

The Return of the God of War [The Protector] Chapter 4028 -

With Levi Garrison's support, Gongsun Yueying and Murong Qingxue instantly relaxed a lot.

The feeling that the power in the body was suppressed completely disappeared.

Seeing Levi Garrison's slightly thin back, Murong Qingxue felt an unprecedented peace of mind.

The three continued to move forward, and Levi Garrison found that this primitive jungle was extraordinarily strange.

From big beasts and spirit beasts to small birds, insects, mosquitoes and flies, everything is gone.

The entire jungle was dead silent, as if a dead zone made people panic.

Levi Garrison also tried to release power fluctuations to investigate, but no creatures appeared in the radius.

"It's like a restricted area of life here."

Murong Qingxue said suddenly.

Gongsun Yueying deeply agreed with this evaluation, and she was inexplicably flustered.

Especially when I recalled what the two hall masters once said about the strange situations in the Dragon Burial Valley, the speed of the spread of fear in my heart was even faster.

The three walked forward for more than 20 miles, except for the rugged rocks and dense vines, there was still no sign of any living beings.

"It's really weird!"

Levi Garrison frowned slightly, the range of rare creatures here is much larger than the secret realm found in the secular world.

Continue to move forward, and the road in the jungle will become more and more rugged, that is, Levi Garrison and others are very strong, otherwise the speed of moving forward will be very slow.

After walking for dozens of miles, Levi Garrison stopped abruptly.

“Sect Master, what happened?”

Murong Qingxue asked nervously.

Levi Garrison asked in a deep voice: “There is an extremely powerful energy gathered in the sky in the southeast, have you sensed it?”

Murong Qingxue shook her head, Gongsun Yueying said after a moment, “This energy is so terrifying, it should be the location of the Buried Dragon Valley.”

Levi Garrison glanced at Gongsun Yueying with admiration, this woman’s strength is indeed a level stronger than Murong Qingxue.

“Yeah, this power is very terrifying and violent. Except for the power of Tianlei, I really can’t guess any power that belongs to this category.”

Levi Garrison said with emotion.

Levi Garrison’s perception is very strong, and he can clearly feel that this power is much more terrifying than the energy contained in all the large dragon veins he has ever seen.

It is said that it is the power of lightning?

Thinking of Gong Qianqiu’s use of the Heavenly Thunder Tempering Body to improve his cultivation, he could try this method when he started?

Moreover, according to the information provided by Wei Shuyang, the power of Tianlei in Buried Dragon Valley is stronger than that of ordinary Tianlei, and the effect of body quenching is definitely better.

Thinking of this, Levi Garrison’s mouth couldn’t help but flash a smile.

“Sect Master, are you... okay?”

Murong Qingxue asked tentatively.

In the face of the huge unknown danger, even if the strength is extraordinary, it should be taken seriously, right?

Why is Levi Garrison still smiling?

Do you just look down on the power of Dragon Burial Valley?

Gongsun Yueying was also puzzled. If it wasn't for Levi Garrison, she would have long wanted to leave this place of right and wrong.

"I just plan to use the sky thunder formed in the Buried Dragon Valley to quench the body, and find some god bones by the way."

"It really kills two birds with one stone!"

The more Levi Garrison spoke, the more excited he became, and the more smile on his face.

Seeing that Levi Garrison gradually accelerated his pace, the two women were immediately stunned.

"Faced with a place like the Buried Dragon Valley, where the world can't avoid danger, he actually regarded it as a welfare bureau?"

Murong Qingxue was speechless.

In the face of the terrifying thunderbolt in the Buried Dragon Valley, even the suzerain-level powerhouses of large sects should be cautious.

Even retreating as much as possible, if it is not a last resort, they will not easily set foot in the area where the thunder is gathered.

It is very likely that the old Sect Master of the Xingyue Divine Sect died under the bombardment of the sky.

On the other hand, Levi Garrison actually planned to use the terrifying thunderbolt to quench his body. Isn't he afraid of being smashed into ashes?

