

Passive Skills 341

Chapter 341 kill our way out

Zhang Shan and the other four were wandering around the world War map when they were ambushed by Guild Subjugator.

although they had been caught off guard and didn't even have time to get on their horses and escape, the five of them didn't panic at all.

Zhang Shan went all out and quickly took down a large number of the domineering aura members.

Meanwhile, wind cloud blade and heart moves with me were blocking the front and back respectively.

In the beginning, the two of them could still hold on. After all, the equipment and skills of these two big shots were amazing.

They were all the top players in the game, and boss Wu was healing them, so it shouldn't be a problem for a while.

however, the domineering air guild quickly split up and started attacking boss wu.

in order to save his own life, boss wu naturally didn't have time to heal them.

All of a sudden, these two big shots would soon be in a dangerous situation.

Zhang Shan could tell that the situation was not right, but he could not pull himself out to help.

he still had to focus his fire on the area with the most members from subjugator so that he could take down more people as soon as possible.

However, the little demon should be able to find time.

Even though there were players from domineering aura who wanted to attack her, they were all defeated before they could even get close.

Seeing this, Zhang Shan shouted.

Daoist priest, don't worry about yourself with your blade. Pay attention to healing wind and cloud blade and heart follows me. Little fairy, help the support out.

one of the fairies shot a few split arrows and defeated the members of the domineering aura who were attacking boss wu.

Meanwhile, boss Wu continued to heal wind and cloud blade and heart follows me, and the situation slowed down again.

The members of the domineering aura Guild seemed to be deliberately ignoring Zhang Shan's existence. Almost no one went up to attack him.

As for Zhang Shan, he could happily play the damage output. In less than half a minute, there were more than a thousand people in the domineering aura Guild team.

they had already knocked down nearly half of the people.

If the members of the domineering aura Guild knew what Zhang Shan was thinking, they would definitely curse him.

How could they not want to attack Zhang Shan? it was just that they never had the chance.

They were still far away from Zhang Shan, but they were already beaten to the ground. They did not even have the chance to go forward.

Furthermore, they had long known that Zhang Shan was not easy to deal with. They had planned to deal with his four teammates first.

Whoever knew that in less than half a minute, not a single person on Zhang Shan's side had fallen.

However, over 600 members of the domineering aura Guild had fallen.

They were completely dumbfounded.

"What's going on? why did our people fall so quickly?"

"I don't know. I didn't see anyone hit me, so I just fell for no reason."

"f * ck, i've seen a ghost."

it's the Bodhisattva of six tubes. His damage seems to be bouncing between us, like a piece of music.

to hell with the dandan. What kind of skill is this? "

"Who knows? we'll just do it and it'll be over."

that's right, hold them back. Boss will bring the main force behind and they will catch up soon.

when boss and the others come, there will be tens of millions of people. Their saliva alone can drown six-pipe Bodhisattva.

let's put some distance between us. Don't let the damage of six-barreled Bodhisattva reach us.

"Drag it out slowly, just don't let them escape."

"You're right. Let's see how they die this time. We'll drag them to death."

even though zhang shan had taken down half of their members in less than half a minute, the members of the domineering aura guild were clearly not going to give up.

however, they did not charge as closely as before. instead, they were separated.

It was obvious that the people from the domineering aura Guild had discovered the secret of Zhang Shan's catapulting skill.

As soon as the members of the domineering aura Guild split up, Zhang Shan's efficiency in beating up others dropped.

However, after the players from the domineering aura Guild split up, they were basically no longer a threat to them.

however, they couldn't continue like this. they couldn't be held back here forever. they had to find a way to leave as soon as possible.

The thoughts of the members of the domineering aura Guild were obvious. They wanted to stall Zhang Shan and the others here.

Regardless of whether they were or not, there was still a large group of people rushing over. Zhang Shan could not let them have their way.

He had to rush out as soon as possible.

At this moment, the players from domineering aura no longer charged towards them like before.

Instead, he kept on harassing them from the side. This way, Zhang Shan could not kill many people.

it wasn't easy to walk either, because as soon as they got on their horses, they would definitely face a wave of damage.

he would probably be directly beaten down.

Seeing that he was about to be held back by the domineering aura Guild, Zhang Shan could not help but shout.

...

brother Yidao, you lead the way. The rest of you follow. I'll hold the rear. We'll rush out.

"Alright," he said.

Wind and cloud blade brandished his divine weapon battle axe and charged forward quickly.

Those from the domineering Guild would not let Zhang Shan and the others leave.

wind and cloud blade used charge and directly killed his way into the middle of the enemies.

The axe hacked wildly.

Heart follows me followed closely behind him, and the little fairy kept shooting arrows with her longbow.

They quickly pushed back the members of domineering aura who were blocking their way.

Zhang Shan followed behind and used his intense firepower to seal off the path of retreat, not allowing the people from the domineering aura to get close.

"Get on the horse, let's go."

Seeing that a path had been cleared, Zhang Shan and the other four quickly mounted their horses. Before the people from Guild Subjugator could react.

...

He quickly rushed out.

As long as they could get on their horses, the players from Subjugator would never be able to catch up to them.

Unless they had set up an interception in front of them.

But Zhang Shan was not worried about this.

The country war map was an empty map, and there were basically no obstacles.

If they encountered an interception, they would just run around it.

Only after Zhang Shan and the rest had mounted their horses did the members of the domineering aura Guild react.

“Hurry up and stop them, don’t let them escape.”

how the f * ck can we stop them? we couldn’t even get close just now. Six-barreled Bodhisattva blocked our way with his spear. We couldn’t even get up.

what about the one in front? why didn’t they stop him? ”

stop my ass. Try and stop them. Do you think that the other four are weaklings other than six-barreled Bodhisattva? ”

“Don’t quarrel, let’s get on the horses and chase.”

“What’s the point of chasing now? we definitely can’t catch up.”

“Even if we can’t catch up, we still have to keep an eye on them.”

“That’s right, just keep an eye on them.”

zhang shan’s group of five was running in front, and there were about three to four hundred members of the domineering aura guild chasing behind.

Zhang Shan was also worried that there might be a large group of people following behind.

He didn’t even care about these three or four hundred people. He could defeat them all in minutes.

However, it was obviously not possible now. It was better to take things slow and return to his own altar to guard it.

feng yun realm had already urged them several times, afraid that they would die outside.

One had to know that among the five of them, three of them had ultimate skills.

In addition, there was Zhang Shan, the invincible goalkeeper.

if they all fell outside the altar, then it would be nonsense.

That would seriously affect their subsequent defensive strength.

Chapter 342-counterattack, then run

After Zhang Shan broke out of the encirclement of the domineering air guild members, he quickly took out his positioning ball.

He removed the two coordinates he had set at the auction house in Dangyang city and the one outside the gates of heaven's Gate.

These two coordinates could be set again at any time after the kingdom war.

Only the coordinates of the beast King Valley were kept.

With that, there were two empty spots, and two more spots could be designated.

He marked his current location and then put away the positioning ball.

Zhang Shan planned to mark a location on each end of the country war map.

This place wasn't too far away from the sacrificial altar of the state of Qin.

Although they couldn't see the altar of the state of Qin from here, it would only take a few minutes to get there on a horse.

As for the other location, he planned to mark it near the godly beast statue of Chu State.

If that was the case, when the defensive battle reached a stalemate, the players would be forced to retreat.

He would use the positioning ball to teleport out and harvest a wave of heads.

If he was surrounded by too many people, he could use the positioning ball to teleport back to his home, near the statue of the country protector beast.

zhang shan had even thought of the script. it was perfect.

