

The Return of the God of War [The Protector] Chapter 3248

Only then did the Black Hawk agents realize that Levi Garrison's strength was unfathomable.

Just like the forces behind the War Eagle Nation, it ignores any era.

At any time, they are above the world.

"If you don't come to me, I will still find you!"

"There is a powerful existence behind your War Eagle Nation? It's the one I killed!"

Levi Garrison asked.

At this meeting, the Black Hawk agent nodded: "I also only found out not long ago that since the establishment of the War Eagle Kingdom, there is a behemoth behind it!"

Levi Garrison nodded: "Sure enough, the power behind you is very powerful, and the resources are not lost to me!"

"Yeah, the force behind us ignores everything, and they are superior in any era. The core technology of our Sky Shield and even the entire War Eagle Kingdom is provided by them. Therefore, our technology leads the world. so many!

Let's put it this way, after the aura was revived, gods from all over the world appeared one after another, putting all the technology in a useless place. However, the technology of the Eagle Kingdom can still compete with the gods, because I found that many of the devices of the Sky Shield Bureau are actually motivated by aura.

But I don't know much about it. My head of the game, Smith, should know. "

This is the same as what Levi Garrison guessed.

The sky-defying device that dealt with the Lord God Division back then made him look stupid.

It really needs to be motivated by spiritual energy, otherwise it would not have such power.

Hei Ying continued: "The most terrifying thing is that this force has always been in the territory of War Eagle Country, but I can't find it in every corner!"

"Can't find it at all?"

Levi Garrison said in surprise.

"Yeah, so I guess there is such a possibility! And it's probably the case."

Hearing what the Black Hawk agent said, Levi Garrison immediately asked, "What is the possibility?"

"There is nothing wrong with them in the War Eagle Nation, but we can't enter their territory! They should have their own small world!"

"They are so powerful that the devices given to the Sky Shield Bureau can change everything in the area, and even protect the entire War Eagle Nation from the aura storm.

Then it is also possible for their own place to become an independent world isolated from the rest of the world! "

Levi Garrison not only did not think it was not absurd, but was also correct when Black Hawk agents proposed this "small world" theory.

Mostly so.

In fact, this force is in the territory of War Eagle Nation, but they have used some devices or special methods to turn their area into an independent world, and others can't find it and can't get in.

In layman's terms, they use the device to change the nearby magnetic field, gravity and other factors.

Even if you find this place, you will get lost due to the changes of various elements such as the magnetic field, gravity field, etc. You wander around for a long time, but you are actually just standing there, and you can't find it at all.

Or directly change these factors, so that you walk around the edge of this "independent world", and you can't find this independent world at all, let alone enter it.

They have this kind of heaven-defying means, and it is too simple to hide the small world they are in.

It is easy to give you the illusion that you have passed through this area.

But in fact you are walking around the edge without touching this area at all.

You passed through from somewhere else.

Not conjecture.

But that's for sure.

It's too easy for them.

It's easy to make a "small world".

Levi Garrison thinks of Daxia's words, such as Zhenmo Division, such as Tianshifu.

There are supernatural beings here.

They made an area so that outsiders couldn't come and find it, it was simply too easy.

The small world sounds incredible to others, but to Levi Garrison who probably knows the principle, it is as simple as chopping melons and vegetables.

For example, Zhen Mosi, they have been looking for a long time.

Still no clues.

Reminder now.

The Return of the God of War [The Protector] Chapter 3249

There is a high probability that the Town Demon Division has its own independent small world, and other people just cannot approach or find this area.

Even if you enter it accidentally, you will be bypassed and you will not be able to find it at all.

"By the way, I also heard that they can unlock your daughter's poison! But they won't do it! Even if you beg them, it's useless! You don't have the conditions to impress them! You have it, they have it. You don't have it. Yes, they have more!"

Agent Blackhawk said.

Hearing this message, Levi Garrison looked calm.

This force is so terrifying, it is normal to be able to detoxify.

Fortunately, Levilia has solved half of the poison now.

Immediately open the secret lock, you can completely detoxify.

Otherwise, knowing this information, Levi Garrison will definitely go crazy.

He even contacted this force for his daughter and asked them to take action.

But now he is calm.

“Okay, I probably know it too!”

Levi Garrison smiled.

This made the Black Hawk agents different again, and Levi Garrison was still at the top level.

As for his secret, he didn't dare say it.

still the same.

This is likely to be his life-saving trump card, which can only be used at critical times.

I thought it would take a long time to find the murderer.

I didn't expect to find it as soon as I got out of the horse.

But Levi Garrison couldn't say it either, he could only delay for a while.

Now, what is causing Levi Garrison's headache is not the problem of Levilia's poisoning, but who is behind Yan Zangsheng?

Why target yourself?

Even Tiance Shenshuai was wondering about this.

Who is it?

He could not have imagined such a group of people.

It is necessary to strengthen Daxia and target Levi Garrison.

This is not reasonable.

Is it...

Tiance Shenshuai suddenly realized something.

Immediately broke out in a cold sweat.

But shouldn't it?

What kind of hatred can they have with Levi Garrison?

He can't think of it!

Young Marshal Tian Ce also looked puzzled, but seeing his father's appearance, he couldn't help but ask, "What did you think of?"

"Knowing the Baolong family, they have been guarding a secret, right?"

Tiance Shenshuai asked.

While Young Commander Tian Ce was shocked, he immediately nodded: "I know!"

"Each of their veins guards a part of this secret, and the combination of several veins is the complete secret. Could it be that this group of forces has something to do with this secret?"

Marshal Tian Ce looked at his father in surprise.

"Well, I can't think of others! It should be!"

Hear the affirmative statement from my father.

Young Marshal Tian Ce was even more puzzled: "Although I don't know what the secret is, it doesn't seem to have anything to do with Levi Garrison, right?"

"Yeah, that's the point of my doubts too!"

"I still have to investigate!"

The goddess Tiance said.

...

Levi Garrison naturally didn't think about who it was.

He is now only asking people to investigate the identity of the genius doctor Yan Zangsheng.

However, there is also good news from Ning Jinye – he is looking for someone who can unlock the secret lock.

I believe there will be news soon.

The probability of opening the sky lock is still very high.

Of course, Levi Garrison wouldn't put his hopes on the magic medicine.

He is still looking for other ways.

Even if Levilia has detoxified half of the poison, the quicker the detoxification is, the better.

Definitely don't delay!

But it is still difficult.

Bounties are useless at all.

No one dared to make a deal with Levi Garrison despite the blocking of multiple forces.

Whoever trades will die.

Who dares to do this?

However, there are also Hydra and other forces that cannot be deterred.

After all, their power is not enough to restrain everyone in the world.

For example, the second existence on the power list after War Bear Kingdom.

That is the Olympic Empire!

This is a country full of myths and legends.

In the age of technology in the past, this country had no sense of existence at all.

Perhaps the most familiar are the myths and legends.

But after the aura recovery came, this country once believed that this was the awakening of the gods in their myths and legends.

Instead of escaping, they accepted the baptism of Heavenly Commander Fuze.

Just like the War Bear Kingdom and the Apocalypse Empire.

All face the arrival of aura recovery.

As a result, by mistake, the gods appeared one by one.

So that the Olympic Empire became the second power list.

It is reported that the Olympic Empire has at least a thousand gods, a lot more than the third Apocalypse Empire.

But there are rumors that the Olympic Empire has thousands of gods, even tens of thousands of gods.
