

The Return of the God of War [The Protector] Chapter 2693

Obviously, the Dark Doctor's ability made the laboratories of the gods and even the main brain organization, the main divine division, feel scared.

The strongest ordinary person in the Lab of the Gods!

"Remember the blood ancestors that were dug up?"

Mr. X turned around and said.

The clown nodded: "I know, I dug it out myself!"

"What's wrong? Has something happened to the blood ancestor?"

Everyone looked at Mr. X in confusion.

The clown is the most curious.

They dug up the blood ancestors.

It's just that the blood ancestor opened up a new era, causing chaos everywhere.

Other than that, it seems to be of no use.

The presence is not great.

They haven't paid much attention to it.

Now why did Mr. X suddenly mention the blood ancestor?

"Actually, it was Doctor Dark's idea to dig out the bleeding ancestor!"

Mr. X's words made everyone breathe.

Doctor Dark?

Doesn't it mean that Doctor Dark is studying the blood race?

Dark doctor's style, when you see a strange race, you will be caught for anatomy and research.

None of them will be let go.

Now it seems that the blood race has suffered...

When encountering the dark doctor, he can only be caught with his hands.

"Yes, that's wrong! In fact, these blood ancestors were dug up, on the one hand, it is to create chaos and open up a new era. The most important aspect is that Doctor Dark wants to experiment with this race!"

"You don't know much! In addition to the blood ancestors of these later generations, he has also captured the blood ancestors of the earlier generations! He has conducted long-term research on the blood of this race and other secrets!"

Listening to what Mr. X said, everyone was amazed.

“Wrong! The blood race has too many secrets! If you study it clearly, it may not be much worse than the group of gods in Forbidden Land No. 76!”

“Yes, it would be unimaginable to master the secrets of the blood clan for us to use!”

...

Seeing everyone discussing, Mr. X couldn't help but smile.

“He Zhixue clan, and several powerful races have also been studied by him. It is said that these races have been thoroughly studied by him now!”

“The most terrifying thing is the results that Doctor Dark will research, that is, the secret traits of these races, which will be used in our planned experiments!”

“It's his master plan-the super race plan, including the creation of super humans, super creatures, etc.!”

Hear the words.

Everyone was shaking.

“Such a fast speed has been studied clearly? Can it be used in the new plan? Don't those Big Macs have to be more powerful?”

“Think about it, the trait of the blood race is used on the Big Mac. Isn't that a sweep?”

Everyone is shocked.

“Listen to Doctor Dark, there should be no weakness at the moment! Maybe it’s too big to be the only weakness!”

At first it sounds a bit funny.

Being too big, how could it be a weakness?

But it is indeed a weakness.

If someone predicts in advance and builds huge tall buildings, they can keep these giants out.

Due to their size limitations, they can’t get over much taller than themselves.

The Dark Doctor can’t avoid this.
