

# The Return of the God of War [The Protector] Chapter 2881

After clearing the obstacles, the flying giant ship moved on.

Facing the narrow strait ahead.

Flying giant ships still go hand in hand!

Did not line up one by one.

...

Seeing the giant flying ship press up.

Everyone awoke from the brief excitement.

“What to do? They are here! Although the fake position has consumed a wave! But it is not enough to consume all!”

Everyone is waiting for follow-up. The Titan God of War is calm: “Continue to implement the plan!!!”

“emission!!!”

He gave an order, and suddenly tens of thousands of cannons fired from the endless mountains on both sides of the strait.

The hundreds of thousands of weapons placed here were launched at the same time...

A terrible attack on the mountains on both sides! ! !

Fortunately, the coalition forces are strong, with a lot of materials and equipment, so they can arrange everything.

Can rest assured to splurge boldly!

“Boom boom boom...”

The firepower this time is obviously ten times stronger than the offensive of the coalition forces just now!

“哐啷!”

The flying giant ship is not invincible, it can only be said that the firepower can be blocked.

But there are some secret weapons that can be hurt by attacking fortified weapons.

Cause no small damage to the flying giant ship!

Even some are substantial damage!

This annoys the Lab of the Gods!

They are the kingdom of God!

All are gods!

These ordinary humans can actually hurt them!

This is a great shame!

“Mr. X, the group of monkeys relying on the advantage of the terrain to bombard us indiscriminately! Both the Star No. 1 and No. 5 have been damaged!”

“Moreover, the entrance to the strait is limited, so it is impossible for the five Stars to pass through together! What do you think we do now?”

At this time, the five captains of the Stars successively asked what to do.

Mr. X looked at the terrain of the mountains ahead, and he sneered: “Since they have a geographical advantage! Then we will blow them up!”

“Um?”

Everyone was taken aback.

I don't understand what Mr. X means.

“What I mean is very simple! Raze the mountains on both sides of the front directly to the ground! Push all the front flat! The Star does not need to fly over, I want to watch the five Stars go hand in hand and smash them directly!”

After hearing what Mr. X said, everyone gasped.

This posture is to directly flatten the mountains on both sides of the front, to the ground! ! !

Looking at the endless, towering mountains on both sides of the front.

Even the gods in the laboratory of the gods couldn't help but swallow!

This is too shocking!

The mountains on both sides have been razed to the ground. How much effort would it take?

So simple and rude?

Level the mountains on both sides directly?

Everyone can't even think about it!

But this is an order!

Can only be executed!

“Command-level the mountains ahead! Raze to the ground!”

After this order came out.

“Buzzing...”

Five huge flying ships gather energy.

“Boom!”

“Boom!”

“Boom!”

...

One hundred thousand weapon launch ports ejected red light beams, aiming at the mountains on both sides for destruction.

The scene is simply terrible! ! !

“f\*cked! They are fooled again!”

Cheers in the coalition command room.

The weapons placed in the mountains on both sides are fully automatic and unmanned, and no one exists.

This is also one of Levi Garrison's plans.

When encountering such invincible attack weapons, they can only attract firepower to the mountains on both sides.

Enraged them and vented the fire on the mountains on both sides.

Levi Garrison knew very well the arrogance of the Lab of the Gods and knew that they would definitely attack the mountains.

It will flatten the mountains on both sides!

So this plan was also successful...
