying to join the battle. Can I go up and get some rewards?"

"you don't look that good, but you're quite delusional."

"Then how do we select the participants?"

...

Feng Yun realm did not hesitate and said,

"We will still choose the strongest five-person combination. Although it is a sure-win game, we will still take it seriously."

"Hehe, I'll definitely be there."

Feng Yun Qing Qing said happily. She was someone who had a spiritual weapon.

Moreover, she had a wide range of support skills and was the strongest support in the wind and cloud Guild. She was even stronger than Feng Ling. No matter how he picked, she would definitely be one of them.

yeah, Qingqing, me, the Secretary, and Yidao. It'll be just the five of us.

sigh, I'm not here. My poor little wild wolf can't be of any use.

Said the wind Cloud Cannon gloomily.

having godly equipment bro as a Hunter is enough. What can you do if you go up? ”

Zhang Shan felt that Feng Yun realm's team composition was quite reasonable.

With two melee fighters, two ranged fighters, and a support, the range of movement in the ring was limited.

...

If they went up, it would be a head-on confrontation. A warrior class was needed to take the lead. A Berserker and a Guardian were just right.

berserkers had less than half of a guardian's hp.

However, to the players, every strength-type profession was a meat pie.

Not to mention the strength attribute gained from leveling up, just the strength gained from each piece of red equipment alone was quite a lot.

In total, their HP was almost double that of the fragile jobs.

it was almost impossible to be killed in one second.

As for the Panda baby with Zhang Shan, why did he have to bring a little Secretary?

this was because the players were not bosses. when the panda baby was fighting, it was very difficult for it to be a meat shield.

others would avoid it.

it was hard for others to avoid guardian warriors like the little secretary.

With a charge to slow him down, he had to stay put.

Everyone scattered around to farm monsters. The number of monsters here was neither too much nor too little, so 10000 people was just right.

Suddenly, someone shouted in the Guild channel, ”

“i have a boss here. it seems to be very strong. this boss even has a name.”

“How is that possible? How could there be a BOSS here? we've been here for two to three hours and we've never seen one. The map isn't that big either, there shouldn't be a BOSS here.”

Windcloud blade said in disbelief.

“It's true. Do you think I can't even recognize the BOSS? This BOSS is probably very powerful. It has a name.”

“What do you mean? Which boss doesn't have a name? don't they all have a name?”

it's not like the name from before, it's the kind with a person's name. This boss is called blade demon commander chakra.

"holy sh * t, a real name boss, that's awesome, we've met it now? Can we win?"

Zhang Shan was also shocked. Zhang Shan had never seen a boss with a name before.

He had only heard of it from the announcement during monster sieges. The one leading the sieges was the right general of the Nephilims, Locke.

However, the boss was blocked by the city Lord, so the players couldn't see it. They could only see it as the background of the game.

He didn't expect to find a boss with a real name here. It was a little unbelievable.

Chapter 155 Blade devil commander chakra

since they had discovered the boss, they naturally had to go and take a look. whether they could defeat it or not was another matter, but they should at least go and take a look.

"let's go. we'll go and take a look."

what's the point of watching? let's just do it. We have more than 8000 people here. What kind of boss can't we take down? "

"That's right, just do it, don't be scared."

Zhang Shan followed the coordinates and arrived at the place where the boss had spawned.

The entire wind and cloud Guild's over 8000 players had stopped farming monsters and came to watch the boss. It was a dark crowd.

No one dared to move forward. They didn't know what level this boss with a name was.

However, it looked similar to a red boss. It also had a red name.

However, this boss's outfit looked much more impressive.

Zhang Shan looked at the boss in the distance.

He was wearing a set of exquisite armor and holding a shining broadsword in his hand. He stood majestically in the middle of a group of monsters.

"This boss is so handsome. Why was its blade so beautiful? Take a look at my own blade, it's simply trash."

A certain Guardian warrior with a blade said.

"That saber of yours is trash to begin with."

"f * ck, no matter what, my sword is still an orange equipment. how can it be trash?"

"Orange isn't trash enough? Hehe."

“You’re awesome.”

“Hey, do you guys think the BOSS’s sword is a godly weapon?”

I don’t think so. If it’s a divine weapon, we might not be able to defeat it with eight thousand people.

what’s there to worry about? maybe it’s just a lighting effect, but it’s actually just trash? ”

“Alright, you’re right. Why don’t you go up and try the boss first?”

There were bosses in the game whose level and attributes couldn’t be seen.

Just by looking at its appearance, one could tell that it was not to be trifled with. This was the one they saw.

There was no need to try. Even a fool would know that this was a very powerful boss.

“Boss, how do we do it? let someone try it first?”

Everyone looked at Feng Yun realm and asked. No matter how strong the boss was, they still had to try.

Anyway, there were so many of them, so they could provide a lot of support. Even if a few fell, they could be pulled back up quickly.

It didn’t matter if he fell to the ground.

alright, everyone, back off a little. Ten people, test out the boss’s attributes.

Feng Yun realm had arranged for ten guild members to be cannon fodder. They only needed to test the boss’s attributes.

The ten of them went forward one by one. However, before they could even get close to the boss, they saw a flash of a blade.

One-hit kill. None of the ten players could block the boss’s attack.

“Holy sh * t, it’s that fierce? All of them were Insta-killed, even a warrior with 20000 HP was Insta-killed?”

Zhang Shan observed for a moment. Although those ten people had not even gotten close, they had already been killed by the boss.

this didn’t mean that this chakra was a long-ranged boss.

It was indeed a close-combat boss. However, chakra’s movement speed and attack speed were very fast. Before the players could get close, it had already attacked.

As for instantly killing a warrior with 20000 HP, that was very normal.

The ant queen that they had fought before could deal more than 10000 damage each time.

