

The Return of the God of War [The Protector] Chapter 2671

Before, Levi Garrison had been entangled in how to make people a peerless powerhouse!

But none of them will work!

They don't have power absorption** to absorb power.

Levi Garrison also couldn't inject crystal energy into their bodies.

It's okay if you can bear it, but if you can't bear it, it will explode one by one.

He can't experiment with people.

No one!

He dare not go even if Tiance is handsome and so on!

But Levi Garrison just changed his mind, not necessarily the super strong must be human!

Can start in other ways.

For example, machinery can even be carried out on the living dead, a variant of Maya Industry.

There are a lot of them and they can be used for experiments.

And once you become a super strong, you can control it.

Not as complicated as people.

I also have my own ideas.

After thinking of this.

Levi Garrison immediately came to the mysterious base of Maya Industry.

“Calling all the variants of the living dead, I have an urgent need!”

Levi Garrison gave an order.

All variants of the living dead are arranged.

A full 300,000 variants of the living dead.

The quantity scared Levi Garrison.

It can be seen how frantic the Maya Industry was before...

Under the special training of Maya Industry, this group of living dead has mastered offensive skills and has super combat effectiveness.

This is a terrible force that cannot be ignored.

But it didn't work for Levi Garrison.

The Lab of the Gods had known this kind of existence for a long time, and there was no threat to them.

Moreover, the original experimental plan to create the living dead belongs to the laboratory of the gods.

Their plan was to use it on super-sized creatures, but it was only used by Maya Industry on humans.

But now to Levi Garrison, nothing matters anymore.

He didn't think of what he was going to do in the laboratory of the gods.

In the next few days, Levi Garrison personally checked the physique and other various conditions of each mutant living dead.

In the end, three hundred and sixty-five qualified ones were selected.

Next, Levi Garrison started planning directly.

Combine the crystal energy and the various energies of Forbidden Land No. 76, including the golden blood of the gods and so on.

Inject them a little bit into the bodies of these mutant living dead to see how they endure.

Then phase out and pick out the best.

In the blink of an eye, seven days passed.