Zhang Shan's group of five was running in front. The remaining 300 to 400 members of the domineering aura Guild were still unwilling to give up. They quickly chased after them.

what the f * ck? there are only three to four hundred people left, and they still dare to give chase? are they looking for death? why don't we just kill this group of people before leaving? "

Windcloud blade said indignantly.

When they couldn't win, it was fine to be chased around. But they could win.

However, he still had to run away, which was very unpleasant.

I'm just afraid that the domineering King has already made his move. Otherwise, these people wouldn't have the guts to keep staring at us like this.

Heart with me said worriedly.

"so what if the tyrant king has made his move? his main target is the divine beast statue of chu. he doesn't have the time to deal with us."

brother Yidao is right. Unless we're in his way, he won't be able to deal with us. After all, he has tens of millions of people with him. It's hard for a ship to turn around. If he turns around and attacks us, his entire team will be in chaos.

"Then what do you say? sweep the tail behind?"

Hearing that Zhang Shan agreed with his point of view, wind and cloud blade was a little excited.

He held the divine weapon battleaxe and looked a little eager to try.

find an opportunity to kill them again. We'll slow down and let them catch up.

Zhang Shan was also very unhappy with the tail following behind. He did not want to give these domineering guild members a bit of power.

They probably didn't know how many eyes the horse King had.

Did he really think that Zhang Shan was so easy to get along with?

As the five of them slowed down, the members of domineering aura immediately caught up.

It was not that they wanted to continue fighting with Zhang Shan. They also knew that the thousands of people just now did not do much to Zhang Shan and his team of five.

Now that there were only three to four hundred people left, it was even more impossible to defeat them.

Even though the players from domineering aura knew that they could not win, they did not slow down their speed.

This was a habitual operation. After all, he was chasing someone, so of course, he had to chase as fast as he could.

Zhang Shan's five-man team suddenly slowed down, causing the people from the domineering aura Guild to not be able to react in time.

The two sides soon collided.

Zhang Shan quickly got off his horse and opened fire. The bullets swept out.

The other four also got off their horses at the same time.

windcloud blade's charge cut one, and then he continued to chase.

Of course, he was destined to not be able to catch up to his second target. The players from the domineering aura Guild were not that stupid.

After all, those people were all riding horses. It was impossible for Feng Yun to hit a second target when he got off the horse to attack people.

heart with me was even more depressed. after he got off his horse, he rushed forward with the flying snow sword in hand.

In the end, when the players from the domineering aura Guild saw him charging at them, they immediately turned around and ran.

Heart follows my movements was a Spellblade, so he could still fight with people. After all, he had many powerful skills.

However, he couldn't chase after them. He didn't have any skills to keep them alive, so he didn't kill a single person.

Fortunately, this Big Shot didn't really like to pk. Otherwise, he would be depressed to death.

only zhang shan and the little fairy, because of their long attack range.

After the two of them suddenly dismounted, they quickly launched an attack on the players from domineering aura.

although these people also wanted to turn around and run, they were caught off guard.

However, the two of them attacked quickly and boss Wu had also knocked down a few players. In one wave of counterattacks, they had knocked down dozens of players from the domineering aura.

Zhang Shan did not chase after the members of the domineering aura Guild who had turned around and ran away.

...

It was fine as long as the tail retreated, there was no need to chase.

After finishing their work, the five of them continued to run in the direction of the sacrificial altar in Chu State.

as for the remaining members of domineering aura, they were depressed.

More than a thousand people had come to besiege Zhang Shan's group of five, and in the end, eight to nine hundred of them had been defeated.

Now, they didn't even dare to chase after him. It was simply unreasonable.

However, what could he do if he couldn't win?

forget it, let's go back and meet up with boss. There's no point in chasing anymore.

let's go back. Six tube Bodhisattva is too disgusting.

don't worry, it's useless no matter how strong he is. When tens of millions of us attack him together, he'll be instantly beaten to a pulp if he dares to show his face.

however, there are still quite a number of Chu players left. Furthermore, they are on the defensive, so they can gain a slight advantage.

"Someone has calculated that the number of players left in Chu is much less than ours. I estimate that there are less than eight million people at their altar. They can't stop them."

...

I hope so. We can't lose a Kingdom war.

"Don't worry, even if we can't destroy the divine beast statues of Chu, we will definitely not lose."

"That's right. We can fight as we please. How can we lose? besides the ten million people that boss brought to attack the other side's divine beast statue, we still have nearly two million people left at the altar."

"with such a huge advantage, if he can still lose, then he might as well just delete his account."

Zhang Shan did not know that the Qin players had already become so confident. He also did not know that the number of surviving players in Chu was almost four million less than the Qin players.

They ran for about ten minutes before they reached the altar of Chu State.

Zhang Shan looked around. There were people everywhere, a sea of people. There was a huge platform not far away.

That should be the sacrificial altar of Chu State. There was a small statue standing in the middle of the platform.

It should be the Chu state's protector beast, Bai Ze.

However, due to the distance, Zhang Shan could not even see what Bai Ze looked like.

the players from chu country surrounded the entire altar.

Zhang Shan and the rest did not even know how to squeeze in.

He couldn't let the five of them stand at the outermost perimeter as cannon fodder.

Although there had to be someone standing in front as cannon fodder, it couldn't be just the five of them.

With their strength, wouldn't it be a joke if they were to be knocked down by the Qin players with just one wave of attacks?

Chapter 343 entering a defensive position

when the five of them arrived near the altar of chu state, they could no longer squeeze in.

How were they going to defend? if they didn't think of a way to squeeze in.

When the domineering King brought the players from the state of Qin to attack, they would probably be the cannon fodder.

"Hey, brother, move aside, let us in for a moment."

Windcloud blade kept shouting.

However, no one paid him any attention.

The mentality of most players was that the heavens were the boss, and they were the second boss. If there was no benefit, they would not give face to anyone.

Windcloud blade shouted for a long time, but no one made way for him.

“F * ck, what do we do now?”

Everyone was depressed. No one made way for them and they couldn't squeeze in.

It was not like he could kill his own people in a Kingdom war. Otherwise, Zhang Shan would have killed his way in.

let's ask the boss and see if he has any way to get us to the altar. It's too dangerous to stay here.

Zhang Shan said to wind cloud blade.

“alright, i'll ask.”

They really had no other way but they hoped that Feng Yun realm could think of a way to get them in.

a short while later, wind and cloud blade said happily.

haha, follow me. Boss really has foresight to leave a path for us in advance.

that's good. I'm afraid that I'll be left here as cannon fodder. Why don't we go to other places? ”

a little fairy also heaved a sigh of relief. no one wanted to stay in the outer area. there was no reason to let them be cannon fodder.

under the guidance of wind cloud blade, they quickly found a passageway.

It turned out that after Feng Yun realm entered the World War map, he quickly arrived near the altar.

they first occupied the defensive position on the path leading to the divine beast statue.

Later on, more and more people from the state of Chu rushed over, gradually blocking the entire altar.

Feng Yun realm immediately thought of a way out.

otherwise, when the other guild members arrived, they wouldn't be able to squeeze in.

At the thought of this, Feng Yun realm arranged for his men to occupy a narrow area.

It extended from the divine beast statue all the way to the periphery.

This way, if there were people like Zhang Shan who arrived late, they could pass through the area occupied by their own people.

They directly went to the platform where the statue of the divine beast was located, which was beneficial to the players and allowed them to display their defensive strength.

This Feng Yun realm was still something. He had already considered these things in advance.

that was close. We were almost thrown out as cannon fodder.

One of the little demons said.

They had finally passed through the path Feng Yun realm had created and arrived at the platform in the middle of the altar.

The entire platform was very large, but it didn't seem crowded, except for the people from the three major guilds.

there were also a small number of chu country's casual players who were also defending here.

Because Feng Yun realm and the others had blocked the passage to the platform in advance.

However, not all the players of Chu State had come here.

