

The Return of the God of War [The Protector] Chapter 2667

This is what he didn't think of anyway.

Understood!

Levi Garrison thought of the few pure energy bodies he had pursued from Forbidden Area No. 76 before.

All the way to Daxia.

He thought it was those people who discovered him and deliberately led him to Daxia.

After arriving in Daxia, he left in several directions.

Finally, I pursued a person who arrived in the capital and disappeared...

Thinking about it now, no one found him at that time, and they weren't deliberately leading him away.

They go back to Daxia purely where they are going.

As for why they have to be separated after arriving in Daxia.

That's because there is more than one base, scattered everywhere.

Beijing is one of them.

Figured out!

It's really amazing!

The laboratory of the gods after disappearing turned out to be in Daxia.

Who can think of this?

Levi Garrison couldn't help but admire again and again.

"What do I need to do next? Lead them out and catch them all in one go?"

Agent Black Hawk asked.

Levi Garrison shook his head: "No need for now! You pretend that nothing happened! Continue to keep in touch with the Lab of the Gods! I will say when I need you!"

I don't know how powerful the Gods Lab is now.

If you act rashly, there may be crises.

With the cards in his hand, except for himself, no one can be sure whether it can fight against the Lab of the Gods.

It is best to destroy the Lab of the Gods by yourself.

If it can't be destroyed, what should I do?

Levi Garrison wants to make sure nothing goes wrong.

Next, you need to continue to cultivate and continue to strengthen your strength and hole cards.

In order to fight against the laboratory of the gods.

On the one hand, we must slowly understand the laboratories of the gods and know what level they are now.

What conspiracies are they doing and so on.

Only by knowing yourself and the enemy can you survive a hundred battles.

To deal with a weak enemy, one punch, but an enemy with uncertain strength, Levi Garrison would never fight an unprepared battle.

Levi Garrison suddenly looked at Black Hawk: "Of course you can also? Tell the Lab of the Gods about me..."

The Black Hawk agent shook his head: "I'm not stupid! I just want to live! Tell them, then I really will die. If you are chased by both of you, we must die!"

Agent Black Hawk is a smart man.

After weighing the pros and cons, it is natural to choose to compromise with Levi Garrison.

“Just be afraid of death, just be afraid that you are not afraid of death! Then my business will be difficult!”
