

The Return of the God of War [The Protector] Chapter 2878

Only now did they understand to underestimate the enemy.

Even if the coalition forces put out such a big battle.

The Kingdom of God is still powerful and invincible!

Many weapons and equipment have never been seen before!

You can't be brave!

Go up all dead.

What's the use of being brave?

Just the red beam coming, who can stop it?

Isn't it all going to die?

You think all the coalition forces are strong, but they are even stronger.

Underestimate the enemy!

Still not listening to Levi Garrison's dissuasion!

“You have to cheer up, otherwise what will all the soldiers in the rear think if you see this look of yours?”

“And the enemy is coming right away! As commanders, you must start to command!”

The evil gods who were left here by Levi Garrison began to persuade them.

Soon, the Titan War God reacted immediately.

“Everyone is working hard! A fierce battle is coming! I won’t lie to you! The enemy is very powerful, even stronger than we thought!”

“Many of us will sacrifice! Even the entire army will be wiped out, and no one will be able to go out!”

“But behind us, is the land we guard, where are our family, love, and friends! We must fight this battle! We will win with all our best!”

...

The Titan God of War still has the temperament of a leader and commander.

A few words infected the audience.

All the soldiers walked out of the haze, and started yelling one by one.

Fear that fear is already there.

Only the determination to fight to the death!

“However, we have to change our plan too! We can’t go head-to-head, their weapons are too powerful. We can’t sacrifice in vain! We have to find a way!”

“Fortunately, the military divisions of our think tank have prepared four combat plans in advance! This situation is also predicted!”

“Then all parties began to follow my instructions and act!”

The Titan War God ordered.

In fact, these four sets of plans did not take them seriously at the beginning.

After all, the Titan God of War is known for his toughness, and his battle must be a head-to-head confrontation!

These four methods are equivalent to being abandoned...But now these four abandoned plans have been picked up by him, and they have become life-saving magic weapons.

Not to mention that the implementation of these four plans will win.

But they won’t lose so fast, they have time to continue to deploy and find the direction to win.

“Understand! We will execute it immediately!”

Soon, the Titan God of War came up with Levi Garrison’s first plan.

Sure enough, he had anticipated what the enemy would do if he had such an indestructible weapon?

What if they use this invincible weapon to crush it all the way?

Isn't this problem exactly the same as the one you just encountered?

Is the kingdom of God now swept and crushed everything with the beam weapons of five giant spaceships?

How can this be done?

The Titan War God and a group of lieutenants couldn't think of any way.

I was scared to pee my pants just now.

Faced with this situation at a loss!

But Levi Garrison's first plan has the answer.

He thought about this issue early on.

Incidentally, if the Lab of the Gods still attacked by a giant like Leviathan, how should we deal with it?

Naturally, it will not be a fight with a real sword.

That way, there are not enough people.