This chakra was clearly much stronger, dealing around 30000 to 50000 damage with a single slash.

“What should we do? I can’t go up. Even the ranged players were killed before they could get close. I didn’t even see the boss clearly. How did he rush up and attack?”

it's not easy. This boss's aggro range is a little wide. Its movement speed is almost the same as teleportation. Once you enter the aggro range, you will be attacked.

f*ck, this doesn't look like a close-combat dummy monster at all. It's completely similar to a long-range boss.

archers, get a row of archers to shoot meteor arrows. I don't believe that the boss 'aggro range can be further than the range of meteor arrows.

"meteor arrow can't hit the boss. there are so many small monsters around it."

"then what should we do? we can't just attack the boss without knowing its attributes and skills."

of course not. What if the boss instakilled us all in one hit? that would be a joke.

"Let me try. The boss shouldn't be able to kill me instantly."

The little Secretary stood up and said.

He should be The Guardian warrior with the best equipment in the wind and cloud Guild.

his hp was almost 50000, so the boss should not be able to kill him in one hit.

As long as he could close the distance between him and the boss, he could use charge on the boss.

During the process of [charge], players couldn't be locked on to and attacked. As long as they used [charge], they would definitely be able to deal damage with a slash.

...

In that case, he would be able to see the boss's attributes and skills.

"Alright, then you can go up and try."

Little Secretary Feng Yun rushed forward, and chakra's blade also flashed.

However, this attack did not instantly kill the little Secretary. Everyone saw the damage value that appeared above the little Secretary's head, -4890.

With one slash, Secretary Feng Yun's health bar was emptied. Fortunately, he didn't die instantly.

the little secretary quickly charged at the boss and used the charge skill. the damage dealt with one strike landed on chakra's body, -106.

After Secretary Feng Yun's first attack, the boss followed up with a second attack and knocked him out.

I'm fired. My attack power is over 2000, but I can only deal 100 damage.

Although Secretary Feng Yun had already fallen to the ground, he had already tested the BOSS's attributes and skills.

The little Secretary who was lying on the ground said after she sent out the BOSS's attributes.

I don't think we'll be able to defeat this BOSS even though we have over 8000 players.

...

Zhang Shan took a look at the BOSS's attributes that the Secretary had sent him.

Blade demon commander chakra (red): level 40, attack 18000, hp 8000000.

Skill 1, flowing light slash, skill 2, blade mastery, skill 3, Demon God's will, skill 4, all-directional blade disorder, status, Holy demon's protection.

[flowing light slash: chakra's large blade, slashes out a flowing light, damage increased by 100%.]

[blade mastery: blade demon commander is proficient in blade techniques, increases blade damage by 100%.]

[Demon God's will: summons a Demon God's will to assist in battle.]

[chaotic blades in all directions: the enraged chakra will use his peerless blade technique. Blade light will slash in all directions, causing 5x the damage. Damage range: 50 yards.]

[Holy demon's protection: a protection state that the Holy demon gives to invading demon Warriors, reducing damage by 50%. Will lose its effect after passing Heaven's Gate.]

"F * ck, wouldn't this BOSS be able to kill everyone with its ultimate skill? Who can stop him?"

Zhang Shan calculated the damage. The BOSS's basic attack was 18000.

The first skill was a small skill that could not be stacked with the damage of a high-level skill.

However, the second skill was the boss's own status skill.

It was similar to Zhang Shan's fanaticism, but it was definitely not like Zhang Shan's skill, which could only last for six seconds.

If the skill didn't have any special instructions, then it would always be effective.

In that case, the boss's ultimate skill would be five times more powerful than 36000.

A total of 180000 damage. This was too much. Even the Panda baby couldn't take it.

The Panda baby only had 120000 HP. It couldn't take it at all.

If even the Panda baby couldn't handle it, there was no need to mention others.

This meant that they had to fight the BOSS without anyone tanking the monster, which was a little difficult.

Chapter 156 Damage across the map

When fighting the BOSS, if no one was able to hold it off, the BOSS would rush out and attack randomly.

one slash, one kill. no matter how many people there were, it was useless. there was no way they could survive the BOSS 'attacks.

Not to mention, the BOSS's ultimate skill was an AoE skill that covered a 50-yard radius.

A big move could clear a large area.

"What do we do? Do we still fight?"

"Brother Liu Guan, how much blood does your baby panda have?"

Asked Feng Yun realm.

"One hundred and thirty-six thousand."

In other words, before the boss uses its ultimate skill, the Panda baby will be able to hold on?"

Zhang Shan thought for a while and felt that there was no problem.

The main thing was that with the first skill, flowing light slash, and Sword Mastery, the full damage was 72000.

However, the panda baby's defense was pretty good, and it also had a passive damage reduction skill.

The boss could at most deal about 50000 damage to the Panda baby.

Even if it was a critical hit, it wouldn't be able to instantly kill the Panda baby. As long as the support healed and gave some strength, there shouldn't be any problems.

"Before the BOSS uses its ultimate skill, there shouldn't be a problem as long as the support regenerates more blood."

"That's good. We'll temporarily organize five teams of support, each with 20 people. These five teams of support only need to heal the Panda baby and don't care about anything else. If one team dies, they'll go to the other team."

They had more than eight thousand people. They didn't need too many supports, at least a thousand.

It was just that some of them didn't have the best equipment or skills, but they still had the basic healing skills.

What about the other half of the BOSS's health? It'll be hard to survive after the boss uses its ultimate skill.

Let the soldiers hold them back for now. We have enough people. If groups of soldiers come forward and a few of us stall for a second, we can still hold them off.

"Alright," he said.

Since they had agreed on a strategy, they were ready to start.

After everyone was ready, Zhang Shan controlled the baby panda to move forward.