Therefore, the platform in the middle of the altar did not seem crowded.

Feng Yun realm must have also considered that the more people there were, the easier it was to defend.

Everyone was squeezed together, and there was no room for them to move.

He could only take it head-on and couldn't even Dodge.

If Subjugator were to use a scroll or a powerful skill, they would be useless no matter how many of them there were.

The more people there were, the faster they would die.

Feng Yun realm and the others did not bother about the densely packed Chu players below the platform.

No one would listen to him if he said too much, so he didn't need to waste his breath.

he would have the chu players stay below the platform and wait for the domineering king to rush over.

These Chu players could still wear down the Qin players 'strength. After all, they had the numbers.

With so many people, they could easily kill millions of people.

As for the remaining players from the state of Qin, they would have to rely on these elite players who stood on the platform.

"Right now, how many people are left in our Chu country? how many are still alive in the country war map?"

Looking at the densely packed crowd below, Zhang Shan could not tell how many people there were.

In any case, it was a lot. As for how many there were, he didn't know where to start.

...

Thus, he curiously asked the others in the Guild channel.

there are about eight million people around the altar. As for the people scattered around the other places, I don't know how many there are.

Feng Yun realm replied.

“damn, there are as many as eight million people in this sea of people? That’s impossible, right?”

Zhang Shan did not quite believe it, even though there were as many people as there were rice near the altar.

but could such a small place really hold eight million people?

He remembered that when he was still studying, a few thousand people could fill half the field.

there are eight million people. Someone else has counted them.

how are we going to count them? are we going to count them one by one? ”

Zhang Shan expressed his confusion. He could not let the players take turns to count, and it was impossible for such a person to count one by one.

how did the others calculate the number of people?

...

the six-barreled boss is so stupid. He has so many ways.

What? not just a way? There were still many ways? She was bullying him for being uncultured.

“For example?”

Zhang Shan asked without shame.

” for example, the simplest method is to divide the area around the altar into countless areas of the same size, then count the number of people in one area, and then multiply it by the number of areas. then, wouldn’t you be able to estimate the approximate number of people? ”

ASIBA, he was indeed uncultured. This method was indeed feasible.

I heard that the tyrant king has already set off. How many of them are there? how long will it take for them to reach here? ”

In fact, these things were posted on the forum in real-time videos, but Zhang Shan was too lazy to look at the forum.

Hence, he decided to ask others in the Guild channel.

I heard that there are about ten million people. They’ll be here soon.

“they only have around ten million people left? They have about the same number of people as us. We’ll have a good fight.”

they have far more people than we do. Other than the tens of millions of people that tyrant king brought with him, there are still about two million people guarding the altar.

“F * ck, doesn’t that mean that they have four million more people than us? This is a little difficult.”

don't worry, we will definitely be able to defend it. Don't look at how many players from the state of Qin are there. They are basically just cannon fodder. It's good enough that they can beat us under the platform. As for destroying the divine beast statue, they are thinking too much.

Zhang Shan thought about it and agreed.

There was a huge difference in strength between those who had equipment and those without.

Even players with a few pieces of orange equipment would not be able to handle it.

He was also much stronger than those players who did not even have orange equipment. He could completely crush them.

What if the tyrannical King wanted to use his advantage in numbers to charge onto the platform and destroy the Chu country's Guardian beast statue? He was thinking too much.

Chapter 344 a great collision

the domineering king was leading an army of ten million soldiers towards the altar in chu. the video was made into a collection of videos by the operator and uploaded to the game forum.

The scene was spectacular. In the past, they had always talked about the New World. This game was very popular, and there were more than 200 million players.

however, everyone only knew a number. no one knew if it was accurate.

However, this country war made everyone understand that there were many players in the game.

After the initial chaotic period, many of the Qin players were knocked to the ground and left the World War map.

Even so, Subjugator was still able to gather tens of millions of players.

One could imagine how many players there were.

Under the lead of the domineering King, over ten million Qin players slowly ran towards the altar of Chu.

Among these players, some of them ran fast, some of them ran slowly, and more than half of them had not even reached level 30.

These people naturally did not have mounts, so they could only follow behind.

In order to control his speed, the tyrant king had to put in a lot of effort.

He didn't want to imagine that these people would form a long snake formation when they reached the sacrificial altar in Chu.

In that case, it would be easy for the players of Chu to defeat them one by one.

Tyrant King's idea was simple. He wanted to rely on his numbers and crush them in one wave.

As for running a little slower, that was fine.

In any case, the entire Kingdom war could last for four hours at most. It had not even been half an hour yet, and there was still plenty of time. He was not in a hurry at all.

Just like that, the tens of millions of Qin players in the video flooded towards the altar in Chu.

On the way, they would occasionally meet some players from Chu State, perhaps because they had entered the World War map too late.

They could also be hunting, but once they encountered them, they would be quickly drowned in the torrent.

The Qin players were unstoppable, even before the war started.

It was a feast for everyone's eyes and really broadened their horizons.

In reality, no one had ever seen tens of millions of people crushing their way through.

As for the game, this was the first time such a scene had appeared.

Before the emergence of the New World, almost no game could have tens of millions of players online at the same time.

not to mention, no one had ever seen a flood of tens of millions of people.

Even in the New World, although all sorts of Wars had broken out many times, the number of people who had participated in the war was at most in the millions.

It was the first time that a country war had tens of millions of people on one side. The scene was really too exaggerated.

As the domineering King brought his Army and rolled over, Zhang Shan was sizing up the statue of the mythical beast on the platform.

the chu state's protector beast was actually bai ze, a little white dog.

Was this also a divine beast?

However, it was indeed quite cute. The only pity was that it was just a statue.

it wasn't alive, so it couldn't move.

Can't move?

zhang shan suddenly recalled that the divine beast statue could not move. it meant that it could not only be like a wooden stake, passively taking a beating.

No wonder it needed the players to protect it.

He just didn't know what the attributes of this divine beast statue were like.

However, there should be some other skills, such as damage reduction and so on. The attributes of the divine beast statue couldn't just be a single health point, right?

Zhang Shan tried a few times, but he could not see the baize statue's attributes.

It seemed that this statue was the same as the other bosses, because its level was higher than the player's.

Therefore, he had to attack it before he could check its attributes.

As the statue of his own country's Guardian beast, Zhang Shan was naturally unable to attack it.

While Zhang Shan was still pondering over the baize statue, he suddenly heard wind cloud blade shout.

"The Qin players are here."

Zhang Shan looked into the distance and saw a large black Mass in the distance, like a tide, slowly surging towards them.

As they were still a little far away, if not for the fact that they were in the country war map. He couldn't tell that they were players from Qin.

It was like a monster siege.

"How do we fight? Are we just going to wait on this platform and watch the domineering King kill all the Chu players?"

Someone asked in the Guild channel.

Up until now, Feng Yun realm had not planned out any battle tactics.

Perhaps he wasn't sure what to do. after all, this was the first world war in the game.

Everyone did not have much experience, so they could only slowly explore.

of course not. If the domineering King kills all the other players from Chu, what can the hundreds of thousands of people on our platform do? "

...

"that's right. as long as the qin players get close, we'll be ready to join the battle."

"Join my ass. There are so many Chu players blocking the way down there. How can you go down?"

In fact, what he said was true. It wasn't that they didn't want to go down the platform to help, but there were people everywhere.

They couldn't squeeze in.

Only when more people fell to the ground would they have a chance to rush down and fight.

However, by then, it would be a little too late.

"We don't need to go down. We'll just guard the divine beast statue on this platform and wait for them to attack."

Feng Yun realm said in the Guild channel after some consideration.

This was something that could not be helped. He could only let the others clash with the Qin players first.

Then, he would see what to do.

the qin players led by the domineering king quickly approached the altar.

