

Passive Skills 72

Chapter 72 Exchanging cloaks

It would take at least half an hour for the others to arrive. It was a little boring, and there were no monsters nearby.

he couldn't just go to other places to farm monsters and come back later. he could only urge them to hurry up.

you guys run faster. The flowers are wilting.

how fast can I be? I don't even have a Mount. I feel like I'm running faster than I'm flying.

"Yeah, the wild wolf Hill is too far away."

"Brother six steward, if you're free, go and see if the boss is still there. Don't let the boss disappear after we've been running for half a day."

"that's impossible, right? I'll go take a look."

zhang shan once again entered the wild wolf slope map. seeing that the wolf king had left immediately, he did not bother to fight it.

"It's still here. I just went in to take a look."

"Brother artifact, he was just teasing you. Why would the BOSS run away? if it respawns, it will definitely be nearby, not a patrolling monster."

"F * ck, so there are bad people in the Guild."

Zhang Shan was a little depressed. Just now, he was really a little worried that the BOSS would run away. In such a big map, if it ran away, how would they find it?

"Hehe, brother divine weapon is still naive."

"Brother artifact, kill this bad guy with one shot later."

"Do you have to be so ruthless?"

since the wolf king would not run away, zhang shan did not go in to take a look again. he could only browse the forum and quietly wait for the others to arrive.

In less than half an hour, some of the people who were close to them arrived one after another.

"how does the wolf king look like? is there any difference between him and my little wild wolf? I'll go in and take a look."

the wind cloud cannon had been showing off ever since it tamed the pet. it had been two to three days and it had not stopped.

I'll go if I want to. Anyway, the wolf King can hit me for more than 9000 points. If I'm unlucky enough to encounter it and get a skill, I don't know what will happen.

“F * ck, is it really over 9000 damage? Then I’m not going, I’m a brittleskin and my Cape is green. I only have 5000 HP.”

after reaching level 20, the weakness of the low hp of the fragile professions was already very obvious.

Previously, with a good Cape, the health of a fragile class could even be more than that of a meat shield.

It was basically impossible. For example, the little Secretary had 40000 HP. Even without the cloak, he would only have 20000 to 30000 HP.

Zhang Shan had a purple cape and was of a higher level than him, but his health was still incomparable to that of a tank.

At present, almost all of the fragile professions had around 4000 to 5000 HP. As for the strength-type professions, as long as they had normal equipment, their HP could reach more than 8000.

Relatively speaking, brittleskin classes needed a good Cape more. For brittleskin classes, they needed to have the ability to survive so that they could deal damage.

Otherwise, if they were cut down by a warrior with charge, what damage would they deal?

Wind and cloud Cannon summoned his little wild wolf and said to Zhang Shan, ”

“Brother artifact, look at my little wild wolf. It has also reached level 20, and its attack power is higher than mine, hehe.”

f * ck, he’s not done showing off.

Zhang Shan didn’t want to bother with him. It was nothing strange for a pet to have higher attack than a character. Zhang Shan’s Panda baby was much higher than him.

However, a pet’s attack speed was frighteningly slow. It would be wishful thinking to rely on a pet to deal damage.

The wind and cloud Cannon kept on talking, and no one paid him any attention. Perhaps he felt bored, so not long after, he stopped talking.

Those who arrived first stayed quietly, waiting for the rest of their teammates to arrive.

Finally, Feng Yun realm arrived with the last batch of people. Including Zhang Shan, there were a total of 50 people. It was a neat big ball.

“Have you brought enough big red Medicine? The wolf King’s third skill requires you to take medicine to restore blood. The support can’t heal everyone.”

Feng Yun realm said to everyone.

if you don’t have enough, go ask someone else for some. Don’t just lie on the ground and play dead when the wolf King uses his skill.

Zhang Shan looked at his backpack. He had dozens of big red potions. His boots also increased his health recovery speed, so he should have enough.

Zhang Shan walked to the side of the little Secretary and exchanged the cloak with him.

The Secretary's Cape was also pretty good. It was a level 20 Blue cape that increased 8000 HP.

It was already considered to be of the highest quality. However, compared to Zhang Shan's purple priest Cape, the difference was obvious.

This was especially true for The Guardian class, who had the heart of The Guardian skill. If their equipment had an additional 10000 HP, it would be equivalent to their own having an additional 20000 HP.

Equipment that increased health was the most effective on Guardian Warriors.

after zhang shan and the secretary changed into their cloaks, feng yun realm said, "

"There's no problem, right? if there's no problem, then get ready to enter."

"Let's go in. We finally have a chance to fight a red BOSS in the wild. It's even a level 30 one, haha."

Speaking of which, we miscalculated. We didn't find a level 30 monster map today. Otherwise, we could have found other red bosses to fight.

you're thinking too much. You can't even beat a few level 30 monsters, and you want to search the entire map for a BOSS? I'm afraid you'll be killed by a group of monsters.

alright, get ready to go in. The Secretary will be the first to go in, and the second group of assistants will follow closely. The rest of you will follow up.

There was a pause when switching between scenes across the map, and if too many people entered at the same time, the pause would be more obvious.

...

That was why Feng Yun realm let his Secretary and support go in first. After they went in, they would hold on to Wolf King and the others would enter first.

The little Secretary's HP should be close to 60000 now, and with his high defense, the wolf King would need to attack him at least seven or eight times to kill him.

he could hold on until the support came in to heal him.

The Secretary was the first to enter the wild wolf slope, followed by the support. Zhang Shan and the rest also followed.

"F * ck, this boss is really a critical hit."

The wolf King's attacks on the little Secretary were all critical hits. There was no normal damage, and the critical hit rate seemed to be 100%."

" f * ck, did you guys notice? not only does the BOSS have a critical hit, but its attack speed is also much faster than the ones we've fought before. "

that's true. I hope the little Secretary can hold on. If the tower falls, we're all done for.

“Shut up and focus on your damage output. Even if you die, the tank won’t die. Are you looking down on our support’s healing ability?”

Windling was furious. She raised her hand and cast an enhanced rejuvenation spell, instantly filling up the little Secretary’s health bar.

Enhanced rejuvenation’s healing ability was terrifying, and this skill was related to the intelligence attribute of the support.

...

In theory, as long as the intelligence attribute of the support was high enough, the amount of HP added would not go online.

For example, if the support’s intelligence was 100, then the enhanced rejuvenation could add 1000 hp each time. If the intelligence was 1000, it could add 10000 HP.

In the later stages, everyone’s main attributes would be higher, and the healing effect would be stronger.

This skill appeared at the right time. The Guardian warrior’s HP was increasing, while rejuvenation could only heal a little over 1000 hp each time.

If they encountered a powerful boss, seven or eight support players would not be enough.