"Support, get ready. The moment the boss attacks the Panda baby, you have to heal it. If it gets attacked three times in a row, the Panda baby will definitely die."

"Don't worry, brother divine weapon. Let's go."

The Panda baby went forward to pull the BOSS, and the 20 support players followed closely to heal.

The others quickly went forward to attack.

haha, it seems like it's just that. It's a good fight.

"don't be happy too early, hurry up and call."

the panda baby tanked the BOSS, and huge amounts of damage kept appearing above its head.

Each of chakra's attacks dealt close to 50000 damage, and a critical hit dealt close to 100000 damage.

it was only because the panda baby had a lot of health that any other player would not be able to withstand such damage.

Although there were more than 8000 players from the wind and cloud Guild present, it was impossible for everyone to attack the boss.

The place was only so big, and only a few hundred people could participate in the attack.

The others stood nearby as reserves, and the fallen ones were replaced by the new ones.

Other than the people who were fighting the boss, Feng Yun realm also arranged for people to block the entrance of the tunnel.

Don't fight them at a critical moment.

It would be nonsense if a group of players from other countries came to cause trouble.

Fortunately, this was a closed terrain. As long as the entrance was blocked, no one else could enter.

Right now, only the members of the wind and cloud Guild were present. There was not a single outsider.

"What if other players from Chu State come in at this time?"

what else can we do? we'll just seal the entrance and not let anyone in. Who cares which country they're from?"

Under the attack of hundreds of people, the BOSS's HP dropped rapidly.

No matter how strong the BOSS was, it couldn't take on so many people. Each of them dealt more than 100 damage.

Hundreds of players could deal tens of thousands of damage at once.

Moreover, not all of them could only deal about 100 damage.

Some players had high skill damage, like Feng Yun realm, who kept using Heavenly Fire meteors to attack.

each hit dealt more than 400 to 500 damage, and if it was a critical hit, it could deal more than 1000 damage.

As for Zhang Shan, there was no need to even mention him. A random shot from him could deal three to four thousand damage.

A level 40 BOSS didn't have much of an effect on him.

If it wasn't for the fact that all Monsters in Heaven's Gate had the Holy demon protection effect ...

Each shot he fired could deal at least seven to eight thousand damage.

...

This was even without activating his berserk and fanatic skills. Otherwise, his damage output would be much higher.

Because there were too many people fighting the BOSS, in an ideal situation, they should be able to take out 80 million of chakra's HP in less than five minutes.

Zhang Shan planned to save these two explosive skills for the last. There was no rush now, since his little bit of damage wasn't much of a difference.

" now, i'll talk about the item distribution plan. since everyone has more or less participated in this BOSS fight, it's impossible for everyone to ROLL for it. "

feng yun realm said in the guild channel.

I plan to distribute it according to the damage ranking. The one with the highest damage will be the first to choose an item, and so on until it's all distributed.

the others have also contributed to this event, so they will be given red packets by those who get the items. The red packets will be given out in the Guild channel with 10% of the estimated value of the items.

this distribution plan is good. Those who are not involved can at least get a few red packets.

"Then if you want the items with the highest damage output and don't have any class items, do you still choose them?"

"regardless of profession, those who are not of the same profession can choose first and then auction them internally."

that's fine. With so many people participating, it's impossible to take care of everyone. This is the best. At least everyone will get something.

...

zhang shan had no objections to this distribution plan. to him, this was the best.

In terms of damage output, no one could compare to him. He alone could take on the damage of more than a dozen people.

The harder it was to fight the BOSS, the higher Zhang Shan's percentage of damage.

This was because the level suppression effect on the others was one level higher than his.

His divine weapon also had the effect of suppressing defense, so the actual damage dealt would be very high.

When the boss's HP dropped to 20%, it used the demon God's will skill.

A huge demonic God's apparition slowly appeared behind chakra.

"F * ck, he lost 1000 hp in one go? It's too outrageous, I can't take it."

feng yun qing qing quickly released her totem, and the hp of the people near the totem gradually stabilized.

However, the totem's range of effect was limited, and most of them could not enjoy the healing effect.

f * ck, support, hurry up and heal me. I'm going to fall soon. I can't hold on.

"What's the situation? Why is it that we're also losing HP like crazy when we're blocking the entrance here?"

"What? Did you guys lose health too? Did the boss's skill have such a wide area of effect? A full map?"

"support, don't stop! hurry up and heal me, or i'll die. sob, sob, sob. i'll get shot."

Hearing that at the entrance, the people blocking the entrance were losing health, Zhang Shan felt that it was unbelievable.

This was too strong, the entire map was losing blood.

They had fought many demonic bosses before. Most of the red bosses had the skill demonic will.

However, he had never encountered a situation where the entire map would lose health.

Chapter 157 The origin of magic

It was so f * cking exaggerated. No wonder no one had ever seen the nine great demonic gods outside the capital.

he would die as soon as he left the city.

Compared to the demon God, the ones they were fighting were only small bosses.

If the summoned Demon God's will Phantom was already so powerful, one could imagine how freakish a real Demon God would be.

He did not know how much health the players had to have in order to withstand the demon God's full-map damage.

As for how to push down a Demon God, it was even more unknown what kind of strength was needed.

After a round of Demon God's will, they had lost over a hundred people.

the rest of them had to be healed by the support to survive.

This was because they had a large number of support players. There were only about a hundred of them fighting the boss.

The other supports were just watching from the side as substitutes.

that's f * cking scary. 1000 hp per second for 15 seconds. Which fragile job can withstand that? "

"Brother divine artifact can take it."

excluding artifact bro, is there a second brittleskin who can survive this skill on his own? "

how is that possible? he'll lose 15000 HP in total. Unless he has the purple cloak, he won't be able to hold on.