...

Many of the Chu players who were guarding the periphery had already become impatient and went up to welcome him.

The two sides soon engaged in a fierce battle.

the qin players that were originally coming from one side were simply too many.

Only the people walking in front could attack the players from Chu, while the others could only follow behind and look at the back of their heads.

Although they had tens of millions of people, most of them could not interfere.

The players of Qin started to fight, and soon, there were battles around the altar.

When Zhang Shan and the rest started, they could only stand on the platform and watch.

However, he soon realized that he was about to live.

The domineering King obviously knew that if he wanted to destroy the statue, he had to rush up to the platform first.

He led the members of the domineering aura and charged towards the path leading to the platform.

The Chu players who were blocking the way fell to the ground one after another. After all, they were just ordinary players.

Against domineering Aura's powerful lineup, they really couldn't hold on.

The entire battlefield had become a battlefield on all sides, and the domineering King was leading his men directly to the middle.

"Holy F * ck, has the domineering King become arrogant again? He dares to rush over?"

Zhang Shan could not understand. He had thought that the domineering King would rely on his numbers.

He would first clear out the Chu country players on the platform. After that, he would concentrate his strength on attacking Zhang Shan and the others on the platform.

Who would have thought that he would be so headstrong, directly bringing people and rushing over to Zhang Shan's side.

That's good, I don't want to be bored.

Zhang Shanhe thought silently.

Chapter 345-scroll's ferocity

when the domineering king led his men directly to the platform they were guarding, they were stunned.

Zhang Shan was a little excited. Could he defeat the domineering King a few more times today?

He hoped that he had brought enough gold coins. Otherwise, he would not be able to revive with gold coins as the boss.

Instead, they could only resurrect in the city and leave the World War map. Wouldn't that be a joke?

Under Zhang Shan's anticipation, the domineering King led his men and charged forward. Very soon, they were close to Zhang Shan's shooting range.

Zhang Shan raised his hand cannon and equipped it. When the Subjugator got within his shooting range, he immediately shot and knocked him down.

Having defeated the domineering King so many times before, Zhang Shan realized that he was getting addicted to killing.

To think that they would actually aim for the tyrant king and kill him, wasn't that a little too much?

At this moment, the domineering King took out a scroll and used it in Zhang Shan's direction.

Countless bolts of lightning struck down, drowning Zhang Shan and the other Chu players nearby.

f * ck, did he have to be so ruthless? throwing scrolls at him again? the domineering king was too much.

What kind of hatred was so strong that he needed to use a scroll?

Zhang Shan, who was lying on the ground and waiting to be reborn, was cursing silently in his heart.

Even though it was only a matter of time before the tyrant king used the scroll, there was no need to use it on him.

this isn't directed at me.

Although Zhang Shan and the people around him had fallen to the ground in large numbers.

However, there were hundreds of thousands of people on the platform and on the way to the platform.

Just the members of the three great guilds alone numbered 200000.

Although the damage from the tyrant King's Scroll was high, it could only take down less than ten thousand players.

At most, it could only cause a small wave and couldn't shake the defense of the players in Chu.

However, after using one scroll, the tyrant king did not stop. Instead, he took out another.

He also used it on the platform, and another large number of people fell to the ground.

Just like that, in a few short seconds, the tyrant king had used five scrolls in succession.

They hadn't even officially started a battle with the members of the three major guilds of Chu. They had already used the power of the scrolls to rush up to the platform.

Zhang Shan realized that he was in for a tragedy, even though he still had the passive rebirth skill.

He didn't need any assistance to revive, and he could stand up in full condition.

However, he was now surrounded by Qin players. Subjugator had already led his men over his dead body and rushed to the platform.

right now, the place where zhang shan was lying down was surrounded by players from the state of qin.

If he stood up later, he would be beaten to a pulp.

Who knew how many tens of thousands of Qin players there were? how could he have the chance to live?

I shouldn't have stood so close to the front just now. I should have stood next to the baize statue.

In any case, the domineering King would fight his way there sooner or later.

It was too late to say anything now. He could only wait for his rebirth and be defeated again.

After that, they would lie on the ground and wait for Feng Yun realm and the rest to kick the players from the state of Qin out of the altar.

It was only at that time that it would be meaningful whether it was the support who resurrected him or the gold coins who resurrected him on the spot.

Otherwise, with all the players from the state of Qin around him, it would be useless no matter how he revived.

No matter how strong he was, he couldn't last more than three seconds.

Just as Zhang Shan was feeling depressed, he suddenly thought of something.

He also had the positioning bead, which could be used to teleport out the moment the rebirth skill was activated.

Before coming to the altar, Zhang Shan had already marked the location near the altar of the Qin country.

He could have teleported there.

Although he could not come back to defend the divine beast statue for the time being after he was teleported away, it was still a pity.

But there was no other way, right?

No matter what, it was better than lying on the ground.

Anyway, if he didn't teleport away, there was no point in him staying. He could only lie on the ground and watch.

Besides, he had already marked the coordinates near the baize statue.

As long as he waited outside for three minutes, he could teleport back and return to the whizard statue.

The battle on the platform was already in full swing.

However, it was still too early for them to attack the baize statue.

On the platform, there were still a lot of players from Chu State left. There were at least 300000 of them.

However, there were even more players in the kingdom of Qin. Subjugator had brought all 50000 of his guild members.

There were also other elite players from the state of Qin, more than 500000 of them.

...

The people in front rushed to the platform, but the people behind could not rush up due to the limited space.

“boss, are we going to use a big move?”

Wind cloud Cupid saw a large number of Qin players rushing up the platform and could not help but ask in the Guild channel.

no need. Save the big moves for now. We'll wait until we can't hold on any longer.

Feng Yun realm replied calmly.

He didn't seem to be in a hurry at all, even though there were many Qin players rushing over.

however, the platform was only so big, and there were still 300000 players in chu state, and they were basically all elite players.

even though subjugator had brought more people with him, they still couldn't charge at him all at once.

unless he took out five more scrolls and knocked out tens of thousands of chu country players.

Otherwise, Subjugator would not be able to take control of the platform.

If they couldn't occupy this platform, they couldn't attack the baize statue.

...

On the Chu country's side, the wind and cloud Guild still had five big moves and Feng Yun realm still had two scrolls.

In addition, he believed that the Dragon King of the East Sea and King Xiaoyao would also have some trump cards.

Therefore, he didn't panic at all and let domineering King do it.

At this moment, Zhang Shan was not in the mood to care about other things.

he only wanted to live now.

Zhang Shan silently calculated the time. After 10 seconds, the moment his passive rebirth was activated. He used the positioning ball to teleport away from the altar in Chu State and came to the altar near the altar in Qin State.

something flashed by just now. Did you guys see it? ”

The Qin players who were around Zhang Shan did not notice anything unusual, except for a few players.

As for the missing corpse on the ground, no one would care.

This was a war between nations, the kind where hundreds of thousands of people would fall in minutes. The entire ground was covered in corpses.

With Zhang Shan’s corpse missing, no one would notice.

After Zhang Shan was teleported away, he heaved a huge sigh of relief.

It was so f * cking scary, I almost didn’t get to play anymore.

At this moment, most of the players from the two countries who were still participating in the country war had gathered near the altar of Chu.

The other places, apart from the altar in the state of Qin, were still being guarded by a large number of players.

In the entire country war map, it was quiet everywhere, even if there were a few people who came late.

They would also run towards the altars on both sides.

After Zhang Shan was teleported over, he had to think about what he should do in the next three minutes.

The positioning ball had a cooldown time, and it would take another three minutes to teleport back.

He had to find something to do in these three minutes.

Chapter 346 Back and forth transportation

After Zhang Shan was teleported out, he had to think about where to go.

