

The Return of the God of War [The Protector] Chapter 2681

As for the positioning of Variant One and King Kong One.

Levi Garrison packed them into the “gods” of Forbidden Land No. 76.

Even the appearance is very similar.

Originally, what they injected into their bodies was the energy left behind by the gods, and the various resources and materials used were all from the No. 76 Forbidden Land.

In particular, the material of the four great diamonds is made of metal materials used by the group of “gods”.

Therefore, it is logical for the god to be packaged as Forbidden Land No. 76.

Levi Garrison wanted to use this to confuse the laboratory of the gods and divert their attention.

Focus everything on the forbidden area No. 76.

Coincidentally, it happened to be the God of Forbidden Land No. 76 because of the Gods Experiment.

Otherwise, it is impossible to explain why they disappeared collectively.

This is what Levi Garrison thought of.

It happened to be right.

Everyone looked over.

When I saw the faces of the two deputy deans...

Everyone was taken aback.

They are very puzzled.

“Huh? It always feels a bit wrong?”

“The two vice yards seem to be different from ours, but I can’t tell you the details...”

“Well, it’s different from the East and West...”

...

Everyone has such doubts.

It must be different.

Levi Garrison was built in accordance with the god of Forbidden Land No. 76.

Therefore, everyone will be very confused when they see it.

Even if you can’t see clearly, it’s just a rough idea.

But the outlines are different.

“Next we will guide one by one! Come to us if you hear the name!”

Of course, Levi Garrison would not arrange for everyone to guide together.

To be guided one by one.

Of course it is to target the spies.

Levi Garrison's first choice was Shura God of War, he was the most suitable Ye Zhantian technique.

This person hit Levi Garrison with a heavy punch.

Facing the dark god, only promise.

However, Levi Garrison gave him all his strength to make him reach the realm of Ye Zhantian as quickly as possible.

...

Next, Levi Garrison, King Kong One, and Variety One each select students.

Guide one by one.

There are seven spies in total.

Levi Garrison chose a spy—Jiang Sisen.

The other six spies were all selected by the other two.

Levi Garrison sincerely wanted to leave them a clue.

Naturally, I won't choose too many to come to my side.

For the time being, I still can't give too many clues.

After Jiang Sisen arrived, he knocked on the sidelines, always looking for more clues.

Levi Garrison let him find it.

Anyway, his purpose is not here.

What makes Levi Garrison more gratified is that these seedlings can create a reserve team of quasi-strong players.

Especially after the special guidance, I was even more gratified.

This group of seedlings are very savvy.