" i'm willing to call chakra the strongest BOSS. he's too f * cking fierce. "

" this is only the beginning. there are more ferocious things to come. "

it's only a level 40 BOSS and it's already so strong. I don't know how to play it.

that's simple. Pay to make you stronger.

how? tell me, what kind of f * cking rare items can be bought? "

that's right. Let's not talk about divine artifacts. I've never even seen a purple cape being sold.

the best equipment we can buy right now is red equipment. We can forget about the rest, and we can't even buy rare skill books.

"I've been eyeing brother artifact's berserk skill for a long time, but I've never seen anyone sell it."

there should only be one so far. I've never heard of anyone else using it.

"Brother artifact, why do you always get such amazing things?"

"Is there? My equipment is only about the same as yours. The only difference is that I have an additional divine weapon and a spiritual weapon."

"F * ck, is this even human? And it's just an additional divine artifact or spiritual artifact?"

"divine artifact bro is a super versailles."

"by the way, what kind of good stuff will chakra drop for us?"

"Who knows? let's destroy it first."

Not long after, the boss used the demon God's will skill again. This time, everyone learned their lesson.

Those who did not participate in the boss fight quickly ran to the support.

To get a mouthful of milk to save his life.

After a round of demonic will, no one was killed.

pay attention to your positions. The boss's big move is about to come out.

all melee players, retreat. A team of Warriors, get ready. When the Panda baby falls to the ground, you guys take turns to pull the boss.

Other than the warrior class, the other melee classes were like thieves and spellblades.

This boss had nothing to do with them anymore, so they were no longer of any use.

The warrior class was still okay. At least they had the charge skill, which could quickly approach the boss. It was also good to pull aggro for one second.

When chakra's HP dropped to half, he used his ultimate skill.

Countless blade lights flashed in the surroundings, and almost all the people who were attacking fell to the ground.

only a portion of the hunters could still stand due to the long attack range.

Zhang Shan's Panda baby was also killed in seconds. A big move dealt 180000 damage, which was terrifying. He died the moment he was hit.

The Warriors, who were already prepared, quickly moved forward in groups, each of them using charge to pull the boss.

Not everyone could do it well. Out of three to five people, only one warrior could rush to the boss.

Due to various reasons, the others had died before they could even charge.

"F * ck, that's too fierce."

no matter how strong they are, they'll still fall. Do you really think that we, a few thousand people, are vegetarians? "

Zhang Shan quickly summoned the Panda baby again. After feeding it, he continued to go forward to tank the boss.

"will this chakra's ultimate move also be endless?"

"I don't know, but I'll just fight as fast as I can."

feng yun realm had also fallen to the ground and the mage's attack range was less than 50 yards.

Chakra's all-directional chaotic blade skill was an instant cast skill that didn't require a channeling bar.

...

the boss didn't give anyone a chance to dodge. as long as they were within 50 yards of the boss, they would die.

The support pulled up some of the fallen players, and the others continued to attack the boss.

The damage could not be stopped, otherwise, the boss's health would quickly recover.

In less than half a minute, chakra used another eight-sided chaotic blade and killed the Panda baby.

However, in this half a minute, they had taken out another 10% of the boss's health.

haha, let's continue. It's not that hard. We can easily kill the boss with just a few players.

Just like that, Zhang Shan's Panda baby died four to five times before the boss's health was finally depleted.

Zhang Shan carefully estimated everyone's damage and controlled the Panda baby to use its combo skills, directly blowing up chakra.

≪ system announcement: congratulations to Feng Yun realm, six-barreled Bodhisattva, and Windcloud cannon Suan ni for successfully killing blade demon commander chakra. ≫

Skill point +1, medal +100.

f * ck, it's so hard to fight. We've lost almost a thousand people, right? "

...

yes, there are still a lot of people lying on the ground. They can't be revived until the cooldown of the support's resurrection skill is over.

This chakra is really strong. 80 million HP isn't a lot.

if all of them fought together, they would be able to defeat it in less than five minutes.

the main point was that the damage was too high.

A big move instantly killed everyone, and there was no place to hide.

If they wanted to deal damage, they would have to take the boss's ultimate skill, except for hunters who had Eagle Eye.

They could attack outside the range of the boss's ultimate skill, but no one else could.

it had to be said that increasing the range was a godly special effect. zhang shan had underestimated the effect of the eagle eye skill.

previously, he had only thought that the eagle eye skill was very useful in a fight.

When others couldn't hit him, he could knock them down.

Now, it seemed that this skill was the most useful against a boss's ultimate skill.

The other classes that did not increase their attack range, such as mages like Feng Yun realm, were all mages.

No matter how good his equipment was, it was useless. He had already died many times.

As long as the BOSS used a big move, Feng Yun realm would definitely fall.

No matter what he did, it wouldn't work. The BOSS instantly cast a big move, not giving anyone a chance to Dodge it.

The announcement that the wind and cloud Guild had defeated the BOSS had also attracted the attention of others.

After all, they had just been fighting with the Qi players. Why did they start fighting the BOSS again?

The world Channel:

“Isn’t wind and cloud at war with peerless? How come you still have time to fight the boss?”

“Your information is outdated. It’s done long ago. The peerless Guild’s members have already returned.”

“What’s the situation? Why haven’t we heard anything? which side won?”

I don’t know. In any case, quite a few of peerless ‘members returned. I don’t think many of them died. Judging by the number of people they put up a bounty for, maybe one or two thousand? ”

“So you’re saying that if wind and cloud Guild lost, why would they still have the time to fight the BOSS?”

“I just want to know if the divine artifact boss is dead or not.”

let me ask you the same question. The two major guilds of Qi state have taken action one after another. Did they defeat the divine weapon boss? ”

“ask around. you can know from the level ranking. brother divine equipment is still level 30. he’s definitely not dead.”

