

The Return of the God of War [The Protector] Chapter 2877

And can't hurt the other party the slightest!

"Fight back while retreating!"

"Let the rear meet us and escape!"

The Titan God of War personally commanded and attacked the five giant spaceships behind.

All within range.

Various weapons take turns in battle.

But it does not cause substantial damage to the giant spaceship!

I don't know what material it is, the weapons are pouring on the surface of the spacecraft, like a punch on cotton.

The aircraft carrier where the Titan Ares was evacuated quickly.

The surrounding frigates have been covering, in order to make them evacuate.

If the coach is destroyed at the beginning of this battle, how can we fight in the future?

Must desperately cover the evacuation of the Titans.

A frigate was smashed.

The Titans and the God of War looked in their eyes, each of them had their eyes open and they were about to cry.

But there is no way!

I can only watch my guards die one by one!

Reckless!

Everything is too reckless!

The Titan God of War knew that he had to take the main responsibility for this matter!

The few lieutenants who offered to take the initiative to attack also lowered their heads and said nothing.

Because of their cleverness, they paid such a heavy price!

They are all to blame!

Under the cover of the cost of death by all parties, they soon encountered the supporting team.

The Titans and War Gods finally got out of danger and temporarily came to the battlefield.

At this moment, the coalition forces in the entire position already knew the situation ahead.

Everyone looks numb and loses energy...Obviously, so many people, weapons and equipment were dispatched at once.

They all disappeared.

Was beaten instantly.

How powerful is the kingdom of God?

Moreover, when the parties stationed in the position saw the Titan God of War and a group of lieutenants, they were all trembling.

Some people even pee their pants in fright.

These commanders didn't even say a word.

See these.

Everyone understands.

The more so, it just shows how dangerous the front is.

Although everyone in the rear position hadn't seen it with their own eyes.

Seeing all this, I understand.

More serious than they thought!

“Think about it now that Junshi Ye is not afraid. He said earlier that the Lab of the Gods is super powerful, much stronger than we thought! Let us avoid as we can, and try to harass! Don’t attack directly!”

“It seems that what he said is right! His retreat and harassment plan is also based on this! He knows the power of the Lab of the Gods better than we do!”

“He is just thinking of a way to be more sure! If he is sure, can he not fight?”

...

Only then did a group of people realize how powerful Levi Garrison was.

It seems to retreat, but it is actually protecting everyone from sacrifice.

“If Levi Garrison is given time, maybe he can think of a good way!”

Many people began to miss Levi Garrison.

Only after hearing that Levi Garrison had devised several combat plans, he left.

I don’t know where it went.

Why are they not like the Titans?

It's really wrong to blame Levi Garrison for coming!

Even after Levi Garrison was demoted to a military division, he deliberately discouraged them, not to confront them head-on! Don't go head-to-head, you will die miserably!

Everyone didn't take Levi Garrison's advice on the spot.