The Return of the God of War [The Protector] Chapter 4029 -

"This guy is too bold, isn't he?"

Murong Qingxue could not help but secretly slander.

Especially when you are so far away, you can clearly feel the terrifying pressure. Can you imagine how terrifying the power of Tianlei must be after getting close?

Even if you have great strength, you don't need to take such a big risk, right?

Gongsun Yueying almost dropped her chin in shock, and was completely speechless about Levi Garrison's "wonderful idea".

She knew better than Murong Qingxue how terrifying the Dragon Burying Valley was. Even the absolute top of the Sun Moon Divine Fire Palace would not dare to set foot there easily.

It is said that the Sun Moon Divine Fire Temple also had several top powerhouses going to the Dragon Burial Valley in search of divine bones.

And he also deliberately chose not to enter the area during the time when the thunder was gathered, but he was still bombarded by the terrifying thunder of the thunder.

It came to a tragic ending of death and disappearance.

"Should I praise him for his courage, or should I scold him for not knowing whether to live or die?"

Gongsun Yueying looked at Levi Garrison's back with an indescribably complicated feeling.

"Even if Levi Garrison is a pure body cultivator, the thunderstorms gathered in the Dragon Burial Valley can definitely bombard him with powder."

"But at that time, I might be able to take the opportunity to escape!"

Gongsun Yueying even looked forward to arriving at the Buried Dragon Valley soon.

With Levi Garrison's character, even if he is not fully sure, he will try his best to win.

"Human arrogance has its own harvest, Levi Garrison, you will pay a heavy price for your arrogance."

Gongsun Yueying sneered in her heart.

Levi Garrison didn't know what the two women were thinking, but the speed of the march was getting faster and faster.

Clap! Clap!

After walking for another ten miles, the three suddenly heard the sound of something shattering.

Levi Garrison frowned slightly, and saw that the outermost layer of the energy shield he released was cracking outward from the middle part at a speed visible to the naked eye, and then completely shattered.

“It actually squeezed and smashed the outermost energy shield. It seems that we are almost approaching the Buried Dragon Valley.”

Levi Garrison said solemnly.

Fortunately, the energy shield released by Levi Garrison was thick enough.

But the outermost fragmentation also confirmed how terrifying the energy coercion here is.

Murong Qingxue and Gongsun Yueying suddenly became nervous.

It’s hard to imagine if Levi Garrison hadn’t released so many layers of energy shields, but it would be difficult to move forward on his own.

“Look at the sky here is different.”

There was a faint panic in Murong Qingxue’s voice.

Levi Garrison followed Murong Qingxue’s verdant jade, and saw the dark clouds in the sky that he had just entered this area.

It’s as if you can reach into the clouds with your hands up high, which makes people feel extra depressing.

The previous area was full of clear skies, and the skies on both sides were distinct, making people feel that these were two different worlds.

Boom!

In the depths of the incomparably thick clouds, deafening sounds of thunder could be heard from time to time.

It was still far away just now, and it exploded in the ear in the blink of an eye. If there is no energy shield to resist, I am afraid it will directly burst the eardrum.

“Both of you better use your own skills to defend yourself. I can feel a suspicious aura roaming inside.”

“And it doesn’t seem to be a fierce beast, but a powerful cultivator. The enemy is unknown, so we should be cautious.”

Levi Garrison said in a condensed voice.

Murong Qingxue and Gongsun Yueying nodded in succession, and at the same time they were quite surprised. It seemed that the Dragon Burial Valley was very attractive.

On second thought, it is understandable.

The Dragon Burial Valley contains countless god bones. Although Tianlei is very unfriendly to monks, it is worth fighting to the death for such treasures.

The three of them continued to move forward, and the feeling of depression became more and more obvious.

In particular, the energy shield released by Levi Garrison has more and more shattered layers, and in the end, even the middle part was squeezed and deformed.

“Look at those people, they seem to be bounty hunters.”

Murong Qingxue said suddenly.