“That’s hard to say. Maybe he was pulled up by the support.”

“Don’t ask. If you ask, it means you’ve never fought. Didn’t you see that the unparalleled gentleman has already started a Guild War? If they win, they won’t be afraid of the Guild challenge.”

“Perhaps unparalleled gentleman thinks that wind and cloud Guild is a pushover and wants to make a wave of Guild contribution points.”

“You must be joking. Is the wind and cloud Guild a pushover? Why don’t your Guild go and challenge it?”

“I wouldn’t dare. Didn’t you see how brother divine weapon killed a kid with one shot? If I draw the arena mode, I’ll be dead meat.”

” if you know about it, then that unparalleled gentleman definitely knows about it too. he still issued a guild challenge. why do you think he did that? ”

that’s right. You lost and want to get back your face through the Guild challenge? ”

“Brother Jun Zi, what’s the situation?”

“Brother beneath the heavens, say something.”

No matter what the world Channel was discussing, the two guilds involved didn’t say anything.

Naturally, peerless Guild was too embarrassed to say anything. Wind cloud Guild didn’t want to say anything either.

Speaking of which, they didn’t win against the other party and were still blocked by them for quite a while.

There was nothing much to say.

Right now, the people from wind and cloud Guild were only concerned about what good items the boss had dropped.

Chakra was the first real name boss that players had ever killed in the New World.

It was even a first clear, so the drops wouldn't be too shabby, right?

Feng Yun realm displayed the drops.

There were three red equipment, one orange equipment, one red material, one special item, and one skill book.

"holy sh * t! look at that mana pool! it's a spiritual-level special item that increases the maximum mana!"

that's awesome. With an additional 50000 MP, as long as you equip the mana pool, you'll be able to cast an ultimate skill.

brother artifact, you have to sell me this mana pool. With it, I can use the wrath of the stars.

the big shot archer in the guild who had previously obtained the ultimate skill, wrath of the stars, shouted excitedly.

why must I sell it to you? don't mages like it? "

that's right. I think the mana is more suitable for mages. It increases the maximum mana by 50000 and increases mana recovery speed by 20%. You can say that you'll never run out of mana.

it's indeed a top-grade item for mages. A mage equipped with the mana pool can cast skills infinitely as long as the skills have cooldowns. There's no need to bring Xiao LAN along.

"I'm firing! What are you guys doing? if I had equipped the mana pool, would I still need to call a truce with peerless? I'll just use the wrath of the stars to annihilate them all."

feng yun realm suppressed the heated discussion and said.

"I'll rank the damage output of the boss and choose the items according to the ranking."

Needless to say, the first in damage output was definitely Zhang Shan. The second in damage was actually the wind Cloud Cannon.

Hunters did have an advantage when fighting a BOSS. It was safer to stand far away.

Moreover, the output was smooth and stable, making it easy to deal high damage.

In third place was Feng Yun realm. Although he had fallen a few times, his mage's burst damage was extremely high and he was very impressive.

The fourth place was also a Hunter, Desert Gun God. Zhang Shan was not familiar with this person.

The fifth, sixth, and seventh place were all mages. There were many mages in the Guild who played high burst damage.

Chapter 158 a wave of profit

Zhang Shan was the first to choose the item. There was nothing much to think about. No matter how good the other items were, they could not compare to the source of magic.

Not to mention the function of the magic source, just because it was a spiritual weapon, Zhang Shan would choose it.

how many spiritual weapons were there in the entire game? every single one of them was extremely precious.

As for the wind Cloud Cannon, he did not hesitate and chose the skill book.

This skill book was pretty good as well. Heavy slash was a Guardian warrior skill book.

It was a little similar to chakra's [Moonbeam slash]. Once the skill was maxed out, the damage would be increased by 100%.

After learning this skill, The Guardian warrior was no longer a meat shield without any damage output.

The remaining five people could only choose equipment and materials.

Although there were still three pieces of red equipment, these big shots didn't really care about them.

He wouldn't be able to use a level 40 red equipment for a while. Besides, it wasn't a rare item that could be bought.

After the items were distributed, Feng Yun realm said,

if you don't need it, auction it in the Guild channel. Once it's sold, you'll get a red packet.

brother artifact, you're not going to use the source of magic for yourself, are you? "

he definitely won't use it. Brother artifact doesn't even have many skills that require blue.

sigh, divine equipment bro is already so awesome even without using his skills. I'm still a noob even though I've used all my skills.

I don't need this mana pool, so let's auction it off. Big shots, raise the price. I won't sell it if it's too cheap.

"Don't worry, I'll take it if it's below 50 million gold coins."

don't fight with me. In order to use my ultimate skill as soon as possible, I'll fight you all to the death today.

it's a pity that spiritual weapons are bound after they are equipped. Otherwise, we could borrow each other's weapons.

you're thinking too much. Can a game designer make it so easy for you? "

After a bloody battle between the big shots, the origin of magic was won by the Archer for 80 million gold coins.

Another wave of profit, but Zhang Shan did not want to make money now.

he wanted to increase his combat power as soon as possible, but he did not have a suitable skill book.

His equipment could not be upgraded as well. They were all red equipment, and he could not buy any better equipment.

It seemed that it was time to try and see if that broken ring could be turned into a divine artifact.

Otherwise, he wouldn't have made much progress in the next two months.

In that case, his strength would no longer be able to suppress the other players.

When everyone else reached level 30 and changed into level 30 equipment, their combat power would not be much worse than his.

He could no longer be as comfortable as he was now, shooting one person with one shot, two shots one person.

The wind and cloud Cannon skill book was also won by the Secretary for 500000 gold coins.

although the heavy slash skill was very practical, it was only a normal skill.

It was just that skill books were rarely sold, or else they wouldn't be able to sell for a high price.

