

The Return of the God of War [The Protector] Chapter 2954

A direction is selected.

Levi Garrison opened his way directly to show off his supernatural power.

While they were closing, the three of Levi Garrison had already rushed out.

Just about to catch up, a great force struck.

Drive everyone back.

It even caused a lot of casualties.

When chasing again, all the people were gone.

As long as there is a gap, with the strength of Levi Garrison and Doctor Dark, where can they catch up?

“What’s the situation? People? Is that the Dark Doctor?”

Others quickly caught up.

“It should be! We saw their true colors just now! They are exactly the same as Dr. Peyton! Two other people are...” “Look, this is the picture just captured!”

One of them took out his equipment.

Although they are ancient organizations.

Does it mean that they don't know how to use modern equipment.

Everyone got together,

Start to view the captured frame.

Suddenly they were surprised to find that they knew one of the other two.

"Isn't this Daxia's word side by side with Wang Levi Garrison?"

Someone was surprised.

One of their next tasks is to catch Levi Garrison's daughter Levilia.

How can they not know each other?

"He turned out to be the one who took Doctor Dark! Unbelievable!"

"Well, we don't have to chase it anymore. Now that we know where the Dark Doctor is going, it's easy!
Get out!"

"What we just said should have disturbed the War Eagle Nation, and the Sky Shield will be here soon!"

...

This ancient organization left soon.

Almost two or three minutes.

Agents of the Tiandeng Bureau and mechanical agents came to the New Jincheng General Hospital one after another.

Five minutes later.

They are all here, Agent Black Hawk.

“what happened?”

Agent Black Hawk asked.

“There was an abnormality here just now, there are many strong people gathered, it seems that there is still a battle...”

The people immediately told what had happened.

“Search! Search this hospital thoroughly first!”

The Black Hawk agent gave an order and immediately searched the area by digging three feet.

I have to say that Doctor Dark is hiding too deeply.

Just know that there is a problem with this hospital, so you can let it go.

It took a full three hours to find out.

“In the morgue!”

Agent Black Hawk led a large number of people to the morgue.

But the door was found, but it was difficult to open.

Dozens of mechanical agents were cutting the door.

It took a while before the door was opened.

After coming to the private world of Doctor Dark.

Everyone was amazed.

Various biological specimens from ancient times to the present, various seeds from ancient times, various races...

It can be said that the private domain of Doctor Darkness is much richer than the sum of all the museums of other countries.

Incredible!

“Move everything away intact! Please handle with care and never destroy a little bit!”

Agent Black Hawk ordered.

This is a good thing.

Nothing can be wasted.

“It seems that this is Doctor Dark’s lair, it seems that he has already left!”

Coming out of the other passage, the Black Hawk agent said.