After all, there was a cooldown time of three minutes for the positioning.

as for where he would go?

In the entire country war map, there were only two directions.

One was the altar of Chu State, while the other was the altar of Qin State.

Of course, he couldn’t go to the sacrificial altar in Chu.

There were more than ten million people there, and they were in a chaotic battle. What could he do by himself?

There was another direction, which was to take a look at the altar in the state of Qin.

Zhang Shan ran over when he heard that the domineering King had left close to two million players to defend.

He probably couldn't do anything, but it shouldn't be a big problem to just ride a horse and take a look.

There was actually another direction.

That was to run around the map. Maybe he could catch a few fish that escaped the net and kill them.

However, Zhang Shan had already eliminated this option from the start.

There was no point in defeating a few fish that escaped the net.

He might as well go and take a look at the sacrificial altar in the state of Qin.

He might even have a chance to get close to the altar and see what the black Dragon statue in the state of Qin looked like.

Although there was a collection of videos on the forum that could be checked.

But watching a video was not as real as seeing it with his own eyes.

He put his thoughts into action immediately. Zhang Shan mounted the red Hare and began to run towards the altar of the Qin country.

in less than two minutes, he could see the altar of the state of qin in the distance.

however, he had yet to look at the black dragon statue in the middle of the altar.

Just as he was about to get a little closer to take a look, a group of Qin players rushed out.

haha, I was just regretting not following the domineering King to the sacrificial altar of Chu to kill people. I didn't expect someone to come knocking on my door.

"brothers, don't fight. the head is mine."

A group of Qin players swarmed over. There were not many of them, only a few hundred of them.

They had probably not seen Zhang Shan's character name yet.

Otherwise, if they dared to rush up with only a few hundred people, they would be courting death.

Since he had nothing to do, he might as well take care of these people first. Although, after these people fell to the ground, there would still be support coming over to resurrect them.

However, it was good to have some fun. The country war had started for so long, and Zhang Shan had not killed many people yet.

Facing the hundreds of Qin players, Zhang Shan did not turn around and run.

Instead, he continued to stay on his Red Hare.

haha, is this person an idiot? he actually didn't run.

“It’s too late for him to run now.”

f * cking get out of the way! Watch my head-harvesting skill!

a group of qin warriors, just as they were about to reach zhang shan, quickly dismounted and used the forward charge skill.

It charged straight at Zhang Shan.

and at this moment, zhang shan was no longer pretending.

He quickly got off his horse, picked up his hand cannon, and fired.

Zhang Shan had not activated any skills.

He didn’t need to go all out to deal with these people.

Most of the players who were left behind by the domineering King to defend were players with trash equipment.

Among these people, even if they were of the warrior profession, they would not be able to withstand the damage from Zhang Shan’s spear.

Was there a need to go all out?

It’s easy.

As Zhang Shan’s bullets continued to fire.

One shot was enough to knock down twelve people, and in a short while, they had knocked out hundreds of people.

“f * ck, why is it six tube bodhisattva? why did he come here?”

who knows? what the hell? shouldn’t he be guarding the altar in Chu State? ”

“Why are you thinking so much? run!”

why did he run away? let’s hold him back and call for help from the people at the altar. We’ll kill six-barreled Bodhisattva here and let him have his way.

Zhang Shan continued to attack. At the same time, he looked at the Qin altar in the distance. There were a large number of Qin players running over.

F * ck, shaking people when he couldn’t beat them, that was too much.

...

They were very close to the Qin altar.

The other party’s reinforcements came over on horses in less than half a minute.

forget it, i’ve had enough fun. i’m going back.

Zhang Shan took a look. The cooling time of the positioning ball was over.

Taking advantage of the fact that their support hadn't arrived yet, they would fight another wave and leave.

Zhang Shan kept on firing. When he saw thousands of Qin players about to reach him ...

He quickly used the positioning ball and teleported back to the vicinity of the baize statue.

He hoped that the tyrant king would not be too fierce. If he were to teleport over and find the tyrant king with a group of people surrounding the baize statue, he would be in deep trouble.

When Zhang Shan landed, he looked at the situation around him and could not help but sigh in relief.

Fortunately, the domineering King didn't attack. Not only did they not attack the baize statue, but they also didn't attack it.

Feng Yun realm had even brought his men and almost pushed them off the platform.

...

Was this a reversal? What happened in the three minutes he was gone?

He had just been teleported away, so Zhang Shan did not know what had happened here.

However, now was not the time to ask about this.

Let's beat back the domineering King first.

Zhang Shan quickly moved forward and came to the edge of the platform. This was the passage from the outside to the platform.

It was not far from where Zhang Shan had fallen.

The Qin players led by the domineering King were about to be kicked off the platform.

However, they firmly guarded the passage.

He had used five scrolls to open this passage, so there was no way the tyrant king would give up.

if the passageway was taken back by the players of chu state, they would have to pay a huge price to attack again.

After a Chu player fell to the ground, Zhang Shan quickly moved forward to fill in the gap.

At the same time, they opened fire and bullets swept out, instantly knocking down a large number of Qin players.

Due to Zhang Shan's participation, the players from the Qin country quickly felt that it was very difficult.

Even though Zhang Shan alone did not seem to be of much use in such a big scene.

However, there was limited space for him to do so in the passageway that led to the platform.

Zhang Shan would not have had the chance to come up if it was not for the fact that a Chu player had fallen to the ground.

He could only stand at the back and watch.

The passage was wide enough to allow hundreds of people to pass through side by side.

But that also depended on how many people it was to.

For millions of people, the passage for hundreds of people to pass side by side was too narrow.

A random group of people squeezed in and blocked the passage.

Therefore, although both sides had invested more than a million players on the platform of the divine beast statue, it was not a big deal.

However, at this time, there were less than a thousand people who could deal damage at the same time.

The others could only watch from behind, waiting for the person in front to fall to the ground, and then quickly fill in the position.

With the addition of Zhang Shan, even though he was only occupying one attacking position.

However, the damage he dealt was more than what dozens of people could do at the same time.

Each shot bounced off 12 times in a row, knocking down a large number of people with each shot.

Furthermore, when he went all out, his attack speed was super fast, and he could fire more than four shots per second.

The amount of damage was terrifying.

Chapter 347 stalemate

With the addition of Zhang Shan, the number of Qin players who fell to the ground began to increase greatly.

After they fell, they were either immediately resurrected or quickly replaced.

In reality, both sides were still in a stalemate. Although the Qin players could not attack, they did not retreat.

Zhang Shan looked around. If both sides did not have any backup plans, they would continue to attack like this.

It was possible that even if the country war ended, there wouldn't be any results.

And this was only the battle for the platform where the baize statue was.

Below the platform, the players from both countries were still engaged in a fierce battle.

Although there were more players in the state of Qin.

However, they only had less than two million more people than Chu, so their advantage wasn't that great.

Moreover, most of the elite players in the state of Qin had been selected by the domineering King.

Using it to attack the platform in the center, he probably wanted to get there in one go and directly blow up the divine beast statue.

therefore, about 8 million players from chu state would fight against nearly 10 million players from qin state.

The two sides surrounded the altar and fought back and forth.

the number of people falling to the ground also rose sharply.

However, there were still many people on both sides. After a few minutes of fighting, there were still a large number of people fighting.

zhang shan could not estimate how many people were left.

However, most of them were still alive and the battle was still going on.

As for the place where he was fighting, Zhang Shan did not need to use his skills anyway.

He didn't need to take the initiative to cast a skill.

Therefore, he just had to keep shooting. It was almost the same as when he was killing monsters, mindlessly killing. However, this time, he was not killing monsters, but killing.

The players from the state of Qin would also occasionally deal damage to him.

However, Zhang Shan did not care about these injuries at all.