After all, Guardian Warriors prioritized the development of HP and defense.

There were not many Guardian Warriors who focused on increasing their damage, so it was already good that this skill book could be sold for 500000 gold coins.

The others took out their equipment that they didn't need.

"brother divine weapon, hurry up and send red packets."

Zhang Shan's source of magic had been sold for 80 million gold coins, according to the previous agreement.

if he gave out a red packet that was 10% of the item's value, he would have to give out eight million gold coins.

He felt a little heartache.

Forget it, it was an unexpected fortune anyway.

In the Guild channel, he typed in eight million gold coins and sent out ten thousand red packets.

"Haha, I got 5000 gold coins."

"Oh my God, why did I only get 100?"

"Not bad, 1000 gold coins, hehe."

After Zhang Shan sent out the red packets, the other six people also sent out their red packets.

Zhang Shan had not managed to get 200 gold coins.

The main reason was that the others didn't fire much, and the wind Cloud Cannon that they fired the most was only 50000 gold.

Although not all of their Guild's 10000 members were present, no one bothered to count their heads.

He directly sent red packets according to the total number of guild members.

Zhang Shan could be considered lucky to be able to snatch more than 100 gold coins.

After sending out all the red packets, everyone was elated.

The harvest from this boss battle was not bad. Zhang Shan had earned more than 70 million gold coins.

...

The others also had their own small gains.

"Little QiuQiu, aren't you able to release your ultimate skill now? Let's take a look."

The Big Shot Archer who had learned the wrath of the stars was called wind cloud Cupid.

After winning Zhang Shan's source of magic, he could finally use the wrath of the stars.

" what are you looking at? the cooldown time is 24 hours. if i use it now and fight with someone later, the skill will still be on cooldown. wouldn't that be a joke? "

I don't need you to fight. You can only use this skill once a day. It's good for scaring people, but it's not as effective as brother artifact's. It's more practical to use it one shot at a time.

" you're so jealous. one move can cover 50 yards. in a crowded situation, you can kill two to three thousand people in seconds. "

"Which idiot would stand so close to each other and let you hit him?"

it doesn't matter even if they're separated. It's not a problem to knock down a few hundred people at once.

you're awesome, alright? sigh, when can I get it too? it'll be great if it's an ultimate skill.

" prepare your gold coins. you'll have them sooner or later. "

...

why do I need to prepare gold coins? isn't it nice if I get one myself? "

that'll be too hard on your character. You know your own character, hehe.

"What do I know? I'm going to write a book myself."

After the BOSS was defeated, the equipment was distributed, and everyone split up to find other teams to kill the monsters.

The people at the entrance of the tunnel no longer needed to guard. When they were not fighting the BOSS, they were not afraid of others causing trouble.

if few came, they would be destroyed, but if many came.

They had already discovered it long ago, so they could just push it back to the entrance and continue to guard it.

Zhang Shan and wind and cloud blade continued to bring boss Wu to farm monsters, and their experience kept increasing.

However, he was still far from leveling up.

There were too many people sharing the experience from killing the boss just now.

In total, he had only gained about 100000 experience points, which he could earn in about ten minutes.

It was better to fight a boss with fewer people. There were fewer people who could share the experience and equipment.

It was a pity that those powerful bosses required a lot of people. They couldn't be defeated with a few people.

a boss like chakra, even after two months, a 50-man team would still not be able to defeat it.

A single ultimate skill dealt 180000 damage. Who could withstand that?

This kind of boss required a large number of people to kill it. There were a lot of them in a second, and no one could stop them.

Zhang Shan looked at his experience bar. He had only gained about three million experience points after leveling up.

it was not even one-tenth of an upgrade.

However, it didn't matter. For the time being, no one could catch up to him in level.

The second on the level leaderboard, heart with me, had only just reached level 29.

if he wanted to reach level 30, he would need at least ten days, and that was already if he farmed quickly.

It was time to run the broken ring quest. It was a long-term project.

Zhang Shan planned to spend a few days to search through both items. He did not believe that he could not find the corresponding NPC.

Chapter 159 The chaotic situation

Although Zhang Shan had planned to complete the ring mission, he could not go immediately.

they would have to wait until tomorrow. tomorrow, they still had to fight a guild war with peerless.

Even though the unparalleled gentleman had said that he would forfeit the match, who knew if he was speaking the truth?

Zhang Shan decided to wait until tomorrow after the Guild War.

It was not cheap to teleport to the East and West. It cost 10000 gold coins to teleport once.

Although he had money now, he couldn't waste it.

If you can't find it in one day, then take two days. If two days isn't enough, then continue looking.

Anyway, he could run fast on a horse now. He should be able to cover the entire East Capital in two or three days.

As long as the NPCs were in the East and West, he should be able to find them.

If he couldn't find it in both the East and West, then there was no other way.

It was impossible for Zhang Shan to visit all the cities in the game.

That was completely unrealistic, as there was no way to go to the cities of other countries.

if he went, everyone would shout at him.

Just as they were farming monsters, Windcloud blade suddenly shouted.

"F * ck, the people of Wei and Qin are also fighting."

"What's the situation? Why are they also fighting?"

I think they're fighting for a BOSS. The God of War Guild was fighting a BOSS when they were ambushed by the Qin's domineering aura Guild. Then, they started fighting. Go to the World Channel and see for yourself.

I'll go take a look.

The world Channel:

tyrant king, are you looking for death? "

"It's still not certain who will die. Your war god Guild has been the leader of the Guild for so many years. It's time for you to give up your position."

"You, the domineering King?"

"Of course I can't do it by myself, but the great Qin has more than 10 million players, so it's not a problem for us to take you all down."

"Very good. If you don't want to play, then don't."

