

The Return of the God of War [The Protector] Chapter 2299

I have to say that Li Dazhong has rich experience, every time he can avoid the monster group, or encounter very few monsters, everyone can handle it.

But others are not so lucky.

Even if there is a strong player in the ranks of the gods, they will always encounter a group of monsters.

At the beginning, it may be dozens, then hundreds, or even thousands.

Those who are strong in the gods list have to avoid their edge and dare not make a head-on shake.

They also have to avoid as many monster groups as possible, and hide as much as possible.

However, other people are not so lucky, if they encounter a group of monsters, after being entangled, they can't escape in time.

Then there is only death.

There will only be more and more mutants.

In the end, there may be thousands...it

is impossible to resist!

And the newcomers have also seen the terrible monsters.

Not to mention being wiped out, all kinds of attacks hit the monsters without any effect at all, let alone penetration.

Their bodies will generally skyrocket and become indestructible.

I don't know what Maya Industry's medicine is, but it has such a miraculous effect.

The monsters in almost the entire town were in action.

Experienced people fell one by one...

Time also passed by one minute and one second.

It's an hour.

The west gate opened... After

the newcomers who came in got the news, they ran to the west gate immediately.

But they were followed by a large number of monsters, chasing after them.

"These idiots! Brought too much! Closed!"

Outside Sanxing Group immediately closed the west gate.

In the end only two people escaped.

No one else escaped.

Most of the people ran away, and a few were surrounded by monsters.

...

Levi Garrison wanted to see what these mutants had been injected, but Li Dazhong had too much experience.

Every time he could avoid the monster, Levi Garrison couldn't observe it.

Can only continue to walk with them.

time flies.

The strong are all practicing.

More and more people fell.

Two hours.

Seven people escaped.

...

Others either don't go out and continue to practice, or they just don't have the ability to escape.

In the laboratory of Sanxing Group, they analyzed some data.

"After the variants of the experimental product that just went in the container, it is really powerful! Even the strongest of the gods is difficult to parry!"

"Look at the data! The four strongest of the gods are very difficult to deal with! Except for Li Dazhong, no one else is good!"

"So the difficulty they face now is even higher! The current seven hours may be even more terrifying than the past eight hours!"

... the

experimental product is getting stronger and stronger.

Everyone is mixed.

The worry is that they can't control these mutants yet.

"What the hell is this Maya industry going to do? If this goes on, I am afraid that it will test out a group of undead strong people. Who can stop it?"

"Yes, the problem that should be solved now should not be how to think about control. Are these mutants? We have been working on this project!"

Maya Industry seems to have no idea in this regard! They are still increasing the potion, and the mutants they experimented with are getting stronger and more violent!

This is to create the most violent brain and the strongest physique! “

...

These experimenters began to guess that Maya Industry's experiments were not so simple.

“Do you think Maya Industry has long been in control of how to control these mutants?” Just didn't tell us? “

Well, it's possible!” “

...At

this moment, the senior management came, and everyone stopped talking.

The time came to three hours in a blink of an eye.

That is the longest time that the senior management of Sanxing Group promised Li Chengmin to hold on.

As long as she survived, let it go. Passed her.

Li Chengmin in the metal fortress was excited and frightened.

Three hours finally arrived.

This time, the gate to the north was opened.

Li Chengmin drank the medicine given by his parents, and rushed to the gate with enthusiasm.