To be honest, if it wasn't for the damage from scrolls and ultimate skills, other skills wouldn't be able to do anything to him.

Zhang Shan's damage was terrifying, and his equipment had a life-steal effect.

Their ability to sustain their lives was ridiculously strong.

he didn't even need the support to heal him.

As Zhang Shan fired his gun mechanically, he asked on the Guild channel.

"Are they still alive?"

wuwuwu, I'm dead. I'm still lying on the ground, surrounded by players from the state of Qin. I don't dare to get up.

come on, six-barreled Big Boss. Chase the domineering King down.

"no, didn't six-barreled boss just fall beside me? Why are you gone now? did you go back and resurrect?"

"What are you thinking about? didn't you watch the video? What kind of skill was the six-barrel boss? it's so f * cking cool, one shot dealing damage and bouncing everywhere, twelve times in a row, it's simply exaggerated."

“I saw it too. Is this a Hunter’s skill? Why don’t I have one?”

“can you compare to the six-barreled boss? Isn’t it normal to not have one?”

alright, I’m just curious what kind of skill it is. Why is it like a piece of pop music? it’s so fierce and cute.

I don’t know. Big Boss six-barreled can explain it to everyone.

“Launch skill, a skill book dropped by a monster.”

After Zhang Shan finished speaking, he displayed the ejection skill in the Guild channel.

Holy F * ck, jealousy is driving me crazy. Why can’t I get such a cool skill? it’s actually dropped by a small monster.

by the way, how did you guys defeat the domineering King? I wasn’t here just now. I was teleported away.

f * ck, no wonder I didn’t see you lying on the ground. Didn’t we agree to die together? you actually teleported away secretly.

how else can we fight? we can only rely on big moves. In that situation just now, if we didn’t have big moves, we might not have been able to hold on.

“F * ck, are the players from the state of Qin that strong?”

“They’re indeed quite fierce, but now that they’ve been beaten back, they can’t be fierce anymore.”

” it’s still too early to say that. who knows if subjugator still has a few more scrolls in his hands? ”

don’t even think about it. He must still have more scrolls. Otherwise, why would the domineering King still be here? he should have gone back to set up his defense.

you’re right. The domineering King can still show his power. Everyone, be careful of him.

how can I be careful? everything else is fine. With the damage of a scroll, I can’t do anything except pray that it doesn’t hit me.

yeah, the scroll’s damage is too high, and the player’s HP is too low. If the player’s HP could be increased by a few times, it would be great if they could withstand the damage of the scroll and the ultimate skill.

you can’t think like that. If a player’s HP can withstand a big move, then wouldn’t my big move be useless? ”

It was unknown if a little demon had fallen to the ground. The entire battlefield was in chaos. There were people everywhere, but Zhang Shan had not seen her.

however, when she heard that the players ‘hp would be increased to the point that they could withstand the damage from the big moves, she was shocked.

...

The little demon was not happy. She had only gotten her ultimate move two days ago and had only used it once.

How could she increase a player's HP? where was she going to place her ultimate?

"hahaha, you people who don't have any big moves, just dream on. You want to increase the HP of the players? don't tell me that our attacks won't increase as well? You're just jealous."

Wind cloud blade chimed in.

For people like them who had ultimate skills, they naturally hoped that their ultimate skills were as powerful as possible. It would be best if they could always insta-kill anyone.

He knew that it was impossible. In the later stages of the game, there would always be some players who would become stronger in a certain aspect.

For example, the Guardian's HP would increase to the point where it could block some of the damage from the ultimate.

"Are we just going to waste our time like this? Don't you want to think of a way to take down the Qin players?"

Zhang Shan's hand cannon never stopped firing.

Each shot could knock down more than seven or eight people, and if they were lucky, they could even knock down twelve people.

The players from the state of Qin who were at the top were the true elite players.

...

He cut them like leeks.

But even so, they still had no way to kick the players from the state of Qin off the platform.

The two sides continued to be in a stalemate for quite some time.

let's not rush. Let's wait for the Subjugator to use another wave of scrolls before we launch our counterattack.

Feng Yun realm said calmly.

His meaning was clear. If the domineering King was willing to waste time, then they would all waste time.

Even if he had to wait until the country war ended.

In any case, they could accept a draw.

They wouldn't make the first move, so they would let the domineering King do it.

If they didn't force out the scroll, they wouldn't be at ease.

Zhang Shan suddenly remembered that the tyrant king should have more scrolls. He had to be careful.

Don't let his scrolls hit you again.

Otherwise, he wouldn't have the passive ability to resurrect anymore.

If he fell to the ground again, he could either choose to revive on the spot or wait for the support to revive him.

No matter what it was, it would be too passive. The feeling of not being in control of the outcome was very bad.

Chapter 348 Bladder Bureau

If it was like before, where the players were all from the state of Qin, then there would be nothing to do.

It was better to be more careful. When he saw Subjugator use the scroll, he immediately teleported away.

Besides, he didn't need to teleport to the altar in the state of Qin. He just needed to teleport to the side of the Baize statue.

Zhang Shan could not help but look at the domineering King.

This time, Subjugator did not charge forward. Instead, he hid among the Qin players and commanded them.

Even though Subjugator's equipment and skills were definitely the best among the players.

In addition, he was a Berserker. He was indeed an expert in charging.

However, he was also a big target. If the domineering King dared to show his face, he would probably attract the firepower of all the frontline troops of Chu State.

If Zhang Shan could defeat the domineering king, he would definitely not be polite to him.

He didn't care about anything else, he had to defeat the domineering king first.

Tyrant King had also considered these factors, so he didn't rush to the front.

Moreover, in such a Grand scene, one person's strength wouldn't have much of an effect.

Not to mention the domineering King, even an existence like Zhang Shan could not change the outcome of the battle.

If the tyrant king wanted to control the battle, he had to rely on his control and scrolls, not the axe in his hand.

As Zhang Shan continued to fire his guns, he did not pay attention to the movements of the domineering King.

Even though the tyrant king was hiding among the Qin players, and Zhang Shan could not hit him.

However, they could still be seen clearly. After all, they were standing on the platform.

As for the domineering King, he was standing on the passageway leading to the platform below. Zhang Shan was looking down from above.

As long as the domineering King made any small movements, he would be able to see it clearly.

While the players of Chu were still calmly defending, the players of Qin were already very anxious.

as the attacking side, they had been attacking with all their might, but they had not made any progress.

The only progress he had made was at the beginning when he had to rely on the Five Scrolls from Subjugator to clear the path.

Only then did they attack the platform where the baize statue was.

However, after they attacked the platform, they couldn't even touch the baize statue.

He was hit back by the wind and cloud Guild's big move.

They were still in a stalemate.

Although the country war would last for a long time, it could last until 12 o'clock in the evening.

Logically speaking, they still had plenty of time and should not be in such a hurry.

However, the longer they dragged on, the more their advantage was slowly worn down.

In the beginning, they could rely on their advantage in numbers to suppress the players of Chu.

At least, that was what the players in the state of Qin thought.

Who would have thought that after fighting for so long, their advantage in numbers had not been shown.

below the platform, more than ten million players from both countries were still locked in a fierce battle.

It would be difficult to determine the victor in a short time.

Even if the players from Qin country were to kill all the players from Chu country, they would still be able to do so.

He estimated that there were not many people left on his side.

the most important thing was that they, the elite main force, had not made any progress after fighting for so long.

This was completely unacceptable to the players of the state of Qin.

boss, we have to think of something. We can't keep dragging this on.

Someone said to the domineering King.

that's right. We'll be at a disadvantage if this continues.

"If you have any trump cards, just use them. There's no need to hide them now."

that's right. If we can win, we'll fight. If we really can't win, we'll go back early to set up the defense.