Soon, the war god Guild called for a large number of Wei players to enter the Heaven's Gate map.

At the same time, a large number of Qin players also rushed into Heaven's Gate.

The two countries were at war, and the number of people participating in the war reached hundreds of thousands.

In comparison, the chaotic battle between the wind and cloud Guild and the players of the Qi Kingdom was child's play.

The players from the two countries fought, and the players from the other countries also followed suit.

Heaven's Gate, which was already chaotic, became even more chaotic.

Even at the place where the wind and cloud Guild was farming monsters, players from other countries would occasionally sneak in.

He had sneaked in on them.

The members of wind and cloud Guild could not farm monsters in peace. They had thought that with so many of them together, the entrance to the passage would be narrow.

It should be very safe to farm monsters here.

However, the chaos of The Map of Heaven's Gate was beyond their imagination.

Everyone's eyes were bloodshot, and they killed any foreign player with a purple name.

Who cares who he is.

After clearing out a group of foreign players who had sneaked in, Windcloud blade said gloomily.

"F * ck, can I still farm monsters in this damn place? Why don't we arrange for people to take turns guarding the entrance? otherwise, we won't be able to farm them."

sigh, I want to go back to Dangyang city to farm monsters. It's too f * cking unsafe here. I've already died twice. If it wasn't for the support pulling me up, it would be a big loss.

it's impossible to go back and farm. There's a lot of experience here. In the same time, the experience gained is more than one-third of what it was before.

"But this place is too unsafe."

it's fine. We'll just farm monsters here. Just arrange for ten people to take turns guarding the entrance of the passage. If anyone attacks, call for backup.

Feng Yun realm quickly arranged for people to guard the entrance.

After experiencing the monsters at heaven's gate, no one wanted to return to Dangyang city to farm monsters.

it was difficult to level up. since there was more experience here, of course, he would try his best to farm here. who wouldn't like the faster leveling up?

The earlier he reached level 30, the earlier he could upgrade his equipment.

Most importantly, after reaching level 30, one would be able to buy mounts.

Even Feng Yun realm, who did not want to come to Heaven's Gate in the first place, was shocked.

after farming here for a while, he didn't want to go back.

“it’s a good thing we found a good place. otherwise, we’d be like the others, grinding in an open area. there’s no safety to speak of. we’ll be ambushed from time to time. who can stand that?”

that’s right. This is a good place to farm monsters. We have to guard this place 24/7.

...

“I don’t think there’s a need for that. There should be quite a number of such places in the Heaven’s Gate map. Moreover, our Guild will reach Level 3 in a few days. By then, we’ll have more guild members, and there won’t be enough monsters to farm here.”

that’s true. We have to find more of these maps. Maybe we can find another BOSS to fight.

isn’t it easy to beat the BOSS? there are maps of Heaven’s Gate everywhere, but no one can beat it.

I heard that someone saw a few big bosses in the depths of the map, but they died before they could get close.

“No way. Isn’t that even more ferocious than the chakra?”

it’s definitely fiercer than chakra. Chakra is only a level 40 BOSS. The deeper we go into the Heaven’s Gate map, the higher the level of the monsters and the higher the level of the BOSS. It’s really fiercer.

sigh, I don’t want to think about it anymore. We’re just noobs who haven’t even reached level 30. We should just focus on farming monsters and leveling up.

The battle outside was turning the world upside down, while the people of wind and cloud Guild hid here to farm monsters.

As long as they blocked the entrance, they would be safe. They didn’t have to worry about being disturbed. It was simply a Pure Land in Heaven’s Gate.

As time passed, more and more people discovered their location.

there were also many people who were envious of the monster-farming map where the wind and cloud guild was located. there were even a few times when thousands of people rushed to the entrance of the passage.

...

They were all blocked outside.

do you guys think that the battle outside is so intense? will it really trigger a country war? ”

“Who can say for sure?”

if it was before, everyone thought that the country war wouldn’t start so soon. but now that the war was getting bigger, it was hard to say.

“should we go and play as well? if someone else triggers the kingdom war, our chu kingdom won’t have anything to do.”

“How could this be? Although we are farming monsters here, the other Chu country players are not idle.”

yes, the heaven and earth Dragon slaying saber has always been active and stirring up trouble at heaven’s gate.

that’s right. If we really want to trigger a World War, how can we rely on the few people in our Guild? after all, we only have 10000 people. Compared to the 10 or 20 million people in each country, we can’t make much of a difference.

That was indeed the case. The current player guilds were still relatively weak.

They were all Level 2 guilds, not even a single level 3 Guild.

The Guild only had 10000 members at most, which was too small of a proportion in a country’s player camp.

whether or not they went to cause trouble would not affect the hatred between chu state and other countries.

Unless their Guild’s level continued to increase until their guild members reached a million.

Only then would he be able to truly influence the situation of a country.

Chapter 160 The ultimate skill that bloomed for the first time

The chaotic situation in the Heaven’s Gate map continued until late that night, until most of the players went offline to rest.

It gradually calmed down.

After a day of free-for-all, many people had even fallen from the level rankings. Some people were unlucky and didn’t get to wait for the support to rescue them.

Some of them were even spawn-camped for an hour until they resurrected in the city.

The People of the Wind and cloud Guild gradually went offline to sleep. Feng Yun realm arranged for a group of liver Kings to continue to block the passage so that they would not be occupied by others when they went to sleep.

The next day, everyone continued to farm monsters here.

not long after zhang shan went online, he suddenly received a call from heart with me.

Eh? Why was this Big Boss looking for him? did he have another business?

Zhang Shan’s first impression of ‘follow my heart’ was that he was rich, and the second impression was that he was a real deal.

The kind that was even better at farming than Zhang Shan.

“Brother Liu Guan, is your Guild still recruiting?”

heart with me asked him.

