

## The Return of the God of War [The Protector] Chapter 2813

Not to mention that his physique has reached the point where it is against the sky, even if the diamond is not bad, it can be blocked.

Isn't the main priest here? ? ?

Levi Garrison also heard about the several bases of the Gods Laboratory in other places in Daxia.

The capital of the capital does not exist, so the other bases will not exist.

Where are they?

This was the point that made Levi Garrison jealous.

In his plan, he was used to deal with the chief priest.

The main divine division can't come out, he is determined not to reveal his strength.

Now that he lost the clue of the main gods once again, Levi Garrison was very depressed.

The fear has to continue!

The ruthless man who wanted to talk for a while—the Dark Doctor didn't even come across it.

Where are they all?

However, the headquarters of the Lab of the Gods have been evacuated, and they will definitely make big moves.

Got to keep up.

At this time, the variants on the 13th all expired, and all the four King Kong have arrived.

Levi Garrison led them to set off together.

No one would have thought that these mutants and mechanical talents were Levi Garrison's biggest killer move.

Look at the frontline battlefield again.

The main battlefield.

Leviathan was attacked completely but the momentum could not be reversed.

Da Xia, together with the reinforcements, slashed their bodies as much as possible to destroy the core.

However, after the Leviathans received the order to retreat, all the Leviathans actually retreated.

They retreated too fast.

Let the strong people of the Bible organization not react.

“Press it up! Hurry up!”

...

Xiao Liejun and Jiang Ye immediately gave the order, and they all pressed on.

Underworld God and they rushed out first.

Keep staring at the Leviathans to see where they are going to retreat.

This scourge must be eliminated.

Resolutely cannot keep.

at the same time.

On various battle lines in Daxia, the Leviathans who were suppressed by Daxia and the World Support Coalition began to retreat collectively.

Everyone has the same idea.

Resolutely eliminate all Leviathan.

Resolutely cannot let go of any one.

So it all came up.

Soon, Daxia regained all the lost territory.

This greatly boosted Daxia's morale!

After chasing Leviathan all the way, he came to the coastline of Daxia.

The Leviathans at this moment have all entered the sea.

I don't know what they are going to do...

At this time, three thousand Leviathans had already gathered in the designated waters of the East China Sea.

After receiving a new round of instructions, they began to move.

"Buzzing..."

Amidst waves of energy fluctuations.

The wounds on these Leviathans are healing quickly.

The knocked-out head, legs and other parts also grew out magically.

Kung fu in the blink of an eye.

All three thousand Leviathans returned to normal.

This is something that no one thought of.

Leviathan can recover instantly.

This is the power of Doctor Darkness, which was taken into consideration when Leviathan was built.

Therefore, all aspects of materials and genetic technology used to make up for this defect.

As long as the energy core can continuously supply energy, this group of Leviathans can recover immediately.

not only.

This group of Leviathans can supply each other and recover each other.

Originally on the front battlefield, they can be restored.