“That’s right, we should just attack them. If we can’t win, we can just go back and defend. In any case, if we can’t take down their divine beast statues, the people of Chu can forget about taking down our divine beast statues.”

that’s right. Why don’t we call it a draw? it’s not unacceptable to end it in a draw. At least there won’t be any punishment.

“what are you guys shouting for? how can this be a draw? we have to destroy the divine beast statue of chu.”

we also want to destroy the divine beast statue. We have double experience for a week, and a divine weapon will drop from the heart of the divine beast statue. But we have to be able to do it.

don’t make a fuss. Listen to the boss. He will have arrangements.

A large group of players from the state of Qin was having a heated discussion on the National channel.

Even though the control of the players from the state of Qin was extremely good.

At least, people would usually listen to what he said.

It was unlike Chu country where Feng Yun realm would not say anything on the National channel.

...

Because his words were useless, no one would listen to him. It was useless to say anything, so he might as well not say anything.

However, Subjugator was different. He was always recruiting people on the National channel.

Whenever there was a conflict, he could pull out a large group of people to follow.

However, there was a limit to such things.

his summoning power in the hearts of the qin players had dropped by a lot.

this world war had been going on for a long time without any progress, so many of the players in the state of qin were quite angry at the tyrant king.

Who would be willing to follow a boss who failed every day?

When Subjugator saw how agitated the players from the kingdom of Qin were, he knew that he could not delay any longer.

If this dragged on, the hearts of the people would be scattered.

If they couldn’t gather the players of Qin together, they wouldn’t be able to destroy the statue of the mythical beast in Chu.

It was already very good that they could guard their own divine beast statues.

...

One spurt of energy, then waning, and finally exhausted.

Of course, the domineering King knew this, but he always felt that the time was not right.

He only had five scrolls left, and he wanted to wait for the Chu players on the platform to use some more.

He would wait until the Chu players on the platform were almost exhausted before using the scroll.

It was settled in one go.

As for their own consumption, the tyrant king didn't really care.

Anyway, they had a lot of people, and the Qin players could afford to consume them.

The only thing he didn't think of was the human heart.

The Qin players had more people and could afford the consumption.

However, the Qin players' hearts could not afford to be consumed.

In the hearts of most of the Qin players, they just wanted to play a wave of crushing games.

It would not be like now, where it was a bladder battle.

They did not want to waste any more time.

The tyrant king had no choice. He had to follow the will of the people.

To win the World War, they had to rely on all the players from the kingdom of Qin and not on their domineering aura.

With just the 50000 players in domineering aura, there was no way they could win the World War. Even if they were to encounter the wind and cloud Guild, they would still be tortured.

After all, the top players in wind and cloud Guild were much stronger than domineering aura.

Moreover, now that the wind and cloud Guild had risen to Level 4, they were completely crushed.

If he wanted to rely on everyone to win the country war, then the domineering King had to go along with everyone's mentality.

going against the tide would mean being abandoned.

Chapter 349 I can't kill you

Seeing the state of Qin players' restless minds, even the domineering King could do nothing about it.

We can't drag this on any longer, we have to be brutal.

"I'll use the scroll later. Everyone, let's rush in together. Don't care about the statue of the divine beast for now. Kill all the Chu players under the platform first. Pay attention to their in-place resurrection."

Subjugator said in the Guild channel.

He didn't say it directly on the National channel, as he felt that the country of Qin's national channel was too chaotic.

There were all kinds of people, and he was a little worried.

In any case, the main force of the first assault was the members of the domineering aura Guild.

The other Qin players would naturally follow suit.

After saying that, the domineering King took out a scroll and glanced at Zhang Shan.

He was feeling a little strange now. Wasn't Zhang Shan knocked down by his scroll just now?

How did he end up on the platform again?

The domineering King was very confused, but he thought, 'you dodged it once.

I'll let you try again. Let's see how you're going to dodge this time.

Zhang Shan, who was holding his handcannon and firing non-stop, saw Subjugator take out another scroll.

And she even looked at him.

Zhang Shan could not help but be shocked.

'F * ck, this guy isn't going to cast another scroll on me, is he? this is too much!'

If he had the chance later, he would definitely beat the domineering King a few hundred times.

Zhang Shan thought to himself indignantly, while using the positioning ball without hesitation.

He teleported himself to the side of the baize statue.

The moment Zhang Shan was teleported away, the damage from the tyrant King's Scroll came crashing down.

A large area of the place where Zhang Shan was originally at was cleared.

The Qin players, who were in a stalemate, took the opportunity to rush up to the platform.

"Don't panic, beat them down."

The Chu players on the platform shouted.

after a large number of players were knocked down by a scroll from the domineering king, the players from the kingdom of qin rushed forward.

However, there were still many Chu State players left on the platform.

The others continued to rush forward, blocking the Qin players 'charge.

Before the two sides entered a stalemate, Subjugator used another scroll to deal damage.

The Qin players took the opportunity to charge forward again, and the domineering King came one after another, as if the scrolls were free.

Once again, he used five scrolls in a row, completely disrupting the front line of defense of the Chu players.

A large number of Qin players took the chance to rush onto the platform.

almost in an instant, the number of players from the state of qin on the platform was even more than the number of players from the state of chu.

There were also Qin players below the stage who were charging up.

Relatively speaking, they didn't have much extra support for the Chu players on the platform.

Because in the battle royale below the platform, the players of Chu State were the weaker party.

It would be good enough if they could hold the Qin players back.

He couldn't count on these people to rush up to the platform to help.

Moreover, there were only a few elite players in a country.

Even if the others rushed up, they would be useless if they were not strong enough.

After Zhang Shan was teleported to the side of the baize statue, he did not go forward to stop the Qin players at first.

He did not know how many scrolls the domineering King had. It would be troublesome if there were more.

zhang shan did not want to take the damage from the scroll.

it was only when the subjugator used five scrolls in a row that a large number of qin players rushed forward.

Zhang Shan carefully observed for a while. This guy, the domineering King, should be out of stock.

Was he planning to just go all out? This was a little too much.

Although the wind and cloud Guild had used four of their big moves in order to drive the referee of Qin off the platform, they had not used any of them.

However, they still had a big move that they had not used.

A little fairy's ultimate move had not been used in the world War.

This was because she could not use it directly. She had to borrow a magic bead from wind and cloud blade.

Otherwise, her maximum mana wouldn't even be enough to cast a big move.

Wind and cloud blade had already used his ultimate skill, so the magic bead was temporarily useless to him.

...

He had already borrowed the little demon.

Other than the little fairy's ultimate skill, the players of Chu had not used a single scroll.

Zhang Shan did not believe that the bosses of the three major guilds had not managed to buy a single scroll.

That was almost impossible.

Zhang Shan did not understand freedom King, but Feng Yun realm and the Dragon King of the East Sea were both people who did not lack money.

There was no reason for him to be reluctant to spend money at such a critical time.

They definitely had scrolls in their hands, but they had to wait for the right time to use them.

After Subjugator used the Five Scrolls, the players from the kingdom of Qin charged forward as if they were on steroids.

The two sides fought desperately on the platform, and most of them chose to revive on the spot after falling.

Very few people would lie on the ground and wait for the support to come and save them.

This was because everyone knew that this wave was crucial.

...

If they won, they might have won half of the country war. If they lost, they might not even have the country war anymore.

How could there be a support to save him?

so after falling to the ground, don't think about anything else, quickly choose to revive on the spot and continue to join the battle.

If there were too many resurrections and people really didn't have the money to resurrect on the spot, then there was no other way.

they could only lie on the ground and pray that their side would win.

After Zhang Shan saw that Subjugator had used five scrolls in a row, he did not use any more scrolls.

Instead, they charged forward like the other Qin players.

