

THE PRINCESS CONSORT HAS A LETHAL DESTINY

Chapter 1082 Problems with the Ancestral Grave

No one mentioned these old matters anymore, but the other families also knew that very few dared to marry into the Gu family.

It was said that the Gu family's sons and descendants could only be married to the people in their hometown in Kangchuan. The madams' family backgrounds were low, and they were all personally chosen by the old master of the Gu family. They were very virtuous.

After all, most of the sons and grandsons were b*stards. If the wife of the family did not marry well again, then the whole family would really be finished.

The first madam and the second madam were both very kind and intelligent people.

When they entered the Xie Resident, they were more or less worried. Especially when they thought that the male members of the family were all bandits, they could not help but feel anxious and fearful. However, these two people's expressions were normal. They even looked at Xie Qiao very close and their expressions were very natural.

Xie Qiao politely greeted them and was immediately held by the two of them.

"I took the liberty to come here today. Firstly, I want to acknowledge the family. From now on, we are all family. If there is anything that you need, please feel free to say it. Secondly, I want to express my gratitude," the first madam quickly added.

When Xie Qiao heard that, she roughly knew what was going on.

When she entered the palace last year, she saw that the empress used the wrong mala beads, so she reminded Zhao Xuanjing of that.

“It was our carelessness. We never thought that there would be a problem with the gift given to the Empress. I heard from the people that His Highness said that if it weren’t for your good eyesight and seeing the problem at a glance, the Empress’s health would have been destroyed!” The first madam said, she was also somewhat resentful.

“Since I saw it, there’s no reason not to say it. I didn’t do anything,” Xie Qiao said politely.

“What do you mean you didn’t do anything? To you, it’s just saying something, but to our Gu family, it’s the lives of our entire family!” The first madam quickly added.

If something really happened to the empress, what if the person behind her told the emperor that there was a problem with the mala beads? By then, would the Gu family still be able to survive?

Moreover, the empress was the Gu family’s biggest backer. If she fell, the Gu family’s future would also be completely ruined.

In the past, the Gu family had been glorious...

Now, they did not want to be as prosperous as they were in the past. They only wanted to have a place in the capital. The descendants of the family were of noble character. As long as nothing happened, everything would be fine.

“The most important thing is still the ancestral grave...” The second madam was afraid that the first madam had forgotten, so she quickly spoke up, “The person sent by His Highness said that there was a problem with the ancestral grave in Old Master Li’s family, which resulted in a lack of descendants. I’m afraid that there is something wrong with our Gu family’s ancestral grave as well, which is why we have

been repeatedly met with misfortune. After receiving the news, father invited several powerful masters to take a look. With one look, they really discovered something fishy.”

It was unknown who had watered the soil near the ancestral grave with blood!

There was even a place where a lot of cat carcasses had been buried. When the soil was removed, it really smelled fishy!

There were also many other problems that they did not understand. However, the masters said it would affect the fate of the future generations.

Thinking about how the children in the family had not made much progress in the past few years, they could not help but feel resentful in their hearts.

They really did not know who had harmed them so much behind their backs!

“It is already a blessing that we have found the reason. I heard that the Gu family has strict discipline now. Without these external influences, our children and grandchildren will definitely have great prospects in the future.” Xie Qiao was not very surprised when she heard the outcome.

The situation in the Gu family was a little strange. The possibility of problems in the ancestral grave was already the greatest.

If there were children in the family with strong Yang energy and good luck, they would not be affected. However, if they were ordinary people, their luck would definitely be damaged.

“Thank you for your good words.” The two madams looked at Xie Qiao and were really happy no matter how they looked at her.

It was just that their Gu family was currently weak and could not help the Crown Prince.

As the two madams spoke, they even took off the bracelet that they were wearing and forcefully gave it to her.