“If you’re here, of course I’ll accept it. Why did you suddenly want to join our guild? Didn’t you plan to play alone?”

don’t mention it. I heard that the monsters in the Heaven’s Gate map give a lot of experience. I went there yesterday to farm monsters and was killed once. Fortunately, I found a support to resurrect me. Otherwise, I would have lost another level.

“Where are you? I’ll get someone to pull you into the Guild.”

“In the teleportation Hall of Heaven’s Gate.”

“okay, wait a moment, i’ll be there.”

After ending the call, Zhang Shan said to wind and cloud blade, ”

brother one blade, heart with me wants to join our guild. Let’s go back and pull him in.

“Your heart moves with me? Is he the rich Big Boss we accepted the bounty last time?”

“Yes, I am.”

he’s finally remembered to join us. That guy’s spending money is even more vicious than mine. Where is he? I’ll go and pull him in.

it’s in the teleportation Hall of Heaven’s Gate. Let’s go together. I’m afraid you won’t be able to make it and will die halfway. Hehe.

“F * ck, who are you looking down on? let’s go.”

let’s go back together first. We’ll come back later. It’s not too far away anyway.

Zhang Shan said to boss Wu, who was beside him.

He was still a little worried. The Map of Heaven’s Gate had been in a mess the whole day yesterday, although it was a little quieter today.

However, there would still be some small-scale scuffles occasionally. If boss Wu was called along, it would be safer to have a support who could resurrect.

The three of them cast the teleportation bar together and returned to the city. They found follow your heart in the teleportation Hall of Heaven’s Gate.

Zhang Shan had added him to the team.

Windcloud blade kicked out a zombie member who was not usually online and pulled heart with me into the Guild.

Zhang Shan was afraid of trouble, so he didn’t hold any guild positions and couldn’t pull people into the Guild.

If he wanted to invite someone to join his Guild, he would have to look for Windcloud blade.

haha, Big Boss, welcome to the wind and cloud Guild.

I'm too unstable in second place. I was killed once yesterday. If I didn't find a support to pull me up, I would have fallen.

Heart with me said gloomily.

This Big Shot was a serious person and never wanted to cut people. But even if he didn't cut people, it didn't mean that others wouldn't cut him.

No matter how good a person was at playing, he still couldn't withstand the chopping of a vegetable knife. He still needed many brothers to play the game.

He had probably thought it through, and that was why he had asked Zhang Shan to join the wind and cloud Guild.

"let's go and farm some monsters. we found a safe farming map with no one to harass us. the experience is so good, hehe."

Windcloud blade said smugly.

I've heard about it. I know that you guys found a good place yesterday and sneakily killed monsters to level up. The outside world is in chaos, but it didn't affect you guys.

there should be quite a few places like this in Heaven's Gate. As long as we look for them seriously, we'll be able to find them.

" there are a few similar locations, but they've all been occupied by the various large guilds. no one else can enter. "

The four of them left Heaven's Gate and ran towards the place where they were farming monsters. They didn't expect to meet such a blind guy on the way.

Although Zhang Shan was very famous, and everyone knew that his attack power was fierce.

However, there were always those who did not believe in heresy. Seeing that there were only four of them, they dared to run around The Map of Heaven's Gate.

A group of over a hundred people surrounded them, and before Zhang Shan could make a move.

Heart with me suddenly used a skill that no one had ever seen before, and a large number of sword lights fell from the sky.

On the other hand, following heart's activation of the skill caused his entire body to turn illusory, as if he was about to disappear.

The sword light lasted for a full five seconds, directly turning the hundred or so people into dregs.

"F * ck, big brother, what skill is this? How could there be such an awesome skill?"

...

Wind and cloud blade, Zhang Shan, and the other two were all stunned. He was too f * cking handsome.

“Spellblade’s ultimate skill, invincible slash.”

Heart with me said with a hint of pride, even though he didn’t like to fight and slash people.

However, he didn’t want to be attacked even more. No one liked to be tortured to death in the game.

When someone tried to mess with him, he didn’t hold back. He killed everyone with a single invincible slash.

“Where did you get the skill book?”

Windcloud blade asked enviously. He also wanted such a cool skill.

“I bought it from the auction house. Wasn’t there an invincible slash skill book that was being auctioned last time? I bought it.”

Actually, when he had seen the skill that was displayed by heart with me, Zhang Shan had already guessed that it might be the skill book that they had auctioned off earlier.

i didn’t expect it to really fall into the hands of ‘heart moves with me’. this rich big shot is really rich.

The invincible slash skill book was finally auctioned for 150 million gold coins.

...

Spending so much money to buy a skill book in the game, even though it was Zhang Shan who sold it.

But he still wanted to say that it was awesome.

“You’re ruthless. You’re willing to buy such an expensive skill book. However, the effect is really good. I haven’t even seen a skill book yet.”

how do you have enough mana to cast the invincible slash? didn’t it cost you 20000 mana? ”

Zhang Shan asked curiously. does ‘follow my heart’ also get a mana pool? ”

after I died yesterday, I stopped farming monsters. I saw a special item at the auction house, so I spent some money to buy it.

After saying that, moving heart took out a special item.

[magical magic bottle (red): stores 20000 magic points. It will be full after two hours. It will be effective when placed in the backpack.]

“This is awesome.”

Magic potions were far inferior to mana pool, but they were still very practical.

Storing 20,000 magic meant that he could add 20000 more magic to his cast time, which was just enough for the magic consumption of invincible slash.

Moreover, the magic bottle would be full after two hours, so it would be good to use it when farming monsters.

He could save a lot of blue.

Magic potions didn't need to take up inventory space either. They could be effective just by placing them in the backpack, and there was no need to switch equipment with other special items.

speaking of which, this was the first time zhang shan had seen such an item.