Haha, you've used up all your scrolls, right? next, it's my turn to show my might.

Without the threat of the scroll, the Qin players did not have any ultimate skills.

Zhang Shan was not afraid of anything now. In such a chaotic battle, he was almost undying.

The two sides at the front were in a chaotic battle as they pounced forward.

Zhang Shan rushed forward from the side of the baize statue.

He purposely looked for the position of the domineering King and ran in his direction.

i told you to cast a scroll on me, see if i can't kill you.

once he was within firing range, zhang shan quickly opened fire, his gun pointed straight at subjugator.

The bullet shot out at high speed. Before the tyrant king could even understand what was going on, a bullet shot out.

He had already fallen to the ground, but in such a chaotic situation, falling to the ground was very normal.

After falling to the ground, Subjugator didn't seem to care. He didn't wait for the support to resurrect him. Instead, he chose to resurrect on the spot.

This was the most crucial moment, and time was of the essence. Subjugator had no intention of lying on the ground and wasting his time.

However, the moment he stood up, he fell to the ground again.

zhang shan had his eyes on him for a long time. as long as the domineering king dared to stand up, he would turn his gun on him.

They didn't fight anyone, but only domineering King.

A domineering King without scrolls, in front of Zhang Shan, was not much better than a normal player?

It was just a matter of two more shots. With Zhang Shan's attack speed, it would not take much time.

After being knocked out twice in a row, the overbearing King was a little dumbfounded.

Chapter 350 beat him until he can't stand up

The overbearing King, who had fallen to the ground twice in a row, was a little dumbfounded.

Although the current situation was very chaotic, and falling to the ground was a normal thing.

However, why did he fall to the ground again as soon as he stood up?

thinking up to this point, subjugator did not choose to revive on the spot.

Instead, he first checked the battle log.

It didn't matter if he didn't look, but he was shocked when he saw it.

It turned out that the two times he had fallen to the ground had been because of Zhang Shan.

f * ck, is this six tube bodhisattva targeting me?

Baqi was extremely angry. This damned six-barreled Bodhisattva. Didn't he release a scroll at six-barreled Bodhisattva a few times?

why isn't this guy dead yet?

The tyrant king, who was lying on the ground, didn't dare to get up again. The entire platform was in chaos.

Zhang Shan's shooting range was far, and there were people everywhere. Even the domineering King could not see where Zhang Shan was.

He didn't dare to choose to resurrect on the spot again. If he got up and was knocked down again, it would be too much of a loss.

Resurrecting on the spot was not cheap, and the key was that the number of times one could resurrect on the spot was very precious.

The fifth resurrection required 10 million gold coins, and the sixth required 100 million.

No matter how rich a player was, they probably wouldn't revive six times on the spot during the World War.

With this amount of money, he could buy an ultimate skill book.

Who would be so extravagant? after all, no one's money came from the wind. How could they be so wasteful?

Zhang Shan estimated that a rich player could only revive five times at most, and that was the same for Subjugator.

Unless it was absolutely necessary, he would not choose to resurrect on the spot for the sixth time.

Right now, Subjugator did not do anything. He fell to the ground twice and resurrected on the spot once.

If he chose to resurrect on the spot again, he would have to do it twice.

He didn't want to do that. If he used up two on-the-spot resurrections at once, it would be too much of a loss.

The key was that resurrecting on the spot might not be useful. He did not know if Zhang Shan was still guarding him.

If he resurrected on the spot and Zhang Shan fired a few more shots, that would be nonsense.

Therefore, even though the situation was critical, the domineering King didn't get up immediately.

Instead, he laid on the ground and observed the situation.

He didn't want to resurrect on the spot, so he just lay on the ground.

He was quickly discovered by the other Qin players.

quick, come and support him. The boss has fallen to the ground. Quickly pull the boss up.

f * ck, resurrect on the spot if you fall. Do you still need to wait for the support? "

” that’s right. i’ve resurrected on the spot twice already. why didn’t subjugator resurrect on the spot? ”

“Ignore him, let him lie down.”

Although there were many players from the state of Qin who made sarcastic remarks, there were more people who supported the domineering King.

Not long after Subjugator was discovered, a support quickly rushed up and revived him.

After Zhang Shan had knocked down Subjugator twice in a row, he noticed that he had not resurrected immediately.

Instead, he lay on the ground and waited.

Even so, Zhang Shan did not let go. Instead, he attacked the other Qin players while standing guard nearby.

when the support pulled subjugator up, he saw it very quickly. he immediately turned his gun and fired two shots at subjugator, knocking him down to the ground again.

The domineering King was speechless. This six-barreled Bodhisattva had his eyes on him and was not giving him any chance.

the surrounding qin players were shocked to find that the domineering king had fallen again.

Didn’t he just get revived by the support? Why did he fall after only a few seconds?

this shouldn’t be the case. the equipment of the domineering king was so strong, and he was so tanky. how could he fall so easily?

He didn’t have time to think about it as another support came forward and revived Subjugator.

however, the moment the tyrant king stood up, zhang shan’s bullet also flew over.

the big shot immediately fell to the ground again.

At this point, the other Qin players finally realized where the problem was. It turned out that Zhang Shan had his eyes on the domineering King.

No wonder he kept dying, and he couldn’t even stand up.

the six-headed Bodhisattva is over there. Let’s chase him away first.

“f * ck, no wonder the people here fell so quickly. it turns out that the b * tch six-pipe bodhisattva is here.”

“Let’s go together and chase him away.”

“There are people everywhere, where are we going to get up from?”

...

“Let’s charge together and block six-barreled Bodhisattva’s line of sight to resurrect boss.”

The scene on the platform was very chaotic. Millions of people from both sides were in a chaotic battle.

zhang shan was surrounded by the chu players. the qin players wanted to attack him.

They had to first clear out the Chu country players around Zhang Shan. However, it was obvious that they could not do it in such a short time.

Under Zhang Shan's intense firepower, it was already very good that they could save their own lives.

How could he still have the ability to push forward on Zhang Shan's side?

Since he could not rush up, he would chase Zhang Shan away.

In that case, they could only think of using their own bodies to block the bullets for the Overlord. After that, he would revive Subjugator.

A group of players from the state of Qin rushed forward and surrounded the place where the Subjugator had fallen.

Then, he prepared to resurrect him.

Seeing such a situation, of course Zhang Shan would not let them have their way.

...

He was going to fight with the domineering King today. This guy was not going anywhere today.

Just lie here obediently.

Just as the Qin players surrounded the place where Subjugator had fallen, Zhang Shan's bullet flew over.

One shot bounced 12 times, and the bullets kept shooting over, instantly knocking the Qin players to the ground.

Subjugator, who had just been revived, was killed by the bullet damage before he could even be hit by Zhang Shan.

This Big Shot had inexplicably died in the chaos.

Zhang Shan's battle around the domineering King was only a small part of the countless battles on the platform.

The entire platform was in chaos. There were even some players from the state of Qin who rushed to the side of the baize statue and hit it a few times.

However, when they saw the amount of blood the statue had, they were in despair. The amount of blood was too f * cking high.

The operator showed the scene of a player from the state of Qin looking at the baize statue's attributes after attacking it.

They made a collection of videos and quickly uploaded them to the game forum.

All the players soon found out about the attributes of the divine beast statue.

The divine beast statue's attributes were very simple. It only had One Health attribute and one deity position attribute.

However, these two attributes were extremely exaggerated.

[whizard statue (God-level): health points: 100 billion, deity position: When facing damage below God-level, the effect will be reduced by half.

100 billion HP, this was too scary.

One must know that Zhang Shan and the rest would need at least ten minutes to fight a boss with 100 million HP.

Was it possible for the current players to destroy a divine beast statue with 100 billion HP?
